> What is the necessary connection of the quality, whatever it may be, which makes one a medium for physical manifestacases, and that which combies a man to tell the leath and refram come us a ug pockets? So far as I have laid an opportunity of potents. I should my that physical medians were about equal as to morals to the average lawyer, elector, or preachercortainly quite equal to the average shopkeeper in "othicountermil ou doubacholide.

#### REVIEWS

theorems of Bings and Death as a Change in the Form of PERCEPTION , OR, THE TWOFOLD NATURE OF MAN

In the contents page of the above work, as published in No. 221 of "Liour," March 28th, the entireson of the accordary title funds to misloud your resilers with regard to the scope of the book. I think a few gluoness into the interesting train of home to which in heal down in this work by this great philosopher may not be unwelcome to the readon of "Laure."

The author starts with the supposition that a kuman being (Mensellishs Erachemency) point have nome kind of transcent ent d same as this noncontrily overcon itself as well through are record . now en that are a remove ) as through brokered development, even as all great thinkers have accepted such a basis, however much they differed regarding its nature. of money is such a transcondental basis does exist, then earthly Is sure sly be a transport condition of this ownering gente at the long jest to aught which with any death concerns to a solven only into a change of our form of perception, hones, special comments of the section of the contract of the contrac

Note the author arross at follows. All development in nature shows transition states, imperfections, and exceptions, it is, therefore, inconcessable that in the laws of experiences there should not occur eases where the nectaphysical basis in certain pursons and its cortain cases should not clearly show steel! The author appeals them to experience which perfectly justifies his starting point and his argument. With this

The whole book is divided into four parts, which trust of the following questions .-

- t. The mandestation of the transcendental beins.
- 2. The severance (Die Spollung) of the human form.
- 3. The three hypotheses in explanation of the phenomena.
- 4. The solution of the problem.

With regard to the first part, experience tells us that, in fact, people do abow in droams or its the somnambulic state, and but account for, and Dr Roorke, who followed but, and also by visions, another supermenous power of perception, which partition the supposition that there is in man a conscious Equ. aprend movement known as Spiritualism or Spiritism. There Buy as it is not prevently dust such an existing transcendental bases had been, as doubt, a great deal of found in connection with a . The and revenienced only through perceptions, and not also through but at the same blue it would be nareamounted to pock-pook the actions or offices, he again asks of experience, which proves that is most clearly ovidenced by autgnotiness when acting at a

May 25, 1885.]

Now the author argues If the magic force of the will of a person at a distance positiones this power, should not some average amongst as have it? Experience, if asked, confirms the fact that some persons, through unormations writing or speaking, do act under the influence of an intell gent power

The existence of a transcendental basis in mania, therefore, confirmed by experience, and not verify the proper to put forward by the author explains in the suppless manner al. kinds of mysteen phenomens.

In the second part the author sets forth the proposition that as the transcondenial basis perceives and acts, it, therefore, inust be organised, and that, consequently, beneath the human organism composed of living colls, another a mota-organismmust exist. He asks la thus confirmed by experience! and experience again answers you fa somnambulists, Hindoo Fakus and Mahatmas this (mota) organism not only sometimes stops out he the purpose of becoming visible to others at i distance, but human forms are also materialised at sources. Douth 14, therefore, nothing olse that a perfect severance

In spiritual esances partial forms and imporfect severance also occur, and under apparent severance theauthor understands that which the Americans call transfiguration, which expression he rejects, because the difference between materialization and transfiguration only consists in the greater or lemer preximity of the phantous to the medium.

In the third part the author shows that neither fraud nor psychie force, nor the intervention of a marit-world, can explain the whole field of the phonomena, but that mak of the three hypotheses is justifiable in different cases.

Regarding the fourth part, an extract in impossible, bename in it there is not a word too much or too little the reader want read in the original the striking argument by which, upon the principle that birth and death are really only a change in the form of perception, all myster manifestations find their natural explanation. Only one thing I will point out, that is the definition of a Pakir. A Fakir according to Helicuback, is a man who through natural tendency, in knew, religious ter s -s. or cultivation of his absurant pascers, or intest and thouse of his regence disposition has arrived at a partial, but cortainly imperfect, use of those metaphysical (transcendental) capacities which are within him and every other busine being. and who can, therefore, do things which his outside of those natural laws which are known to us

The reader will admit that this book, by its deductive form, differs from all spiritual works. Those disclose to us experiences; nonstitues also perclations, and theories Hollenback proceeds the opposite way-he quotes specific phenomena only as experimental data for his philosophy through which the latter finds its triumphant conjunction whilst on the other hand a natural and connected explanation is furnished for the phenomena so often disputed.

Le Louisve, Paris, reports a somes with Madamo Bablin Among the phenomena was boaring rapid writing at the lable then a sheet of parer was taid on the hand of Madamo Counge (es ter of Lo Laur et at had on it three communications characteratic of the negatived indeeducts a rose sig a neefollower ben. Heapen spirits manifested themselves, the possitivances visible, by uglp sugmitting from their hands , some of these spirits and promised at a scance elsewhere thus to man feat themse yes. The center of La Long. remarks "If you relate such phenomena to thear who deny upst our existence, they tell you that you are the victim of hallocination, or of some contraring trackery if to others of the elemen strong they conferate that such appearances must be phantons caused by devol's magic

Wall, both materialists and elements have much to leave Such manifestations are becoming more known to private circles, in various quarters remote from each other in fact confounding to secunds, and we have new forward to such med onto an Madame Babi is noon occupy on their proper rank or the esti-mation of the honost airs maidst. We shall expect he won-"Charlatament to be less constantly in the mouths of Spiritualities." -mong whom, for some one past, a charlature estical illusion somes to have epidemically prevailed. The greatest charlatane are not those who have botto the stigms of that mane We repose that Madame Bublin new declines receiving at her prayers all whom and is not assured are narrost investiga-

#### THE BERMETIC SOCIETY.

At the meeting of this society, on the 13th inst., the president, Dr. Anna Kingsford, read a paper cutable "The Misthed of the Mystics," of which the following is a brief SOMETH !-

The solution of the religious problem offered by the method of the mystics appears to be that which is destined to triumph in the present age. This is no new mothed, but one that less been in the world, obscuraby and secretly, from the very dawn of religious thought, having its representatives and exponents in the succent systems of both East and West, Buddle at Alexandrian, and Christian. Their method consists in regarding the extenorand phenomenal presentation of religion as but the scaffolding necessary to the comtrustom of the edifice-sta mythologic commy, to use Professor Tyndall's expression-and not the religion itself. The true faith is interior and spiritual, and has for ages been in the course of qlaboration within and by means of these exterior appliances. Representing to sterms energy, and one of in the specienal connectionates, and note is ment of letter and form, tradition and authority, and superfor, therefore, to all assaults of intellectual criticism. What this age is witnessing in the removal of the new asperthouse scaffolding and he beckenire in all its finished perfection, of the true Cacholie Church of the future.

The difference between exeteric or popular religion, and restic or generalization may be thus defined. In the fernior, agreed personages and occurrences are understood in the physical and obvious sense, as phenomenal and relative, and related to particular times and places, and dependent for verification upon adicidual testimony. In the system of the mystic, on the contrary, samed personages and events denote principles and perations which affect the spiritum Ego, and are in this what hysical transactions are to the material personality. As those principles and operations belong necessarily to universal experionos, they are unrelated to times, places, and persons, and ere to be sought, not on the historical plane, but on that of the mind and spirit, not, as the Buddhist would my, in the worlds of form," but in the " fermion worlds."

Images and symbols of religious verities have their true and oritinate use in leading the coul to the apprehension of that which they imply. But when regarded -as the poulty religionest regards them-as thomselves usentials and co-officients in opiritual processes, they become instruments of delusion. The ascertise is related to the smoothed, the corpored to the corpercel. The langued God are similars to the small on ; the thange of Cours are somilars to the modves. To God belong the things f God , to Come the things of Court. The reduciption of the noul cannot be affected by ments of orm on which is stouped the tange and superscription of the physical. No orange podurring in time, no acts of an historical personage, can save sir souls. These events and acts must be translated into aparty new version, and realized materialisty and experience ally if they are to have any officery for the spiritual solfhood.

The method of the mystics counirie, then, in transmitation, or the conversion of the torns of the outer . into the fanor, of the physical foto the appritual, of the temporal and phonesamini into the classed and notineousl. In them the key of the Secretures. and of the feathers and secrements of religion, is found in the ale come secret of transmittation. All the metals, asymptoare counst are code in near exercise marker in a sphere into of the Thirtie art can be made to appear in his resource. But the onthe is artical be made to appear it in resonance. The the chi-nart rocking a soproducially and concentrations has also all the margin as the stresson metal has concentrationally in a continuous and as the stresson metal has concentrationally in a editation is the exact not be over secret of all section Separates. It amends sugnificance as hunder under the letter in such as sehas rong wordle to the vingar it is evident to the eye of the fillingmaxed.

Following, therefore, the invariable rule of his order, and applying to the text of secret tradition, the "universal sulvent formed by the two words note and critics, the mystic sees in the exponition of revolution, from Gottesia to the Apeer type the energy not of past overts in the external and armsible world but of the soul and of perst one in expensal process of the sphere to which the tout whether in record or individual declarge. The rest of the process was broaden manify of the application of no mystical and of interpretation of the horder manifest of the application of no mystical agent of the procession of t I me appreciation of no mystical atom i observation to the line chief Christian and other mystics of the early and mid-line chief Christian and other mystics of the early and mid-line ages, all of whom what ver the externals of their faith, were at me in their dictrine and method, diese being the same that we

are now recovering.

The reading of the paper was, as usual, followed by a discussion, in which several Follows and visitors book part.

#### ADVIOR TO INQUIRERS

#### The Dessinot of Circles,-By M.S. (Ozen.)

If you wish to see whether Speritualism is really only jugglery and imposture, try it by personal experiment.

If you can got an introduction to some experienced Sparitualist, on whose good faith you can rely, ask blue for odvice , and, if he la holding private circles, seek permission to attend one to see how to conduct seances, and what to expect.

There is, however, difficulty in obtaining access to private circles, It was addressed to no special sector automality. It invited us and, he may case, you must rely chiefly as experiences in your to contamplate manortality, and to look buyond the limited own family circle, or amongst year own friends, all strangers being excluded. The bulk of Spiritualists have gained conviction thus.

Form a circle of from hote to each persons and, or as feast two of negative, positive traces, weren't and pre entitled the femule sex-

ance, in sublined light, and in comfortable and unconstrumed positions, round an uncovered table of convenient size. Place the palms of the hands fint upon its upper surface. The hands of each satter need not touch those of his neighbour, though the practice in frequently adopted.

Do not concentrate attention too fixedly on the expected manifestations. Engage in cheerful but not frivolous conversation. Your dispute a azymura. Scopticism has no determent affect,

Sent as May with Moment I have now as species of the many of the final and decrease in the sent and the many of the final and decrease in the sent and the sent a

The William of the open with meteors are the control of the specimens.

When you think that the time has come, let some one take command of the circle and not as spekestean. Explain to the unsoon intelligence that an agreed cube of algeria is destrable, and sak that a tilt may be given as the alphabet in slowly repeated at the several letters which form the word that the Intelligence whiteto spell. It is convenient to use a single thit for No. three for Yes. And two to express doubt or uncertainty

When a satisfactory communication has been established, ask if you are rightly placed, and if not, what order you should take. After this, ask who the Intel igones purports to be, which of the com many is the needlines, and such salarant constraint of confu someonian assume a to the difficulty that exists in directing the Several. A river. The dater of the executed water of the measure of the interest with executions. #### "May 10th, 1847." Teetlmony of Harry Kellar.

Harry Kellar, a distinguished professor of legerdemain. myestigated the slate-writing phenomena which occurred in the presence of Mr. Eginton, at Calcutta, in January, 1882, nurs on the "little of that mouth he adarened a letter to the editor of the Indian Daily Nover, in which he mid -

"In your mote of the 13th January I stated that I should be glul of an apportunity of participating in a manus with a view of giving an enhanced opinion as to whother, in my enpacity of a profumound prestedigitator, I would give a natural explanation of offsets mid to be produced by spiritual and

I am muleblad to the courtery of Mr Eglanton, the appretualistic medium now in Calcutta, and of his host, Mr. J. Mangons, for affording the the opportunity I maved.

" It is needless to say I went as a sceptic, but I ment own that I have come away utterly unable to explain, by any natural mesons, the phenomena that I witnessed on Tuesday evening. I w.s. give a brief description of what took place."

After describing several recognited experiments, Mr Kellar proceeds :--

that I do not expect my account of them to gain general canastances. I still romain a aceptic as regards Specitualism, but 1877.

WHAT CONJURERS SAY ABOUT PSYCHICAL, I repeat my subdity to explain or amount for what must have out an intelligent force that produced the writing on the siste, which, if my somes are to be rolled on, wat in no way the result

Ou the 30th of the same mouth Mr. Kellar addressed another letter to the Indian Daily News, reporting some experiences of another kind with Mr. Eglinton, and regarding which be said -

 $\Gamma_{\rm c}$  includes a, h(t) are many that after a most strongest tract and a consequence of the analysis of the experience of the article of the analysis of the article of the experience of t lachin, Remann, Kedur, and others have already confessed in any torus, nor was there at the roots any meanances of machinery by which could be produced the phenomena which had what occurs without human intervention in the presence of taken place. The ordinary mode by which Maskelyne and other conjurers mainte levitation or the floating test could not pumilly be denot in the room in which we were associated."

#### The Tottlemeny of Protesser Jacobs.

Professor Jacobs, writing to the editor of Licht, webr Licht, April 10th, 1881, in reference to phenomena which occurred in Paris through the Brothers Davenport, said

Spite of the american, more or last trustmerthy, of the a Senutce, of les hommes du Monde," in which the conjurer French and English journalists, and spite of the feelink jeulousees guerant conjurant, I feel it my duty to show up the had factor I me party and the chimnery of the other. All that has been and or dute adverse to these American mediums is absolutely untrustworthy. If we would right, page if a thing we must understand it, and neither the journalists nor the conpress possessed the most obsessiony knowledge of the science that a werns these phonomena. As a prestiligitator of reputo, and a scottere Sanatachet. I after that the meaning are freely bound to inthete a threet absent tour and seconged o the Norrhestate order of things in every respect

" Mesers of on and Robert Hamlin, when attempting to mitting there was facts, nover presented to the public saything layoud an infastine and almost gretospue paredy of the mid phenomens, and it would be only ignorant and obstinute persons who could regard the questions seriously as set forth by these gentlemen. If (as I have every reason to hope) the psychical studies, to which I am applying reports at this time, reasonal, I shall be able to establish clearly, said that by public demonstration, the immense into of domarcation which separates mediums. the phenomena from conjuring proper, and then equiromical A fortsight later, M. de Mirville received another; will be ne longer possible, and persons will have to yield to evi-

philosopher, Mr. W Orookes, of London, I am now in a posttion to prove plainly, and by purely scientific methods, the existence of a 'psychic force' in mounterism, and also the individuality of the spirit 'in spiritual manifestation,' I authories and, to you," de Ac.

#### Pratimony of Samuel Bullachini.

Samuel Is Jacken. Court Conjugar at Borbs, made the follows a decia ation a December, 1877.

"I hereby dealers it to be a mah action to give decisive judgment upon the objective medial performence of the American medium, Mr. Henry Stade, after only one aitting and the observations so made. After I had, at the wish of several highly astorned gentlemen of rank and position, and she fer my own interest, tested the physical mediumship of Mr. Slade, in a action of sittings by full daylight, as well as in the evening in his badroom, I must, for the mice of truth, hereby cartify that the phonomenal occurrences with Mr. Stade have been theroughly examined by me with the minutest observation, and mrestigation of his surroundings, including the table, and that I have not in the smallest degree found saything to be produced by means of prestedigitative manifestations, or by mechanical apparatus , and that any explanation of the experiments which took place under the circumstances and smallfions then obtaining by any reference to prestidigitation is absolutely impossible. It must rest with such men of science as Crooker and Walker, in London , Perty, in Berne ; Butlerof, in St. Petersburg, to search for the explanation of this phenomenal power, and to prove its reality. I declare, moreover, the published opinious of "In respect to the above manifestations, I can only say laymen as to the How of this subject to be premature, and, according to my view and expensence, false and one-sided. This, credence. Furty-eight hours before I should not have believed my declaration, is signed and executed before a notary and witanyone who described such manifestations under similar cir-nesses. - (Signed) Saxues. #### ARE THE PHENOMENA OF SPIRITUALISM IN HARMONY WITH SCIENCE?

BY ALPERD RUSSEL WALLACE, FRS.

(From the Boston Sunday Harold.)

" Life in the abburstion of soul through the raried transformations of matter," - Specified Eco or on-

It is a common, but I believe a mutaken, notion, that the conclusions of asiense are autignizated to the alleged phonomena of modern Spiritualism. The majority of par teachers and students of seconds are, no doubt, antagonome but their estations and projections are not seconce. Every discoverer who has promulgated new and starting truths, even in the domain of physics, has been denounced or ignored by those who represented the seismos of the day, as witness the long line of great teachers from Galileo in imposture. The no-called mireoles and supernatural events the dark ages to Boacher de Porthes in our own tours. But the opponents of Spiritualism have the additional advantage all nations find their place among autoral phenomena and of semigable to brand the new belief as a degree ag soperstation, and to access those who accept its facts and its emit mania of Europe and America affords the materia a teachings of being the victime of deletion or important— for an important study, since we are now able to detect the of being, in fact, either half-ments outlinessate or credulous basis of fact on which it rested, and to separate from it the fools. Such demunciations, however, affect us little. The Salante interpretation which invested it with horror and fact that Spiritualism has firmly established Itself a our scentical and materialistic age, that it has continuously grown and de cloped for marrly forty yours, that by more we glit of evidence, and in spite of the most powerful proproventions, it has compared to again our by an ever inereming body of tone and a master a shaper and the gamed adherents in the highest ranks of science and and authropology are illuminated by Spirithalian philosophy, and, flually, that despite abuse and misrepre never lost a convert thus made -all this affords a conclusive random him altogether helpless against the vigorous assaults nuswer to the objections so commonly orged against it, of Agnosticism and materialistic science. Theology, when Let us, then, simply ignore the seem and moredulity of those who really know nothing of the matter, and consider, of the a flue occurs power of its care or ye ra briefly, what are the actual relations of science and Spirit-Allumines the former

which we live full and systematised knowledge leading to

before he applies the term "impossible" to any facts which lare wately believed and have been repeatedly observed by man as intellige a mid honest as himself. Now, modern Spiritualism restrictory on the observation and comparison of facts in a domain of nature which has been natherto little explored, and it is a contradiction in terms to may that each an investigation is opposed to science Equally absurd is the allegation that some of the phone seas of Spiritualism " contradict the laws of inture," since there is no law of nature yet known to us but may be apparently contravened by the action of more recombite laws or forces Spirstunists observe facts and record experiments, and then construct hypotheses which will best explain and co-ordinate the facts, and in so doing they are pursuing a truly scientific course. They have now collected an enormous body of observations tested and verified in every possible way, and they have determined many of the conditions necessary for the production of the phenomena. They have also arrived at certain general conclusions as to the causes of these phonogram, and they miniply refuse to recognize the compotence of those who knye no acquamtance wintever with fore to determine the value or correctness of these

We who have astudiod ourselves of the reality of the phenomena of modern Spiritualiza in al. their we a-reaching extent and outless variety are channel to look apon the records of the past with new interest and fuller appreciation. It is surely namething to be relieved from the necessity of classing Socrator and St. Augustine, Luther and Swedenberg, as the eredelous victors of delusion or which perrado the sacred books and historical records of need no longer be laboriously explained nearly. The witch apprared to justify the oracl punishments by which it was attempted to be suppressed. Local folk-lore and superetitions acquire a living interest, ninco they are often based on phenomena which we can reproduce under proper conditions. and the same may be said of much of the sorcery and magic of the Middle Ages. In these and many other ways history

To the teacher of religion it is of vital importance, since semation, the folly of enthusiasts and the knavory of the it enables had to meet the sceptic on his own ground, to postors, it has rarely failed to convince those who have address fasts and evidence for the faith that he professes. made a thorough and painstning investigation, and has and to avoid that attitude of apology and doubt which vivitied and strengthened by Spiritualina may a gain some

Science will equally seneff, since it with an expense to unlism, and to what extent the latter supplements and it a new domain of surpassing interest. Just as there is nehred the vix sie wort, of nature no "unseen no vers-Science may be defined as knowledge of the universe in of forces, the soudy of which commandly opens up fresh worlds of knowledge often intanately connected with the the discovery of laws and the comprehension of causes, true comprehension of the most familiar phenomena of The true student of science neglects nothing and despises nature, so the world of mind will be illuminated by the new nothing that may widen and deepen has knowledge of facts and principles which the study of Spiritualism makes nature, and if ha is wise as well as learned he will hesitate known to us. Modern science uttorly fails to realise the

"the product of organisation." Spir tunhsm, on the other for a higher state of progressive spiritual existence, but hand, recognises in sirid the cause of organisation, and, that what we have usually considered as its very worst perhaps, even of matter itself, and it has added greatly to features, its all-perceding dis and suffering, are in all our knowledge of terms nothern by the monstrating the probability the only means of developing in as those highest exertence of and valued mine's indistinguishable from those of moral qualities annimerated as "love" by St. Paul and from its partnership with the brom and or an exercise.

kongdome-is to serve the grand purpose of one of g han as spirite in suman bodies

This world-life not only lands itself to the production by gradual evolution, of the physical body needed for the reception of teachings from it, then indeed we shall have in growth and nourtalment of the human soul, but by its very imperfections tends to the continuous development of the igher spiritual nature of man. In a perfect and bar monitous world perfect beings might possibly have been created but could landly have been evolved, and it may a everyo of adad on we sat of matter. The need for labour oppression of the weak by the strong, the palustoking and topper it gas a directed search regulard to wrote from nature her secret powers and hudden trensures—all density asset in develop ing the varied powers of mind and body and the nobler lamphes of our nature. Thus all the material imperfections of our globe, the wintry blusts and summer heats, the volcano, the whichwind and the Bood, the barron desert and the gloomy forest, have onch served as attimult to develop and strengthen man's intellectual nature; while the oppression and wrong, the ignorance and crime, the univery and pain, that niways and everywhere pervade the world, have been the means of excreming and strongthoung the h her sentiments mestis 4

Such a view na this affords us perhaps the best attainable solution of the great worklook problem of the origin of orit, was, at the thus, a believer in spritted phenomena." for if it is the very means of creating auxidoveloping the higher pression of the truth. We, too, believe that

Ad Nature is but Art, unknown to thee ,
At hance. Duce any relief room and but see
All Discording actions in the cristian
All partial Eell on corsis (ned.)

Finally, these teachings of modern Spiritualism farmali

\* This argument applies of course to other worlds are: systems, all of which, on the sparstrad hypothesis, cities have been or will be the seems of the development of human route.

mature of mund or to account for its presence in the universe, as with the much needed basis of a true ethical system except by the mere verbal and unthinknole dogma that it is We learn by it that our earth-life is not only a preparation

between her got yet separate from any human body. It has advanced by our modern teachers, which all admit must met a matted with forms of matter of which be cultivated and extended to the atmost if we are really to where here no cognisance, and with an otherent make progress toward a higher social state. The modern chemistry whose transformations are for more marvallous. Intersphere can however, give no sufficient reason why we than any of those with which sessace deals. It thus gives should practice these virtues. If, as they teach us, not us proof that there are possibilities of organised existence . our own lives end here, but the life of the whole human beyond those of the material world, and in doing so removes race in sure to end some day, it is difficult to see any the speatest standing-back in the way of hearf in a future salequate natcome of the painful self-merifice they inculcate, state of existence-tir possibility so often felt by the while there is certainly no motive address will be student of material science of separating the consecous mind mafficiently powerful to withdraw from selfah pleasures that nurserous class which derives from them its chief enjoy On the spiritual theory man consumt accountially of a new But when men are trught from childhood that the spiritual mature and infud sutunately associated with a whole material universe exists for the very purpose of spiritual body or soul, both of which are developed in developing beings possessing them attributes, that evil and and by means of a material organism. Thus the whole pain, sin and suffering, all tend to the same end, and that raises of the material universe -with all its mar, the characters developed here will make further progress valious olunges and adaptations, the munito complexity of towards a nobler and happier existence in the spiritual matter and of the state of the percule and energy world, just in proportion as our higher moral feelings are at the vast weeker of nature in the veseta de and an mal gultirated here—and when all this can be taught, not us a set of dogmes to be blindly accepted on the authority of a known area it writers, but as being founded on direct knowledge of the spirit world, and the continued actual our probit " a power that peaks for the same and

Thus, modern Spiritudians, though usually despised and rejected by the learned, is yet able to give valuable and to spirited and to religion, to philosophy and to morals. Not only does it offer us a solid basis for a solution of some of well be that evolution is the great fundamental new of the the profoundest mysteries of our being, but it affords us a up he se founded not on reason and facth only, but on number to ave, the constant struggle against the forces actual knowledge, to bour conscious life does not perial of nature, the antiquousin of the good and the back, the with our physical body. To all who will carnestly

Will that their perfect grounds? That the adsense Bo broken here will character to fallibed? Hope not a dominar's dram.

MARY Hower's "Retainiscences of my lafe," will begin at. " I wate for June, and be continued regularly in the

VICTOR HORE.-In "Spiritual Experiences," by R. Cooper, a book published many years up, we find the following paragraph with reference to Victor Rugo "While we were at the San l'Orient we were rinted by Victor Hoge. Receiving an of justice, mercy, charity, and love, which we all feel to be manustron of his coming, we reserved the place of honour for our best and noticest characteristics, and which it is hardly non, immediately in front of the cabinet. After witnessing possible to extreme a could have been developed by any other both stances, he expressed himself perfectly estimated with the authorness of the amnifestations, and said they for exceeded his expectations , in fact he could not have supposed such things to be possible. I believe I am right in mying that Victor Buro

M. D writes : I am very sorry to see it announced that Mr. moral attributes of man, those attributes which alone results Eglinton declines to two mances for partonalization. It is true him fit for a permanent spiritual existence and for continuous that paychegraphy as displayed at his manous is a perfect proof of progression, then the mere temperary ain and minery of the spirit power. Skile-writing, as given, for example, to Mr. world must be held to be fully justified by the supreme nature. Gladstone, in mostleable. I have writing on alster, cards, and permanent character of what they lead to From this antiuted note-paper, in hands perfectly known to me, done point of view the vision of the poet becomes to us the best ex. under absolute conditions, unpossible to be explained on any theory but Spiritualism, which I hold to be of inestinable value . but how forego those materialisations which have brought the realities of the other life to the test of the three senses of eight, the ring of the No. W. and as a section. We may a section the major as an arrive to the fix a of a content to the content to t e of account hand, an a rear is a toric and a decided to the same very dark and the state of the same hand, or here are the same and the same the same the same and the same a

#### EVIDENCE AND BELIEF

May 30, 18e5.

As I understand Mr. Watson, he maintains that there can be no preconception or prejudice (pre-judgment), except as belief or unbelief, resulting from contact of the mind with evidence. In a sense that is true, because the evidence must be offered to the mind before there is any conscious attitude of the latter towards it. But did he nover hear such expressions as "I would not believe it if I saw it". to take a less extreme, but not really less significant, case, has he not himself told us that evidence of cortain facts . experience? That is, not that Mr. Watson has examined the testimony of others, and a mid at inxufficient pa its merits as testimony, but that he attributes to the alleged been proved and tested, which Mr. Watson will not orgist He has a right to call a thing improbable which is ontaide all human experience. But whether the thing is cuttide hutuan experience in just the question, and upon this point critically we may, and ought to, examine it.

The logitimate two of the word responsible conveys to or to leaste a pr sumption, aroung from the atme er of the degree of exaction which would notice to establish a particular alleged onto of an ordinary known fact of mature, that each avidence will never be forthcoming. A not immuniderable proportion of admitted human ... perience is beyond the personal experience of most mosviduals. No one now, for maturee, would call the fall of a metooric stone improbable, though the phenome or as are and comparatively few have witnessed it.

Mr. Watson, I observe, falls into the common fallacy of confounding what is not conformable to one's own experwith what is controdictory to it. "It is not suponible mys, "but it is highly improbable, that a heavy body will remain the or unsupporte. Why! Include I have scholars hard oy a vistary concernation as not a can of a m a it. I have other experiences as up care, and prefragable as the former, I must discolved as y and ments, however aumerous, that such phonomens do occur." Mr. Watson has no such experience as he alleges, "that it does not, and cannot, " if he had, he would be utterly tratroual in socking for a contradictory personal experience. Only to romark, by the way, that he begs the question y the use of the word "unsupported," unless he knows a time forces mnature by which bodies our besupported in the air, his very offer and wish to personally investigate similar alleger phenomena prove that he does not really regard his ox perience as having the character he ascribus to 16. And so far in it from being true that he " send disbelieve" the stalements, that he very evidently has not "disbelieved" them, or he would not one thought them worth follow a up by weestigation. He ask simply not be eved there a very different thing from dishelack, if language is to be used as accurately "in oxact reasoning" as Mr Watson desires. He does not assent to these statements and therefore does not positively believe them , but they have inpressed and and a not made up about the a last confirmation, and that is certainly not " disholiel."

Well, but, if that is so , if other than his own experience has impressed, and rightly impressed, his mind, conviction can be logically induced by ruising the same sort of evidence -the testimony of others-to a lugiter power. All evidence is an appeal to experience, and I can tell Mr. Watson why

he has not absolutely a deshelieved" the witnesses to facts which are not in themselves conformable to his experience It is that he has a certain positive experience of human veracity and human powers of observation. And he knows that the " cloud of witnesses" to these phenomena meludes very many on whose teath and intelligence he would implicitly roly for any ordinary statement they might make To suppose that when they make extraordinary statements their truth or their inte agence has failed, does vioience to or, "I will not asten to evidence of such monsense"? Or, I the principle of continuty harmonic or seven which is so guaranteed by experience. Now as this experience is positive, whereas what is opposed to it is mere thex must for him be evidence of a particular sort, zee, personal persone, it is impossible that testimony of a certain quantity and quality, when fairly considered, should fail to impresentation mana. I sent may that the sent of east or my us its enterety, if fairly considered, most not only facts an improbability the measure of which he assigns by impress, but positioned the mond. But I also condemanding that it should be encountered by his own tend that testimony council be "fairly considered" "An improbable there," he may meeter by the majority of people in an age when it runs counter simply sometime; that has not been proved or tested.' Not to dominant preconceptions" of what is impossible or been proved a tested by whom . By nobody at all, or only improbable in enture. My Leeky, to his "Hastory of Ra not by oneself! It is evidence that the facts in question have | tionalism," has so ably illustrated this proposition that 2 need not dwell further on it, not withstanding the legenmenty m which Mr. Watson seeks to ravoryo me. That " se of and unboked are entirely outside our own volution " (so far as any conscious not of a 3" og m meant), I quite agree , but it is surely not rational to refuse human testimony, however Mr. Watson must surely see that this proposition is very distinct from another which he treats as correlative or equivalent viz. that they are both (belief and unbelief) " the product and the measure of the force of the evidence brought to bear." When Levereier and the textanony for meteorites with the soutentions rounts. " There are no stones in the sky; none, consequently, can full upon the ourth," did has "mental fector" contribute nothing to the result-has associate and was the latter " the product and the measure of the evidence brought to bear "? The mental facts who make the as washing a guing with reference to experience out is deoply dyed with the lines of pravident opinions, hum which it mustakes for its own intural colour. Mr Watson may, perhaps, be one of those ern scepties of whom there have been representat ves in even the most creaturous generations. I at if not, it is no dispurigement to his intelligence to any that I mg 300 or 400 years ago, he would have been an apt to merile Mankelyn and Cooken performances t mage as I suppose he is now to explain Eg non a a a writing by trickory. I our credit many mon with exemption from conscious prematica, but very for with a purely objective relation to nature. But if we must bring to our judgment of testamony presumptions or "probabilities," let it be a presumption which has positive experience for a foundation. Such a presumption is at hand. I venture to quote it from an emay appended to my translation of Zöllner. "If the widest and lughest experience of mankind can afford us a cauon of probability, it is this that textuneny, otherwise sufficient, to the exceptional, the abnormal, the strange, and the new, is probably true, and not probably false. Set side by side the cases in which newly observed facts of nature have been asserted, and have proved to be true, with the cases in which they have been well asserted, and yet disproved, or not proved, and who that is acquainted even superficially with the history of science and discovery would heritate to say which hat affords us the best foundation for an unduction !" And perhaps I cannot conclude better than with the three propositions which follow judgment is in suspense, making for a particular sort of | what I have just quoted. "(1) That testimony to the extraordinary is falsely opposed to experience. (2) That what it is opposed to is simply a negative induction from the absence of experience. (3) That a more general experience tenches us that such negative inductions cease to be probably true as soon as they are opposed to testimony of a character sufficient to establish any other fact."

### PHENOMENA OF MATERIALISATION

258

" Facts" is the tatle of a mouthly pumphlet, "devoted to statements of mental and spiritual phenomena," new published at the office of the Benner of Light

In the another (the twelfth) for December hast is coprinted, from " Limite" of October 11th, the narrative of remarkaolo materialización séances with Mr. Eg. acton, by Florence Marryat. It also records some experiences of the a character at sources hold under strict test conditions, amoutely described

Mr. Brackett, of Boston, reports this, Mrs. Pay being the medium: " A murit campout in last rous white drapery This form dematerialised when not more than three feet from me, and eight foot from the calmet. Then a small spot of light appeared on the carpet, gradually enlarged, singlituned, and finally developed into the tall angular form of "Anutie," one of the are and controls. She addressed the erule, stating the reasons for her dictating the struggest conditions under what the median set, and then esthdrew into the calmet. Various materialised spirits than expeout successively, and were recognised by different members of the sirele. Bertha appeared. She extended her arms and caused to appear between them, from our hand to the other, some fine sustrougly whote fahrie, which she let all ununtage, this die grossfully arranged about her, and letting walked to and I've, took at off, and dematerialised at before

"At a subsequent summer with the same medium and under the same conditions, "Burtha" nuclerialised flowers mother, 'Emmo,' came out each in a six a are to W affeck had permission to cut out a piece of A, and the gap so made was rapidly filled up. A mass spirit, clausing to love been a Gornan element, magnetical some water for is nick loom or of neverther where noting so has on itsel fine sparkles. On my complianing he man to a some for me, and it releved me. Mr. Wathock recognised y time rote at meterialised spirit as his father. Our old from 1 Nowton, was also recognized by all present who ha was was sain in cartle for

To Mr Brickett's report, Mr. Whitlock, the d or milds a confirmatory note, to the effect that the here while he cut in the actholike fabric because tilled up with samular material before his eyes. He while that the circle nambered arrival she thus wrote to her confident Leibnits. 'I know not forty. He attributes the results partly to the neutal if the Landrest Busch has coulded to Laubourg the recolution instructing which provailed among so many

Borry, of Boston. At this, Mr. Henry Lacronx, not long the buttle no positively. The Elector mys, shows all, "What esturned from a visit to France, his native country, was present. Three female spirits came out of the cabinet and to ked with him in French. In answer to questions he said that they were I is daughters, that there were twelve. One of the spirits and in French, "Three of fifteen, pape," H. supl, "True, three are still in earth-life."

The next report only Mr Andrewson of Saft Leav Cit. The text report in by Mr. Anticrone. I Sait Lear Cit. Antica. are a That settled was lickly in Dunver, Colorado, at which he, some as you a That misses was hold in Danver, Colorado, at which his agrees you at the sense was hold in Danver, colorado, at which his family and eight others, were present, the medium was like a sense of cone agrees as a sense and a sense of cone of the sense agree. Will be one sport was with the colorado agree of the sense of Mr. Anderson, "with several. One roked me to hold her at the spirits' own suggestion. My wife was admitted strong impromise." ate the calmet, and continued a conversation there with a !

sperit, who told her that similar manifestations would before long be given in Salt Lake City

"But," he continues, "a more remarkable manifestation was to come, a female spirit raised my little daughter in her arms and carried her about; then, still holding the cutle, she slowly sank, dematerialising, feet first, leaving the child where she disappeared, standing unbarmed.

"The possibility," concludes Mr Anderson, "of such manifestations implies favorrable conditions, among which must be considered the perfect harmony of the circle. But I must not ount a noteworthy mealent. A spirit-child came out of the calenct and was recognised by ex-Judge County, of Denver, as his granddaughter. He spoke to her, but she and she wanted to mik to Gracus. The only one present answering to that name was my little daughter, they because at once familiar, and went together into the culunck, prattling to one another just like two mortal little garls. Our Gmess returned to us, but the other remained n the calenct, to range, with the rest of our strange essitive, into the air from which they seemed-to our morta, sight-all to have come !"

#### AN APPARITION CONNECTED WITH THE BATTLE OF BLENHEIM, AS QUOTED BY MISS STRICKLAND

Mengro as the following record is, from its connection with the great victory of Blenheim, and the interest which naturally attaches to the fracthinking Sophia, Electrone of Hapover, mother of George 1, in whose letter to her friend Leibnitz, the great bean a mount of scale, it may many of the contract or the transfer the transfer and participations theste to further reasons as those fartments consigh to have accounte the valuable record quoted by Minn Strickia id in her " Lives of the Queens of Scotland and English Princemes," Vol. VIII, pages 300, 391, from which I copy the account (or rather allusion) verletim

"AB Europe now rang with the famo of the Marthorough eleteries, the war through the year 1704 had become gignatur. Beanswick troops had partaken in the great victory of Bienheim, rhich occurred in the encoonling year, where Sophia's third son, Duke Max, commanded the Emperor's left wing.

" (M course, the victorious Mariborough and his captains were received as welcome guests at her Court. But before their and prayed him not to be afflicted at his dentit, because he was Mr. Whitnock hisnself reports a somee with the Muses very happy.' I find this very extendelinery, to have known of padement will M. Lorontes and in manufacet?

After quoting the above letter, Mins Strickland continues "A very curious spection it is an proposeded by the philoouble Pleatness to her high prices in those matters. The three persons a teerned in the discussion of the a love gloss some the Photorous South, here was every the some the Photorous South, here was a course I and the Core and New South I as a made each their different openedate. The block of the course I believed implicitly in ghosts, made as any a second of the course of the course

bands; while houling them she mark slowly through the , fancial be had seen vampures, and has left a judicial account floor, her hands melting in my group as she disappeared, of these supernatorals. The trial, happening when he was This experiment was repeated by my wife, and by others, at Triexte, is quoted by Lord Byros, on whom it made a

ELIVA BOUCHER.

#### THE SPIRITUAL OUTLOOK.

May 30, 1583.]

XXIX

I'We shall estoom at a farour on the part of our readers if they will forward us, for one in this column, any alterious to Spiritualism and P. vehical Rosearch they may come screen in the course of their reading. We see a great many of them ourselves, but it is obvious that there must be make the enclose to the subject which do not most our eyes,-En, or " Lanut

What has been said in those pages of the value of the tentimony to the facts of Spiritualian, go or by Mr. Early of Newcastle, at not a life overdrawn. I have seen limit in a nome, with his accontific work in automossy and goology around had—a solid, useful man, full of cumman-sense and pure logic Mr. Cowan, his townsman, a man of great vigous and influence quite know what he was about when he left the Home of Commons to take the chair at Mr Barksa's locture, some time ago, in London.

"A good name us," in many cases, "a source of strongth." Let up to be a suggestion. Let us got the matter of one of the stand up a sole of "Liour"—the testimonies to the reality of spiritual manifestation—nontly printed as a tract and walely circulated among the stall agreement, and perhaps therefore intologant, friends of Spiritualists.

Light, describes a materializing assume, in which, while standing near to any talking with the medium, he saw shook hunda, and conversed with several of his perfectly recognized friends in the approximate. He says: "As I good with delight upon his sudden and emerpected manufactation, bathod in a mellow light which make all one current charge perfectly visible. I could not he sites on a regree that an overchard sounds had shut choose server on from such economic by to be very arrangements a round the world, and so complete his experience, but not in which no in elegery on no work ambient. Here, uniter time, I fear, to include it in "Twixt Two Worlds," which I am strictly lest-conditions, which produced say possible doubt, was glid to hear, is a wear on appear crowded into a anual space just the information which I am sure that some of them are honoutly endourousing to obtain." Well, the next thing to personal observation of such transcendent facts in a good account of those by reliable, ontirely crolledwomeness. Not the to any some meaning are one and then hearly the whole ducteurs. The past given estimately this one of a great and diktion age. We made proport imprinct, and everyang, on the extraction of many It not strange, then, that the evidence for Spiritudens of on an interested did he become in what secured that he has recently far stronger than that upon which we deliberately strange a follow greature and give another inhabitual to the world of marita as rejection ?

And Spiritualism raises anow the question whether we have any right to shoot our rubbish by gallows or gaupowder into that other world. Conndering that ferty millions of souls manage to leave their earthly holienevery year the or thousands of soldiers shot or pairelevers hanged can make but little

But the fact, at last deconstrated, that the I mean apr survives its body, and the probability that militers of words have some a skutch which Mr. Timet intends to more us a have been releasted for man more years by beings where souls part to they had the this who knows space may have an a cost me-Suite number of spirits-" toust give se pause." The mind or pends with what it foods apon, and not searchly bursteall the bonds to prove one of the pictures of the year by which it has been confined.

The material universe, of which we got alight glampees in the sterry boavers, orders itself by the two forces of attraction and repulsion. It is resconship to provent more analogy in the forces which govern the operitual mirrorse. What "outlook" we may have must come from our explorations. All our munlogics agest be drawn from our facts-and they who ignore or deny the facts can have no insight seal no outlook.

I read in the Chrudson Forld, "Mr. Maskelyno mys, dark sciences are wicked, and that fathers and husbands have complaned to him of the insults pat upon their wives and daughters during the hour of darkness, and that the Spiritunlists trade and fatten on this use of the dark scance

has packed an many mon and women as he could get into the have not been sufficiently overlighted

Egypteer Hall and then turned off the lights and given he dark acances, at which people behave with the most exemplary propricty, and of which wives and daughters nover complians. And what of the magic landeres, dissolving views in all he her to halls of London and the provinces? Really, the Christian I want as mot consented?

The Vocantle Caronicle Mr. Cowan's paper, gives a good account of some physical manifestations. The writer says . We all placed the time of our thraves only on the table. One of the atters saked that the table should be lifted, if the apartfriends sould do so. After being rapidly rocked to and fro a fow tables it gradually rose some three feet from the floor, and owered. Next the 'conom' was desired to all it again higher, and that was done, the table many so high that we have to stond on in order to reach it. And some clavital about his foot, it was put gently down again, but not in the exact spot where it had stood before. A request being unde that it should be just in its proper place, this was at once done."

I have that Mr W. Egl aton has received a most flattering and advantageous offer to risit Australia, and that it is without he region of possibility that he may leave our abores for the Antipoducity the nuturn. Many attempts have been us do at various those to rudge line to pay the Australian Colonies a Mr E. A. Bracket, in a recons number of the Bonner of visit, but his engagements have always prevented his doing so-Mac as is epecture from our above would be, as I consider, an irreparable loss to the equal of Spiritualism in this country. to a to be also useful work in to be done in the Colombs in breaking now ground

> Mr Eglinson is truly a munionary. After having seen in almost every country in Europe, he is now going to put a girdle

> During M. hgs can't recent that to he Cont ent to utel, amongst or year or sum on Preside Some you not M Though whose get cause a a use at actes to through reading Plorouse Marryst's account of a unterintisation published some mently since in the columns of this journal M. Timot second the opportunity of Mr. Eglinton's late abroad to commence a practical avertigation of the subject, and paid a visit to London for the express purpose of southerting his nquiry. Aftera searching investigation he heavypressed himself so thoroughly convenced of the resulty of aptritual phenomena His experience both in psychography and materialization, especially the latter, was certainly most marvellous, one form which appeared leaving boun indubitably recognised by him as that of a docerard friend.

> Aproper of materialization, a sensation is likely to be caused in society and the artests world by the next picture from M Timet's peach. I am violating no confidence by stating that I memorate. The subject is a materialization as seen and d we by the artist on the spot, and it needs no exertion of mine to show that a picture like this from the hand of a unster is likely

I CONTRAST HOW THE TRUTE IS APPANCISO,-In an article on apparituous in the "Kational Encyclopædia," pubindeed from altern to twenty years since, occurs the following pasters - We cannot dismiss the subject of apparitions without observing that the manner in which these plantons have vanished before the light of knowledge affords a striking lique traism of the blessings which descend even to the lowest of the prople from the coffesion of the sound principles of philosophy-An article on the sune subject by "A Z," in the last obtain of the "Encyclopesia Britannica" mys "Apparitions in the ordinary accoptation of the word can acareoly be better defined than in the words used by Defee : \* They are the invisible Inhabitants of the unknown world, affecting human datpen, or any shapes, an showing in angless visibly to us. "We shall probably, "adds awr of or some as and "arrive at the conclusion that Of course, all the fathers and husbands of Spirituants here is no consultated at the compliant to Mr. Markelyne, who for yours farts, or extile human and magnitude is subject to more wants

denominations, a lover of chadren, and a sympathening friend to the poor and needy. He has desired that his body may be find to rest in the republican simplicity that his advances are made from day to day. soul loved, and that no formal uttermous of prayer or paregyric may break the selemn silence of the temb, It has been the fashion, from some passages in his writings, and from some ampetuous attenances of his during his life, to regard Victor Hugo as an Atheast. This feeling will gather force from his last wish respecting his funeral. Yet it was not true of him that he denied the existence of a God, on the contrary, he died affirming that behel. Nor did he make light of that true and pure religion which alone could touch his simplicity and sincerity of nature. He only desired to avoid a histrionic display, and perhaps to mark his dissent from an elaborate system of degrantle theology to which he was unable to assent. His yows nowhere find a clearer expression than in the following words which

"From her hoights of screenty in the unknown world, sho will see assemble her these hunter of ours which are at a full of hor, those friends who respect and glorify her, this good husbare. who meetres her. The money of her, at once sad and charming will novoe be offered. It will illoming the twilight in which we a spirit receive hite the high denoun that a . However of rong may have been the objection felt by M. Hugo to dogueste theology, he has struck in those harmag words the key-note of true religious faith and agricultum, and must be claused, by virtue of them, as a T C CAPDLE asks for a brief definition of the nature and efficacy good Spiritaalv4.

"M. A. (Oxov)."

## LISETTE MANDOUGALL GREGORY

It is with extresso regret that we have to record the passing away of Mrs. Makdoughil Gregory, at her rendence, 21, Green-street, W., on Sunday last. She deed a sudden and pantless death from breaking a blood varial. She had been ill, but was, apparently, as nearly recovered as a lady of her advanced age could expect. She would have been eighty next August. There are few Spiritualists who do not owe Mrs. Gregory a debt of gratitude for the facilities for the investigation of Spiritualism which she unwearyingly, from the early days of the movement, placed at the disposal of her friends and acquaintances. The news of her transiteen comes too late to cancele us to deal exhaustively with in the original Cornett. State price to Editor of "Litter" her work for Spiritualism. The subjoined extract from the preface to the second edition of "Ammai Magnetiam," spear to be generally known to see to be seen or addressed at 0, written in 1877, gives a few particulars, and pending the Nottingham place, W Several investigators who have had publication next week of a more extended memor, we premous with him recently testify to the remarkable nature of his can only say that in her departure from the physical plane, powers. There are few who visit him who do not receive Spiritualism, Spiritualists, and mediums expectally, have complete satisfactory avaicance of the gammenous of psycholost a devoted friend and helper. The funeral takes place graphy at Brompton on Friday next.

Mrs. Gregory's maiden mane was Lasette Scott, she was 'with courything that is bright daughter of John Scott the Younger, of Gala, who was the son Roxburghabire since a.b. 1100.

Mrs. Makdougall Gregory was as deeply interested in psychoregress science as her partner; indeed, it is well known that up to the present time she continues to work ardnossly in London, done, all the can to dissummate a knowledge of this interesting A man of massive genus has been removed from the account. Professor and Mrs. Gregory were both well acquainted world, and we are the poorer for the less of Victor Hugo | with Harnet Martineau, who wished Professor Gregory to write It is not always possible to admire his many poses, nor to her biography, and offered to send all the documents and activities follow with approval all his eviatio utterances. He was a necessary for the purpose. He was unable, in the midst of ment of contradictions, a force later, tamultuous in his other ardious duties, to undertake the additional responsible work. Professor Gregory's works on charactry, capacially the organic branch of that anbject, are even now valuable text books to the student, although it is a secure in which such rapid

#### MRS. LOFTUS-OTWAY

We regret to announce the passing away of Mrs. Georgina Frances Oweny, on Tuesday, the 19th mat. The deceased indy lack been a Spiretealist for many years past, and always helped any scheme likely to promote the interest of Spiritualism, but of late she took no active part in the movement, probably owing to the death of her son, Captain Cocal Otway, which took place last anterior, and from which she never recovered. Mrs. Otway was the sole heirest of General Sir Loftes William Otway, and married in 1847. Captain Marjoribanks Hughes, who assumed the surmans of Otway in line of his patronymate, and who survives her closed his cration over the grave of Madame Paul Menrice | mounted by a large sirele of acquaintances, no loss for her on carriag quanties than for her landsom and consideration to the poor, to whom she was at all times a generous donor The behal she hold so strongly in now exchanged for know

#### PRYCHOMETRY

May 20, 1883.]

By T. L. Nichols, M.D.

eminent of American Spiritualists, Dr. J R. Buchanson, author of the spiritual consciousness of the reces concorned. The of works on medicine, education, and Spiritualism, with allied carbor steps of this great ladder are traceable in Hiblical phonomens. Not long up Dr. Buchanan had the good fortune to and other prolinterio myths and begands. The latter are marry a highly gifted lady well known as a psychometric recorded in history. Throughout them all runs one definite The learned Ductor writes "I gave your name to Mrs purpose—the recognition by, and establishment in, the world of Dechman at our distance just now for an official psychometric in system of thought which at once explains the nature of exactdescription, which the gave in these words : "An able writer, used and provides for the conduct of it a rule by the observance bound and logical, aspectational, larger. He could write scenibly of which man may turn but own existence to the atment possible un various thence-not a man of farence, but sound. He ment in this country dat away. His views are similar to yours. He has it in him to be. writings would be on his profession, and the condition of the Bibles and rengions, and of which the great religious systems of would read your books with interest and appeare these H s. world and promotion of boulth and education." ("What is bin age (') ' Very searly as old as you. He has good health muse paired, and, with his good care, should live long. His ideas are all reformatory, and he has a following. These who know him The han ('What family?') "He has no wife-be is a

Now how did Mrs. Buchman, who certainly never mw, and probably mover hourd of mo, got all that information? Brain reading? Not her kushand's, for Dr. Buchanan sever my the and probably known very little about me. He silds "You will have a good record to remember in the upper world, where we shall meet before many years. I'am harrying to get out Psychometry, then I have to propert a mind volume, also 'Ricetro-therapoetteet' and 'Authropology.' If I could live to 120 y are I might sobjects my plants, but I can only do an un-Brimban week

I had, many years ago, another remarkable experience of the psychometric faculty. A friend of mine smiled up a business letter from me in a black envelope, and handed it to a lady who had server seem, and probably never hourd of mo-a sister of the late William Denton, who deal while exploring New Guines. She hold the packet in her hands, then against her forehead, and gave hom as good a description of six as if also had known use most untimately for terenty years, extending to particulars of my physical condition known only to mysolf, when the latter was

How did also got this knowledge, sees 200 miles away? No. from my friend who gave her the letter, for he had no soul knowledge to give. Well, perhaps this is not Speritualism of such facts surely illustrate spiritual powers and possibilities. I know a lady who used to got the institut of a lotter, and sometimes an image of the writer, if a stranger, so that she recognized him when she new him, before also spotted the envelope.

#### THE HERMETIC SOCIETY

A paper on the present revival of Mysterious was read by Mr. Edward Marthard before this Society on the 20th mat.

This revival, he said, is at once the most constituble and ment important of all the notes of our era, both for its power to m orpest the past and to influence the future. Mystician is the account Bosophy of Spirit, and rotors to procomes and con core or v a writing the most, It thus denotes transcendental metaphysics. Occultion, on the contrary, denotes transcendental physics, and refers to a sphere exterior to the soul, that, namely, in which the soul in. The one is concorned with spirit, the other with spirits. Mystleisen is the product of the maritual consciousness, which is the consciousness of the mmost and highest region is near, and the faculty by which this Popular is degreed is the intestent, or contriputal mode of the mend, whereby men obtains account to the knowledge which, in the long ages of its past, the soul has gethered by experience

spiritual history is marked by a socios of corresponding revivals, slike in the Best and the West. In the Bost they are called Arkines, in the West, Messianic advents and illuminations. In Perfect

both worlds the series consists of ten such avents, each of them making a cycle, or day, in man's spiritual creation, of which the duration is about 600 years, the great cycle which I have just rectived a pleasant letter from one of the most is made up of these representing the entire syclution account in the long run by making of inmeelf the best that he

Such a system it is which has found expression in all true East and West have been the velocies. Known in the West as the Hornotic Guesis, it was originally the predict of Divinorevolution, and is always discurred afresh whonover men recoverin sufficourt degree the faculty by which it was originally received -- the mutution, the possession of which makes the mystic. Mystically regarded, the Bilds represents the fall of man as consisting m the obscuration of the spiritual consciousness through the soul s descent into matter, or fail beneath the power of the bedily consciousness. Such is the primary meaning of the allegery of the creation, the soul being sym a two or a or and and lower go called Eve, and the boddy consciousness as a man, and called Adam. In its secondary and historical sense, this allegory may be taken as denoting the first formulation of the Hornesto Charts and institution of that Church of Christ which consists of those-and those only-who posters he spiritual consciousment. Both this, and each of the vents described under the huteries of Enoch, Noch, Abraham, Moses, Erra, and Christ, are readily interpretable as implying

The titles of those oyelar, but a Social Cores, was ancountry for the full comprehension of the Ohrist were by the world. The eighth sycle, A.R. 700 to 1,300, may the permention of Christondam by the doctrine, at once Hermonic and Christian, formulated under the name of Dionysius the Arc and the secontained by both the Eastern and Western Lunches of the mystical prosentation of Christianity

The minth opels -- A.S. 1,300 to the present time a mosted mother great advance in the same direction in the rise of the Scholartic Philosophy,"-a moreoment largely contributed to by the Ambian school of Blyeticians, which under the Molinia moden regime had monmille attained a notable development -the Hermetic destrine of Dimysius receiving everywhere the fullest recognition as constituting the easteris truth, not only of Christmatty, but of religion itself. The illumination of thus cycle which was at the time regarded as a Mussianic advant. and also the present one had been predicted as such—was followed, like all the rest, by an electrication, or "fall," of the spiritual consciousness, through the month conso—the materialratic and stolateness tendencies of the priesthood. And it is the restrate from this full that is animodately represented by

" (Signed), ROBERT HOURS

· May 10th, 1847."

#### Trethmony of Earry Kellar.

Harry Kellar, a distinguished professor of legerdemann, investigated the slate-writing phenomena which occurred in the presence of Mr. Egunton, at Calcutta, in January, 1889 and on the 25th of that month he addressed a letter to the corpor of the Latina Dady Notes in which he said :-

an you made if he lists January I scores true I also as on many of the opposite over if purposed the first a meaning wat the view of writing no unbecome operation as to whether in my as carry o a professional prestidigitator, I could gove a pattern explaintion of effects sold to be produced by spiritual sid.

"I am indubted to the courtesy of Mr. Eginton, the spiritualistic medium now in Calcutts, and of his host, Mr. J Meagens, for affording me the opportunity I staved

"It is needless to say I went as a sceptic, but I must own that I have come away atterly unable to explain, by any natural sevens, the phenomena that I witnessed on Tuesday oroning. 1 will give a brief description of what took place."

After describing several successful experiments, Mr. Kellar proceeds :--

" In respect to the above manifestations, I can only say emmitances. I still remain a scopic as regards Spiritualism, but , 1877 "

WHAT CONJURERS SAY ABOUT PSYCHICAL. I repeat toy inability to explain or account for what most have been an intelligent force that produced the writing on the abite, which, if my access are to be relied on, was in no way the result · Eterokovy care gut of hand."

On the 30th of the same month Mr. Kellar addressed another letter to the Indian Daily Rees, reporting some were nees of another kind with Mr. Egiluton, and regardn which he said -

"In conclusion, let me state that after a most stringent trial and strict scrutary of these wetslerful experiences I can arrive or other case usuan than that there was no trace of trickery any form nor was there in the prom any mechanism of an tane ry which could be produced the phenomena which had or are The country mode by which Maskelyno and other comparers justate levitation of a first or cert could not possibly be done in the most in which we were amounthled."

#### The Testimony of Professor Incobe.

Professor Jacobs, writing to the editor of Licht, mehr

Spite of the assertions, more or less treatweethy, of the Free-count English journalists, and spite of the foolish jealousies of the most conjusters, I feel it my duty to show up the bad to he do no party and the chicanery of the other. All that has them has it done adverse to three American mediums in sheolutely entrustworthy. If we would rightly judge of a thing we must understand it, and neither the journalists nor the conjuries possessed the most elementary knowledge of the science that governs those phononicus. As a prestiderisator of repute, and a sincore Sparitualist, I aftern that the medianostic forte demandrated by the two brothers were absolutely frue, and belonged to the Aperitualistic order of things in every respect

"Manre, Robin and Robert Houdin, when attempting to instate these sold facts, nover presented to the public shything bey no an infastino and absent grotesque paredy of the mid st sometime, and it would be only hymomet and obstituate persons who could regard the questions seriously as set forth by these gontlomen. If (se I have every remon to hope) the psychical attenies, to which I can applying myself at this time, succeed, I shall be able to establish electly, and that by public demonstra-I m, the me neese amost demarcation which separates mediumlathe diemone of from conjuming peopler, and then equivocation will be to not ger passence and persons will have to yield to exdence, or deny through predetermination to deny "Fullewing the data of the learned chomist and autoral

philosopher, Mr. W. Cruckes, of London, I am now or a west tion to prove plainly, and by purely according methods, the existence of a "psychic force" in monuerism, and also the individuality of the spirit 'In spiritual manifestation.' I authorise full impressible que le lemand un l'astrone juteme juteme juteme produire des you, deur sir, to insect this letter in your next number, if agreea de t you lee, ic

#### Testimony of Remost Reliachink

Samuel Belfachum, Court Conjurer at Berlin, made the following declaration in December, 1877 :--

"I kereby declare it to be a rash action to give decisive indement upon the objective medial performance of the American morecom Mr. Henry Shale, after only one althing and After I had, at the wish of several my steeries a new sets of rank and position, and also for my wen interest, that the planned and anomy of Mr. State valuence of any significantly go as well as in the evening critics seen and, I must for the sake of cruth, hereby certify tions in an assure to secure need with Mr. Scale have even the roughly examine by me with the introduct most than their in vestigation of his survivina ugs, nicho in the table and that I take not in the man oil don't farms a many to be provinced by means of prestinenestive mainfestacions, or by mice direct apparents are that say or danction if he experiments watch track place with the er r notances and each one then obtain of by any reference to reesting dation or mancifully supermittee. It must rest with such mun of science on Crowners and Washee un-London , Perty, in Berne , Butlerof, in St. Petemburg, to search for the explanation of this phenomenal power, and to prove its reality. I declare, moreover, the published opinions of laymen as to the ' How ' of this subject to be premature, and, that I do not expect my account of them to gain general according to my view and experience, false and one-sided. Thus, croduse. Forty-night hours before I should not have believed my declaration, is nigned and executed before a netary and witanyone who described such manifestations under similar cir- nessen-(Signed) Samura Brancourst, Berlin, December 6th,

#### MENTAL HEALING IN BOSTON, U.S.A. By "M.A. (Oxox.)"

From time to thue, during some years, I have noticed In this journel, and in other places, cures of the alleged don't you take in your sign now that those missioure people euro of disease by methods other than those of orthodox mirroral scence. Many such cures are recorded, some produced to measurem t extract more follow is a prayer come resulting from an act of faith, some exceed by the conscious exercise of will on the part of a strongly magnetic reary symboth, with miss the work or cooking a many person some claimed as the effect of spirit-agency acting through a human instrument. In all these cases, except our does among at it to some absolute peace of mind on the the best and last, the efficient cause of healing is the mind, part of the patient. Thus nature will work her own ours whether of the patient cured, or of the physician who Sometimes a necessary to administer a few broad pills or a cures. And it is impossible to deny that there is a large hody of evidence, which would be good and sufficient to establish any ordinary fact, that remarkable cures have pur targeter been thus effected. I do not speak of more nervous allments, which might be expected to be soothed and even (May 11th), gives an elaborate account of the progress of removed by magnetic treatment, but of the healing of this mental healing, and cites abundant testimony as to the organic disease, and of the removal of adments which are reality of the ourse effected. Although he is by no means certainly not attributable to a hysterical imagination or a perverted fancy. Nor is there anything in all this which and although he satirises severely the absurdities of the an enlightened physician, who is also a student of psychical science, should put aude as unacceptable. For he knows well, by daily experience, that his success in treating a agricular case depends in griv upon the degree in which he possesses the countrie see of a patient. Complete harmony carea of the mental healers have been no permitently proof annul between the healer and the healed is a more potent claimed that a large proportion of average Bostonians are factor in the cure than most persons are prepared to admit, willing at least to admit that "there is something in it." And when this mental sympathy is further aided by the Hundreds claim to have been benefited in varying degrees amon of a powerful will with a magnetic presence on the part of the physician, and a passive patience combined with an acture faith on the part of the mek man, we have the Christian Scientist branch of the metaphysical organization, elements of a cure ready to hand without further search. and it has thus far been unpossible to check the defection. It

various persons who have professed to care disease without thomsaids among its sympathusers whose ordinary good intellirecourse to drugs. Just now Boston (U.S.A.) is convulsed gence entitles their judgment to respect. with excitement caused by " mind-cures" or " montal would be moless to deny that, under the influence of the healing." Any such furore runs its course in America manu-curo practitioners, beneficent, and in some cases runnirkwith startling vigour. "The Judge of Spiritualism" is abundance, radical, positive, and undoubtedly honest, from recy receptive of spiritual excitement, come in what form people who claim to have been cared by the new agency of it may , and just now the Bostomans have got this parts organic disease of long standing ; but investigation develops so cular form of excitement in a highly developed form. The many weak or incredible points that close analysis is almost science of mental healing has taken so firm a hold on minds always mentulactory in its results. Illustrations might be the most intelligent and cultured-for it need not be said, detailed by the score. that the " hab of the universe" has a pre-eminent share of . The founder of this system is one Mrs. Mary B. G. the truest culture and the inghest intelligence in America Eddy. She claims for it a Divine origin, and gives the

-that the Press is silenced from its name, jeers at anything paychical. The dergy

' regard the subject with grave apprehenden, and on all sides they are ducument the situation with great cornestness. They hardly know how to deal with the danger, for the succepty of all infected with the new fash a underbied. and any policy of opposition or donunctions serves only to secrets their ardour. Secret of applications have been unde Evangeon of them for of the Baptut, Methodist, Congregaonal, and F as que an denominations for letters of disassed has the nepresents may , another Cheest are Secondata' phurchto one a greatenty may over set mer, but the converts to the new idea novortheless worship with those of the new creed

As for the physicians they, though more affected than any section of the community, except the notual converts, regard " the grace" as an evasuescent carically, a sort of collective ballucumtion which runs a rapid course among a suscept bie and excitable people

" Doctor, a velocan problithmer was taked recently, " why has the sim that we one need be nick union he has a mind to? physicians declared would routh fatally in a few hours. Her point, no mass for death, yet your enemy sits at case in his pastor called to see her just before the end was apparently at ha is, and offered her consolution. She begged him to return the of errors, but no one believed also would then be by a By residat in from the you at that time Consucting relation towards her and to not quince race was made that and she putlised that her care was her as error whom when supplanted by the truth, would despise . By the light of her new knowledge the brought bornell, by montal process, into a proper attitude toward Johovah, and when the dergyman exticel a few hours later, expecting to comfort a becoved family, also mut him at the door. Ever since, him. Eddy says, she has hed the power of housing others as also was herself healed,"

Mrs. Eddy is probably made of the stuff that is more fam, or to us in the medium or osychic. She is probably enough a medium, and it is characteristic of this upon appretunt authorst that it has about it more or less of a religious flavour, as all, or almost all, the plasses of what we loosely call Spirituadan have. Mrs. Eddy's evangel a deed. an conveyed by the Times correspondent, is of a very mean character-"a mixture of Buddhom and Punthenson the sectors were to be toric error a meter. The she is use or on D. D. unkindly calls it, as well as "a whetes while on, which is at once unratelligible and rude, -but it has its affinities with spirit-teaching. God is alluded to as the Great Spirit, the All-pervading Mind. Matter is nothing , the shadow and reflex of Spirit. Persomality is the embediment of mind. The true Ego is outlined and conditioned by the body , so that the source of all must be taught, not in the body, but in the mind. Hence the remember of the mind-cure. A free use is made of Biblical toring and the Christian Scientists, as the sect is carled, profess to present a retined and spiritualized littleway spect in Quaker-meeting alones for justical attenty Obristianity for the acceptance of a world that has outworn the orthodox prosontation of the teachings of the Christ. It is not secessary to have a very minute assummance with the way in which the efforts of the world of spirit to come to relation with the world of matter are traceable, to recognise this as one of such attempts. It bears on its face the family likeness. It is of the same carriously spixed dury : in its philosophy important traths are justled by tudiorous absurdation, " the treasure," such as it is, is contaxand in "earthen vessels", the stream of truth has last its murity in prising through human vehicles. But it is none the loss significant that a considerable section of the orthodox Boston clergy that in the teaching of the Christian Scientists much that they can necept, while all Christian togehers, of whatever sect or party, are fully alive to the importance of the movament as well as to its possible in finding out is whether there be at the bottom of to danger. The delusion, my some of them,

a most man as. The large use of the Bible, the strongous demand for holinous and self-absorption in the disciples, the results apparently effected in the minutey to the sick these are very powerful counternment for actra-my converts. And so handreds of young ladies especially produced by a strongly magnetic will on an imagination are new the system under the ingression that they are getting some liner manty of Christianity. De Gordon products. the tack a not the first esses. If the hody is only a phanton and the fiest only a shadow, by and by some very practical similars will take refuge under the system, and count that the and of the body and the transgramment of the flesh are hurnless, since they are only the phanton of a phantom and the shadow of a shadow. Dr. Gordon regards the whole system as a sort of witches enuldron, in which every concereable heather and Christian horozy is sectiong and stannoring to produce the aubtle emence called \* mental medicino.

It is easy, on the other hand, to make fun out of the It is easy, on the other hand, to make fun out of the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions and absurdations which beset the utterances of intellectual action, excitable by personal upon the contradictions are described by personal upon the contradiction are described by personal upon the contradiction are described by personal upon the cont says Mrs. Eddy, is an error of the mind, the result of fear, i.e., of faith inverted and porverted. Yet this lady asserts the major of the mind the major of the mind.

following account of the way in which she was in to her blist her husband, who died three or four years ago " was murdered by an enemy among the Scientists who thought In 1806, according to her story, she fell acco estably open are me into him." Can any suggestion be more grassenally the side walk and suffered spinal injury and paralyses, where grips and grotesque! There is no such thing as disease, no arm-chair and "thanks arrenie" into you till you fancy you are dead, for, I suppose, if disease is an error, death as a greater one at A No one, however, scenar to attribute to these user enthusiants anything but uncerity of purpose

Note of them have you ght to be the r purses of practising ne new method. It is true that handy any two agree in their conceptions of the "science" for in their idea of the resource to which her set to action.

he say senercy that I be a consistent heater one must be a Universalist in religious little. And we are assets that the in nonof her patients shall be made enterely free from guile and somethingly abounds for a full statement of their lives. Many paraons who study the system renounce all religious and super titleson along in compactnon with it, but recognise the physical phonomous, which they do not attough to explain, and practice the art as successfully as any. A lady in Hyde-park, Massacharacte, who takes this position, eags also finds or twill possessed I a sower over man, we note a rawhich she hardly knows more to use. She says six prays earnestly and the a morne of he you, to how so off. She hors mit all whappeher to call a mu-cure, faith-cure, or magnetism. Some operators my avy me no will power, but simply keep before their sainds an usage of perfect health, and let God or the truth work through them. Others exert the will intensely to drag out the disease, as at were, ay maan forer "

There is plenty of divergence here. Yet they go on somestly pursuing their effort to think health into a perverse and stiff-necked generation, which they have, radeed, affected in a quite unexpected way

· Hore is a familiar Buston parlour scene; two ladies sit a mutes. The face of one se se builty fleshed as if she had been alging in violent exercise, physical instead of mental. The when the judicut, apparently does in her chair. Externally than in all that or notates a more care treatment.

No one seems to doubt the honor, interview. Yet it is ency to see what a happy hand ig ground it here disclosed for the quack, the impostor who trades on human credit ty and foils, the charlatan who lives on the faibles and frailties of hot fellow creatures. These gentry whom the Irmes correct much comprehe airely sque up as scalawage, an awasome term of much suggestiveness-will, unless I am such mutaken, turn all this bealing to their own neferious ends. It is to be expected. So long as there is human weakness, there wat be housin researty to prey upon at The or seen up a put yet and the hon derouts the lamb the free down by trade. What we are incrested mentas her og anv gern of truth at all. For myself I we eve that there is. But I believe it to be an old truth a new quise, one that the world has kn we for ages, and has great villegmeter, and gournel, viz the potent influence of an id on an aid, the gamest impractions effect that, in be that and been quicks sells to act vity . But, however this may be the story of the minorum in Boston as a curious na-rative of some spiritual agnificance in the midst of many that this curious age it more or less fare har with

Hypnorunt is a term employed to describe a state which was agnalized by Piorry in 1815. He recorded the effect of the prolonged action of a shiring object, or of a monotonous movement upon the bran through the eye, determining in certhe marriage of what is termed the nervous temperamen a state lemotes by certain stem go symptoms carrow note, from non-quartery, in which a rece is a peculiar need not a second note.

PHENOMENA CALLED "SPIRITUAL" ILLUSTRATED BY CHROMO-LITHOGRAPHY \*

June 5, 1882.]

By J G. KEDLEMANS. (Continued from page 262.)

PLATE IV .- BURT OF JOHN KING.

Now it may be argued that all these differences in expression, as likewise in the length of the body, can be artificially produced, that every person can to a certain extent-some even remarkably so-change their features and, with the addition of an artificial beard, a pair of thicksoled boots, or a touch of paint, give themselves an almost anrecognizable appearance. My answer is that as regards the length of the "spirit" form, the measurement I have taken was that of the form standing with his maked feet on a of the bag was suspended by ropes from above to pravant it luminous slate against the medium standing in his boots, that from collapsing, the under surface rested on a table, the besides, I have, on more than one occasion, seen the "form" of "John King" exhibiting the medium by passing the the receptacle, at its farthest distance—about five feetluminous slates over the latter's head and shoulders. Granted from the medium's chest, we placed the farry-bells. Mr. S. and that there is nothing absolutely wonderful for a person to in york remained standing, at times changing our position alter his facial expressions, and that, owing to the subdued from the and- to the front and back. Fully satisfied that light, the slightest modification may appear a perfect mota, the apparatus was in proper condition and large morphosis, there still is some difficulty, absect amounting to mough to hold even two forms, we asked whether an impossibility, in altering the shape of one's nose; especiany "spirits" were present. A voice from inside ally if it happens to be a little out of the regular form. I was heard to complain of the narrow space allowed have found "John's " note invariably straight, as far as the for the experiment, and also of the disagreeable smell of the bridge is concerned, and what may be considered equally material. We heard two voices discussing this particular important is that those "spirits" regularly " showing pro- ament of being for the first time since their experithomselves" have all perfect nones, somewhat of the "John King" type, but still varying in length or other alight details

and those of "John King," suffice it to say that indications from the heavy humps that were administered against the of an extremely weak eyenght are plainly observable in the medium, whilst "John" has normal and even powerfully expressive eyes. This, like the difference in the shape in custody. Our conversation with the latter inside, and of the none, it a sufficient proof that " spirit" and "reeding" - no matter whether we are brookling a nuderialisation or a transformation are distinct cultures in the latter final test to demonstrate his substantiality. We were case, although it is the medium's person which is used, the saked to place our heads against the side, I merely put my substance, i.e., the material part constituting the body, hand in that attitude, when at once a strong blow from has been so modified..." bluxled" with an extraneous in the inside was given against it. After the experiment dividuality as to be no longer its former self.

Whether materialisations and other kinds of form manifestations are explicable by scientific methods is not the district entity as a residuality of at least two spirits a assertion we are dealing with at present. My opinion is is preven beyond a doubt. How far both roices inside that these manifestations are beyond the reach of physics logical experiment or analysis. But what we have to decide is, whether we are dealing with facts, or with frauds or delusions. In my short remarks agent " John King " 1 | " John " once appeared as a bust in front of the med non have merely quoted my personal observations from scances. He then, upon request, exhibited the latter with the held with his only medium, Mr. Hunk. Of these mentions. new numbering over 200, about one-third were hold at the private residences of both inquirers and confirmed believers. With the almost insignificant exception of twelve occasions, "John " appeared at each, either as a best or in the full form, and, in most cases, under test couditions, viz., the medium's hands being held throughout the evening. It is needless to point to the impossibility of large disc-light, the so-called "John's" own right, and made introducing tracks or confederates under such circumstances. it would be equally absurd to suppose, as some sceptics often do, that the "John Kings" are one and all mediums made up for that sile, because, in Mr Husk's case, an alteration of the bony part of the nove, like the self-restoration of normal night, is beyond human powers to achieve. Besides, the application of special tests, of which I will quote the

\* A few sets of these chrones drawings still reseals, and may be obtained of the Manager of the Psychological Franc. 1 Ave Maria-lane, E.C. price in pil. the set, packed on reflex for each transpasses by purcel peel, -first April.

more interesting only, must, as regards spirit individuality, set further doubts at rest.

A very novel, and at the same time highly satisfactory experiment, at which I personally assisted, was made by an impairer (Mr &) about a year ago, the object being to assertant the possibility of procuring a material so on inside an air-tight receptacle. A wedge-shaped udurubber bog had been prepared for the occasion, the narrowest part measuring about eighteen square inches, the widest portion about four-and-a-half square feet, the length of the apparetus being about five feet. From the above dimensions it will be seen that a human form might, without much inconvenience, be placed made. The narrow part, which was the only opening, was placed agranat the medium's chest, two flaps at the side of the opening, passing under his arms, were securely tred behind his back, both the medium's arms remaining free. The larger part medium being sented on a chair before the table. Inside ence of free "apirit-life" locked up in a mak! Meanwhile John's" voice was heard outside the bag, right overbond, holding convermation with no amount the test As to the difference between the eyes of the medium Inside, the fairy-hells were played upon, and, Judging udes and upper portion of the spirit-prison, it accord evident we were holding at least one substantial prisoner with "John" outside, continued for some twenty minutes, when one of the prisoners volunteered to give an exten-"free of ble s" voice was again heard overhead, pience y completting of the treatment he had received. Now here, represented an equal number of materialisations I am unable to affirm, since voices are frequently beard to speak independently of substantial or visible organs of speech,

Another experiment, equally successful, was as follows: luminous slates, this time standing in full form behind the medium. I purposely engaged in some conversa on th "John," in order to satisfy myself that "John was ot a "form" made up for the occasion, s.c., on imitation "John King." I saw the medium still scoted, and in deep trance, whilst " John " was standing beland and answering my remarks. Thou, the luminous slates having been replaced upon the table. John once more shower moself wit the a sudden movement, from the left side of the medium, backwards. It would be atterly impossible for any human being to imitate this. The form neither stepped nor floated sackward, but seemed to glide eideways with the swiftness of lightning.

Another test, self-imposed by "John," which I have recorded on a previous occasion, and is of the same convincing nature, the narrow welded ring on the arm of the medium, before and after the scence, was found to be absent from " John's " arm,

(To be concluded next week.)

#### THE SPIRITUAL OUTLOOK XXX

[Wa shall esteem it a favour on the part of our ressions if they will forward us, for use in this column, any allusions to Spizitealism and Psychian I Research they may come acres to be come of their for such a statement ! rending. We see a great many of these suncices, but it is obvious that there must be many relevances to the subject which do not meet on eyes box is Li hir

There could sourcely be a brighter or more hopeful outlook for the cause we love, which is that of the knowledge of truth, than the amouncement in "Lieure" of the speedy publication of the facts of Mr. Eglinton's mediumaken, so illustrated as to give thousands of reasons abuset he same advantage as they enjoyed who attended his seasces. It was also a happy thought-or nupration-to ensure the extension of the beams of "Liour" by the sum operation.

The apathy of so many Spiritualists as to any inseconary effort-any extension of what they know of truth to others-is couly accounted for. The ture cary the demonstration of any truth the lets trouble we take. "They can know if they like," wo say and " they are sure to loser some time." One who bonoves that printing tracts or Hibios will save souls from sternous tertures gives sixpenses or gran shillings to the Treet or Bible some cen. The Spiritualist who believes that all souls are in the part of progress line no such mative to just his hards rate Jon physicalty.

For much the more creshs to a Spiritualist like Mr. Blackburn, who has done to much for mediums, and inconfigators, and to whose wise and benevolent Liberality we are indebted for some of the most thorough favortigations over made-some of the strongest testimony over published. The estesishing thing Is that any who have the power of dotag such work should

Ladmit that Spiritualists have no such motives as these which implies the Salvatout Army. It is not a matter of life and doubt. We have no cell to blow tramputs or best drame. hat we ought in do what we can in give to others who dealer it may truth that is a source of comfort to purselyon-much more a truth that may rescue men from agony and dopen-

The amounts of the religious Press stress Spiritualism just and thoughts of the other now on both sides of the Atlantic cannot fail to awaken implify and promote investigation. The Satania theory, of course, atturby everthrows the charge of fraud. To be diabulical the manifestations must be real. The juggl ug tricks of a pretouled medium are me thing, the Sature devices which the two records were in perfect agreement. might deceive the "very clock" must be semething quite different. Signs and wonders which pertons the speedy destruction of our planet, or the universe itself, may be Saturie, but they cannot be humber,

So far, the religious Press is doing our work. The ghost stories in magazines and newspapers are also doing it. The studies of witcheraft, and what are considered the superstitions of savages, are likewise calling attention to Spiritualian. The free-thought," too, which prompts to the investigation of every fast of human interest current fall to protecte a knowledge of Spiritualians

By the way, dal you over road "the Shorter Catechiam agreed upon by the Assembly of Divines at Westminster "T A friend, a Souttish chargyman, has kindly cent me a copy, printed by authority of Her Majesty the Queen. It begins with the eletef out of man " and grots with the Apostles Creed. But there was a blank page of the cover to fill which something was wanted, se true, and if possible, about as usuful at the Cateolium itself. To make a mare thing of it the cautious Scotch printer has given us the meltiplienties table

Now my question is whether the words "printed by nothersty," under the lien and unicorn, "Hone soil que sent y Dies of men doul," apply to the fact that 12 by 13 equal 144. Does Hor Gramous Majesty equally authorise the statement that "two and two make four" and the effectual calling of Calvinistic theology

"From the beginning of the world to the resurrection of Christ, reconcile himself to the fact that his favourite daughter, who

clod appointed the account day of the week to be the weekly Sabbath , and the first day of the week ever since, to continue to the end of the world, which is the Christian Sabbath "; and where, between the two lids of the Bible, is there any ground

" Prove all things hold fast to that which is good." That is a the Bible. "Try the spirita" is also a Dibliest injunction. From General to Revelation we have a continuous record of spiritual manifestations. Of course, no ne who believes has Bible can question the possibility of such manifestations—or doubt that they may " happen" at any time of anywhere. The handwriting on the wall of the banquoting hall at Kinoveh is scated in the manages written on state or paper at a scance. Why should men who have seen, heard, and felt, the senterialised specifum Kn 3.7 flad any difficulty in believing that the quite master warre of Smauel had a convergation with King Saul!

The good mediums-the prophets-were sometimes killed as well as the had unes, the witches, who have been bestell or hanged by handrods and thousands, absent to our own day Even new, our mediana are pursecuted and at times imprisoned Under existing English law may London suggistrate would have sent Mr Eguaton to good for three months, for his slate-writing sistion with Mr. Gladitons-while he, Prince Minister of England, knowing there is such a law, does not move for its repeal He profits by the power of an adoptable medium for spiritual manifestations, declares that they are worthy of secontific inrestigation, and yet linves in force a law under which Mr Eglatten could be aget to hard labour in prison for three months for every exhibition of a power which Mr Gladetone thinks. men of source ought to investigate ! Can incommutatory go much further?

The Bracest Light, a new Spiritualist weekly in New York, gives a pretty anacdote of the Swedish novelat, Frederika Bremor. During her American tour she enjoyed, as the writer if this note has dotte, the generous hospitality of Madanes Le-Vert, of Mobile, Alabama. It was observed that at a certain hour every day she ratired to her room. This esteed damppositionite to visitors, but her explanation was that she had prontered this hour to her sister, who set at the same time as Swoden, each for the time being conscious of the feelings

In a similar way Judge Edmunds, during a tour in Mexico. was in daily communion with his daughter in Brooklyn, Kew York. Both remeded their experiences from day to day, and

The hold that Spectanlism has upon great matches of intel ligant, cultivated people in England is abown by the workly meetings he don near your cours as a min in the fact that Mrs and I A Reduce to has for the use to. In crowd the branch i give a series of inspirational parameter of surrey eve as at the N w T w Hale in High street. Kensington. to full a in appreciative audiences.

"The spirits seem letern and to give as all the instruction we are likely to make a good use of I reed for example that the controls of Miss Bornl discoursed alequently on health, sarriage, an the combitums necessary for the generation of a higher type of immanity. And we may reasonably expect that pur town il matheir opportunition for the improvement of the race. In fact, knowing their power over the minds of all countries speakers and writers, may not we lairly attribute a large part of our best lessens on life health and culture to spend wisdom nur thereo. For me person contentially me rested, a hundred may be unconsciously influenced.

Victor Hugo, who held such a mastery over the mind of France, though he declined the proffered and of the Church, lectated his be of in God and ministality, and his doors for in prayers of all good people. His spiritualistic idum were content both v his writings and from his conversations with friends We do not die altogether, he would say four andividuality services; and, while I am talking to you, I am certain that all around me are the souls of all the dear ones Or have we the Queen's authority for the statement that, that I have lost and who hear ma." He could never quite

#### A PLEA FOR CANDID INQUIRY

For nearly half a century phenonena have been presented to the world, which do not come within the range of those facts that are generally recognized by the seknow ledged exponents of natural science. They have, as, judging by experience, might have been expected, been almost universally rejected.

The scientific world in precisely in the same position In relation to what have neen termed appritual phenomena, The man who, in his conceit, approaches a payelise with an as was the knowed world in relation to cosmic have peror to the advent of Galileo, and as were the theologians and astronomors in relation to the structure and dynamic laws of the universe prior to the advents of Kepler, Copernicus, Unlike, and our own launortal Newton

accepted the diete of the learned, and the seeming truths probably, during the first experiment, but certainly after of Ptolemy in relation to cosmical arrangements were, by the investigation, receive what would be to him absolute the masses, accepted as thoroughly in the Middle Ages as are the real phenomena and philosophy of comis chasilication investigation, he thought extends the range of the possible. now accepted in accordance with the more accurate physical leachings of the present day

Popular opinion in reference to abstrace and in a some at present infinite phonomens, has been, is now, and probably ever will be valueless as evidence; it is morely a multitudinous gregarious acceptance of the teachings of the learned, and specially of specialists in their respective departments

Take for example spectrum analysis as an illustration. adults who do not accept the teachings of spectroscopists, and feel confident that sun, stars and nebules have been successfully analysed by them.

In relation to remote, occult, and abstrace phenomena, the mass of mankind must, as a matter of necessity, accept the teachings of the learned when there is among them a consulters of opinion.

as valuable and reliable as are the investigations and induced by magnetization presents nearly the same sympto inferences of the specially-trained few,

as the softness of pasts and the hardness of arm, the mobility of water and its immobility in the form of ice. The opinion of an illiterate but ordinarily mue man is, in reference to the pasts and iron, water and ice, as good a is that of the most profound scientist, in respect to hard-The Annual Subscriptors for 'Liunt." post free in any address ment and softness, mobility and immobility, but as regards within the United Kingdom, or to places comprised within the Postal I the laws which underlie the facts, the two men are upon United States, and British I the laws which underlie the facts, the two men are upon North America, is 10s. Add. per statem, forwarded to our office in an entirely different plane. They are more or less known where to the scientist, but are quite beyond the hen of the

This latter rule applied to some of the facts of modern Spiritualism, and especially to such phenomena as are those meluded under the term psychography, or writings produced under conditions in which no embodied human being can \* Their may never to obtained from F. W. Art. of A. Ave Maria and produce them, via, in a closed and locked or scaled slate, and on a Bookes for a prime closed, maked, and carefully used book. Denduced not in darkness but in broad daylight, not in recesses, but in the critical investigator's own hand, not on slates and books provided by the psychic, but on slates and books furnished by this sceptical investigator, and without either slate or book passing from his own keeping -- we affirm that evidence such as that, which is of absent daily occurrence, is as valid in the experience of the ordinarily shrewd and intelligent men as it is in the experience of those who have made physical science a specific life study

In these facts, which the writer and thousands of other cautious and critical observers have witnessed under various test conditions, we have physical phenomena appealing to the candid and capable of critical investigation. Critical investigation is one thing , degrettic, blatant, esperellious, hypocritical investigation is quite smother. redevede foregone conclusion that he is an impostor, may possibly not obtain that which he professes to seek, but any candid inquirer who seeks for avidence of an alleged occult fact in the presence of a paychic, and does not assume (because it is mere assumption) that he knows all The great mass of markind, as a matter of course, the physical and psychological laws of the universe, will evidence of a psychographic power which, prior to his

num being, that there are some who never surmount the many, if not most, of the inquirers into Spiritua issu are obstacles that his in the way of a personal expenses of animated by desires and longings such as these. the reality of these occult phenomens. But these are comparatively very few, and I can refer the cause only to the manufest to all who read the records printed on the subject

mounted. There are various motives that induce persons a number of eases—I suppose I should say in a majority of to engage in an investigation that it not free from risk cases—the desire is not gratified, the long up is must siled, Of the risk they know nothing when undertaking the and the bereaved mourner is fain to believe that it is not well investigation. Some escape it altogether, by reason of their that his aching, yearning wish should drag his level one not parsuing the subject far enough. Some find themselves back to this nether world. It is well if he adopts so face to face with it unprepared, and suffer or escape as the resecuable a belief , but it remains that the affections, when chance may be. Some elect, knowingly, to reckes with deeply sterred, most strongly urge a man to seek an untry what may come, and penetrate beyond the domain of the to the world of sport, and also most frequently unfit han Dwelfer on the Threshold, as cocalt writers call the for a calm judgment on the results that he obtains. guardian of the new world into which they wish to pone trate. But for all, whether they do or do not know it. there is a rectain risk

by personal experience of that shout which the world is joy, but comotines of sorrow, on if it were contemplating some talking. There are not many ways open, and the experiences of the average public circle are more or less satisfactory in proportion as the mind of the observer is more or less critical. It is very seldom, so far as I am able to judge by experience, that mere curiously achieves with faction. And this I believe to be owing to the fact, in some pro deast more or less served or capable of solution by with spiritual things, spiritually discerned, and thus only action of this law. These phenomena, those minutes of information, are not evolved from our plane, but are governed by laws with the making of which we have no those due to organic alterations of atructure. Reserves concern, and with the action of which we are very inperfectly acquainted.

The acceptable inquirer is of another type. He seeks out phenomens that have so frequently occurred as to lio; fairly subject to imquiry from his point of view. He denow well estimate. It is only when he tries to act as master 1837 Houlache. Forty pages of "Revolutions of the Globe repeat an experiment as the chemist can, for he has to recken with an Unness and Unknown Agent whom he has no power of commanding. But abort of that, the whole of better for the cause of truth.

is attracted to the subject by a purely human longing for possible. It is exact to say that every man has within according to us, by the Sprittat doctrine of Re-incarnation. him an instruct of self-preservation, whereby he preserves Le Meserger

to its consummation his own sarthly life, an instanct of reproduction, whereby he provides for the perpetuation of his race, and an instanct of immortality, which testifies to the potentiality within his race of future existence. To these must now be added the instanct which causes a man, From what has hitherto been said, it must not be once the gates are agar, to seek communion with those who unagined that the difficulties in the way of the inquirer are have gone before him. As often as not he argues from either exclusively those of his own making or necessarily his own consciousness of immortality to their continued insuperable. I am bound to my, as the expression of my life, and he seeks communion with them. I occave that

#### In Memoriam.

#### LISETTE MANDOUGALL GREGORY By "M.A. (Oxox.)"

Once in in this changeful epoch the Augel whose a stion is It control has moved from our midst a notable presence. My earliest reminiscences of Spiritualism, in common with those of many others, are associated with the no nost Moc Validoc as D.C. regory in her house I witnessed many of its most conneckable phenomena at her table I met most of the Sporttee sits of thus and other countries with whose neguantance I am honoured. She was emphationly a leader amongst as, a "Mother in Israel," whom we all regarded with the affectments respect that her pure soudness of heart, her unwavering seal, and her bright ratel lectual sympathy could not fail to inspire. She never tired of devising means to string the facts and truths that she her self so highly valued to the notice of those who she thought either around their comfort for themselves, or could advance their acceptance is the world. Since she seemic a resident in London her life was one long crusade for the forther to and dissemination of her faith. Her louse was open to a by arrest, her resources, of whatever kind, were absolutely at the service of Spectualion. She spont herself in a

m sold too often, I sailly think, her overmastering zent council her to do what, for her own sake, had best been left undere. But no word of even se that criticism should find a phase where the intent was no pury, and the self-sacridee so complete. place as I must pen a record of her ife, to remember her on the encodement in set of a firth which she hold without an after-thought of doubt. Sportualism was to her a religion, and she lived, as also cied is votary of its entiel. dog facts. She was essentially a religious woman, a hundle and streete fostower of the Christ. I believe that or orthodoxy as glit successfully be copugned by a theological sat I am fully assured that no one who knew her would Educburgh. deny to her the credit of a sincere and aluple Christian faith. She put ands from her as hateful all the meaner conseptions of the Supreme which depict Run as vindictive, coated his telepte and entires. Does after no see the sac came t tyreamiens, and, mrs word, humos-with the pressons of a man without his sympathy and love, "That is not the God her my a good from He married Mos Fastfar, only I know," the would say when some theological dogsaw prosped out in conversation. Over and over again the x but a few years after the neutring and war Mrs. Cres. presses to me her delight at the idea of God contained in who is life age as I wrapped up in her only groundchild, who my book of "Spirit Teachings," and her thorough sympathy passed away at the ago of eighteen about fear 5 as any shown, not in theological systems, but in the Gospel pages. was able to perfectly to nesterialise in her drawing come in the She was a true lover and worshipper of the Puttern-life but there again her conceptions of it were not those of orthodox theology

For a rong time her friends must have laid forced upon before she was delivered from its burden. She had fived her son. out the full term of earthly life, and completed a decade beyond that which the Padmut assigned as the life of man, and she had been long prepared to go. She had auffered untek from a racking cough, and it was in one of its paroxysus that a ruptured vessel terminated her earthly life, and set her spirit free. It was on Whit-Sunday-a happy day for the new birth of her spirit-that the entered into her new life. She had been alone, and laid account. as well as usual, when her belt rang foully, and her servants. who had always surrounded her with such unto and be got, but no human aid would have availed her. Her or an

hour was come, and she was ready for it. Let us who knew and loved her pray that her soul may rest in peace, and that she may enter into the fruition of that knowledge which she was the means of bringing to so many of as on earth. Her memory will long remain green for the sweet aroma of charity, sincerity, and love that broathes

An intimate friend who, of late years, saw much of our departed friend, has kindly placed at my disposal some particulars which may fitly be appended

Mrs. Makdougall Gregory was one of three states, and the corol daughter of Mr. John Scott, H E.T.C.S., son of Mr. John Scott of Gala.

#### ADVICE TO INQUIRERS.

#### The Conduct of Circles -- By H.S. (Curu.)

If you wish to see whether Spiritualism is really only jurgiery and imposture, try it by personal experiment

If you can get an introduction to some experienced Spiritualial. on whose good thith you can rely, ask bim for advice; and, if he is holding private circles, suck pertulence to attend one to see how to conduct sources, and what to expect.

There is, however, difficulty in chtaining access to private circles, and, in any case, yet must rely chiefly on experiences in your own family circle, or amongst your own friends, all strangers being axeluded. The bulk of Spiritasthets have gained conviction than.

Form a circle of from four to eight persons, half, or at least two of negative, pussive temperament, and prefembly of the female sax, the rest of a more positive type

Sit, positive and negative alternately, accure against disturbance, in aubitual light, and in confortable and unconstrained positions, reand an uncovered table of convenient size. Place the paims of the hands that upon its upper surface. The hands of each sitter need not touch those of his neighbour, though the practice is respondly adopted.

Do not concentrate attention too fixelly on the expected manfestations. Engage in chorrist but not frivaless conversation. Avoid dispute or argument. Scopticians has no determent effect, but a critice aproxi of opposition in a person of determined will may totally stop or duckledly impole manifestations. If conversation flage, needs is a great help, if it he agreeable to all, and not of a kind to irritate the semitive out. Patience is amented; and it may be necessary to meet ten or twelve times, at short intervals, before saything secure. If after such trial you still fail, form a frock circle. Lines at the reason of your fallars, eliminate the inharmonious elements, and introduce others. An hour should be

The first indications of anceson usually are a each breast passing orar the hands, with involuntary twitching of the hands and arms of some of the sitters, and a secucion of throbbing in the table. These indications, at first so slight as to came doubt as to their reality, will usually develop with more or loss rapidity.

If the table moves, let your presents be an gentle on its serface that you are sure you are not sailing its motions. After some time you will probably find that the movement will continue if your hands are held seer, but not in centact with it. Do not, bewerer, To he unto the movement is awared, and be in no harry to get

When you think that the time has come, let some one take command of the circle and art as apolesman. Explain to the usseen Intelligence that an agreed code of signals is desirable, and not that a tilt may be given an the alphabet in slowly repeated at the several setters which form the word that the Intelligence wishes to spell. It is convenient to and a single tilt for No, three for Yes, and two to express doubt or ancertainty.

When a st. dactory communication has been established, ask of you are right a place? are if not, what order you should take. ther this ask who the late before projects to be, which of the company is the medium and not relevant ones nonmon next. Ascerne 1, in the " files by that exists in street og the percenents at that will exact their Patience will remove by the there is a real too to on the part of the Intelligence to peak with you. If you easy satisfy you cell at first dust it is ness like to

and If were entry satisfy you sell at first dust it is seen he to speak in an Intel games separate from that of any person present out will have pathed rates.

The signals may take the form of raps. It so, not the saint rates of signals, and nak as the maps become clear may describe that the table, or in a part of he rates where her any demonstrably not produced by any natural means out assumently exacting to see its own nevers. These compliancements are the large generates as after see, it persons to be separate as an attention, and will reserve using hampered as never a restrictions. It restants and will reserve using hampered as never a restrictions ries along greatly with the alliers to make the manufacturious ries along of first mays one or efficiency.

#### Testimony of Harry Keller.

Placry Kellar, a diatoguished professor of legeralemain. investigated the slate-writing phenomena which occurred in the presence of Mr Egilnton, at Calcutto, in January, 1882, and on the 25th of that month he addressed a letter to the editor of the Indian Daily Asses, at which he said :--

" In your issue of the 13th January I stated that I should be glad of an opportunity of participating in a scance with a view of giving an incomes a time as a wholese is a r especity of a professional prostningitator, I could give a natural explanation of effects said to be produced by spirites and

"I am included to the courtery of Mr Eglinton, the spar-tualistic medium now in Calcutta, and of his host, Mr. J. Youge a for affording me the apportunity I eraved

It is needless to may I went as a scopic, but I must own that I have come away utterly unable to explain, by any natural means, the phonomena that I witnessed on Tuckday evening. I will be a brief description of what took place."

After describing several successful experiments, Mr. Kellar proceeds :--

"In respect to the above manifestations, I can only my that I do not expect my account of them to gain general credens. Forty-eight hours before I should not have behoved anyone who described such manifestations under similar circumulances. I still remain a scoptio as regards Sparitualism, but 1877

WHAT CONJURERS SAY ABOUT PSYCHICAL I repeat my inability to explain or account for what must have been an intelligent force that produced the writing on the slate, who be I my senses are to be relied on, was in no way the result of trackery or aleight of hand."

On the 30th of the same month Mr Kellar addressed another letter to the Indian Daily News, reporting some experiences of another kind with Mr. Eglinton, and regardms which he said :-

In conclusion, let me state that after a most stringent trial at no other conclusion than that there was no trace of trickery IH MRY form, nor was there in the room any mechanism o conjucers imitale levilation or the floating lest could not junuibly the the in the ruces in which we were necessibled.

#### The Testimony of Professor Jacobs.

Professor Jacobs, writing to the editor of Licht wells Locks, April 10th, 1881, in reference to phenomena which occurred in Paris through the Brothern Dovenport, and :-

# ASYLUMS.

By Samoni Eadon, M.D., M.A. (Eory.), Ph. D.

Man is a compound being. Outwardly, there is the hodily and visible man, inwardly, the invisible body with the need as its occupant. The former, the outcome of the latter, is an organization drugged for earth-life actions, purposes, and concornments. What spirit is, per se, we know not; what matter is, per se, we know not. There is, however, a dynamic force recently discovered, and which has always existed, though unknown, through, and by which, the luvisible man within is found to not on the corporate or visible man soldout. It is this median of inter-communication and its laws of action which will claim our attention and investigation, as it may tend to close up some forms of discuss.

CONTRACT

respects, from the other known forces of the physicists. It this view, which is really the generalisation of every

Institute and Ingestion. IV.

The Evidence for Independent with these it is always more or less compense. In a system to the Fasteres at Mr. Egiston.

The Fasteres at Mr. Egiston. that ight nor liest not electricity nor magnetism, a that gh pure and simple form of od. In motion it is not so rapid as that of light, but passes through solid bodies more quickly than heat. It radiates from all bodies, ammal, [The Editor of "Leave" desires it to be distinctly mineral, and vegotable, in every direction, and when wen understood that he can accept no responsibility or to the in the dark, by good Sensitives, all bodies appear like dangreeable warmth from the moon and the other planets of our system, but a grateful coolness from the san and the NATURAL SENSITIVES AND OUR LUNATIC fixed stars. Like terrestrial magnetism, it is point in its distribution; the North Pole being negative and cold, the south positive and warm.

> With regard to the body, the brain is the greet source of odio armdutton, and from that focus the fluid streams to, and through, every part of the body. In the right hand, the force is negative and cold, and emits a blue light from the flugers; in the left, it is positive, and warm, and from the fingers, a light, of a red or orange colour, more or less,

> This force over tends to an equilibrium; hence, disturbances in odio disculation, or its abnormal accumulation in vital organs, give rise to symptoms and pathological states adverse to those of benith in its most lively forms.

From what has been advanced, it is not difficult to draw the inference, that body and spirit act and react on each mysticisms of metaphysics, some uncortainties of physiologic other, by virtue of the odylic fluid or force interflowing in speculations, and, perhaps, enable philosophers to lay the due manutar and volume, and permeating every organ with foundations of a correct mente-physicogic science of mind, its life-testaining influence. Hence, to be normal or not to my, a rational and natural treatment of certain corult healthful, this force should pervade every part in due equilibrium, neither too much, nor too little. The brain-The sportt-man, in the present life, can only make known the great odylic battery-is so charged as to control every its powers, by means of a material organization adapted to part of the system, the minutest atom of the extremities its matere, and a dynamic force, in harmony with the receiving the edic force in due quantity and proportion. The myssible and visible framework of which it is the connecting blood, also, is influenced during every moment of its circulalink. In perfect health, there is a correct reciprocity of tion, the absorbents too feel the odic whip ever ready to action between spirit-man and body-man by means of this lash them for one moment's neglect of duty. The nerves, natural medium, known as the od, or odylic ferce, which is soon, become torpid and devoid of feeting, if they fall to dispersed through the meterial or body-organization, respond to this vital gymnast, as it trips with light foraccording to certain pre-ordained and normal conditions, tastic motion, along their dehentely invisible atrunds. The not only with regard to the body, generally, but in respect boxes, in health, glow with a sort of odio incandescence of the brain, particularly—that marvellously wondrous and the whole body is radiant with bright light to the cerebral formation for the soul's action during the earth-life oye of a Sensitiva. The odic force, in its wide and destined forms of distribution, is, in fact, the inclinin of This od or odylic fluid permeates through, impinges on, preserving and continuing human life. So long as those and irradiates every atom of the human body when odylio streams roll on, as nature intended, there is health, manifesting itself under normal conditions, either by giving if there is retardation, or reversal of currents, there will be elasticity, vigour, and becyancy to the whole body, or, by disease in some form or other. If the normal or natural firing the intellectual organs, with bright and original flow of this finally attenuated and influitesimally dynamic thoughts, or the emotional, with feelings, good, or the agent cannot be restored, either by ordinary, or by extraordinary means, death, sooner or later, of necessity, takes This grand connecting link between the spiritual and place, for the object of all kinds of treatment which over has corporeal man-the od force, as it has been called by been, is now, and that ever will be practised, can be no other, Baron von Reichenbach, its discoverer, is generated in whether known to medical men or not, than the restortample volumes in the body by the natural processes of tion of the reversal of the odio currents to their primary and secondary assimilation, the necessary chemical natural or normal states. Disturbances, atoppages, and changes, the respiratory processes, and the other emborations reversals of flow, are the sources, whether acknowof the hody. It is a force analogous to, yet different, in many ledged or not, of every form of disease. Taking

theory of medicane cour put forth to account for diseased | men is to him real and objectively present. The subject in or on the human organism there is no wonder, in the this condition can converse with the absent, or, rising to a present artificial atute of society, when every man is in higher state of spontaneous extasis, hold converse with the force-hont to get rich, or so gain distinction, literary, denusers of the spiritual world. To outsiders, this is viewed theological, legal, or military, that abnormal distarbaness as more dreaming—a species of insanity, in fact, and the should take place throughout the wendrously widespread | party is considered a proper subject for a lunatic saylam, web-work of the countless and invisibly acting strands of but thus is not so. In time, this sensitive wakes up into the nervous system, or, that the harmonicals working has ordinary state of consciousness, not knowing the between the spirit-man and the body-man, should become so hightest circumstance which had taken place in the previous frequently an atter impossibility on this earth-life of cars, or, that a double form of consciousness, or of ecstacy, or of trance, should be apperinduced. If we only throw ande the dunce's cap, and reflect a little on the present state of the skill of an enlightened physician to restore the magnetoid things, the wonder is, that society should be as same as it currents into their natural or normal channels.

Insurity an discarbance, more or loss, in the cares at onnot to mention, in that of the liver, stomach ungrit a other vital parts, which bouldes suffering from their own spread local odic disturbances, are in full sympathy with the sciences returned. Her lover called to see her, but was countril polar disturbances from the cerebral organs to received with all the coolness of a stranger, and with perfect the pedal extremeter. Need we be surprised, in such an middlerence. All that had previously passed between them abnormal condition of body, that encently, or a state of was a perfect blank. This lody had not been means in the high-wrought sometivenous should apread through all usual acceptation of the word, but had suffered from a chasses of society, and its victims be counted by tens of superinduced degree of intense sensitiveness which had dis-

Our phicet in this paper is to call attention specially to a form of insunity (falsely so called), and to point out almpie and common-souse means-scientific in fact, but perhaps not so, according to the already, and too soon wrapped up notions of some parties who seem not to know that education is the work of a lifetime, and that the nequalities of new ideas should only terremute with the grave-means, naloed, by which this form of immity may be effectually sured, and often has been enred when all other measures , case. have been tried in vain-

We admit, and rejoice to record, that the moral management of the lumne has of late years greatly improved. This may be traced to more correct views on the philosophy of maid, owing to the brain being now admitted as the organ of the spirit's notion during this life. The late Dr. Concily, in all our length eavigns, and a staff of spirituate regularly of the Hanwell Launtie Asylum, introduced many improvements and modifications in the treatment of the insane. These wore inevitable deductions and inferences derived from his thorough knowledge of the structure and physiology ! of the brain as explained and demonstrated by the writings brain—the great odylis buttery of the system—to of Gol', Sparsheim, and Combe, but the additional introduction of the human-magnetoid, or odylic processes, by the physicians of our naylums, in certain cases, i.e., in natural, or superinduced Smusitives, and Ohirvoyants, would be another stop of advance in respect of carative treatment, and ought to be adopted by every physician at the head of our lumbte my ums.

into play the laws of auggestion.

the head to the nit of the stomach, by restoring a certain confined in Ignatic stylens. amount of equilibrium in the odylic circulation, has pro! If it is humans to point out such a simple mode of cure, subdued, and sleep brought on, and, in this class of cliqueism and trades union actions of etiquette ! atients, it is easily and often quickly done. Sometimes man is now in a world of his own. All that is heard and society is a natural agrarity, and susceptible to influences

mental condition.

Now, the above is not a real case of innancty, but morely one of maidistribution of the odic fluid, and requires only

A lady once fell spontaneously into a state of accoud conscionances, and, in that condition, became engaged to a of the odic fluid, in one or more of the organs of the brain, gentleman in marriage. Before the event took place, how ever, the lady was seized with a severe fever, from which is due time also recovered, and her ordinary or natural conturbed and thrown out of balance the healthy equilibrium of the odylic flord.

This, and many other alleged cases may easily be cured, wither by the long magnetoid or edylic peat, or by looking intently on a zine and copper disc held in the palm of the left hand, or by gazing with intense earnestness and willpower into the eyes of the patient, or, according to Dr. Brand's plan, by the patient looking apwards, and a little on one nide on some bright object, as the ond of a silver poscil-

Any of the above methods will bring on, sooner or later, a deep sleep. When this condition is attained, the processes for equalizing the edic Suid may then be made, and in due time a saturactory, permanent, and naturallybrought-about-cure, may be expected.

Methods of the kind just pointed out should be adopted set aside for the purpose of inducing the odylic sleep, and of performing other recuperative manipulations under the direction and guidance of the physician.

The object in this kind of treatment is to restore the healthy action; to distribute and equalise the field in every part, and to administer such medicines as experience has sanctioned, and adopt those hygienic measures, the praction of which, during the last quarter of a century, in our asylume has been found so beneficial.

There are many other nervous diseases to which this form of treatment might prove of service; as, in producing It should be borne in mind, that all lumnion (of this intensibility to pain in surgical operations (much safer than class) are highly susceptible and impressionable, and may chloroform), also, in rhousesties, neuralgia, and beadache; easily be brought under control, often by a concentrated in banishing wakefulness and inducing refreshing sleep; in glanco of the oye, or a first tone and command of the voice , relieving and often caring paralysis, hysteria, catalogay, and, sometimes, they may be influenced simply by bringing chores, &c. To point out its uses in the above maindies was not our object, but to make evident, to everybody, a simple The ordinary way of making passes from the crown of mode of ours, for many who are unnecessarily and cruelly

cured, in countless cases, refreshing sleep, and dessipated, as 1 how much more grandly moral, hely, and Divine would it if by magic, many old annoying symptoms. To procure, be, in a physician, boldly to introduce such measures for however, fall recuperative effects, the brain must be the amelioration of his suffering patients, despite medical

We, none of us, are far removed from the border-line persons are so sensitive that they spontaneously fall into the of resulty, and it behaves as and the public to see that the odylic sleep with the eyes wide open, and without any treatment in our asylums is corration as well as humans, for, recollection of the previous state of consciousness. The be it remembered, that every third or fourth person is

which tend to disturb, more or less, the normal circulation of this nervo-vital fluid in the system.

Thousands of highly consitive and impressionable females, and men of lofty culture and profound intellectual attainments, up materal sensitives, and eminently susceptible to odvlic influences, not only from surrounding objects but also from persons, whose od force is antagonistic to meet our eyes, -- En. oy "Leouv." their own. Many persons of this class have narrowly escaped being incurcerated in a lunatic asylum for life under the impression that they were persons of unsound need, or beside themselves. It is to avoid such dire mishaps. and prevent the stupid incorcerations of such persons that this paper has been written. When public opinion is rafficiently enlightened, no private pressure, for sorded are reported in the leading journals. ends can avail in withdrawing nervous and highly-sensitive natures from society, and prolonging a secondary consciousnow, the opposite of that in which they had been born But enough. The question is. Will the kind of treatment advocated in this paper he introduced into our asylumn. public or private ? The honout, kind-hearted, and just part scientific researches in Spiritualism of Crookes, Wathou, and of the community send their friends to these resorts to be golfner, and now gives in to faith-hearing? This is well-very cared, and not to be tinkered at, secundum ertem. If a wat, males of certain methods and medicines pathogenetic to certain cases. are recommended, as excellently curative of patients in our lunatic asylums, who intervenes and plays the incarnate stuped, between the asylum-supporting-public, and the poor unfortunate patient! Who is it who stands at the door! of these institutions and, with swaggering mice and proud gesticulation, assume that all knowledge centres Who, or what did it, is an informed from the facts. Give the in their own precious selves? Who is it who thunders forth, facts and people out find their inferences. in proud deflance of public opinion, "Nullius addictos jurare non verba magneter "I If it be the dector himself. he, above all others, not only for his own reputation and that of the institution over which he preside, and having lable out the mix, and remained amount amounts amounted in the welfare of his patients at heart,-should not very differently. On no account should be poch-pook any means, method of magnetum practised at Boston. The Daily Telegraph if at all calculated to restore the patient to a healthy coudtion, merely because it is povel or to avoid a little extra at the Agricultural Rall, at which 250 invalida on couches and trouble. If this is the case with any physicians, it will not to bathchairs were "anomated with oil in the name of the be long ore public opinion, with its everpowering against, Lord," and resolutely prayed for. Wonders will make reason, will make itself known, and show how best to deal with such impersonations of standatillism by leaving them "alone in their glory I" with recess without patients, grounds without admirers, and a routine of dulness which ends in departure for ever

new ideas. The approaching tide of moderal improvement to the faith-meaning no man can stop. Vain will be the attempt of any medical Dame Partington, with largely-developed and cultured selfexteem, with broom in hand, to sweep back the ourolling waters of therapoutic improvements, of whateverdescription, in this late period of the nineteenth century

INSTANTANDOUS DISECT WRITERS.-Mr. J. W. Caldwoll, the Donato of the United States, informathe Bouncrof Light, April 4th, that at the camp meeting at Clinton, in 1883, he met Dr. Debuen, of Magnokota, lows, who suggested that he should give a course of his loctures and domonstrations on magnotism, &c., in his district, and he did so. During his course of a fortnight, he was Dr. Dobson's guest. He found Dr. Dobson was a mediam for the direct writing. He med to have season: "Yh slates cleaned by myself," says Mr. Caldwell, "and hald in any way to believe all their somes. I pleased, I received rapidly written monages, with the signs. tures of departed relatives known to none present but myself Dr. Dobson teld me that spirits could cause writing to come instantaneously, reminding him of the instantaneous process m photography. At the next sence I handed to him a slate, which I has electron, and on my putting a question be pushed two-thirds of it under the table-flap, and withdraw it almost unstantaneously with four lines of writing on it. I sponged these of, and he again held it in the rums manner, and after a paste of a fraction of a second drew it back with more writing on it thus time that before. The experiment was repeated a doors times the messages differed, but the handwriting, first and messculine, was the mass in each." -Le Messager.

### THE SPIRITUAL OUTLOOK. XXXI

[We shall extensu a a favour on the part of our readers I they will forward us, for use in this column, any allusions to Spiritonium and Psychical Research they may come scross in the course of their reading: We see a great many of these curselves, but it is obvious that there must be many references to the subject which do not

It seems to see the bear a of fast! bearing spot be recognition of Spiritualism. Miracles, in spite of Matthew Arnold and all the materia.ut Churchmen and philosophers, dehappen. Gmnt the facts of faith-healing, and all that Sparitualists assert may be easily granted. Thus is our actual outlook to-day. Supernatural facts, or what are so considered,

I do not forget what the Times and Standard did for the Brothers Davenport, nor that Thackeray nearly wrocked the most sopular . magazines by publishing a full account of one of Daniel Home a admissa, by Robert Boll. But many things have has greated notice then. The daily Prost has accusting upon res. The

Farth-cure, mind-cure, meanntmin-I do not much care how they explain the facts if they will only publish them. This is what we want, and all we want for Spiritualius. Describe the conditions and publish the facts. Only this is wanted. It tells the whole story, and every one may be left to draw his own conclusions. Buck a thing was done under such conditions.

For example, at one of the experiments of the Dialectical Society every person present knolt in his chair facing a large space. The Timerhas had a leading article on the milel cure. a has published a report of a close half-column on the faith cures

The Pall Mall Greette gave the giat of the faith healing enterprise in a briefer weager is, but did not suppress the fact that a rea the true had been exhausted in hearing the ter mestice of men and women practically cared—time being annual . three immutes for each—all who had not had this prestainty were So it will be with everybody who sets his face against saked to rise, and about 250 mon and women store it, it we more

> The mielligent setton of invisible forces has proven, in short, what we call Sparitualism. The evidence that these intelligent forces are human personalities, in many cases we a news to us in this life spirits seatest and search is over whething Wo see how and feel hem. They become an apprifest to our sensor as they over did as life

> Spartualium, then, is a body of inferences which we draw from a collection of facts, and is as much a selected as astronomy or goology. The only difference is that we have learned to accept the facts of natural history, for example, on teatmony, while we demand personal testimony as to the facts of Spiritnalism. The doubting Thomases are in a large majority. They must touch, as well as see and hour, and even thou find at hand

> We welcome thought-reading, meancrism, mand care, fact healing, any and overy abnormality which will help people examine the supreme fact so thoroughly demonstrated in our tipes, the fact of spirit existence and power, the proofs of a life beyond the grave a life which goes on and on, and which, according to the testimony of our spirit friends, is ever moving higher and higher in knowledge and happiness.

Faith ource may be the result of concentrated measurerie action -a spiritual force we all exercise in some degree. The same mind-force or spiritual energy that acts on minds in

LIGHT.

W EGLINTON

ravivals may not on bodies to rostore energy and health. The MR. G. J. ROMANES ON "MIND AND MOTION." fact remains that people are auditualy hooled. The fact remains that we possess what we call spiritual powers. The Catholic Church, by its recognition of mirales, has continuously enjoyed them. Whom Protostante denied their possibility amon the days if the Apostles, they made them impossible. They destroyed fault has come, and the maracles follow it. "According to your concorning the relations between the external world of Katano faith his conce and for."

unlims the whole aspect of society would be changed. Moral, reformation, and wall mage would work together for good This is our outlook toward a near approaching future.

But our Christian friends must grow more tolerant, more pharitable—well, more Christian. The low-class religions puriodicals must rise to a higher level—morel and intellectual. For example, Mrs. McHardie should not have had the hards-

that the spirit of Samuel talked with Saul ? Door she not believe that Moses and Elias were seen by the Disciples? Does also not believe in St. Paul's neaversion for the angels that relossed the Apostles from prison? The alon of any prefessed Christian dought that the spirits of the just ever can a make with the laving ! What of the "cloud of witnesses"! West of the "introducing spirits"? And the idea that we are an exposed to Sammie delusions, while our friends are not allowed to help us ! It is too absurdly dishelical!

It appears that Mr. Watts, an English Socularies locturer, has gone to America to take the place of Mr. Channey, who has bosoms a Spiritualist. But what If Mr. Wetta should happen to attend a scuree and got converted !-- as every countle Sociarist or liable to be. The doughty "Saladin," for example—the compact, per to be sty honers and decadfully mass ken successor of Mr. Watts, as callior of the leading Socialists ram. Expurious with any good medium would may tably masse Sandan a Spiritunial, and an he is - hourst to " make buliuve," or make not bulieve, he would at once declare his newly-found knowledge. That would be a calestrophe

On the whole, I loop. "Saladen" will keep away from almediants-grounds a well both-until he has nade an end or Mr. Beschools, M.P. and Mrs. Bosoni, M.Q., and the author of the " Blaments of Social Science," People most perform their proper amotions. Mr. Bredlaugh a to doctars that there is no God and maint upon his right to assert blis axistones by a public appeal to Birn in the House of Commons.

"Saladin" is, so for as I know, the first Secularist leader who has denounced the improval teachings of some Secularist writers. His high pootic west revolts against what he calls the Cat-and Ladleisn of the left wing of Secularism, and his conversion to Spiritualism just now would be dissections, so we hope he will keep clear of Mr. Eginton, Mr. Huak, and all the mishing until the other matter is settled.

Roully, an out-and-out Socularist is far more likely to become a Spiritualist than any unituarily bigoted Christian who holds gomine Socularist is as open in ided as Mr. Cicrest me to the non satisfactory evidence.

The Spiritual Offering, "devoted to the advocacy of Special of the second to the survey of the s resessationent among us, Mr Henry Knodle, and Professor Lauradinasa

The Rede Lecture was delivered in the Senate-house, at Cambridge, by Mr. G. J Romanes, M.A., FR.S., before large and distinguished audience, provided over by the Vice-Chancellor. Mr. Romanus entitled his fecture "Mind and Motion," and in it he discussed what we at present know and the internal world of mind. After giving some account of the teaching of Hobbin, who laid it down, on the one hand, that If the Archbushop of Centerbury had as much faith as all our knowledge of the enternal world is but a knowledge of General Booth or the Bothshan leaders we might see miracles motion, and, on the other, that all our negatitions of knowof healing in St. Paul's or Westmanster Abbey. If our men page and story a sof and imply some kind of "nection, and women of "light and leading" would investigate Sparit, agriculton, or alteration, which worketh in the brain," he pointed ont, as regards the internal world, that physiology has proved ancellectual, and unfortal power would work together for social that melecular movements of pervons matter are concerned in all the processes of reflex action, sensation, perception, instruct, emotion, thought, and volition. The lecturer detailed the discoveries which of late years have been made by physiology concoming the rate at which these morements travel along narrow, the period of molecular vibrations in nerve centres, the time required for processes of thought, and the quantitative relations between brain-action and mind-action. When physiological metruhood to get up a a meet of the Christian Women's Union at monte fail to take cognisance of these relations, we gain much Chagger and declare that Spirit or our was not an impacture. All rache much cour my the movement as of norsous matter but a fact which connect actualities men has been up as yearners. By attending to the thoughts and feelings of our own to acc. yet that it was Satanto-because " the spirits of the just mover for the or are a many on one of what is going on as communicate with the living " our brants. Proceeding to contemplate the mind, considered thus as a physical goal mate need of the greatest decreacy Now, who told Mrs. Mellardu that I Does she not believe he argued that the association I need to but an Increa expressport of the fact that when some a wave of apolocular disturbance posses through any line of serve structure, it leaves behing at a change in the structure, such that it is afterwards more easy for a moder were when started from the same point to pursue the same course. Such being the intimate relation between The series and mind-action, it has become the assentifically asked a conclude I set the two cames to one another in the relation of came to effect. He pointed out that the dectrine of conscious automation is logically the only possible outcome of the theory that norvous changes are the sames of bodily changes, and, therefore, it cannot be fought on greends of physiology II we pendst in regarding the relation between rain and thought exclusively from a physiological point of iew, we must of nacousty he materialists. But it does not follow from this that the theory of Materialism is true; and other considerations of an extra-physiological kind, conclusively proves that the theory is false. We have, first, the general fact But all our knowledge of motion, and so of matter, is morely a knowledge of the medifications of mind. Therefore, so far as we are encounted, mand is necessarily prior to erceything ules. Thus the theory of Materialism assumes that one thing is produced by another thing, in spite of an obvious domonatuation that the alloged effect is necessarily prior to its cause. But further, "motion produceth nothing but motion," mys Hobbes. and yet he immediately proceeds to serums that in the case of the brain it produces, not only motion, but mind. Materialism has to meet the manuscrable question -How is it that the machinery of the brain motion produces this actnothing which is not motion? Science has now definitely proved the correlation of all the brees, and this metae that if any kind of motion could produce anything else that is not motion it would be producing what science would be bound to regard as in the strictest sense of the word a miracle, causation from brain to mind is in the atriotest sense of the word a physical impossibility. Maintumathematic the theory of Spantualism which supposes estantion to proceed from mind to hody-is, he held, but tittle lam amphilosophical than the opposite theory of Materialism. For just as it follows from the conservation of energy that motion can that wint he calls miracles unded with the Apostine. Every profess nothing but motion, so it squally follows that motion out he produced by nothing but motion. Is there, then, any examination of facts, and to their acceptance, the moment he third hypothesis in which we may kepe to find actellectual rest! If we outto the elements both of Spiritualism and of Materialism, we obtain a product which satisfies every fact of feeling on the one hand, and of observation on the other. We have only to suppose that the antithesis between mind and motion, subject and object, is itself phenomenal or apparent, not absolute or real that the securing suchty is relative to our modes of appreturnsion and therefore that any change taking place in the mino and any corresponding change taking place in the brain are not really two changes, but one change. There is thus sup-

be preducing nothing but motion, mind-changes nothing but of which he made no moution. - Yours trally, mind-changes. Both producing both simultaneously, neither could be what it is without the other, because without the other neither could be the cause which in fact it is. The use of mind to anymals is thus explained, for intelligent volition is shown to be a true cause of heddly movement, seeing that the cerebration which it involves would not otherwise be possible. This prometic theory thus serves to terminate the otherwise interminable controversy on the freedom of the will , for the theory shows it to be merely a matter of terminology whether we speak of the mend or of the brain as the cause of beddy movement. That particular kind of physical activity which takes place in the brain could not take place without the occurrence of volition, and race cord. All the requirements alike of the determinant and of the free-will hypotheses are thus estuded by a synthous which comprises these both in one. Mr. Romanos afterwards agend with their own blood, "that which died first should reviewed the opinions of the late Professor Clifford upon this subject, and concluded by observing that if it were true that the voice of sciunce must of necessity speak the language of Agnosticism, at least lot thom son to it that the language was pero, let them not tolerate any barburians introduced from the side of aggressive dogers. So would they find that this new grammar of thought did not admit of any constructions radically

### LORD BROUGE AM AND THE GEOST

The following story is taken from the " Life and Times of Lord Br. and written by hunsoif . In the first volume le Bo pugham may that after he left the High School of Edinburgh to go to the University, he had there a very intimate friend, Mr. G., and that in their sonely walks round Edinburgh and at other times they frequently discussed such subjects as the life hereafter, the manufality of the soul, and the possibility of spirits revulting the corth and appearing to the living. They even went so for as to draw up an agreement, appear to the other, and thus solve any doubts entertained of the

Mr to went to I was and, after years had elapsed, Br - on a had almost consed to recollect that such a person world, when one day near Christians time-the 19th of Decombos when Brougham was taking a warm bath he happened put, and there at his old college friend G., looking him quiotly and mournfully in the face. Lord Brougham swooned, and, when he came to, found humself lying on the floor of the bath-room. He made a note of the occurrence, that k nig perhaps it was a dream, and yet, when he thought of the compact, believing that even in that case O, was probably dead, and that this appearance, whether dream or not, was to be looked on as an evidence of a future state. Bixty-three years afterwards Lord Brougham wrote the festewing words :--

\* Beougham, October 10th, 1862 - I imvo just been copying out from my journal the account of this stronge dream, certissized marks image (the undoubted semblance of double). Soon after my roturn there arrived a letter from luding announcing G.'s double, and stating that he dood on the 19th of December 1 Surgular ownerdence ! Yet when one reflects on the rast number of dreams which might after might pass through our brains, the number of coincidences between the vuion and the event are perhaps fewer and less remarkable than a fair calculation of chances would warmed ha to expect.

### No. 1V.

In dealing with any subject so vast as this, I must necessarily have been very superficial; and I do not doubt tent many readers will at once complain that nothing and by me at all touches their own case. It must be so, I fear the needs of humanity are infinitely various, and I cannot hope to touch more than a few of them. But I have found that what was given to me in answer to my own weeks was, stanced , so I hope that general remarks may find particular progress of human thought, I am not concerned to deny it. application here also

will, a porsistent and unwearled dealer for success, and progress of that kind spart from the inspiration of spirit. The difficulties, first of all, variables face of a determined they will yield to nothing less, save an those rare cases; where no difficulties are felt, because they have been amouthed away by those unseen guardians who have need of the comperation of a selected person, who is irresutably there wer for most of us, but more insuperable, only they do source, and to cherish with loving veneration whatever of impelled to action without conscious choice. Difficulties not yield to a careloss investigation on an idlo evening when the old truth man has spared in space of his theological there is nothing better to do. They may, indeed, be pro-systems. longed, but I should be surprised to find that they were a any case immperade. Penetenting beyond the threshold is a matter of more difficulty, and few care to do what the old self altogether with al. that that highest of abacquitons always as in the very presence of death? This, in Eastern gregities.

The risks are principally of our own making. The ordinary methods in a promisenous circle of approaching the world of spirit would seem to be devised for the very purpose of insurering the maximum of risk with the maximum of satisfaction. I hope the day is not far distant when we stail agree to aoundon such ill-advised procedure. There to risk there, so grave that it can hardly be exaggerated, the State whose citizens were actuated by each potent But for the evenly halanced mind, not to be thrown off its motives because by the unknown and unexpected, there is no risk! greater than that which besets our ordinary life. The anbalanced intellect when tried then fails, as it would do elsowhere. The entitiesnet raves, the vain-glorious vaints many of the peges, we perceive that the culture during and the is used exceeds gly at the over-developed auxiliarits or strict accuracity groper to science, and give expression to passions become rife under unwonted stimulation. That is cortain clerical tem local which confer a acctangal character so, and must be so. But the even-minded, level-headed income no risk, and soon learns his best lessons from the discripting accountry imposes upon how by an intercourse exposer of meaninging. A Spiritualist M. Zengker get has that demands may whole self-communitand the exercise of the accept a challenge to make the theorems occurring with a medium name. As a corporate organisation, its growth has been out of all proportion to that of any body that has precoded it. Its adherents-infinitely verying in minute shades of opinion, but of one accord in important matters-are numbered to an extent which no census can gauge in every country under Heaven. Even where open adherents are not found, secret heurel obtains to an unknown extent. Even when no special profusion of faith has been made, the belief of the Spiritualist has permeated the thinking classes, especially in respect of matters of religious faith. It has made, for instance, the old sies of God obsolete and repulsive, eternal fire a savage myth, and the hard literal interpretation of the Scriptures a crude and children folly. It has refined, speritualised, and elevated our conceptions. If it be contended that they would have been elevated any way by the I only say that Spiritualism has been one of the expressions of the progress of human thought. I do not believe in any

More than all, it has cut at the very root of dogmatasm and incolorance. It has taught a man to think aloud, to have the courage of his opinions, and to leave to others the responsibility for theirs; to land an attentive car to whatever of new truth may come from whatever unlikely

Most of all, perhaps, it has made religion a matter of drily life to those who before regarded it as a thing for high days and holidays. For if a man makes his future by the nets and habits of his daily life, how should he not live phraseology, is in part the dectrine of Karum—the secretion in the outh-life of an individuality which will survive the descolution of the personality, and which will determine its own future state by the action of mexorable her. If this idea be once grasped as an energising factor in the daily life, most also may contentedly be left alone. Blessed would be the man whose sets were so governed! Blemed

### ON EVIDENCE FOR INDEPENDENT MIND- page, Mrs. Wilson the number of a line, and it remained ACTION IN PSYCHOGRAPHY

June 13, 1885.]

By D. H. WILSON, M.A.

The following is an account (written immediately after made with the medium, Mr. W Eglinton, at his rooms, 11, Langham-street, London, W., on Monday, January 5th,

The scance, held in the daylight, commenced at three o'clock in the afternoon. There were present, besides Eglinton and Mrs. Kimber rested their hands on the book, myself, my wife, and the medium, one other person only, namely, my cister, Mrs. Arthur Kimber, of J. Rolandgardens, South Kennington, S. W.

After having obtained writings within Mr Eglinton's Brahma-locked slate, in answer to a question written by my mumber Mrs. Wilson had written to express the has of that self, secretly, therein, and also within Mrs. Wilson's own book-slate, and after having obtained a large sinteful of writing in about ten seconds, whilst the slate was on the top of the table within view of all present-phenomena familiar to most of your readers—the medium suggested an experiment to prove that the intelligence displayed in the writing was outside of the knowledge of the experimenters. It was this He gave us four strips of closes note-paper. Upon two of these Mrs. Wisson and Mrs. particularly careful neither to open it nor to look at its Kimber wrote two questions (secretly), folded up the papers, , t tle and handed them to see. I wrote (secretly) two questions , on the other two strips, folded them up, and shuffled all the four pieces of paper together in my hands undermeath the asid work, which was "Ghose's Indian Chiefs, Rajaha, &c. table, and then Mrs. Wilson withdrew one of them at Part II bushed, and pieced it on a clean state with a small crumb of pencil. The medium, who up to this moment from the communicament of the experiment had been standing before the window with his back to all of us, approached the of the experiment, I examined the slates, and found the table, and running the said slate with the thumb and fore- following sentence, written on the under one, with the finger of his right hand, held it, jointly with Mrs. Kimber, under, and close against the flap of the table. The sound of writing was heard at once. When it cossed Mr Eglinton conscientionally punctuated, and that every & was prosect handed me the slate, on which appeared by the side of the and every s dotted ) strip of paper the word "Monday," in answer to my question contained in that steep, " What day is it to-day !"

It should be noted that .-

I The medium, from first to last, ded not touch for an pastent any of the papers after we has written apon there

2 Only one person impach) kanw that the question answered had been put-

3. None knew what question the paper drawn by Mrs. Walson at hazard contained

4. The answer Monday was written on the upper surface of the slate, on which rested also the chosen strip of paper. The crumb of pencil used had been previously marked by torself for the purpose of identification, and before the experiment had sharp facets, which afterwards were slightly worm, the mad crumb of pencil rested on the last stroke been read by him. It can secreely be supposed that he reof the "y" of the word Monday, and the writing as an accommend the fourteenth line of the 199th page in the same our previous experiments, was upside down, in refusion to that he could have reproduced it at will flow then, assuming the position of the medium.

as it was intended to prove that the knowledge shown in Jurking in the storehouse of his memory, how by what the psychographic phenomenon was not derived from the process was that little animportant fact ravived! minds of the experimenters, was not complete. Although | no one present—no one in the world—knew what question | thoughts are revived. There is (1) the principle of associathe paper choses contained when it was being answered, toon of ideas, (2) there is volition, (3) there is that acquisiyet one of us, myself, and been conscious of that question a tion of energy which the reproductive faculty displays in few moments previously. In other words, the inquiry originated in the mind of one of the four individuals who took part in the experiments.

obtain by psychography an extract from a closed book. duly labelled with the proper number and page. This is Accordingly Mrs. Kimber wrote on a slate the number of a supposing too much. We admit that whatever a person

for me to choose the book from which Mrs. Wason's line of Mrs. Kimber's page was to be written by psychography on the clate. For this purpose, with closed eyes, I took a book from the medium's shelves, which held about 200 they were concluded) of some experiments in psychography, volumes. A crumb of pencil was pinced upon the state on which Mrs. Kamber and Mrs. Wilson had written the number of the page and has respectively. A second siste of exactly the same size and form was placed over this one, and the book was put by myself on the top of the two slates. Mr

It should be noted that ---

1. Precaution had been taken that no one besides Mrs. K other know what number she has written on the slate to express the page to be recited, the same being true of the

2 The slates and the book were on the top of the table immediately before the eyes of all present.

3. Until I had placed the book upon the slates no one could have known what volume had been taken from the the ves. The medium did not touch the book until the moment when he and Mrs. Kamoer rested their hands thereon. It had been handled by myself alone, and I was

4. Norther Mrs. Kimper, Mrs. Wilson, nor myself have the shightest recollection of ever having soon or heard of the

After the lapse of a few seconds the sound of writing was heard within the slates. Upon the usual signal of three taps (also seemingly within the slates), to indicate the end pencil resting on the foll-step at the end. (I may mention here that all the writings throughout the entire scance were

This is the sentence :-

 Page 199, line 14, is a table. The last word is 0." Mrs. Kimber had written 199, and Mrs. Wilson 14

I then opened the book and turned to page 199, which commences thus -

"Table A. Estates belonging to the Hon. Maluru, a Jotundra Mohan Tagoro Belindus' &c.

The fourteenth line of that page is as follows .

" Skikkarbiti, 24 Paryanuas, 210 0 0 "

This experiment closed the source. Does it prove the action of an independent-of a fifth mind?

As such a test, it seems to have this weak point, namely, that the book belonged to the medium, and had probably it to have been at one tame a part of his consciousness, and It will occur to the reader that this experiment, so far since nothing is lost, at the time of the experiment, a fact

We are rounded of the manaprings whereby latent certain abnorms, states of nervous exertement.

In the experiment before us how could association be a reproducing agent? "190 page, line 14," auggests Mr. Eginton kindly offering to try any further experi- nothing. When we read a book we don't read the numbers ments to demonstrate the action of an undependent (that is of this pages, and count the mics of each page. Yet we a fifth) mind, I suggested that we should endeavour to must suppose the line lying latent in Mr Eglinton's mind,

[June 13, 1885.

reads that may lurk in his mental storehouse to the end of his life, but we cannot admit that the numbers of every line on each page of every book he reads enter that storehouse at all. He connot, therefore, give out what he does trot nesters

What association of ideas can be set a train by a point 199, line 14 "f. Thus inquiry reminds us of wait can be nothing more than a coincidence, muncly, that the last word of the fourteenth line was a capter, which (regarded as a numerical figure) is the class of association one would graphy told no that on that page was " a table" (singularly enough Table 4).

2. If the latent thought were served by volition (as would come into the field of consciousness. Mr. Eghaton

denies any conscious revival

3. That there is present in the medium some abnormal excitement during the occurrence of these psychographic phonomena there can be no doubt. Of the causes of this excitament we are very ignorant, but it may be remarked that manual as the effects some to be storply muscular and nervous, neither exciting nor depressing the must of the surject, this phenomenon cannot well be classed with those well-established facts where the most remotely hadden disturbance, hordering and often entering upon, delirlum. In conclusion, I cannot speak too well of Mr. Eghnton's disposition to assist me in my investigation of the remarkable phanomena attending his mediumship. He takes an Important subject

Resement, Hybres (Var), France. 276h May, 1885.

THE special entrusposed out of the Builty Chromele of Thombay. June lat, in giving a very graphic account of the funeral of Victor Hugo, is pleased to be funny in describing a deputation consider it "singular" if such a deparation had not attent d the last rites of our compositor in belief. From advices received Izona Peris, we understand that the leading Spiritualists were represented in the general coremony by special permission.

INCIPIEST MEDIUMBUR. -The Revue Spirite has a letter from a well-known correspondent with respect to a case of inspect moderniship proviously alfuded to in the Review. " At Emandes. near Rechelio, he writes, " lives a on treater, Seriness, with old, on invested from birth. She was, but January, her aparts the bedesothen were heard. These secutchings came every avening. Then she fult blowings and louckings on the face then pluchings of her arms, the bed-curtains were sometimes shakon as if by a hand, which the said she saw there loud raps sounded on the worden actions. As three became wonker, although the bronchitis was leaving her For a change she was conveyed to the home of a relative in an accompanied her thather, continued, and returned with her. the 23rd I want again and sworth ten that the phenomens were caused by a spirit. In answer to questions, rapp aga were learned on our wrists and arms. My friend's handkerchief was someoness in proportion to their dutance from her. —A VINLEY I taken several times from her lap, and at length appeared.

NEW FEATURES AT MR. EGLINTON'S SEANCES.

Another scance, held a few days since by a friend and myself, again with Mr. Eglinton, was so interesting from the many different phenomena developed, that I send it you

for a place in your valuable journal.

LIGHT.

My friend had never before attended a slate-writing stance with Mr. Eglinton, though she is an experienced Spiritualist. The heavy weather, we feared, would be unexpect from figures 199, 14, 0, belonging, as it were, to the favourable for the enting. However, the power appeared same family. But it is merely a comcidence, for psycho- to be strong. The medium was rapidly controlled. Wo wrote questions on the sinter (carefully concealing them from the medium) as to the spirits who were prosent, and the names of several deceased friends were given in reply , happens when we toll another our name and address), it also some remarks, in which the words "two weeks" were mentioned in answer to a question. The number being magnote, the agure 2 was substituted. I then privately wrote a request to have some information from a spirit present concerns g a departed mutual relation, whose afe has wen as eventfus one. Mr Fg. aton here the nates at first a oter the flap of the table, but write a being actayed, he raised them over my head, when the pence consistenced moving rapidly. The slates were then placed on my shoulder, the west mg containing, and the medium supporting the slates with one hand. Pauses, and a difference in the movements of the memories than into commonwances in states of rare opening penall, showed that two controls were at work. On the excitement, for at such times there is always great mental signal being gives, we found writing in a rather large hand, commencing on one side of the slate, carried in several lines round and round it, leaving a small space in the centre. The large writing informed us that the heavy atmosphere caused difficulties in communication, and also made it diffiintelligent attrost in his work, and deserves gratitude and out for the "guides" to bring our friends to us in proper oncouragement of all serious attrious attrious attrious of this profound and sequence. The small space in the centre was filled with a communication from my sister, and signed with her name. She left earth-life many years ago as a child of seven years old. This writing was small and delicate. My previous question had remained manawered until now. Mr. Eglinton became much agitated, being apparently painfully controlled, and a reply was written identifying the spirit refeered to in my man ry The medium new said a vision was coming upon him. of Spiritualints that followed the voterest poet's funeral or being to say his eyes to slow y described a scene in the early life a "singular feature" in the procession. We, in turn, taight of the easy - question, which was at once recognised as true by my friend and myself. Still holding my hand, Mr. Eglinton became more and more agritated, at the same time describing the unhappy state of the lady in some part of her earth-life. He begged me not to concentrate my thoughts on her too much, as he felt efforts were being made to entrance him, which he resisted. He rose from his seat and paced the room in great apparent suffering and wife and two daughters, the older, Alexandrane, thurteen years agritation. His left arm began moving convalsively, and suddenly he sat down, begging I would hold fast his right pronchitis. One overring as the lay stin in both secretchings of hand, saying, "Look! look! The lady is trying to show you her name on the luck of my hand !" His left hand was now elenched on the table. We could see nothing at first on the back of this hand, but presently faint red lines began to appear, rising, as it were, under the skin, growing darker phenomena increased in alreagth and frequency, she by degrees, until the, to me, well-known name of the budynot a very common one-appeared distinctly complete. After remaining for a few seconds for our impection, the adjoining village, and remained a short time. The phonomena letters faded away. The medican being new relieved from this central, held the states sgain under the table-dap for People from all parts visit the house and soul secounts to the writing, his right hand still holding my left. I was now papers. I wont March lith. I found Alexandrine an interesting writing, his right hand rtill holding my left. I was now girl of smarble sharecter. In laking the has twitchings of the patted several times on know and wrist by invisible fingers, left side of her face, her pupils are dilated, and her sight in Mr. Eglinton hughingly exclaiming that he was also patted. weak. I made some passes over her face, and produced a My companion now changed places with me, on which the pricking semestion, and her eyes began to close; but I withheld medium, turning to her, described a gentleman who wished from prosecuting magnetic frontment, because the room was to communicate, and gave her a verbal message from this crowded and there were many gozing in at the windows. On sparit, a deceased relation, on a subject which had greatly

on the opposite side of the room. Materialized hands now | nonmonally in the other. From which it follows that the terms made their appearance from under the edge of the table. which denote the one chan of objects, serve also to denote the They were of different forms. One appeared close to me, sitting as I was far from Mr. Eghnton. He and my friend described it as a "long-ingered one," and I was told by the cognition by terms derived from the natural world is because medium it was that of my son. This was immediately con we first have cognizance of the natural, and only through our firmed by strong raps on the floor in a different , art of the perceptions of its objects can we have any comprehension of room, which continued for some time, and by which I need a things spiritual conversation on some family matters. Mr Eglinton's left hand during these occurrences continued to hold the slates, denote, not the object stadf, but, a distinguishing characteristic , while his right hand was grasped by my companion. The and this, again, an substitute, not in the object in question, but phenomena throughout this coance were rapidly produced, with great power, but it is difficult to describe the contranspire occurrence of characteristic communications on family and private matters, which could not but convince as but the corresponding mode or quality in the spirit in a grid of the identity of our spirit friends. The scance was held in full light throughout.

June 1st, 1685.

June 13, 1883 3

### THE HERMSTIC SOCIETY

was held on the 3rd mut. The subject was the Symbology of the Old Testamout, and was introduced by Mr. Edward Mart. or contrary to understanding, as it has become usual to suppose land in a paper of which the following it an a struct

The speaked of the value of the list-neal element Christianity involves that of the intention and agricfoance of faculty for its cognition the New Testament and especially of the Gospola. But as thus the question cannot be determined without first secontaming the resimutare of the Old Tes sment, -how far it is indistories!, and how far allogoriest or mystical. For it follows from the relation between these two divisions of the Illiho that whatever as the character of the one that must be also the character usedness y against in a componential of the swift characters also other was much be as

which denote persons, places, times, and events, really refer to and monitual one, then the Bible is historical. If, on the contruey, the expressions in question do not refer to those in the and that which is d person (A.C., 82, 83) ordinary senso, but make this senso a secondary and subordinate one, and rofer really and primarily to principles, processes, and states which are not physical and phenomenal, but spiritual and nonnegral, and notes this the real and essential sense, then Person and deep of the north and subscence, corse upon ne am the Bible is not huterical but mystical, and is rightly under- most severely reprobated in the Bible, namely, idelatry. It is

stood only when so interproted

itself, (2) the consensus of qualified communicators, (3) the general neage in corresponding cases; and (4) the intrinsic nature of the case, growing out of the purpose and nature of here not yet found the true meaning. All in it that is true is povelation and religion. The result of an examination of all for a sort alone. these grounds of judgment-particulars of which were given in the paper -is to show beyond possibility of doubt (1) that the | was followed by several examples of allegaries, narrative in the Bible, while contaming an historical element, is really myntical in the intention, in that it mee historical and other phonomenal as distinguished from the literal and apparent mounting. incidents merely as symbols to denote mystical truths , and (2) Among the garratives dealt with were those of the Creation and that it could not, from the nature of the case, be otherwise Fall , the mystic " Woman " of Scripture , Enoch he Pouge. without forfeiting its character as a Bible; since religion is and the Exedus. The wars and other actions of he large lesnucestarily, by virtue of its interior and spiritual character. addressed, not to the series, but to the soul. So that, were the disc refer by the themselves and their Derty were at we to be Bible historical in the sense ordinarily ascribed to it, it would by abstract of the conflict which must wage against the own have no moneye to the souls of men

of places on the part of its readers, and their commonwent merip. of the Bible to exhibit as the mount and condition of salvacion. tion to the physical plane of that which belongs to, and a intended A really literal translation would show that the names of for, the spiritual. To understand this, this assessmy to consider, various persons and places denoted, not persons and places denoted and plac besides the nature of religion, the method of the mystics who were the writers of the Bible and formulators of religion.

As with the hieroglypha of Egypt-the land from which the Bible has its derivation the symbols condoyed were one and all applained as follows -drawn from the natural or physical world. This was for two

other. And all that is necessary to avoid confusion is to rumainbor which of the two worlds, or states, is the one intended.

The other reason for representing the subjects of spiritual

On the same principle the name of some object is used to in the world specially intended. From which it comes that when the term coupleyed is, my, the name of some animal, it is not the an and made that is meant, nor the characteristic as submitting in the animal and for the take of which it was observe,

Sinch is as action parented in mystigm Ser of res. And they are called a vetteral because they regate to the garanterior and but on and recure an atomic faculty for onen apprehen ston, and also because of the duty of preserving mence concerning them in regard to persons who, being unable to appreciate their, might, after the mainer of the ignorant and The sixth mosting of the present comes of this Society unpercipient, ridicale and profune them. The term mystery, which is cognate with negatio, done not properly imply beyond It and less only that which transcends the lower faculties and requires a transcendental, but not therefore superhuman,

The famous Swedish seer had done excellent service in is but a portion of the Scriptures represented by Christianity, recovering and formulating the amount capus of division interpretation. It is true that Swedenberg did not hance fremonther always to observe the rule had down by him. and that he fall in consequence into some grievous errors. But the rule is none the lass rated on that account. "To take the literal meaning of the Word for the true one at," he says, "to destroy the of the other. So that if the one be exclusedly historical, truth most, since everything a the Word relates to the heavenly and amritual, and becomes faisified when transferred to a lower level by being taken literally " (T C, R 35st To some tome terms. If the expressions in the Bible some there is no respect to any person, or anything determined to a person. But there are three things which disappear from these in the cedinary sense, and make this same the primary the sense of the letter of the Word when the net was a nine in unfolded manualy, that which to of time, that which is if place

The same rate is saiguly mosted or so "The Perfect Way when it was one for him the ne exaluting if I letter and from the most the destroyer, and thereon hat demons in the not the use of symbols which exposes new to the charge of There are four different sources of information whereby a idelatry, but the failure to assign to these their spiritual and independ on this question may be formed. (1) The Bible , we or significance. The rule is that in it is restate a of a realign on dogina or other symbol is teno which has a physical pay icaway, and, no long an it norms is being much an approximate war

This exposition of the principles of mystical interpretation 'Old Tostoment, showing in every once the spiritual and real. which if could in on a would be in the bighest regree ovil properation and other has at eas, in order a mann the The failure to understand the Bible has come of a confusion perfectionical of the final regeneration which it is the object but qualities and proporties related to the various states of the soul, proceedy at in Bunyan's "Pilgrim's Progress" and " Holy War." The mystical meaning of the Exedus was

One of the closel atmoshing brooks of the school of literalista reasons one because its writers recogn sed as subsisting has been the apparent failure of the prophecies asserting posibetween the two worlds or states. For there is no question of tively the return of the Istaclites into employing in Kayrst, since locality a correspondence in virtue of which whatever exists they never did go back into that country. But according to the materially and thenomenally in the one is the counterpart of mystical interpretation, no such failure occurred, nor can there or correspondent to, something which subsists spiritually and be sfailure of Divine prophecy. Egypt was a symbol for materithe response

ality, whether as the world oras the body. And Issuel was a term denoting all who, being possessed of the spiritual consciousness, have attained their true majority and become, in the mystical sense, mon. The soul's lapse from its proper high estate of pure spirituality is thus always, whether for the individual or the general, a 'going down rate Egypt," And although it is necessary for the soul's due unfoldment and the building up of the that the individual have experiences of the body and acquire the leasure it has to teach, it is necessary always to guard against becoming so dooply sunk in materiality as to lose altogether the conscionances of things spiritual, and become "a bond-slave in the tand of Egypt," and past hope of redemptson

Road by this light, the story of the Handage and Excelor sequiros a significance at once new and profound, and an interest universal and eternal, such as could belong norsly historical medicut, whatever may have been the medicus of physics; fact which suggested the allegury. For, thus read, the going down into Egypt for oom becomes the birth of the soul into the body as at once a nursery, a school, a known of correction, and a chamber of ordeal. The taskmasters are the fieshly the total an appetitude of a man total which are not me A both slave. In a give no is suff in coming me by his body non-pounty for a continued the word, and or was the sat of a denser - waper To here Sea was a wife w errol econst and the way ( detectorice to provide a beautiful the weather Then energy is and add will the again and I have do man horse over you a parious man be been w nd thou there will be made to be modern their door door the wilderness beyond to the way of the cross of renunciation the guiding pillar of are and cloud in the understanding of Divino things, and the Promised Land is the final state of rest and perfection, attaining to which the man-new become

Such, to regularize apprehousion, is the one thems of the Bible. repeated again and again under every form of allegary, the verification of which less within the souls of all those who have attained to the semicionsion thereof

All and the transfer and the first fitting the first and increases which followed, and which was of the highest interest and unpertained

### SPIRITUALISM IN LONDON & THE PROVINCES

Mass. Cons. L. V. Richtstono .- The discourse on "Material and Spiritual Pertents" was delivered as announced, but Manday eventur, at the Konsington Town Hall. The address was rouncekable for the broadwass of its vious and the touching my and the lit was well adapted to respond to the interest and and who are and portants of the times. It we shall the x per n on each time of the width the first to have been again to be a great to be a disconnected to the second time of the width the first to have been again to be a disconnected to the second time of the constitution of planets have a great time of the constitution of planets have a great time or again to the constitution of shall be a special time or again to the constitution of shall be a special time or again time. A outputation of places of safety a sea familiar in age of changes in the condition of safety as a sea of safety as a familiar in the safety as a sea of safety safety as a sea of safety as a sea of safety safe After the address an imprompte poem was given on Inspiration, and from whence it concer." The subject of the address of ellegancets of freedom to the concern of ellegancets of freedom to the pure, good, and tree. You will be "Sprittediam, Christanity, to pure, good, and tree. You will be repaid for which a Rubblem and Orientalism their Relation to the New granting conviction that there is a ife after reach for which a part and good life before death is the best and wheel preparation.

### ADVICE TO INQUIRERS

### The Doublett of Circles, -- By H.A. (Onta.)

If you wish to see whether Spiritualism is mally only juggiery and imposture, try it by personal experiment

If you can got an introduction to some experienced Spiritualist, on whose good faith you can ruly, ask bles for advice; and, if he is holding private circles, seek permission to attend our to see how to conduct seasons, and what to expect.

There is, however, difficulty is obtaining access to private circles, and, in any case, you must rely chiefly on experiences in your own family circle, or amongst your own friends, all strangers being excluded. The bulk of Spiritualists have gained conviction thus.

Form a circle of from four to eight persons, half, or at least two of negative, pussive temperament, and preferably of the franche sex, the rest of a more positive type.

Sit, positive and negative alternately, secure against disturbance, in sublined light, and in comfectable and narrowstrained positions, round an encovered table of convenient sim. Place the palms of the hands flat upon its upper surface. The hands of each atter need not touch those of his neighbour, though the practice is requestly adopted.

Do not concentrate attention too fixedly on the expected maniestations. Engage in cheerful but not frivolous conversation. Avoid suspute or argument. Scoptisism has no deterrent effect but a bitter spirit of opposition in a purson of determined will may totally stop or decidedly impede manifestations. If convenience flage, remote in a great help, if it he agreeable to all, and not of a kind to irritate the sensitive ear. Patience is assential; and it may be necessary in most ten or twelve times, at short intervals, whore an his, occurs. If after such trial you still fail, form a resh are I now at the reason of your fallure, pliminate the nuarmoneus regments, and introduce others. An hour should be sough himosopound as lo titel oth

First next indications of success namely are a cold broose passing ever the turn + wats involutiony twitching of the bands and a ma-or write of the every, and a separation of throbbing in the table. These indications, at first so alight as to came doubt as to their roulity, will mountly develop with more or loss rapedity

If the table morm, let your presents be so gentle on its surface that you are sure you are not aiding its motions. After some time you will probably End that the movement will continue if your hands are held over, but not in contact with it. Do not, however, try this until the morement is secured, and be in no hurry to get

When you think that the time has come, let come one take responses of the circle and set as spokestoes. Explain to the nasignate that an agreed code of signals is desirable, and sak that a tilt may be given to the alphabet is slewly repeated at the servers letters which form the word that the Intelligence wishes to spall. It is convenient to use a single till for No, three for Yes, and two to express doubt or nacestainty

When a missistery communication has been mishished, ask If you are rightly placed, and if not, what order you should take. After this, ask who the intuitigence purports to be, which of the

appring distribution in which is where any press I stream the free new items that makes Never her a messeen accurate the treat of your regions. Do not enjoy up a new olemn is est about in a specific property.

### TESTIMONY TO PSYCHICAL PHENOMENA.

June 13, 1885.]

# PHENOMENA.

Afediums, who are the instruments of an external agency, have, more than ouce, been confronted with conjurers who deceive by sleight of hand, and in the same manner test no man of scionce who has theroughly said fairly investigated the phonomena has faued to become convinced of their reality, so no conjurer who has been confronted with the some facts has been able to explain their occurrence by prestudigitation. Hundin, Jacobs, Belmelun. Hermann, Kellar, and others have already confessed what occurs without human intervention in the presence of

### Tertimony of Rebert Mondin.

The Marauis Endea de Mirville published during the forms of Housen two letters from the latter, on a "Mémoire addresse a MM. les membres de l'Académie des Sciences Morales et Pol tiques, sur un grand nousbre de phenomenas marvilleux interement également la Religion, a Science, at los hommes du Mondo," in which the conjurer confesses his inability to explain the phenomena he was nosed in the presence of Alexis, the clairvoyant. A circumstantial account is given of M. de Mirville a visat to Bougan for the purpose of engaging him in this investigation, of the atter's confidence in his own ability to detect the trick, and of what took piece at the scance, the conditions of which were entirely under Houding control. This account extoppis over twelve pages, and its accuracy is confirmed by Houden in the first of the documents now translated .-

"Although very far from accopting the culogies which M. - is good enough to bestow upon me, and especially inseting that I am not at all committed to opinions, either in favour of tangaction or against it, I can, severtholose, not refrain from declaring that the facts above reported are entirely correct (and de to plue complite emotitude), and that, the more I reflect upon those the more empowible I find it to neak them remong those which belong to any art and profession

5 Rought Houns

" 4th May, 1847 " A fortught later, M. de Mirville recoved another letter, in which the following, referring to another seance,

"I have, therefore, returned from this seases as astenuised effets annel marreillone). - I am, Monaiane, den.,

"(Signed), Rosser Houses.

### " May 16th, 1847." Testimony of Harry Kellar.

Harry Kellar, a distinguished professor of legerdamain, investigated the slate-writing phenomena which occurred in the presence of Mr Eginton, at Calcutta, in January, 1882, and on the 25th of that mont the role were, a letter to the editor of the Indian Daily News, in which he said -

" In your laste of the 13th January I stated that I should be glad of an opportunity of parturpating in a sience with a view of giving ar unbassed opinion so to whether, in my enpuolty of a professional prestingitator, I could give a notural explanation of effects said to be produced by apartual soc.

"I am indebted to the courtery of Mr. Eglinton, the speritualistic medicin now in Calcutta, and of his boot, Mr. J. Meagens, for affording me the opportunity I craved

"It is needless to my I went as a sceptia, but I must away that I have come away atterly unable to explain, by any nature, means, the phenomena that I witnessed on Tuesday svening. I will give a brief description of what took place."

After describing several successful experiments, Mr. Kellar proceeds :--

"In respect to the above manifestations, I can only my that I do not expect my account of them to gain general payone who described such manifestations under similar circumstances. I stail remain a sceptic as regards Spiritumium, but 1877 "

WHAT CONJURERS SAY ABOUT PSYCHICAL. I ropest my mability to explain or account for what most have been an intelligent force that produced the writing on the state, which if my senses are to be relied on, was in no way the result of trickery or aleight of hand."

> On the 30th of the same month Mr. Keliae addressed another etter to the Indian Duity News, reporting some experiences of another kind with Mr. Egiodon, and regarding which be mid

In conclusion, let me atato that after a most stringent trial and strict scrutiny of these wanderful experiences I can arrive at no other conclusion than that there was no trace of trickery in any form, nor was there in the mom any mechanism or their powerlessness to produce under the same conditions teachtery by which could be produced the phenomens which had taken place. The ordinary mode by which Mask we came other conjurers mainte levitation or the fleating test could not possibly be done in the most in which we were assembled.

### The Testimeny of Professor Jacobs.

Professor Jacobs, writing to the editor of Licht, mehr Licht, April 10th, 1881, in reference to phenomena which occurred in Paris through the Brothers Davenport, said -

"Spite of the assortions, more or less trustworthy, of the Fromth and English journalists, and spite of the footisk jedlouetes of ignorana con, are I feel it a yearly to show up the bad facts of one party and the channery of the other. A char has been said or done adverse to these Unionesis mediums in absolutely untrastworthy. If we would ngitly judge of a thang we must understand it, and best or the parents at nor the congreen possessed the prost elementary know edge of the science that governs those phonomers. As a prestaligitator of repute, and a sincore Spiritudian, I affirm that the medianama facts demonstrated by the two brothers very absolutely true, and belonged to the Spirston of a order of things as every respect

M saw It on any Robert Housen, when attempting to unitate tiese and facts nover preserved to the public anything boyand an infantino and almost grotes de paredy of the same phenomena, and it would be only agreement and obstinate persons who could regard the questions seriously as set forth by these gentlemen. If (as I have every reason to hope) the psychical sandes, to which I am applying myself at this time, succoed, I shall be able to establish electly, and that by public demonstration, the intagenso line of demarcation which asporates medium istic phonomous from conjuring proper, and then equivocation will be no longer possible, and persons will have to yield to evidence, or dway through predstormination to dany

"Following the data of the learned chemist and natural philosopher, Mr W. Croukes, of London, I am now in a pomtion to prove plantly, and by purely scientific methods, the na it is possible to be, and persuaded that it is offerly responsible existence of a "psychic force" to memorism, and also the indivithat chance or skill could over produce effects so econterful (tout à Junity of the sourt in a aritual manifestation." I authorise fact impossible qui le hearrif ou l'adresse prices javoine produire des you, destroir. Le mort this letter in your next number, if agreeable to you," &c , &c.

### Testimony of Samuel Bellachial.

Samue Belacon, Court Conjurer at Bertin, made the following declaration in December, 1877 :-

"I horeby declare it to be a ruch action to give decisive pidgment upon the objective medial performance of the American neu una Mr. Henry Slade, after only one sitting and the observations so made. After I had, at the wish of several highly established gentlemen of mak and position, and also for my own interest, tested the physical medianiship of Mr. Slade, to a seriou of sittings by full daylight, as well as in the evening in his hedroom, I must, for the cake of truth, hereby certify that the phenomenal occurrences with Mr. Slade have been thoroughly enumered by me with the minutest observation and investigation of his surroundings, including the table, and that I have not us the assailest degree found anything to be produced by moons of prestidigitative manifestations, or by mechanical apparatus, and that any explanation of the experiments which took place under the errometenees and emplitions then obtaining by any reference to prestudigitation is absolutely impossible. It must rest with such men of science as Crookes and Wallace, in London; Perty, in Berne, Butlarté, in St. Petereburg, to search for the explanation of this phenomenal power, and to prove its reality. I declare, moreover, the published opinions of laymen as to the 'How' of this subject to be premature, and, according to my view and experience, false and one-sided. This, credene. Forty-eight hours before I should not have believed | my declaration, is signed and executed before a notary and wisnomen.--(Signed) Samuer Buttacerret, Berlin, December 6th,

neglect of his own spirit and body mad in that he has driven far from him the hely industrees. Fur more mad, indeed, are those besetted drankards whom you does not mad. To spiriteye there is no more fearful eight than those dams of wickedness and impurity where evil men gather to steep their senses of obligion, to excite the lastful and sensual pressons of their delianed bodies, to comort with the degraded and the impure, and to offer the musives the ready proy of the basest and worst spirits who haver around and find their gratification in living over again their boday lives."

Where to you mean by heing nor again their bant hers?

These earth bound sparts retain much of their curthly possessions and proposalty. The cravings of the hedy are not extinct, though the power to gratify them is withdrawn. The drunkard retains his old thirst, but exaggerated aggreeated by the impossibility of slaking it. It haves within him, and urges him so frequent the haunts of his old vices, and to drive wretches like houself to further degradation. In them he bres again his old belf, and avoils the crop of all and sorrow

Page 23 and again p. 40, "Eurperator" observes, with reference to the executes of the Derby Day .-

The spirits who are antagonistic are massed together in great force whenever any occasion is affered for them to operate successfully on mon who are gathered together for the purposes of grandying their bodily passions. Yesterday there were rash mission whose passion of expedity was excited to an energical

Three extends from the writings of men of emmence in the psychological movement counct full to carry weight

It remains but to observe that there has now before the writer of this appeal to the conscience of every thoughtful reader the MS, diary of a worker for daily bread in London.

The experiences therein contained are of a nature too dreadful to be given to an unprepared public. They are the experiences of a "accustive" of a highly-developed order of plear-scoing , of a porson, so to speak, peacemed of a double life and of a double eyo-night, the things of the external life, and the though of the inner life of the spirit, being discorned by this person with an almost equal intensity

The revealments of this deary are in entire accord with the above given extracts. Had not this martyr to the social clothed in an organism so fine as not to be cognisable to priorances, selfishnesses, and ingrained lasts of this "City of our senses. St. Paul said that appritual things are sparitthe Many Spix " bunded around the inner life a bulwark of imposence, through a life of prayer, of self-denial, of atrictest temperance both in onling and drinking, being both a vegotarian and an abstainer from all alcoholis beverages, and once, are natural faculties, empable of being developed the battle against avil influences of the most malign natura could never have been successfully waged. Truly the life of such a martyr is herosam indeed. No greater Informathan London, when thus suveiled, could be conceived or parter by the genus of a Dante, the seven deadly aims in ng iform emboument lying in wait at every turn to strangle the souls, corrupt the spirits of men, and fill their bodies with the saleful minama of sin-

Such sights must have been revealed in old Jerusalem to the clairvoyant vision of the holy Christ when He wept over her, exclaiming, "If thou hadst known, even thou, at cout in this thy day, the things which belong unto thy peace! But now they are hid from these eyes ! BALVA-TION THROUGH PURITY, and "the things which belong to" that "peace," alas! are assuredly hidden from the eyes of the dweilers in our modern great cities, who are over pertinaciously "drawing death into themselves" by their life in death. What has been here stated is simple truth all spirits are not competent. A.M. H. W without any exaggeration.

There and Taxis, which took place on the 2nd inst. The de-ceased, who was a nephow of the Empress, had for many years past been advoted Spiritualist, and the Austrian Court and Spirits tell us that spirit-chemists perform the super-We regrot to announce the death of the young Prince of society in general have been much grieved by the and event. We hear that the Empress, on tearning his hopeiess state. Lastened to his bedaide and resistince with him to the last.

### SPIRITUALISM IN A COURT OF LAW

The Sparitual Offering of May 16th reports the prosecutron, in the Court of Criminal Correction, at St. Louis, of Mr. and Mrs. Miller, mediums, by Messes. Johnson and Madden, on the charge of defranding them of a dollar and a half, price of admission to a sounce. The court was occupied with the case from April 28th to May 7th, when t held the defendants under bond to answer the charge, should the jury find a tree bill against them.

The Spiritual Offering invites attention to the testimony of the principal witness for the defence, Judge Portit. We compress within the limits of our space his answers to the main questions put to him

The Spiritual Offering informs its readers that Judge Portis is a lawyer of thirty years' standing; has long life, dranks in saturation , grim and devilish, from the excesses resided in St. Louis, and has exercised public functions; which he causes then to commit. And so the vice perpetuates he was legal advicer of the Pacific milroad, and holds the same office now on the Massouri Pacific. He has attended many of the seasons of Mr. and Mrs. Miller at various houses, as well as at their own, for nearly four years. On Judge Portis' entering the witness-stand, the counsel for the defence put the question :-

Is the court to understand, Judge Portis, that you are a believer in Spiritualism !-- You, sir. I have been a degree. They were the point of attack from similar be sever in Spiritualism, as I understand it, for aftern

> What do you mean by your understanding of it !- Spirit ualism, as I understand it, demonstrates that what is called death is but a change into another state of life; that we continue in that until we die out of it, to be cauged into a star higher one and so on to infinity This is one of the teachings I have received from Spirit galiste moother is the Universal Fatherhood of God. Matherhood of Nature and Brotherhood of Mankind the term Universal Brotherhood includes, as I understand, spirits who have passed out of, as well as those still in, the body for one of the teachings is that we are as much spirits now as we ever shall be that we now occupy a physical organism to be put off when worm out or broken, as we put off a garment no longer useful; that we are then unly discerned. I believe many eee, by spiritual night, spirits who have laft the body, and that some also hear them speak. These faculties, called clairvoyance and clair

Are you alluding now to those who are called mediums ! Yes, and, as I understand, all are naturally mediums.

What, all of us !- Wall, all who will take the trouble to discipline, in that direction, faculties, which they have by nature. It is quite as possible to cultivate them as other foculties-memory, for instance. And as many as are our faculties, just so many, as I understand, are the modes of spirits manifesting their presence and action. Such is my belief To me there is nothing supernatural in Spiritnaham or mediamshim

Do you believe in materialization !- I do It is, as I understand the term, the patting on by a spirit of something material. Spirits are ordinarily unperceived by us; but their spiritual bodies can be glothed upon with material less fine than their own, and then we can see them and touch them. This materialising is a scientific operation to which

Then do you believe that some spirits have greater power than others !- Yes, just as some of us, who are

Can you make this materialisation a little clearer !-Spirite tell us that spirit-chemists perform thus operation on principles, as I understand, of attraction, polarization, and orystallisation, but they say that it is difficult for

language. I confess I do not comprehend how it is perfermed of his being shot, and about the trouble that led to that At circles, whose materialisation takes place, we understand said event, none of which could also possibly have known. that one spirit controls the others who are present, just as a stage unmager controls performers and sends them on a stage, and he faces the materialized spirit in such form ness, which, in Mrs. Miller's mediumship, is required for that sometimes be can be recognised and talked with

June 20, 1885.

Have you recognized any !-- Many, at various times in dren, my stepmother, uncles, nunts, counns, and friends.

What is the court to understand by dematerialisation ! -The getting rid by the spirit of the material that has been put upon his spiritual body to ronder him visible to us.

Have medicus different powers !-- Their powers vary just as those of musicians, doctors, lawyers, or jurous , and had, through one of them, in Mrs. Millor's mediumship, answers to questions written on the inner sides of sixtes locked together

Could you command answers obtained in that way ! -No more than you could from me if I were not able and To me that is a natural and a rational explanation. The we ling to give one. I have sometimes put questions and absence of physical light at a sounce is a condition, for the answer has been "I do not wish to answer that", cortain manufestations, which commends itself to my mind, sometimes, "I cannot answer", sometimes, "The spirit is especially in this of the spirit voice, for their there is no not here to answer."

Can you make the subject of materialisation clearer !-I understand from spirits that they measuries the media of into the state of trance in order to keep her completely passive and mable them to draw from her the elements for making an appearance and come in contact with material Miller's !- Furhaps fifty things. I do not know if I make my meuring clear

Proceed. You have only the court to convince. Counsel for prosecution interposed: Proceed in what

direction !-- I would say something of spirit-personation.

Connect for prosecution: I cannot see what we have to do in this case with all these theorem. I submit the objection to the Court

examination further !

Counsel for defence We do. Judge Noonan: Then proceed.

It is now an admitted accentific fact that one man can momerine another, and put him into a condition in which he is so much under his mental control as to make him do any thing he wills him to do. A spirit can do this with some mediums, and is then said to entrance there. When Mrs. Miller is thus entranced I regard her an the meanwrised subject of a spirit. In spirit-personation Mrs. Miller, the medium, is then reduced to a state of passivity and may be controlled according to the spirit-mesoscriser's will. Then, if a sperit friend is present and wishes to speak, he gets, as I understand, permission of the controlling spirit; and, having that, controls the medium and addresses you as that | it is proposed, into a superior court.

On such occasions does the medium resemble that frænd 1-No, but I have sometimes marked a change in the medium's voice, reminding me of the friend speaking through hur.

Are there other indications leading you to believe that dimmbodied spirits are present!-I have been told by there of occurrences known only to them and myself , they have told to live partly in the spirit world. It is for his grieving family to me their names, and, in various ways, have enabled me to remember his words: "Those whom we mourn are not absent, only

Can you tell us snything clas showing that it is not the medium herself who so speaks !- Through her, my father and my children have spoken , and no has Colonel W H Coffin, who was Land Commissioner of the Pacific Railroad , J. N Litton, who was Assistant-Attorney of that road, and Colonel Shyback, whose I have also seen while he so spoke, both here in St. Louis and at a medium's in New

them to explain it to us, partly from the imadequacy of our | known !- He told of affairs connected with the circumstance

When these spirits spoke did you distinguish their voices !- Yes, when we have had the condition of darkvoice manifestations. The spirits explain that in a closed, darkened room the air is still, while the smallest my of various circles, among them my father, my mother, my chillight tets it in vibration, and is against the manifestation. I have for that reason, when I would hear the spirit voices, always accepted the condition of darkness.

Then they are subject to untural conditions !- Perfectly You do not regard their manufestations as supernatural?

No and when a spirit has a natorialised exterior it will endure the light for a short time then as elements begin they differ from one another as to their faculties. I have to be attracted back to the medium. In the midst of conversatisful with me, spirit friends have saddenly stopped, and gone back to the medium in the darkened cabinet, presently to return and resume the conversation they have explaned that they have had to renovate from the medium withdrawing for removation. I have made a study of such manufestations with Mrs. Miller. Among spirits with whom I have thus communicated have been my well-known former friends, J. T. Glover and Judge Krumm

How many sounces have you attended at Mrs.

You consider her a genuine medium !-- I do.

Could you give a summary of her powers !- I do not consider her possessed of what are commonly called nevers the powers she appears to have some from the other side. She has an organism which spirits can use for manifestanz their presence and action. For this they require passivity me her side. I have seen her, when she has been in a Judgo Noonan : Does the defence deare to pursue this perfectly passive state, raced in her chair to the ceiling, and on tranue have been written through her hand

You have seen that done !- You

Anything besides !- I have seen so many manifests taons, and in so many different circles, that I would not attempt to specify from recollection.

The counsel for prosecution declined to cross-examine Judge Noonan having amured himself upon several points in the evidence, the witness descended from the stand. He had been under examination two hours

The Spiritual Offering remarks that, whatever suffering may befull Mr and Mrs. Miller, the cause of Spiritualism must receive an impetus from the publication in the naws poper Press of the testemony of Judge Portis; and it will be still more extensively published if the case is corned, as

Victor Heon,-Thu great post, who, for many years excited the admiration of France and the world, while touching the publish chords of the human soul, has gone from among us at the ripe age of eighty-three. From the first day of his illness, in May, he spoke of the coming close of his expect with the composure to be expected of one of his faith. His convictions had long assumed a religious character in him, and he seemed invisible." Victor Hugo was one of the first who, in 1853, when certain avants distinguished themselves by ventiting a mechanical explanation of them, investigator, the planoments of table movements and telegraphing, at senses in Jersey with his friends Hadams de Grardin, Auguste Varquerte, and others. the account of which is given in Vacquerie a Mutter de l'Histoire. In his will Victor Hige bequea is 50,000fr to the poor desires to be borne to the grave in their hearse, and beckness d Colonel Slayback, whom I have also seen while he so the services of any Church he compades by disclaring his order, both here in St. Louis and at a medium's in New behef in God, and asks a prayer of all souls. The death of the great poet is a national cass to be expressed the beaming next.

Did he say anything that the medium could not have according to his will. Le Messonte.

Hence it is that the generality of people who have not reflected know no other than that all sense is in the organs of the body, and consequently that when those organs fall to demy by death nothing of some services, when yet man, that is, his spirit, then comes into his verient sensitive life. -- Swepennone.

Madame Guyon records an event in her life which and the "meed of a melodious tear." him dood, and secertained that he had died at the same trust to the solid ground of well-digueted and luminously hour at which what I have mentioned took place." (" La arranged facts. Vio de Madamo Jenne Mario de la Mothe Galon," écrite par elle meine

It is observable here that notice was given of the manufestation , that more than one person perceived it, and that no apportion accompanied it. These are dutinguishing features, and they recur in the persecution of Midle. Charon. That story, like the last, is too long to quote in extense, but, for purposes of comparison, it may be conveniently skimined, after which I propose to append Frederic W H. Myers, Esp. "Bosoe Higher Aspects of some very brief remarks. It will be remembered that the Meameram," Part II. 2 B. Hodgeon, Reg., " Final Report young actress had first opcouraged, and finally rejected, hor sultor, on account of his missinthropical disposition. He lost health in consequence, and died in two years and a-half from the commencement of their intercourse

On the evening of his death, her mother and several friends supped with Mille. Clairon. "The supper was gay. I had just been singing to them and they applicating me, when, as eleven o'clock struck, a piercing cry was heard. Its heartrending tone, and the length of time it continued, strack every one with astonishment. I fainted and remained for a quarter of an hour totally unconscious. . . Every succeeding night, always at the same hour, the same cry was repeated, sounding immediately beneath my window, and appearing to make from the vacant ale. . . . Seven or eight days afterwards, while chatting with my ordinary circle of friends, the stroke of eleven o'clock was followed by a musket-shot, as if fired at one of my windows. Every one of us heard the report, every one of us anw the firsh , but the window had received no mary . For three entire months, every evening at the same hour, the same musket-shot, directed against the same pane of glass, was heard to explode, was seen, and yet no one was ever able to discover whence it proceeded. This fact is attested by its official record on the registers of the police." To this succeeded the clapping of by M. Motager, the second on 'What a Birtia' by M. hands, and lastly melpdious sounds. "It seemed as if a Poincelet , the last by M. de Foarielle, who maintained his colestial voice warbled the prelude to some noble air which it was about to execute."

Thus for the hountings. For two years and schalf they had dogged their victim, and then they finally ceased. Then it was that Mills, Churcu learnt something which seemed to clueulate her sufferings. It seems the lover, saving petitioned in vain, on the evenmy of his death, for a final interview, had died Spiritualism in America. - Le Spiritualism in America. with these ominous words on his lips; " Rerberous creature ! But the shall gain nothing by vi. I will purine abbaied of the Psychological Press, 16, Cover-airent. 7s. 6s.

CONCERNING SOME PHANTOM SOUNDS. her as long after my death as she has pursued me during my ly's." \* Now the moral atmosphere of these stories is different. In one we hear a pure spirit's passing-bell, no more. In the other we see passionate rescutment subsiding by degrees into calm. The eminous cry is followed by a harmless explosion, and a humorous, though malicious, buffet. To these succeed the measured sounds of applicate,

gathers light from phenomena known to us and merits | But with that I am less monediately concerned. The attention. She is speaking of M. Fouquet, and writes points I wish to make are as follows (1) The previous as follows. "Two days before the Fite Dies the announcement of the sounds makes it probable that the maid went to make incourses for me. She found him in announcer and the author of the counts were the same the same state. He told her that he should come and bid jutenigence. (2) This announcement itself finds ats solution me farewell when he died, but that he would not cause me | in the verifiable phenomenon of prevision in magnetic sleep As I lay in bed at midnight of I may astance the case of Pierre Canot (given in Nowman's the eve of Fote-Diou, there came a glammer into my room, "Fascinations"), and the more celebrated case of M which caused some little gut nails near my bed to glow, a zone taken both there and more fully in Gregory's along with a crash as if all the window-panes in the house. And as Magnetism "). (3) Hence it is my contention had faller. The maid, who slept is as a new group, that the class of facts known as prevision is magnetic sleep axcended into that of her companion, thinking that all may be made to include cases where the predictor fulfile his the window-panes had fallen anto the garden. Nothing of ones prediction after his own buddy demolistics. With these the sort, however, had occurred I thought nothing observations I take leave of the subject in the hope that of it at the time, and sent as usual, the first thing more atories will be forthcoming. It is facts that are in the morning, to junuous after M. Pouquet, She found wanted. If we wish to lay a more foundation, we must

Society for Parcuical Reseases.-A general meeting of this Society will be held on Friday, June the 20th, at the Rooms of the Society of British Artists, Suffolk-street, Pull Mall, London, S.W The chair will be taken at 8.50 p.m. The mosting, which will be partly of a conversational character, is per to members and associates, who are a liberty to invite ton, Papers to be read. 1. Edmund Gurney, Esq., and on Phonomena attested by Mombers of the Theorophical Society" (concluded). Note Mambers and associates will be admitted on writing their names at the door. Persons who do " balong to the Society will be a dmitted on the production of an invitation-eard, duly filled in with one or more mainer, and signed by a member or associate. -- Edward T Bennett, Secretary, 14, Donn's yard, Westminster, S.W.

Mr. Edictions Visit to Untractor.-A most aminated controversy has for some time book going on in the Ulverston and Barrow in Furness Press, cupcernying the respective merits of Mr. Eginten a psychographic manifestations and Mr. Gowland's ridiculous attempts at what he calls exposure of them. The supporters of Mr. Eginton have championed his cause in the most spirited and determined manner, and we think, judging from the correspondence which we have read throughout, with implete maceus. The Electrica Maryor has been most growthy attacked for asserting that Mr. Gowland's performance was a farce, but its manifants have been mortified to find that the editor of the Fulcan, a Barrow paper, who is not a Spiritualist, unqualifically endorses the Mirror's description of the affair as being in accordance with the general opinion of the andience, before whom the "exposer" performed in Barrow. Mr Gowland's silly exhibition has only resulted in the triumphant rindication of Mr Echuton.

FRANCE. Large audiences were drawn to three lectures delivered, during the week, from 18th to 25th May, in the Saile des Capucines. Paris, the first on " What is Spiritism !" meablished character as a philosopher, and as a man of sound commen-sense. He concluded his foctors by contrasting the criticisms of savostigators, like M. Richet. those of charlatans his sumberland. The Spirituate of Marseilles seconbled on the 31st March and celebrated the anniversary of the entrance rate spirit-life of their Master, Allan Kurdec. The occurrence is the more impoung to Spiritists from the fact of the same day being also the anniversary of the commencement of the sea of modern

PHENOMENA CALLED "SPIRITUAL" ILLUSTRATED BY CHROMO-LITHOGRAPHY.

PLATE IV .- BOST OF JOHN KING.

bearing in mind that one proof is as good as many, I do naturally prefer to be at laberty to publish them. Amongs not think necessary to describe, bouldes, the same or the phenomena referred to may be mentioned :analogous occurrences have already been fully recorded by other investigators, or are settled questions to all who have carefully studied the smal seance-room phenomena. In my short notes on " John King," I have only referred to the more interesting characteristics of a familiar scanceroom "spirit," who is distinguished from other "performing sparits" by his quiet and seclate meaners, by his moral superiority, and by the perfection of his various manifests.

To deal with all the visitors from the unseen world I met, at times or regularly, with the same or other mediums, would In a certain sense, and with but slight differences, be a repetition of the same history I have given, for "John;" that is to my, na far as their existence as assuce-room "spirite" la concerned. The far more intricate question as to what these beings were in earth-life, or who they were, or by what same or title they were known, I am unable to answer. Moreover, it is of no more importance to the student of these remarkable phenomena to be acquainted with the past hustery of a "apirit," than it would be to \$50 talk to a k as 50 the norm of an action of a second transfer. know whether the first person one meets in the street evehad the measles in his childhood. If I am allowed to make a guess I should say that the majority of sounce-room and materialising "sperits" did, in earth-life, belong to a class of bemanity which were cortainly not famous for their oy name -Le Spir tione. high intellect or morality. I have also several reasons to approximate the intellect or morality. I have also several reasons to approximate the intellect or morality. I have also several reasons to approximately that in most cases their earthly existence terminal techniques, pointing, photographs, and direct error go to the auditory, violently, and at that period of life usually termed the coliminative point of physical existence, and that mone of us over mot or know the same individuality in the two series are also as any area of a proximately approximately approximat that some of us over mot or know the same individuality in

However, the primary and more important question is that of facts and the value of those facts. To the student of spiritualistic phenomena they prove this -- that there is

monaring the one of one who holes proyupon the great it has in power to assuage. Sporting Officeros.

### EXOPERISM AND ESOTERISM

For many years appritualistic phonomena have been presented to an incredulous and Sadducean public in the most frank, open, and unreserved fashion. Mediams most frunk, open, and unreserved fashion. Mediums be influenced by evidence, are heaty charlatans, who, after have been numerous, and have exhibited their marvelious a few hours' observation, have leaped to the lame and and mexplicable payelited powers, with an openness and unreserve strongly indicative of a thorough belief in their the alleged fraud was merely false inference, the result of own abnorman, or, if not abnormal, at, all events exceptional preconceptionand mexperience, and which was fully disproved

The Expterism of nearly half a century has, however, largely yielded to the Exoterism of the present day, and the tyrants of physical science, who have resorted to an antiquated and almost forgotten law, for the purpose of crushing psychic powers, have themselves solely to blane for the enunged support of speritual investigation.

Not many months ago access to psychical réances was easily obtained; all candid and respectful inquirers were welgoing visitors. Now, however, since psoudo-scientific men have resorted to an almost obsolete law and deeply projudiced judges, as a means of crushing strange pyschical facts, the unreserve less properly given place to a prudent reserve, and a rigid possport is required for the admission of a stranger to a seance, or circle, in which uncommon psychical phenomena are likely to take place.

Nor is this, we regret to may, the worst. Far more inexcumble is the attitude adopted by some investigators who profess to be not only willing but anxious to sift the evidence for the reality of spiritual phenomens, and who are not alterether without experience. We do not say it is so, but it really seems that, in the estimation of this class of inquirers, a Spiritualist is regarded as a rogue and trackster until he is proved to be a honost man. This applies not only to modume but also to any avowed Spiritualist who may be present at any meeting for experimental research in occult subjects. A glaring materies of this frame of mind occurred only recently. A circle of friends, only two of whom were Spiritualists, the rest being unconvinced, yet current seekers for the truth underlying these strange and socult facts, was formed to investigate certain alleged phonomena. In the result, we believe we are justified to mying that the party were satisfied as to the genuine character of the phenomena then observed. Yet now some of their colleagues, who were not presentadvocates of the "fishing rod," "brogmatick and pencil, and the "chimney sweep's tackle," modus operandi -suggest that the whole of the evidence is vitiated and rendered uscless because of the presence at the seances of ville-park, Lewisham, S.E. the two benevers. Spiritualists will appreciate at its true attend at the chambers of the Alliance, 16, Craven-street, value such an attitude, and will doubtless act in consumance. Charing Cross, every Tecsday evening, from six to eight with it. It may be unfortunate, but the nett result of a o'clock, to receive members and friends.

frame of mind like this is to close every door against such inquirers. The ones of doing so at any rate does not rest with Spiritualists, and it is well that the fact should be placed on record.

The profession of a psychic was always a precarious one. So far az remuneration was concerned, they realise greatly less of this world's wealth for their self-denying labours, than do ordinary persons with much less ex-Five inexate under the his medy in fid. Coheme, 21 2s. Page Et.

A recurs on history of a personal vide is, in otherwise and resections.

Experience are made in the control of the contr cuptional powers, such for example as preachers, lecturers,

facts, but it was hoped by sanguine souls that, at the close of the numeteenth century, repression of occult phenomens, by imprisonment or fine, would not have been appealed to, when every reasonable opportunity for exposure, if exposure were practicable, was open to all intelligent inquirers. Notwithstanding chercive repression by antiquated laws, the marrellous fast remains that all who have candidly entered upon the investigation with a view to the exposure of the supposed artifice, have, after due examination, become acknowledged believers. The only persons who affirm the imposition theory and who sometimes desire to carry their convictions into a court of law, whose trabunals are presided over by men, the opinions of whom, on their own showing, cannot inpotent conclusion that they laid detected frank, when ry the written testimonies of many competent and careful witnesses, more whose opinions as to matter of fact would, any other subject, be accepted without heatation.

It is an overely to be hoped that some of our more liberal representatives in Parliament may speedily direct national attention to the imperative necessity that exists for the repeal of antiquated laws, the sole use of which can only be to aid dogmetto sception in their vain attempts to suppress the exhibition of genuine psychical phenomena, which run directly counter to the dogmatic materialism of the present age, and which comredly prove to all candid and courageous minds that the limitation at present placed the a gral new outst be released, und the genuineness of paramena acknowledged, that by the majority are now classed among the impossible.

### LONDON SPIRITUALIST ALLIANCE

On Thursday evening next, June 25th, at 8 p.m., the Alliance will hold the last conversazione of the summer session. We hope there will be a large attendance of members and friends to welcome Mr Shorter, and to congratulate the esteemed president, Mr. Stainton Moses (who will take the chair), on his return to public work after his long and severe illness. We are sure a very large number of his friends will be glad of the opportunity of once more seeing his face and bearing his voice at these meetings.

As regards Mr. Thomas Shorter, who during the evening will speak on "Modern Speritualism the Progressive Development of its Phenomens,"-he, surely, needs no introduction. His name will ever be associated with the pioneers are reiders of nodern Sportuanso. Though next in o gh honour and exteen now has services to the cause will be more highly appreciated as years go by, as the wealth of the facts be has stored in our public records comes to be known. If we may judge from past experience, we an safe v promise our friends that Mr Shorter as usual will have something to say worth telling, and that, equally a matter of course, he will my it well. Full details of the meeting will be found in our advertisement coloning. Memiers can obtain tickets for the introduction of friends on application to the Hon. See., Mr. M. Theobald, 62 Gran-

We are saked to announce that members of the Council

### MR CECIL HUSK'S SEANCES.

June 20, 1885.]

last three months have reached us in respect to Mr. C. and touch the um nous apot with any coreck once in squared or Husk's scances, we are glad to be in a position to publish the following accounts of a scence at which we were also present. We leave the other witnesses to speak for themselves, merely remarking that, so far as the seance goes, we necession hadour and hopest from which t was roung. At was were ourselves thoroughly satisfied. While disapproving not neld by any visible hand, but appeared to that by itself very strongly of the methods sometimes recently adopted at A. this white the various 'ap're a were speaking at were new Mr. Husk's seances, we have always regarded him as a saked of they would permut another test to be applied. They powerful medium. The unwise methods of which we reamy commences. The test was that Mr. Husk all and take speak have, we are assured, obtained cheefly through force of circumstances, and the medium's sad physical affliction. Mr. Hunk is almost blind, and this has necessituted, in a large measure, dependence upon others. He clearly and distinctly than before, but unmistakably in has, in commequence, unfortunately allowed humself to be the same votes as usual. Once during the stance I distinctly placed in positions which have, in some cases, caused feelings heard two "spirits" speaking at the same moment, at of distrust. We do not think there is any valid foundation, what appeared to be opposite sides of the table, but I for this, and Mr. Husk, now that the subject has been meeted to him, is very anxious to remove any came for dispatedaction, and we can ourselves testify that he has always been willing to allow investigators to entudy themselves, in every reasonable way, as to the abnormal charactor of the phenomena occurring in his presence. We should advise these who intend to avail themselves of his services-and we hope our readers will not be slow to do so -to stipulate that he should sit for them by kinesif, and not in purtnership with another medium, also to confer with his gardes as to the conditions to be observed, his instructors having always shown themselves desirous of meeting the inquirer.

I gially contribute my evidence of what took place at the mance held on Monday, June 8th, at No. 6, Nottinghanplace, by sending you this short account of what I observed on

The room in which we get was a small one, having no our boards or other places in which any one could be concented So small, indood, was it that during the sitting it was not possible for any one to more about or pass round the "sircle" between the backs of the chairs and the small tables which stood against three of the walls. There were ten sitters besides the medium," Mr. Husk, and we were directed to join hands and put out the gas. Its a few minutes the "spirits," having made their presence known by " raps," were asked if we were mitting right. We were not have we soon re-arranged ourselves to their estadaction, and then sat in the boil was order. Mr Hust on the north muo will him back to the fire place on his loft Mr. Farmer, then Mrs. Parmer, Mr. Williamson, Mr. Templeton, Colonel Lean, Mrs. M., Mr. C., Mr. Egim ton, myself (Major Taylor), and lastly, on Mr. Husk's right, Mr. Bentall. It was my experience while changing from one side of the table to the other, in the dark, that enables me to make the statement about there not being much room to

Very shortly Mr. Hunk's "guides," "John King" and "Irremetable" became audible, and were asked if they had say objection to Mr. Hunk's hands being fastened. They had none so the gas was lighted, and Mr Bentall produced some copper wire and a passe of tough wood about two feet long, an inch wide, and half as thick, having eight small holes in it, in pairs, a pair at one tuck and a half from each and of the stick, and two pute three inches made those. He proceeded to fasten Mr Farmer's right hand by pusting the ords of a hit of the copper wire through the two holes nearest one end of the stick, placing his hand through the loop than formed, and tightening down the wrist to the stick by twisting the wire underseath. He secured each of Mr Husk's hands in the mine way to the stick at the two pairs of inner holes, and then I bound his left at the remaining pair of below, so that now four hands were attached to the stick in such a way that Mr. Husk's could be held each by a neighbour on outher side. At some us we were in darkness again, the zither, or whatever the name of the musical matrument is which ky on the table, was touched, notes were sounded, and the rither was taken up and moved round the "circle" above our hands. I board it strike some of the nitters

forces its movements using to its having a round spot of lummous paint in it which I kept in view. The light I followed In response to many letters of meaning which, during the was on the martine at, for I was able to thrust out my head, the air close to me. It also moves about the room quite out of reach of any naser. This I am sure of not a much by the sound it emitted but because I reservedly saw it cross and recross a line of eight which and e rit one count, rule the monge. mostis month and keep there for a short, one half a work glassful of owlet and water Light being obtained Mr. Honk had the wine and water administered to him. On the coons being again darkened "John King" spoke, and to my sar more don't remember if it was at that time or afterwards. As Mr. Hunk could only keep the wine and water in his mouth for a short time, the gas was soon lit again, and vary nearly the same quantity of wine and water was returned by him to the wine-glass as he had taken from it. This was seen by comparing it with a second wine-glass filled as first equally with the other

After this I was patted on the head by a noft, sound have , had was warm an fet just he me ke. It touches me very highely, and passing down my face, pulled out the onds or my mountains on both sides, and then, going under my et m. it seemed to feel its way down my nocktie, and unbuttoned the top button of my coat. While o was dung not I bent my head and kined it. It did not final or give way on receiving this salute, and falt to my lips quite first though very suft and relvety. At another time I was cateed by both care, my left being pulled till I remonstrated. "Irrosistible" acknowledged to this, but said that the former hand was, he supposed, that of some friend or connection of mine, but he did not know

Colonel Loap said he would produce a postage strong if the spirits" would pince it on his face. On consenting he gut it out and at once it was placed on his forshoad as we all saw, a match being struck for the purpose. Mr Farmer then saked that it might be transferred to his face. This was done, the stamp opposing on Mr. Parnter's lace when next light was produced. One other thing was done to me worth mentioning asked to be touched on the and of the mose, and, though I took care to move my head each time after I speke, in less than half a minute I was touched a quarter of an inch from the spot indicated, the error being at once corrected. Many more things happened which I cannot new give in the order of occurrence, but at less light was asked for and the seance torumented

I do not know how all those man feste who came amout "at of this I am quite cartain that Mr. Hask was a no way no physical cause of any of them. I cut the wires after the mission to release him and his neighbours. The wire had made has one mark on their wrists and that a deep one. Be ughtly were they fastened that I had to use some force to got one jaw of the uppers between the wires and the fieth.-I remain, yours

G. L. L. M TAYLOR, Major, Bodfordaltire Regiment B.M.C.

On Monday, June 8th, 1885, I was present at a lost-sitting with Mr. Hunk as medium, at the house of Mr. W Eghaton. The circle comprised cleven persons, of whom two were ladies Shortly after the lights were extinguished slight tape were heard. They proceeded apparently from the "fairy bells which had been placed on the table. The positions of the sitters were changed more than once, the directions being given by the raps. When the circle was finally arranged, Mr. Farmer sat on the medium's left, and Mr Boutall on his right. A piece of wood with holes borod in it was then produced and to this Mr. Hock's wrists were bound with copper wire, one wrist of each of his unighouse being cantlarly accured. It was then mepossible for the medium to more his hands without the knowledge of his neighbours, and the copper wire was fastened to tightly round the wrists that it appeared impossible that any of he hands could be withdrawn. This test had been adopted with the on the head, and it struck use in a similar way. I was able to consent of Mr. Huek's "spirit-gurden," whose voices had been al-

then proposed to apply a test to the " spirit voices." Accord mgly half a sharry glass of claret and water was poured into Mr. Black's month. Asmost immediately after the light was extingualted, the vous of " John King" was heard. He spoke but a very few words. They were, as far as my recollection gues "All this do ! God bless you all." The voice was ful and some tas, and resembled exactly the well-known voice of "John King." No other voice was board. although the apirit "Treesant ble" was requested to speak A light was obtained, and Mr. Husk spet out the liquid He had awallowed a very small quantity , and I do not think it possible for aim to have produced the voice we heard. During to a course of the meting four distinct "spirit voices, were don of any sort took place.

G. N. WILLIAMOS.

I have been taked to make a short report of a mendes hold with Mr. Hask under certain test conditions, and now do so.

We sat down pleyen routes the table, and after serse shifting found ourselves properly arranged. By raps permanent was given to apply the main test, that of a stock and wirm, which neurest hand bound town with the med unes, thus preventing draw in closed boxes, or in total darkness. all percentify of Mr. Huck in any way amploying too hands a cope W to so settences. Transcrible,

Ebouszor Tom Cole," and "John King," spoka from various muchs of the table, and georgemp agency to very accumuly recognize the different tones and measurement of the Yourge. Everyone also was more or less touched by hands, and a numeral matrument floated. Mr. Hank then took but a wineg was of abrot and water in his mouth, and whose thus in privat of the power of clear atturance, "John King's" voice very dustinally and recognisably said, "God bless you, light up (fas to two last words.) The clarat and water was returned almost in exact quantity to the wine-glass.

I sat by Cotonol Lean, and he musically proposed that a stance should be taken from his harm and placed at the roof. I hold his band firmly in which by the strong, but the touch of tohoste were tingeredicatly on both our builds; and immediately afterwards onne an exclamation from Colonel Loan. who doctored that it the strong) had been pusced on his brow, a votce remarking, that was surely "his roof," The storen was afterwards pieced at request on Mr. Fermer's face at the opposite side of the circle. In other ways the school was indeed very satisfactory, and, to Spiritualists, Mr. Husk a gamma mediumistic power was subabitably proved. For outside secretion however, who give no trust to Spiritualists thornsolves, the presence of a second medium somewhat, workens the test soud tooms.

DERTI. STONE.

At the invitation of Mr. Eglinton I attended the source hate. at his house last Menday for the purpose of testing the psychical powers of Mr. Hust. It was hold in Mr. Eglinton a own room trumpet. The light being put out, the circle was arranged by why of anything. means of raps. I was placed at the right hand of the medium, Mr Parmer being at his left. The light was then turned up, and by way of test I was permitted to secure the medium's hands with copper wire to astrong oak splone. I also fustoned Mr. modium a right hand. The aght being put out I seem heard a reality of spirit life. They dessented Spiritualism, deep voice purporting to be that of "John King," mying, " God bless you all." During the setting I heard this voice repeatedly, tale whether these voices were produced indepens power and malice of fallon angels. "No doubt these things are dently of his vocal organs. A light was struck, and done, they say. "The facts are undentable. They notored

ready heard. Mr. Husk and his neighbours remained bound in the medium took into his mouth nearly a winethe manner described until the end of the sitting. Notwith glassful of red liquid. On the light being put out, "John standing this, the " farry bells" once from the table and floated. King s " voice was board almost immediately, as deep and full playing faintly, some feet over the sitters' heads, all the sitters at ever. A light was again procured, and the medium countried were touched on the hands and some on the heads; a postage the diquid from his mouth back into the glam, there bring stemp was taken from Colonel Lean's hand, and was affixed to nearly the same quantity as he had originally taken. At an has forehead, and was then removed and fixed on Mr. Farmer's enriverenced in the science the "fairy bolls," which had a mould face. These phenomena necurred in total darkness, a light disse of huminous point attached to its under surface, ross, playing, song struck from time to observe the results. It was anto the air. The disc could be distinctly seen as it flew about in all directions. I was repeatedly touched on the head, face, and arm by both the "fairy bolls" and tempet. My knees were also touched by what seemed to be fingers. The voices seemed to speak through the trumpet, and to travel from one part of the room to the other

Honoway mad. Heybridge, Emex P W BESTALL

### THE SPIRITUAL OUTLOOK. HZ ZZ

I'We shall osteom it a favour on the part of our readers if they will forward us, for use to this column, my allusions to Spiritualists and Psychical Research they may come across in the course of their monel , but "John Kung" was the only one who spoke while Mr. reasong. We see a great many of these correctes, but it is obvious Firsk had the chreet and water in his month. No materians, that there must be many references to the subject which do not meet our eyes.-ED. or "Lique

The Specialer gives a page to the discussion of the mind reading theory of Psychological Researchers, as an explanation of the phenomena of Spiritualium, and the writer comes to the very sepuble conclusion that it does not explain materialisation, nor psychography, nor any of the physical manufestations. given to apply the main test, that of a stack and wires, which Thought-reading has nothing to do with the movements of served the purpose of handing the modum a hands, as it were, I material objects. Thought-reading does not thumb guitars, nor in the stocks." The gentlemen on either side had also their play planes, any thread chairs on your arm, nor write and

> No , thought-reading simply stands by itself, and may be an individual apiritual or mental faculty, but it gives no explanation whatever of what are called spiritual manifestations. And why try to explain simple credent facts? If I throw up a stone it comes flown again. This man amounding fact that no one has ever succeeded to explaining-not even by thought-reading. We talk of a force which brings down the stone, and call it gravitstion - but a name, even of six syllables, explains nothing. We do not know what a force is, nor how it acts. We simply see what is done-as with the phonomena of Spiritualism

> The spirite themselves cannot explain the things they do. Two slates he one agon the other in full light. Between them is a sheet of paper and the new closes with of a steel pen. On the top slate ma heavy inketend. In a few moments I lift off the inkstand and the upper slate, and find the paper closely written over mink on both sides, in two entirely different handwritings, which I recognise as those of persons who have departed this life, and the steet pen is full of ink. Now what relation has thoughtreading to such a fact as that !

One of the writers did try to explain. He wrote "Thus you see that we have the power to take the component particles. of the ink between the slates, put them together again, and use them contrary to the 'well known laws of nature." But how they did it, he did not attempt to explain. At all events, it was not thought-reading. Nor do I see how another dimension of space helps the nutter. And so I can find no explanation of the modes operands of the common photometer of our daily life, On the table were placed the "fary bells" and an improvined I atterly despair of ever knowing, in the world, the land or the

Therefore I rest upon the facts, and what may be fairly referred from thom. If we lack absolute proof of the individual identity of spirits we have a satisfactory storal conviction. We Farmer's right hand to the same spline, and my own left hand know that sparits live, talk, write, and give us the best orideness was similarly treated. During the meaner I also held the they can of their identity. They prove beyond all doubt the

June 20, 1881.]

So be it. If ovil spirits can give us sonsible proofs of their existence, why not good ones? If Satus can appear to us, why not Smith or Jones? Are we to neglect, reject, or denounce Spiritualism because there are bad spirits? We might reject or denounce the amyene by that rule. If God telerator Satan why should we bother shout hind. When the angels of God came into the presence of their Creator, " Sates, came also among them," and got permusion to terment Job. 9 5 9

Cannot our religious editors sos that even dasbolic Spiritualism existed very long ago by the Divino peretimion ! If God allowed Setum to talk with Him, and even accepted a challenge to a contest with him, as later on in Egypt, why denounce Speritualism because it is Saturne or diabolic? Of course it is. Every land spirit angule or human, enters into the constitution of

The poem exteemed the granden in our language. M too a Paradise Lest on etterly aparenance of tucharacters are God Salan, Adam Eve hours or good angels and house of bad once. Have the writers of our religious newspapers ever rend Milton? They call Spiritmilian diabolic. It is such as God has made it, or permitted it to some. We are not responsible for fallen angolt or fallen mon.

What our proschors, from the Pope and Archbishop of Canterbury all the way down-and the religious Press of all graden should do, is to see what Speritualism, good or had, can do to help these in their contest with Materialism. We offer them a body of carefully examined and scientifically tested facts which prove that the spirit of man surrives the death of his body.

The most important thing for religion in the broadest sense of the word, as to have absolute proofs of immortality—which plain, is one wast parable or allegory, as intich as is Danto -Spiritualium alono can giro.

"Last reason," rays Secrete, " witnessed a sunden and remarkable revival of "Sparitualisms," as it to called , and Jackien able secrety, ever engorly searching after some near thing, took the matter up with characteristic vigour. As far as may be judged, the 'straws which show the direction of the wind would appear to herald an even increased demand for psychological phenomena during the precent season."

For one reason, " anything new is cortain to extract the blast members of the 'bestnes,' and Speritualism was 'taken up by the best people.' It was only necessary to hint that Royalty regarded Spiritualism and its professors with a favourable ore; then there was for the young the attraction of sitting in darkened rooms with clasped hands, while to their olders there was all the landmation of doing something wicked-a game of be-peep with the devil." So on for nearly a page, coding with the carjous american that " the world of Spiritualum, supported by some very Electrican people, is at direct issue with the best known members of the scientific world,"

The fact is us exact opposition to this assertion. Every screntific man in Europe or America who has given the facts of Speritualism careful examination is a Speritualist. Whatever theories he may have as to origin, mode, or object, the facts are beyond question. Intelligent forces, claiming to be human spirite, are seen, heard, felt, and do many things generally regarded as impossible, and by a portion of the religious world as dishonal

Mrs. Rechmond is locturing in the Town Hall at Kennington, Mrs Hardange Britton has just returned, and Mr Colville in on his way, from America, which is too warm from June to September for lactures, except at eauty meetings. So our kirds of passage come over, and return in the natural, while some find it pleasant and profitable to make lecturing town quite around the world. "Many shall run to and fro and know Jedgo akali marene.

that she will again visit England.

### THE HERMETIC SOCIETY

Thus Society hold the seventh mosting of its present session on the 10th mat., when a paper, of which the following is an shatract, was read by the Hon. Rodon Noel, on the value of the historical element in Christianity

Although the essence of the Christian system, as well as of any other religious system, is inward, spritual, and universal rather than outstard, historical, and particular, the historica. alement has a distinct value as constituting a vehicle for the spiritual; and that there was a real historical basis seemed to be sufficiently proved by the tastimony of contemporary chancel writers to the fact that Jesus was regarded by His fellowers as a Divine parson. Not even Straum denice the genuineness of four of St. Paul's Episties, which go back to a.o. 60, and suffice to show that the history of the Gospola was then already behaved by the Church, which it hardly could have been had the narratives been myths. And the readiness of the first Christians to suffer marbyrdom for their faith proved the gene memers of their convict one. The farmous work, " Historic Doubt's concerning on Existence of Napoleon,' showing that his hint or was out a now form of the solar myth, proves how easily actual destory can be place oly discremend. And the argument of Christian divines steam the four whom and este subment of the Christian Church within so short a period see hardly intalligible without an actual resurrection of its Founderspecied unanaworable, though the procise nature of this resurrec tion had been laft for us to gather from the phonoments of modern Spiritualiani.

His object, however, was not so much to prove the histori cal been of Christianity on to exhibit the value of an instorte Christ, It is true that the Gospel nevrative may, and leght to be, regarded as an allogory of the regeneration and development of the human com, a parable of interior processes comment to all the elect. But what are termed real events are often as good a parable as imaginary once, and have, besides, a special value in being real. Nature herself, in mountain, see, lake and

Divine Comedy," Spansor's "Facty Queen," or Bunyana

Pilgrim's Progress." Yet the external world is a concrete fact. And moreover, when we speak of the human soul, its regeneration and education, we must remember that the term is an abstruction and there are really only human souls. So that if we alloge the Gospel history to be an allegory of the regeneration of the soul, what we mean is the regeneration of every individual sout, past, present, and facure. So that if the history related in the Gospala represents the actual experiences of some particular soul, it would be even more valuable than if it were shaply a mythical or imaginary history. If—as is the case—external events are important only as they seeve to develop and manifest character generally, they become the more important in the case of a particular Donne-human individual, as was Jones. As for the ruestion of the possibility of investibility of here events, it is not for students of, and believers in, because phenomena. destroy them on due ground. That would be he part of the Agnost c and Materialist. We, on the contrary Involvent reason to conclude that we at one called in tacles are certifier as results nor improbable. Nor is the alleged pravious occurrence of some of the sucidents an argument against their gonulnances, if we pounder that all material phonomena and external events are but the ultimations, on the lower plane, of spiritual reaction. and liable to recur undercorresponding conditions. Human lives and conduct are as much subject to law so the physical physicansens. of the earth and sky. There is even a correspondence between the two classes of phenomena. The festivals, rites, and corsmonses of the Christian Church have been shown to resemble those of the azment pagest nature-worship, and to represent but new adaptations of the solar myth, as illustrated in the histories of Beal, Osiris, Mathras, and Apollo. But this only confirms the pootic view of the essential educatity of the spiritual and material worlds, by showing that the latter is but a reflection, manifesta tion, or "incornation" of the former. Hence, so far from doubting the reality of a carear on the ground that it repre souted such a correspondence, rather should we expect that in the case of a special manifestation of the Divine-human conaccountem, there would be such a providentially-ordered curcor as would specially exemplify such correspondence, and constitute at the same time a representative curver of all perfected Man, Justicen has returned to America. It is not expected souls. Nor would the human imagination be competent for the ciaboration of such a conception unaided by the view of an SPIRITUALISM IN LONDON & THE PROVINCES.

actual career. The ideal embedied in Jesus Christ was not that of Rome, Judge, or Greece, or Alexandria, nor that of the Stores, the Essence, or the Ascetace. No doubt, there are features in common with those of Buddha and other great presentment at once of character, doctrine, and life, and one so much in advance of what the world has even now been able to appropriate and ranks in its institutions and customs, or to pay much more than a verbal homoge to. As well try personalities, of moral and intellectual genius, may be partly the resultant of pre-existing and surrounding influences, but they bring something of their own with them from God, which line the true rangical, supermutural, transforming power to compel, mould, and barn-as it were -the clay into forms of tite and beauty

Moreover wough regeneration must be wrought within each mal for most appropriate be effected by proxy, the question run a a 11 was this brought about 1 Surely not alone by more in which weeking that we are not isolated upits but members of one another-but by the aid of other and advanced scula, who terve to show us the way. Actual lives, such as those of a Trinity. In the Christian religion the same threefold symbol in Washington a Mazzini, a Gordon, are worth many sermons, or still typifed. Revelation became buried in allegory. even processes of abstract ressening. Bestdes, the proud resolve to look only within cornelves for strongth is an attitude unbelitting a mortal, who possesses of necessity sources of weakness within himself. There is something to be said for the Christian virtue of humility and dependence upon a Divino power matter than in our own, an age in the arrogant self-confidence of a philosophy murely or no tank. We are not ourselves without our fellows, without Nature , but are only truly ourselves in these. At all events, such affectation of self-relient Derty could become only the very flower and crown of humanity Yet even Jenes was filled in His atter and some ever the t Falser. We cannot all of no for a second and authorized boautiful ideal after which to sapire, on that it is of infinite importance to us that a neble example be reas, and to know not only that sense have come hear to ste a summent sof that it has actually book reasted. Her box the amoree do if he if it emis Christian an historical parson, a man was in each feb and consummated The essential elentity with God not in the orthogon some, but only as one who fully developed and realised the Divinehuman nature which belongs to the race, and of which all have the potentiality here or hereafter. Not that any belief in such hustorical reality is essential to salvation. Many a person is far more obviously "saved" who has no such belief that many , of ten sare indeed vicarious as an atomoment, proprietion, and reconcilation for the race. The true being of each is in all, since we are soudary to each other, and hence it is impenible that any ovil or good can be wrought in the world without the race being officied by it boundfornly or the reverse, but they are a secret leavenfor histografath. That a merephanomenal ortemporal event this have such monachtorise disciplinated, a second to we are under those or and to use a the gain see a last the unities on og event are also rested to the eter a. Of our bette on and to the heart the me and every the eter about the me acknowledged by the kine and every the about the me and the every the ev The results are men a liminate throughout a human batch as we as a man Sakya M man Zeronster. The result is that the Christ within men is an awaken of hy the Christ without The paper, the argument of which only we are able to re-

The paper, the argument of which only we are able to report, was replote with poetic imagery and diction, as well as with metaphysical thought. In the discussion which followed, and which represented considerable diversity of view, the Provident cited a number of important discrepancies between the followed, and also between the other books of the New Tostament, of a nature to show that their writees did not perfectly and the other without the results of a nature to show that their writees did not perfectly and also certain changes in the Revised Varsion, seriously affecting current orthodox conceptions, and also certain changes in the Revised Varsion, seriously affecting current orthodox conceptions, and also certain changes in the Revised Varsion, seriously affecting current orthodox conceptions, and also certain changes in the Revised Varsion, seriously affecting current orthodox conceptions, and also certain changes in the Revised Varsion, seriously affecting current orthodox conceptions, and the continuous continues by the highest artifactor the construction and the conception with a paper by Mr. Marthard on the attention and incthoo of the Gospela.

Some years ago there was a measureric infirmary as London, where surgical patients were put into the meanneric alcop and upon painlessly. Just as this was giving an impetus to the study of meamerism, chloroform was introduced. which, being more speedy in its action, was, as an amesthetic, made to supersede the mosmeric sleep .-- H R HAWRIS

that I do not expect my account of them to gain general egmatances. I still remain a sceptic as regards Spiritualum, but 1877

WHAT CONJURERS SAY ABOUT PSYCHICAL (I repeat my trability of explain or account for what must have been an intelligent force that produced the writing on the slate. which, if my senses are to be relied on, was to no way the result of trickery or sleight of hand."

On the 30th of the same month Mr Kellar addressed another letter to the Indian Doily Nace, reporting some experiences of another kind with Mr Eglinton, and regarding which he said :--

"In conclusion, let me state that after a most stringent trial and strict scrutiny of these wonderful experiences I can arrive at no other conclusion than that there was no trace of inckery in any form, nor was there in the room any mechanism of suschingry by which could be produced the phenomena which had taken place. The ordinary mode by which Markelyne and other confusers instate teritation or the floating test could not possibly be done in the toom in which we were amenibled."

### The Testimony of Professor Jacobs

Professor Jacobs, writing to the editor of Licks, make Memoiro adaresso a MM les membres de l'Academie des Lucki, April 10th, 1881, in reference to phenomena which

> "Spate of the assertions, more or less trustworthy, of the French and English journalists, and space of the foolish joulouses of ignorant conjurers, I feel it my duty to show up the bad faith of one party and the chicanory of the other. All that has been said or done adverse to those American mediums is absolutely untrastworthy. If we would rightly judge of a thing we must understand it, and neither the journalists nor the con jures possessed the most elementary knowledge of the science and a sincere Spiritualist, I affirm that the medica is finds to the Speritualistic order of things in every respect

> "Meurs, Robin and Robert Housing, when attempt up to mittate these said facts, merce presented to the public anythmy beyond an infantine and aimost grotuque paredy of the aski phenomena, and it would be only upwent and obtinate persons who could regard the questions seriously as set forth by those guntlemen. If (as I have every reason to hope) the paychical studies, to which I am applying repail at this time, succeed, I shall be able to establish clearly, and that by public demonstration, the immense line of demarcation which separates medium in tio phenomena from conjuring proper, and then equirecation will be no longer possible, and persons will have to yield to evdence or enyt rough predetermination to dony .

'Following the data of the learned chemist and instural philosopher, Mr W Crookes, of London, I am now in a position to prove plainly, and by purely scientific methods, the existence of a 'psychic force' in meansurism, and also the indivithat chance or skill could over produce effects to reunderful (tout it duality of the spirit in spiritual man betation I notice to fait impossible que le hamed au l'adecase prime gennité produire des you, deur sir to accert this lotter in your next number, il agresnote to you, are are

### Testimony of Samuel Belinchini.

Samuel Be achie. Court Con arer as better, made the following declaration in December, 1877

"I hereby declars it to be a real action to give deceates judgment upon the objective medial performance of the American medium, Mr. Homy Slade, after only one sitting and the observations so made. After I had, at the wish of several highly externed gentlemen of rank and position, and also for my are interest, tested the physical meditionship of Mr. Slade, is a series of metinga by full daylight, as well as in the evening in his bear son. I must, for the take of truth, hereby certify that the phenomenal occurrences with Mr. Slade have been theroughly examined by me with the minutest observation, and investigation of his surroundings, including the table, and that I have not in the smallest degree found anything to be produced by means of prostidigitative manufestations, or by mechanical apparatus, and that any explanation of the experiments which took place under the circumstances and conditions then obtaining by any reference to prestidigitation is absolutely impossible. [1 nost cest with such men of science as Crooken and Wallace, in Loudon , Perty, in Berne , Butlerof, in St. Petereberg, to search for the explanation of this phenomenal power, and to prove its reality. I declare, moreover, the published opinions of "In respect to the above manifestations, I can only say laymen as to the How of this subject to be premature, and, according to my view and experience, false and one-coled. Thu, credenc. Forty-eight hours before I should not have believed my doctaration, is signed and executed before a notary and witmayone who assertined and manifestations under annular for moster. PRICE TWOPPICE

The Edyanderry of the a and Chi and the Relations of the April and the Relations of the April and th

understood that he can accept no response to thy as to the otymology and meaning of that lettle word "OD," with its opinions expressed by Contributors and Correspondents consequent derivatives of "Odic," "Odylic," "Odified," Free and convicous discussion is meriod, but senters are "Odoscope" and "Odometer" alone responsible for the articles to which their names are

### THE ETYMOLOGY OF THE WORD "OD"

THE GEA

RELATIONS OF THE ODYLIC FORCE WITH ANIMATE AND INANIMATE OBJECTS

SAYUEL EADOS, M.D., M.A. (EDIX.), Ph.D.

owing to attrition, contraction, and other lingual changes, on there is a reason why the little word "OD" was at first human testimony is to be lake uside altogether. name are of to express the conditions, qualities, and relations of this new cosmic force, which Boron Reschangach found to pervade every object in the wide universe of God, buch, of necessity conducted in the dark, are intended to from the stellar orbs above, to the rolling ocean around, and the vest underlying strete beneath.

Heat, light, electricity, and magnetism, the four soknowledged forces of the acientists, have been insulated, that a known relative to the principles, posultarities, and weighed, and measured, but no genius has yet devised an priorcope, or invented an odometer whereby to some or to measure this marvellously attenuated and wondrously refined form of matter-being of all the imponderabilia, the for hours at a time, with tests and counter-tests of every most subtle and delicate.

The existence of this force, and its complete demonstration as adistinct dynamic power, washrut shown by Baron Charles von Reichenbach in his work entitled "Physico-Physiologi these by ly gifted sensitives during their experimentation ed Researches on the Dynamics of Magnetism, Electricity Heat, Light, Crysta rector and Coemas a work advance of the amentific notions of the age but one that can afford to he in abeyance till the mind of several corner formation, the right half seeins of an azure blue colour, and up to it, so as to appreciate and apply this force to the from the right ingers and toos, issue streams of blue light, prihary concernments of life, whether domestic, the apeutic, the left had seems bathon in a sort of pale orango-red philosophic, or what not.

I'm want of confinability renders the invention of an in , the left fingers and toes. attracent of memorement a motter of great difficulty. As a 1 In the dark, a wife, of a highly sensitive nature, sees her force standing midway between magnetism, electricity, and husband and their child translatently asleep, as if bathed in caloric, it required a peculiar word to express its properties cerulean blue and orange-red, and from their mouths, during and relationships. Now VA in Sauscrit, means to blow the act of breathing, issue clouds of luminous vapour. The (motion); VADO in Latin means to go (motion); VADA near uself is encureled with streams of radiant colour, such in old Norse means to flow (motion); and, in old German, as are represented in Eastern pointings of Christ. Dulced, VADA by changing V into W and A into O, the word to highly-erought sensitives, all he man beings seem surbecomes Wods, which in that language signifies motion per-rounded with a luminous atmosphere from head to foot. pading all things, and which having blown on (motion), or These, and many other appearances are seen by sensitives gone forth (motion), or flowed away (motion) into infinite and demi-sensitives, more or less, and would be seen in broad

space, affected, in its varied transits, all kinds of matter till N. Bear's Medianatop and State of the Control of th that, with unseen, but presentable powers, rasher through, The Editor of "Leane" desires at to be distinctly flows on, and persules universal nature. Such is the

Since the Odylic force is exceedingly delicate, and fafintesimally refined in its nature, and man has not seen endowed with a special organ, or souse, in the present environment of things, for its perception, how, it may be maked, have we become acquainted with a force so avanescent and anconfinable ! Portunately, mankind are born with ariforest susceptibilities to surrounding objects and dynamic forces. The smell of cortain flowers will cause fainting in ( some parties, whilst others are proof against emanations of all kinds, whether strong or weak. Females are more As there is always a reason, owner, or purpose for the susceptable to all forms of refined and invisible influences imposition of a sense to a thing, and which is always than males. Hence the reason why Reschenhach called to appropriate at the time when first applied, though often the his aid the delicate organisation of woman in his physical by or the "wherefore" of its boung so used is lost remearches and experiments, carried on for hours in the aght of or forgotten, or inexpaide of being traced out, profoundest darkness. The credibility of these provers cannot rationally, or consistently be called in question, tallets

Man, as stated before, having no special sense for the serception of the OD force, the experiments of Reichensupply this natural defect; and it is to the Baron's on nontable perseverages, and to his elegantly and severely accurate experiments, that the world is indented for a l rentionalnus of the odylic force. The evidence is overwhemming From 161 natural sensitives, selected from all courses of society, from the poble to the present, in darkness conceivable kind, were these experiments carried on. The following are just a few of the results selected from a vast nergy of curious phonomena recorded to have been seen by in the dark senices :-

The annual body, as seen by these senatives, seems but her in a sort of translucent light. The body, being dual in colour having sheaves of this radiant colour chanating from

daylight, and by everybody, had man been endowed with a special additional sense, for the perception of OD. This is the reason why this force has not been perceived earlier and the laws determined and made known. Heat and light, electricity and augmetism, are closely allied, but whether as such, subject to spiritual law, we are surrounded by there is a common erigin, and these are merely distinct spirits in affinity with us, and are open to their influence. groups of phenomena, science has not yet determined. Cortain it is, that the odic force, although often blending tions and thoughts, is determined by our new affections, with, and forming a part of, the above-named forces, yet it thoughts, and aspirutions—like attracting like, is different from all of them, and from each of them, in particular

a we only as mokly as a man taking a brisk walk

OD carnot be magnetism, for that force is only inhereevery form of matter.

OD onwart be electricity, for that force is retained only on the surface of bodies, whilst OD is distributed through lows spiritual qualities. out every particle of matter in its entirety

From thus it is evident that OD is a new force in bescufter

Man, in the present state, is tied down by the know the analysis of Dr. Thomas bree - y the sac senses the who tall us that such are prevented from acting in the earthentirely distinct from that of the same of touch. The indisputable facts. introduction of a new source in the human economy was considered, at the time, a during flight of genius, but physiologists now admit, as a matter of course, a sixth, or bruscular souso, as another pilot to copressions from without for the elaboration of thought, oy our intellectual and

Now, of maddition to these six sensor God had endowed man with a seventh some for the perception of OD, or the odic force, we should not only have stood on a legher level of knowledge than we do, but the moral continents and the religious emotions would have mainfested themselves in purer and nobler forms. Deceit would then have been impossible, for we should have read off each other's hearts, and hypocrisy and intrigue would have slank away Honesty of purpose being found the best poncy, Talleyrand and men of his class, could not then have used cartain forms of speech, for the purpose of concooling and hiding the real nature of their thoughts, but man would have stood before ha fellow man, and be known, oven as he knew houself from another, and a legher state of being.

he romained a dentzon in this part of the universe. If with the addition of one other sense on y such an inprovemature could have been developed, what will take place, it is Compas. The Spring Source on Type of a Press. In passible to conceive, when man walks forth from his present and other the destination of 1 of The Twenteeth Century, We had mass the body at appeir for when a the soul's faculties of the exercised without corpored repression on the name which with previous the great volume of spiritual inture on greaters out before their in the rub in Press and a lectures. Le Messager. him, in extent. But table, and in auration without end.

THE Corrier Dove, published at Onklands, California, congratulates its readers " upon the growing evidence of the progress of Spiritualism in numerous new books are pariodicals. and it doney are the new journals seatured, but some of the older ones put on an appearance denoting outarged circulations among these is the Spiritual Offering,"

### ON SPIRITUAL INFLUENCES. (Extracted from the Speritual Officing)

In this world we are spirits in earthly bedies and are, Whenthese are rits are who may influence us in our affec-

The influence of some spirits tends to elevate and purify, of others to depraye and delease, with the former we asso-OD cannot be heat, as the latter was be measured while conto the nigher kinds of spirit-control or mediumship, with the former entered, and its mode of transmission is much the latter that of suprogressed and low spirits, such (1) as are in accord with an individual's own deleased affections OL cannot se light ( or this every noves at the cate of and will; and (2) such as obsess, or poment, an individual, 200,000 miles in a second of time, whilst that moves along the spirit having psychologized, or subjected him to has own delased will

Mediums are especially open to spirit induence, and, to a few substances, and can only be conveyed along cartain therefore, enght to be careful as to the company they keep, kinds of solurs, whereas OD can implige and permente, and as to whom they receive at seances, when they yield to spirit-control, for every one with whom they come in contact is surrounded by his own sphere, charged with his

Within the last few years many eases have occurred illustrating the power of unprogressed spirits upon mediums. zeronce, and the somer it is recognized by philosophers and Such cases have occurred at all times, instances of investigated, the botter for themselves now, and their fame obsession are numerous in the history of Spiritualism, conswhat simplar to that of the Gaderens.

Spirits in every kind of evil are constantly passing out ludge farmaled to the interlect by the fire, or, according to of this into the spirit world. Home Spiritualists there are perception by the muscles, according that divides gars not aphere by some incomprehensible kind of spiritual police metaphysician and acute mental analyst, being d. i. at and system; but that they can and do act upon us is proved by

> Lore turned to hate nakes femons in he air Death does not conquess ones an ager hearts. On earth they live, about long everywhere And there they soldly play their trage parts."

Nothing provokes the enemies of medicase more than to suggest that the influence of enprogramed spirits may account for certain condenned mexicute at seances, although such influences have been known, beyond eavil or dispute, to have been operative in many cases. These mis sevmen may, themselves, have attracted the evil influences which canned the very things attributed to the condemned medium, whose categrity may have been proved at handreds of seminors.

It behaves the student in spiritual acience to study, by the light of fact and experience, the influence exerted by all orders of spirits, keeping over in view the first principles. stated at the beginning.

The Jon of had even permitted him to place conspiciously in their office a class case containing pieces cut from the Irapenes of materialised spirits, with printen description of their origin.

### ON SCEPTICS AT SEANCES

"H. K.," a very well-known contributor to the Spiritual Offering, quotes Mr Eglinton's letter which appeared a few weeks ago in " Licht," in which he declined faith ] to receive, at a materiausation seance, certain sceptics, on the ground that, whatever their honesty, they were not likely to be convinced at such a scance, that the result might be a deepening of their scepticism and condemnation of the medium. He thought that neophytes should first study manufestations which did not require the conditions for materia, salion

experience may have been, that of other mediums, in what we want now in to know how far this method is really America, has been that the presence of sceptics with honest survivable in cases such, for anxione, as thus of cancer to sounds is not an impediment to any manifestations, and which it is a one that and are a net can be applied with that they are better fitted to be present at a materialisation scence than many who make a boast of their experience-Spiritualists of many years ago, who know nothing expermentally of ucore recent manufestations, and who have settled, à priore, that full form materialisations are "frauda"

"H. K." would advise Mr. Eglanton to adopt to materialisation seamest, recoplytes, if candid and antellager . in preference to any full-fledged adherents of this sort.

Our point ways "H K.," is illustrated by the recent event at St. Louis. Mrs. Mr. er whose go asine modificathip has been well established witness Judge Portas' testimony at the prospection, -- beld a scance under every condition required by the circle amembled. As it turned out, in the circle were certain Spiritualists of the kind just discribed, and body is which for home mass his organic state. It is in who cause resolved to find out the "fraud" which they assumed was to be done, and who, having got what they came for, exhibited the many publical fary against the came for, axhibited the many prilum fary against the tion goes before argumen in development, and that there are medium as if the had not submitted to all their own large classes of cases in which the disthill the of a diseased organ

Our understanding of the matter, continues "H. K.," is that their erri condition of torid a . I wong at me ted to the circle a corresponding order of spirits, whose influence, with fatty de next a even certain forms of atomics change in which their own immed influence, overcome that of the medium's the hatelet of ed to are in her decouled that desiryed, may be usual control , and that whatever "fraud" appeared was arrested and to some extent repured. The cir medicatric authoris the work of their own spiritual confederates.

It is lumentable, "H. K." concludes, that another mediate was concerned in the plot, kinentanic indeed that, moved by some and feeling, he should have sought to abuse a stater medium. Unhappily, this has not been uncommon in the history of our movement.

Mr. W Ecusyron held a reception on Wednesday ovening Last, at G. Nottingham-place, W., which was attended by, among others, Mrs. Putterson, Mrs. Shaw, Miss Frigolius, Hon Mrs. Gors, Mr. Daviet and the Massa Daviet, Mr. P. Walker, Mr. C. W Williamson, Mr. Column, Mr. Tietkers, Mr. Debenham, Mr Colling road, Dr. and Mim Wyld, Colond Lean, Ledy Helena Newenham, Sr B. Leighbot, M P., Mr. Lounard, Signer Roads, Mr. Cuandl, Dr. and Mrs. Wilson, Mr and Mrs. Farmer, Mr. and Mrs. Darter, Major Taylor, Mrs. Manning and the Masses Manning

By bringing mortals and spirits into intelligent communication the sting of death and the power of the grave are greatly seasoned, the mystery of death disappears, the problem of the ages of solved, and man is understood to be, not a bubble sporting upon the sea of life for a moment, to be horied into no back might of annihilation the next but a permanent individually a wh each of e with his variou changes, in but an incident in his end-less parmey if and it ment. So than Offerron.

The word, the conscious, into these teachty to whose mandate

the pacerul indecates and forces of the brain have y enter the sence that a ner that has trace, the evolution of material forms and familiarness shelf with their laws. It is conscious tool from whose predound depths and lofty to this has been projected the light that illimatess the sugmest wird, he only unselfish devotion warning and beautifying all the avenues of human life, that good in not the ciple of encourage at matter, but a ray from the "Divine remote," a vital fragment of the infinite, been of the sparit , its elementware indestructible, its life stormal. It is no new creation or transport formation, but, as Josep mid, "was with the Father before the world was."

### CORRESPONDENCE

[it is preferable that correspondents abould append their names and addresses to outsimmentations. In any case, however, these must be supplied to the Editor as a guarantee of good

### The "Lancet "on Palin Bealing. To the Estator of " Ligary."

Sin. -The subpoined extract from the Lancet may be of interest in connection with what I have from time to time coma unscated respecting faith-hooling. Not so long ago, if I am not much mistaken, the leading organ of medical opinion would not have been an telerapt in tone as it now in. Some cases of Upon this " H K." remarks that, whatever Mr Eglinton's healing by faith we may assume on this authority to be facts success. The writer in the Lorent does not suous very sure on this matter. - Faithfully yours,

> There is no miracio in healing by faith, whereas it would be a cracie form organism being constructed on it by and the laws for such as they are, faith-healing did not, under favourable constory, so ar. The fulfacy of closer was a practical a tradecting ga rengions from nor lies in the act. his they intenderstand and miscotes wet their own formatic. It is tho for b that beats, not the avoidherate out we are gen for fait, on sale thoughful of faith. The whole process is self-contained. Nothing is done for the believer like act of believing by the motor force of its cure. We all mineman the old trick of making a maniff by personnelly et any ham he is ill until he believes it. The contrary of this is making a man well by adhering our to scheen house it be so. The number of the Campacles, porturing wall be the opened main age of the persons who are expanded using the econoton state of mind was will an orthogona of this process to the province of this posts scape but we are not eare that they are justified by sejondile facts in making this handarion. It must not be forgotten that funefor a performance or its functions are margly due to want of power or regularity in action. And it was face in a hology that if the from some diges or given by magnetic most of the book, appeals on this destratet, e me appor quasis - in .... indiffere am of conhective tissue. is a very potent factor in the sinclicration of discuse, if only at be allowed fair play. An exercise of "faith," as a rule, suspends the operation of severe otherwise, and appeals strongly through the resciousness to be much and underlying faculty of vital force There are many futractable cause in every practice which tright be excel by faith. I wisel this those poor persons should be enclited by some means macters lit to want. If they can be realed by facts we object to be very glad and throughful too, for he is caken sent of those who, being weak-infinited themselves, make dupos of other weak-adaded latk to their advantage. This is a blind leading of the blind in which they do not fall into the ditch, but, by a happy combination of circumstances, actually escape danger and gain something to boot

### Liebig's Experiment. To the Editor of " Linux.

Sing I am much onliged to " Lily" for her courteous roply to my lotter. I named but wish, knowers, that the authority that sho is able to give for Liebng's alleged experiment were more direct. I believe I am right in saying that mun of science know nothing of such an experiment as Dr. Welfe demantically narrates , min such of them as I have conversed with are very merodulous as to its ever laving been attempted, not to my performed.

### June 10th. A SPIRITCALIST

### Astrology To the Eddor of " Lioux."

Ein. Will you allow me to introduce a subject futeresting to very many people, and which communing as costandy does, much truth, ought to be rescued from the obscurity and soom which has been its lot for many years, - Astrology If the numerous sinateurs of the art among your roaders would combine and exchange cards, or letters of inquiry, much good would came. If you will allow me I will ask your corresponsome organisation I address this inquiry to anyone who will topiy either in "Light," or privately "Do you know from personal experience of a rapt parallel of Saturn, or Mars, or Uranus causing the death of anyone? Do you consider Secondary Directions (calculated from the dealy motions of the sun and meen, giving a day for a year) to be as reliable as erections exceptited by the sour-ere system, and pursued by the present and past Zadkiel ?- I remain, years respectfully,

### The Value of a Personal Christ. To the Editor of " Lieux

Hermetic Society was very well made, yet one point was madvertently omitted from the argument, which I regard as entotthal

I argued that even when we are espable of forming a high more conception to the resimution in life is unmense. And to all Spectrumbets, because of the accessors meanwhip dis If we do not know that the ideal has been realised at least once, played throughout. - Yours, &c the caparation after it is consistent with despair. We may regard such a clumeter as only a besutiful dream of devent hourts, too for from the possibility of human attainment. But once believe that it is a realised actuality, and we may, though after off, and with balting stops, joyfully follow whose the blessed feet have tradition before. Besides, man will worship a Divise shad mearinate outside themselves; If not Jerus Christ, then Koot

By virtue of exceptionally perfect attainment, I added, Jesus Christ, on leaving the parth, and entoring Nievana, became Lery and Soverings of our race and disperuntion, fiving Helper, Renor, Saviour, Object of prayer and murstop, as well as Rubject of devent monitation. When I shall see individuals and weiety growing lute, and immending the character of Jones Christ as portrayed in the Gospels, then shall I admit that the Christian revolution has been superseded by a higher. But Ifo, not logan, is the criterion,-1 and see, your faithfully,

Americay Park, June 21st, 1883. Bours North

### An inquiry To the Etitor of " Links.

Sin,-Can may of your renders help me to abuntaly the necessary and moderate described in the following words, spot on by the tilting of a most table, under the hands of four perfectly hunost, but scaptical persons, to whom the mesos and sireum atomeos were qui ce indene with

I believe that hat a sorgamall proportion of these cases has ever been verified. But, if they are unite fictitious, who invents them? Not one of the persons present could insee the most distant relation with a knowledge of oither, and that most convenient out vague word teleprification not soom applicable in such cases.

There was a little difficulty in getting the Polish (or Russian) with case and decision. S. E. Dt. M.

Lioratia Long, sés Bryan, wife of Captain Long, divorced from him on account of Gouard Arbetlinet

Nine Socktovits, executed (hung) for resisting the toldiers who were surreling for Peter Phagoliculti, loader of a secret pockety. Surknovitz was executed with another about a year ago.

### Mr Buck's Mediumship. To the Editor of " Lioux."

Six,-I have been a Spiritualist for mearly twelve months, and thanks to my intinuer with Mr. Hook and his guides I have had a great number of tusts. I was at one scance whom Dr. Wyld's colobrated ring was put upon Mr. Hunk's wrist, and I may add that I had proviously been shown the ring and excussed it I laye had forms and voices of relatives and friends appear and speak to me, but have had no direct evidence that they were the spirits they claused to be, and as this subject of identification (the dates and mones are excessedly given by Madame appears to me to be an important one, I have not assisted them m any way, but have been patiently waiting until some spirit friend would give me positive proof that he was actually the person he represented hisself to be. This I think I obtained on Sunday ovening but at Mr. Hunk's house, when the form of a brother, who possed away a few yours class, appeared at the

nest, "C. C. M." (who seems, from his letters to "Lacur," to lable, the likeness being must distinct, and he gave his mame be an adopt in the science), a fair question which may load to ("Chris") and a message for my sister. This was a grand personal test, because no one on the room knew that I had ever and a brother named "Chris," and even if they had this would not account for the convectment of the Ekonesa and for his conding a morage to his favourite sister. -I am, &c.,

Beckenham, June 16th, 1885.

### Onemacions Madramabio.

As Shows in a Porn by James Spendise. To the Editor of "Liont"

Six,-The following poem by Japan Spedding (well known at the author of Lord Boom's Life, "Evenings with a Reviewer," Bin,-Through the shetract of my paper road before the &a.) I have copied from Sir Heavy Taylor's Autobiography are myn t was we to supon the death of a dear friend when James shocking was quite a young man, but was never shown to say one and, he want the location on some animale occasion. I believe the absence of your readers who have not seen ideal for ourselves, and contemplating it, the distance from such this autobiography, and correct and to prove most accreating

> " In a still vision I do live . I now thee fails from the pure light . I know the closed grave cannot give Thy hony to my sight.
>
> I know then cannt not source the gloom Of that dark and jealous tomb,

" And yot then art with me all the day; Thy relee is over in my car. Whate'er I do, or think or say, I feet that thou art near Then leanest on me, even saw, With thy awant and earlied brow-

### Theoresky and lin Facts. To the Bilder of " LIGHT

SIR -Considering the if star which now ficking over the headquarters of the Theorephysia Sor ety in The sa t might a pour acquirement is my again drawing the acombine of the reserve to be the termination of the personally carplecated. I tree this as one means of expressing toy deep regret sames, which are probably incorrectly spots. All the test exact for having published—on the strength of statements peaks by Marlano Blavetsky-what now appears to be an unsabeted trated, if not untrathful account. At the tame of publication I had no reason to doubt the venecity of the late editor of The Throughot, and ospecially as Colonel Olcoth, during his late visit to England, told me that the secount was quite tree.

In my recent work on " Egypt and the Womlers of the Land of the Phersohe," p. 108, I gave a weind and secuntional story, taken from The Theseophist for January, 1883, in order to show that married power had not died out, as proved by a matter-offact relation of an actual occurrence in very recent lance, written by Madama Blavatsky, who was one of the principals concerned. The article is emissed "Can the Double Murder?" headed by The story which follows as required bocause the events actually occurred, and they possess a very deep interest to the student of psychological science, &c.-En

The historic facts are that Michael Obrezovich, the then reigning Prince of Servis, was mardered in Belgrade, along with his cousin Anka Konstantinovick, and her young danghter, Blavatsky), while walking in the park, on the 10th June, 1868.

According to Madame Blavatsky, "neveral persons ismovent of the act, were, as is usual in such cases, imprisoned, and the rotl municrors escaped justice."

Then follows a sensetional account of a singlet at which the "double" of the medium, under the power of an old Service. family, was tissue to go and - effect mortal wounds upon the more man [of the awassins] without puncturing the epiderins. and the manner in which it was done in graphically described. This satisfies to have secured eighteen months after the numbers. Three days after Madame Blavatsky says. "I was sitting in the during-room of a restaurant, and happened to pask up a newspaper. The first lines I read ran thus. View on, 180-M. sterious Deaths. Last ovening at 2 45 as P- was about to retarn, two of the gentlemen in waiting middenly exhibites great torror, as though they had seen a dreadful apparition. They scrosmed, staggered . . . . but presently fell writhing upon the Soor, and expired in great agony. Ac.

June 27, 1885

The point is to show the actual coincidence in time between this tingse set and the weaderful somes enacted by the entranced students in the Thebard during the sensee withomer, by Managia Blavataky. The reason given for withholding the names and dates of the secrepaper paragraph, is "that as nearly all the personages who figure in the story are still living, it is but decent I should withhold their names." Unfortunately for me I yielded to the eogeney of the reasoning

Now the actual facts, as taken from the Assessal Rejuter for 1868 (which was notwood in a recent review of my work or Egypt) and which I have rectifed by consulting a file of one of our local newspapers, are, that the Prince Michael Observo vich, while walking in the park at 5 p.m. on Jane 10th, 1868, was met by three mombers of the Rudenstorich family, father and two some, who fired with pictods at the Prince and the two I have found the company composed of interagent ladies and ladies, his count and her young another. The Prince folwoonded, when the assuming attacked him with sweeds and comploted the murder. The elder lady fell dead, and her danghter was mortally wounded. A sen of one of the Court die als accompanied by a friend, houring a report of the indeed, went to the score, and was shot by the assessment, have some nature on a the Banner of Light for publication on under thus, assusted by others who came up, he succeeded an arresting two of the assessins, father and son, the other son ascaped but was arrested shortly efter. The three, with ten others, who according to the conferment of one of the amendous while an prison, were involved in a company to dustroy the Process were brought to trial, and appeal of those were convicted and She gave me ample evidence as to who she was ; and I am as nentenced to death

These bustoric accounts totally invaluente Mariano Blavataky's marrature, as to the escape of the assauins and their death by mone of the "double" of the sensitive; and as norther the date ner the title of the nowspaper which records the "Two Mysterious Deaths, in given, her statement is open to the most grave assessment. As a prechologies, remoners is at superstantal in the highest degree, but as a marration of on "actual occurrence" it can no longer be received as possessing any historic value. How many of the murrels recorded from time to time in the Thomasphical publications come under the same estegory as the above, of a question that I cannot solve, but if they rest upon no excerbean than the alleged re-mournations of the Thibeten Llaman (to which I referred in a former number of " Litter"), and which is amerted by Mr Birmett, in his "Esotoric Buddham," to bo "s. sober repentific fact, then is any view they are if one doubtfel a character to be admitted as systemes of the marvellous powers alloged to be in passession of the Throsophical expepowers alloged to be an passessor and knowledge.

### Spiritualism in America. To the Editor of " LIGHT "

S.z. Possible a few words as to the cause of Spiritualism as Pa it appears to a visitor in this part of the world may perce of interest to some of your readers.

I arrived in New York on May 10th, after a fairly favourable but rather rough passage in the Germanie, and came on to this city the following day, when I had the pleasure of again taking by the hand my old frond J. William Fletcher, by whom I was most cordially welcomed. I also very speer y received an equally cordully reception from his spirit control "Wissons," who was as squeh as commit of my affairs as I was myself, only much more so, and from her I received many messages of affectionate greeting and of Kurdly offerest from many of these dear to me on the spurit side of life

On my second evening in Boston I went as a stranger to the adapte of the Misses Herry, where I was cordially received by their courteons manager, Mr. Alboro.

It would be impossible, in the limits of this letter, to describe all that took place at that scance. Fully therey spirits

nutron, who had sweet to aronge the deaths of the interfered materialises and historical fevery kind and conditiones regards age, height dress, appearance, &c., &c. On one occasion two fully material and spirits, one that of an Indian chief, the other that of a lady, brought the entranced medium out of the orbitet, and one supporting her on each ade, and the tour of the circle with her between ment. Two spirits appeared at the curtain together and addressed me by lame may I follow there grose than cough they gave me comes that I was familiar well, of elatives who had passed away. A day or two after this I accompanied Mr. Flotcher to New York and Brooklyn, where he loctured ably and elequently to crowded and appreciative audioneou, and I accompanied Mat after that to Washington, where we were very corduitly received, and found everywhere a denire to home and uniterstand more of Specimens. We stayed here for a few cays and very much enjoyed some most friendly receptions that were got up for box benefit, and where I was called areas to give some of my own experiences as a Sparstudiet, returning again to Boston by way of New York. Containly I must say, that so far as I have been able to judge during my stay in America, Spiritualium does not occupy the more position that is accorded to it in England. As a rule, people des't along their shoulders, turn up their eyes, and look the other way when Spir-busium comes on the logical ner are they so ready to refer the thing to the working of the devil, as so many people do in England 1 have generally transition duct there is a very intelligent aparet of requery as to the truth of the question, and, at such spiritual reunions as I have attended goutlemen, very different indeed from the cranks and eccentricities that some numer written would have the world betteve are the only apportune of or believes in Spiritualism. I sunnot de better Juny and this with an account of a most marvellous senace I had at Mrs. Roads on the oversing of 26th May, and which I sent to

### EVOLUTION AND SHIRITUALISM

fossor Haxley, in the entranco-in l of the Nature care vext-inde-History Museum, South Kennington, on Tunsday, June Och, marked an opoch in the progress of scientific specu works and life-labours of the Clustrions materalist, and has led thoughtful uses again to reflect on the projection which, for a langer or allocter period, attempt to bur the progress of now truths in every department of human imquiry.

The theory of evolution expounded and defended by the athorious researches of Charles Darwin is but the nateense pagenclism, and the tramphs of evolution would pule to and fruit of the preceding labours of Lord Manhockle, Enumga Daewin, Lamarck, Matthew, the brothers St. His ive, Comple and the nativer of the " Ventiges of Crees, the Darwin statue, may, speaking of Darwin and his

avolutionists of the present day. Fortunately, time is ever discovery inconstant varieties of the present day. rapidly giving place to the demonstrations of to-day.

Courses Darwin, in the important one of the value of mile are put forward castionaly, reverently, and after a stroom fat go de or w y, combined with the equally important features of stiring integrity and intellectual honorty.

I sarrey Darw is sought truth for truth's sake, and propounded his facts with the utmost fearlessness of personal | demonstrated facts of modern Spiritualism. consequences. His wisdom, which might be tormed prodoned, was equally pronounced, for, whilst his facts, and | experiments were scattered broadcast with the atmost unreserve, has knowing were all broadened tentatively, and " Ceptericum" and " Enterious," respectively without any obtrasiveness to make them mancessarily known ra ovelution.

The true philosophy of propagandesm is firmly to establish facts and leave theories, with a little and, to take

Evolution has cost progrant thoughts into every department of biological, psychological, and theological anquiry, and modified each of them to an extent as momentous as were the nodifications of the antient theories of cosmogony by the teachings of Kepler, Copernicus, Uslikes, and Newton.

Does now thousand the society and so which is generally his placed and truthful nature, succeeded in making terribly unpopular opinions popular, not so much directly by his own cfforts, as by the energetic and of some of the forement describe spirite in her normal state at the closs.—A. M.

nologists in the world, notably Huxley and Fishe, who, by their courageous statements of theories, based on Darwin's facts, directed general attention to the subject.

Hosekel, on the other hand, with his equally, perhaps more profound researches, has, by his unconcealed and bitter antagonusu to Old World theories, and by the promulgation of very extreme biological views, in many instances prevented the acceptance of the doctrine of evolution, whilst the in a mode a teaching of Diewin more were meantaly

Say a strict than the first the payone make payable to Heart They as the first things and the first through the main payable to Heart They as the first through the payable to Heart through the payable through the common accounts and the first through the payable to the common accounts and the first through the payable to the common accounts and the first through the payable to the common accounts and the first through the payable to the common accounts and the first through the payable to the common accounts to the common accounts the payable to age. The acceptance of either theory strikes at the root of the current dogmas of science and theology.

Evolution requires, on its acceptance, that the commonly received originas of biology and psychology be reeast; and the facts of modern Spiritualism demand a comptete remodelling of the fundamental principles of physics and psychology.

Evolution recognises the introduction and progress of life as a progressive development, according to universal law, and Spiritualism demonstrates that the generally The up a mg of the statue of Charles Darwin, by Pro- accept a, a remove of gaysies and pave to egy should be

Evolution has thrown intellectual dynamic anto every intellectual comp, and has caused an entire rearrangement then, has once more directed universal attention to the of their fundamental principles, and spiritual parameters have, on for an they have been the second the same bulk in reference to biology, psychology, and was a

All that Spiritualism wants as a Darwin men a Huxley or many Darwins and many Huxleys—the former to observe and classify facts, the latter to engage in popular procomparison with the premistable advance of Sperituation.

The Times, in its admirable leader on the saveling of theories . "It has served, and will serve, as a lesson to those Between Lamarck and Charles Durwin the greater part which naturally and, as it were, by instinct are in of a century line clayed, and the despised evolutionists of el near totake op a position of hostility to new dectrines. lifty yours ago are succeeded by the possibly over-estimated. It has buy to them, and will control on to teach, that withous do of truth, and the seeming truths of antiquity are mature of the universe which seem trushle in one stage of our knowledge cease to be tenable in the next. The Among the many lessons to be learned from the life of percellary is obvious. It is that all scientific hypotheses which attempt to master the facts, should be uset at least in a courteous and respectful spirit." These pregnant words should be possibled by the prejudical opponents of the

### ON THE RECOVERY OF LOST PROPERTY BY SPIRIT AGENCY

June 27, 1885.]

The following account of a scance with Mr Eglinton will, I think, prove interesting to the readers of "Lione."

On Monday, the Sth met, a friend and myself est with Mr E. Inton, at 6, Nottingham-place, W., for slate-writing, an after o the a sum or of replies to questions asked, both on the locked slate and on ordinary slates held somet we on an acmet mea under the table, we were anxions to know if Mr. Eq. aton's guzdes would pass a coin from the locked slate to one held beneath the table. I have had in my possession some time an old Irah halfpenny very much worn. It has a harp with the letters H I B (the only ones legible) on one side, the King's Head with 1 U S I V on the other. This I took from my pocket and placed in the another ordinary slate undermeath. We received an subject as the reality of Spirituation answer to a question asked aloud on the slate held under the table, also the words, "There is not sufficient power to move the coin." I accordingly unlocked the slate, and put the halfpenny back in the right-hand pocket of my trousers, paper, and mad away two or three other coppers, I concluded I had stopedly paid this halfpenny away by matrice On Monday last, the 15th 1 at, I mean ant with Mr. En aton, the state alone are in the loss so of conversation the provious seance was alleded to, and Mr Eglinton mid he that, oddly enough, I had lost it the some evening, and supposed it was gone for good. No more was said about it, and I asked the question aloud, "Ts anyone present whom I know by name?" Mr Eglinton holding an ordinary mate. under the corner of the table for the reply, writing was beard, the usual three taps denoting the completion of the sentence were given, and on the slate being placed on the table the message was! "Would you like to know where your Irish halfpenny int" I replied onally, "You, please." And Mr. Eglinton again held the state as before, another communication was at once given. "We will try to get it for you," I now took the slate with the Branch lock, wrote a message addressed to a deceased friend, and locked the slate, which Mr. Eglinton joined on the slate, his right hand holding an ordinary alate under the edge of the table. Mr. Eginton was new very strongly controlled, and said that something unusual must be taking place, as so much vitality was being drawn from him. The locked state, which we held on the table, was perceptibly tilted up, and, after sitting for, I should my, five or six minutes, writing was board on the slate held under the table, and the message on it proved to be a pertinent naswer to the question asked in the locked slate.

I then opened the Bramah-locked state to rab out the question written in it. I ande the slate, lying close to the wooden frame, was my lrigh halfpenny, lost the previous Monday. Of this I am certain, that I placed the halfpenny in my pocket on taking it from the slate on Monday, the 5th mat, between 11.30 and 12 o'clock, and that it was not in any of my pockets or anywhere about me on my arriving home at 7 30 that ovening, nor had I any know lodge of its whereabouts between then and Monday, the 15th,

### THE SPIRITUAL OUTLOOK THEFE

(We shall esteem it a layour on the part of our readers if they wi forwar as for use in this column, any allosions to Spiritualism and Perchical Research they may come across in the course of theer tra by We see a great many of these carnelyes, but it is obvious that there must be many references to the subject which do not meet our eyes .-- Ep. oy " LIGHT

The Nonconformal and Independent must be credited with an amounts on liberality for giving a very bundsome notice to Miss Thouladd's nice stories, "Bob and 1," and "More Forget-me-Note," and "Spirit Messages relating to the Nature of Christ a Person," as well as Mr Morell Thoobald's "Sparitunline at Home." The notice closes with the remark that any one really desirous of inquiring into the subject [of Spiritualism] could hardly do better than read these four books." The difficulty is to margine that my person could be locked slate which Mr. Egliston held on the table, and otherwise than "really dearum of inquiring into" such a

The committee of the Swedenberg Society reports that 2 132 volumes of the great Seer's works have been sold, and 2,544 presented, chiefly to libraries and clergymen, during the past year. Here is a mothed worth considering. Dr Nichola' Herald of with more other coppers. I left Landon that evening, and Health is regularly placed upon the tables of more than 300 shortly after leaving Waterloo Station, found that the old libraries and clubs, and so read by thousands. It would not cost Irish halfpenny was not us my pocket. As I had bought a much to give "Lieuv" a similar disculation. No mode of prepagnidum would be so inexpensive and offective, because it would make an ammediate demand for more information

A wealthy gentleman of Boston, U.S.A., has built, and presented to his fellow Spiritualists, a Spiritual Temple. with lookaro, lyonain and seance rooms, very spacious and comwished the gustes had been able to pass the coin. I said plots. A more adended Spiritualist aburch is by a similar Liberality being erected in California. Some agamination of the vast body of Spiritualists is inevitable. Let us hope that it will be carried out by the spirits themselves, who know their work, and our find the means of doing it. We sannot make a tros-it must grow,

A friend less knully sent me a copy of the Glasgue Chaerer Ruman Cathone newspaper, containing a sermen by Father Noonats-a " britaant discourse," in which the " spirit rappore are "exposed "-that is, he "proceeded to deliver before a very sarge congregation, a mingularly lucid, interesting, and mstructive expension of the irrational and irruligious character and tourisments of the doctrines taught by modern Sparttenlists.

And that, I take it, was a countricity good thing to do, and with there were a little more of it. Denunciations excite held us the table, his left hand and both my hands being oursanty, create interest, and product any exists which is worth promoting. If the outire clorge, leading and gor og he 107 registered sects in the United Kingdom, would follow Father Soonen's exceeple, and all the utterances gut as well reported, we should see a wonderful expansion of spiritual light and

> "One of the Fathers of the Church," Father Noonan says. 'called the dovid God's monkey, always counterfeiting Him m wher to supplant Him in the hearts of most, who, foring their faith, study magic, divinction, and the occult arts. Scriply to jumps ... Jack Spiritualism had no winked spirit-th a verdyon, it to say of an 4d writer that, 'while the triough of God was to percel Himself, the triumph of the devil was to duny houself

Mer this I majors account of the religion of Spiritualism the good Pathor intohas into its sample, and compares the Decalorate of Stud with that of "this informal revolution. One adered already, and that forms of weentep are indifferent to II in. The one talk than to saircify Sunday (f), the other denses that God requires any merificot. The one connumbs children to honour their parents and shoy their mosters ; the other tally them that all inequalities of our social condition must

Spiritualists, that abortion is not worth talking about that, in short, it ando light if all crimes, retarly destroyed the stored tion of family relationship, and most horribly issulted the deal. Yet the adopte and adherents of this monstrous doctrine are to be counted by thousands in Europe along. And "thus pretainled religion of Spiritualism is, to a very great extent, the work and ever the earth to appet social order." and so on.

Bt. Paul mys something about the "foolssimest of preaching." but it may be doubted if he ever found, or road, quite much a an regard to Spartantism, opinion is free, and bestops as pricate are free to deffer. In this matter Cardwal Manning m, Sparitunasm.

As to prioris or ministers like Father Somen, if we had Acts later. of Parhament new or force like some in the Tudor times, mediums would be burnt, and here fo maies would aght the faggets.

operations intended to force them to communicate the secrets of 1 am very giad to hear that the S.P R. is about to enter open. the other world to the living, by the movements of a hat or another phase or sectiod of investigation. Thought-reading, haunted houses, apparetions, are interesting subjects, no doubt. It is the same now I grant that are tween are received they There is an abandance of authoritic ghost stories. The Father Noonan, "but whence do they come ? From devils and trouble about all the old ones in that we cannot examine and devils in hell, but from those dumma in the sir who are all cross-examine the witnesses. As to recent once, when a ghost is seen by only one person, how can we prove its objective . .

> The phenomena of witchmaft-taking the testimony which actuated a judge like Sir Matthew Hale for example, and the surjet that found venticis under his direction are well worth a nors careful consideration than has been given to them. We ought to know, so far as facts two conturies old one he known why the most enlightened purists and statesmen of the roust en abtened countries hanged mon, women, and even children

Also we coglet to know, at a time when our translations of the Scriptures of the Ohl and New Testament have undergone revi sion by the most learned men of our time, what amount of erodence we should give to the so-called supernatural elements of both. For example, witcheraft and necrossancy are fortuiten In some new and future existence. Hence, too, the south and trailed penalties in the Old Testament, with the sanction of "Thus saith the Lord " Disprove the possibility of witcheraft and peeromancy, and your revised Bible is only a literary currently. Therefore a Society for Paychical Research should interest all who care for the Bible

> The new method of inventigation upon which the Society is about to enter, in the examination of witnesses as to extraordinary facts. Clong-minded, intelligent men and women are to give their terransing, as in a pourt of law, as to what they have seen, heard, a. If on any term will be a every case is their right cloudmanufaction. As in the investigat or of report I are vice at Romo, there will be a Device Ad ante to write we and the case if p-milble. The Society will not need to go outside its we bray for the cross-state cross-standings. There are metabout trained at the bar, and families we a the methods of the Cas Baney

Of course we can real this testanent of very able very intollogent, very scientific men, as to their observation of the proportions of spiritual stations, but it is probable that nine me er at cen would like to ask them a few questions. When Mr. Alderman Barkas gave his testimony in a locture at Laugham. community in to minre God, the other mys Ho is sufficiently. Hall, he was sharply cross-questioned from the gallery. In the reports of the S. P. R. we shall have question and answer outil in the mouths of many witnesses every word shall be estab-

And, while we are about it, why not make these testimossesthose dramps of truth finding as public as our courts of law ! Why not palent spectators? Why not try the ease Spectantians The devil thou is that a Rousen Cataone priest should told a Materiaism in a court organised at hec, with all legal a large congregation, and a much targer number of newspaper formations of the course there could be no computation, but it readers, that murder and suicide are considered more triffer by may be presumed that the many able and distinguished witnostes of the phenomena of Spiritualism for the past twenty years, would cheerfully give their testimony. Of course, the expenses could be met by a moderate charge for minimion.

Let us suppose that Mr. Eguaton, for metance, were put on trial for fraud in psychography or meterialisations, and formally result of secret secieties -a not work which the devil had cost bried. The testimony would require several sessions, and would be intensely interesting, while a rechaten report of the case would be one of the best books possible for general circulation. A trial in which both sides are represented has a fine-dramatic interest, of which Shakespears and other writers of plays, and agreed as Father Nations. It is true that same Protestant over of come operas, have availed thousalves. And it is time papers denomine Sportuniting as the work of the devil. In that that Spiritualism should be popularised. Not one parson in tea they are band in hand with Father Noonan but Catholica are thousand can personally examine the facts of the most important not all alike any more than Protestants. As the Church, as sections, but when these are established by a few competent represented by the Pope, or in Conneda, has made no decision polytogram, they can be taught to every body. This is true of religion to well. How few were the personal witnesses of the miracles of the Ohl or New Testament, yet how many millions differs whilely from the Into Cardonal Wiscones, and there are have accepted them upon such testimony. Our muracles of tehistories and priests not only telerant of, but doubly interested day have been seen by rest numbers—but yet there are millions who must rely upon the evidence of others. It follows that this evidence should be carefully collected and widely circu-

The Christian, of June 11th, is "Faith-Hesling" all over. It

pervades the advertising cultumns. The reading matter is full of it. Will it compty the hospitals !- oven the Hospital for Incurables! A sermon on "The Principles of Faith-Healing" cays all discuse is sin and came in with the Fall, by Satur s personal agency. Every diseased person is under the devil's dominion. The test of his faith in Christ is his being cared. No true Christian, therefore, can reffer from any disease. We are not to trust to doctors or drugs. "A hopeless case is more hopeful than one in which we think we can do any ming to ournalres for cure," &c.

June 27, 1884.]

At the late Conference, the question was rused right for any policyer to bring up not too as a met 2. We a happened, two medical men present on the platform were faithbesieve-whether they had coused to give medicines was not stated, but it was ctroughy arged that as Christ houled all matter of secknesses, all Christians should be healed. "The death of Christ destroys the root of all mcknoss, which as ain." There is abundant testemony from England, America, Buropo, Australia. Lord Radatock is a fauth-houler. In counted by thousands.

Sad to say, other religious journals denomine the while to a, as appearing or delimion. They could acarealy be more better if it wore Sparitualism. "Look at our facts," my the Faithests. " Brory dolusion is full of facts," my the infidule. 4 Dod not Christ and His disciples head the sisk In 14 The ay of surrector as past." "No, Christ is always the same. It has returned." But we must seave the Christian, who will a section a and the Christian Commonwealth, which denounces, Fa. is Huseing, to settle the question between them.

The Commercealth abuses Paith Healing with witchcraft. and and Speritualism, and mys "It is only when or ploring such a field on this that one our realise how crodulous. and foolish, and imbocite, the kenson ested to especial of become m. He who enlightened people of ancient Egypt sould invest a tong-funted boast with Divino attributes, and worship it as a dotty; or the philosophers of clustic Grocce bow down to mages of word, or of airer and gold, or our own foreisthers, the one Longueration of Milton and Shakespeare, put wemen to death by the thousand on the ground that they were witches-all thus secure to us to be incomprehensible and impossible. Equally mystorious will at be to future agos that the Eugada people of the noneteenth century sould believe inducate being cured by denying Its exestence. No limits can be set to the credulity of functions.

The Commonwealth denounces the "Christian Scientists" and those "mand care" as another dolumen, and at the close of a trenchant leader mys: " Experience proves that Athenen and corruption in their worst forms have always floures to most in those teares and countries where the pricet and the me water have longest hold away."

Well, what are we to do in such a controversy? Simply examine the facts. If people are cured by belief, by mental suppression —if tumours, enacor, blittelnous, donftoos, and jurisly sie, maddenly disappear by mental, moral, or spiritual extent, the fact is worth knowing. We say constantly, examine the facts of Sparitualism. Examine equally the miredes of Parth Hesting Whatever is real will bear the most certical—the most accontain

investigation. The Christian Commencealth mays "The study of these aberrations of the human mind, however interesting they may be psychologically, can only give path to the thinker and the moralist." The Scripture mys. "Prove all things -hold fast to that which is good." That is all we sak for

THE PERFOCE WAY,"-All possessors of this book can obtain gratis, on application to the publishers, Means. Field and Tuor, 50, Leadenhall-street, R.C., a slip of corrections.

Rev. B. B. WARE writes from Malrorn Lank to say That he has not been locturing on Spiritualism at Malvern , (2) that the Vicar of Yeovil has not been at Malvern, and of course did not take the chair, (3) that he never said or thought that appretual phonomena would hereld the Millennium, and (4) that while he admits their reality, he believes them to be a revival of ancient socromancy, against which the ponalty of death was

### THE RERMETIC SOCIETY

The discossion of the Hon. Roden Nucl's paper on the Haston a Element in Christianity," adjourned from the 10th art, was resumed on the 17th by Mr Esteard Manthand in a paper entailed "The Intention and Method of the Gospala," of which the following is an abstract.

That the Gospels not only do not present the actual Life and character of any historica, personage whatever, but were not intented to do to, and that the greatest pains were taken to show that they were not so intended, appears from a variety of reasons. Among these are their absolutely irreconcileable and mutually exclusive statements in respect of every dutinelive point of importance. The genealogies, the numerists conception the miraculous birth, the enrolment under Gyreinus, the purtoention by Herod and managere of the children, the flight into Egypt, the passion, exactliston, resurrection, ascension, and, in abort, whatever has been regarded in constituting an actual history of an exceptional Person, dampears before an intelligent and canded officerum, and leaves no trace behind, so far as the Switzerland and Germany the persons healed by faith are historical plane is omearned. And the partisons of the orthodox presentation, in their attempts to harmonise the Genrels, and randicate their historical character, have exhausted ingenuity and outstripped care our, but without success

Nor in this the only class of evidence. All the lending pharacteristics of the Coupels, their incidents, attersioes, and doctrains, were method to the corresponding characters in other 1 to Carle, Krahna, Mahna, Buddha and others-and the end any of the supersonight to their mitiates in Linear long anterior to the Christian ora, oven the crims being seed as a symbol to denote the attainment of the life eternal through the remarkables-or "errorificien"-of the lower mature. Se that the secred mysteries of Egypt, Greece, and other lands then return commence, and symbology gonorally, were laid under contribution for forms wherewith to relate the life of a appropriate authors possesse, purporting to be written by Gardens

The to a, severtherets an ex-lamated which not only saves topic home to copea on to rath of Christ and and a mage sometic of the world to accome method of a sy-Scriptures, but which also Lita Christianity to a position commanding and indefense bio, and from which, when once estabsaled therees it one nover decline

Thus is the explanation that the Gospois are designed to be, not furtorised, but mystled, not biographical, but adegoried not to describe an midividual, but to present an ideal ; not to relate a particular history, but to promulgate an eternal verity . of the with persons places, times, and events apportuning to present done and appenling to the serios, but to deal with principles, states, and processes which are spiritual, and appeal to the soul. Their thome, in short, was not a man, or Man, and this, not Man physical and external, of time and of place, but Man speritual, interior, and mysheal, superior to all limitations, Man Regenerate, whorever and in whomseaver

A proof of that is to be found, among others, as the declareion of Jesus have a Nice counts - Bacopt a finh be horn again of water and of the Spirit, he cannot enter into the Kunghan of Hoavon, Ye must be been again," That is to enthe condition of salvation for all mon is a birth identical with the unreculous one ascribed to have elf. We see in he agreed any box of the most white has a set in wenter, an occur I of aphetamen or "mother" of the man. And the total fethe residence of the marit, which is the life or "father" of the name. Spirit, when pure, in God; and the soul, when pure, secretor or to pure spirit or God, Wherefore, to be "born again, and become regenerate "of water and of the Spirit," is to be reconstituted -not of matter and its life-but of a pure coul and the Divine life. Being of the total, this Divine potency is called the "Sood of the Woman," Man, according to Hornistic doctring, contains within annual! the said of his own regeneration, and the power to make it effective. This is done by sulordinating are lower self, and uniting his own will with the Divine will. But the soul, or "water," in also called Maria, and when pure a called Virgin and Spirit, when pure and Divine, a called, when in operation, Holy Ghost, So that "born of water and the Spirit mean equivalent expression to "born of the Virgin Mary and the Holy Ghost , " and Josus, in doctaring the necessity of such demounced in the Old Testament. Our note was based apon a shirth, declares both that others must be born as he was, and newspaper report which must be held responsible for all those that the himself was not a physical but a spiritual being. That queer mastatements.

understood that he can accept no responsibility as to the from whom it was elected that her husband had stated to her epissions expressed by Contributors and Correspondents, that he foared Dr. -- 's non was possessed, and that, instead alone responsible for the articles to which their names are

### A MYSTERIOUS AFFAIR.

The narrative which follows appeared first in Febr. Farled's Restol Journal of October 10th, 1863, and was to be scrubinised, that Dr. ---, we hear, has been induced to republished in the Spiritual Magazine of November of the mme year, where the name of the "Dr. - " was go in as Dr Jamos G. Davey of Norwood's Lematic Asylum, most Bristol. Through the courtmy of a correspondent we are now able to add Dr. Davoy's corroboration of the affair, together with an account of the subsequent course of events.

The normative was as follows .-

We have often road of trials having taken place at the instance of ghosts, and it is just possible that one may again recent awing to the alloged revolutions of an invisible aparit. The following are the facts which we have heard, we state them as we have had them from those who, we believe, and no wish to deceive, but we leave the render to draw his own inference. Dr. -- reading in the neighbourhood of Bristol, had some educated in his own profession, who received a medical appointmout abroad. A few mouths ago the sen resolved to return to England, and called by a British remel bound for the port of London, undertaking to give his services as medical man in return for his passage. When, however, the ship was on its way of the vesses on reaching Louisia communicated with Dr. and and gave how an account of his son a death, maining him £22, which he man the coter has at the mac or his come or in also gure Dr. ---- what he stated to be a copy of the ship's log, in which all the circumstances were regularly given. Dr. -was so pleased with the captain's conduct that he made like a present of a gold possil-case as a proof of his gratitude for kindness to his son. A few months after this Dr. - who. from being saids a scoping of Spirous and and apart rapping, a new also see in hotel was not a rule statement of super-const. in London when a creat a stat on any man me forms over of the Board of Trade. Faithfully yours, to on any other syn of the major and desire after a spice of their upon where the medium with a viry, more than he age t trace, was for of apares, and time dec utilizes visitors were Statis-waiting Mapicuster. Very many have been conevotes by reasons of making a communication to some monitive is need of the truly on Si . In our through the direct writing company. The notions was then shed to request the the spirite on the part E. C. Wasses. Like most mediums, he has or aptents wigh, give some measurement of the person present with not seen one can by conpensace. The we are gloud fearin by whom they washed to commontance I sen has a large flar a core a but in the has more as to as more a bette farm without any apparent agency, was violency moves ross tin a Non-arm Machigan. In his lotter he says: " My spiritother aris of the room, falling on the top crose to Dr The spirit was then required, according to the usual fashion, to mediamship more extensively, wish me to inform private and

state who it was, when it rapped out the mane of Dr. -- : undereloped mediums that if they send to me a look of hair, or deceased son, who had deed at sen, and who, to the terror of all an article of clothing, they will inform them if they can become present, intimated that he had died from points. Dr. ---, independent state-writers." We mytte responses to Mr. wishing to assertain whether he was or was not deceived, saked Watkins, Sylvester, Mooreta County, Michigan. We want a the spirit for some avidence of its identity, upon which the ansecu thousand mediums where we have one. From all parts appeals visitor putsuated the nature of the present which Dr. - had come to me for modiums, through whom some phase of the

Dr. J. G. Dawey, Norwood's Louetic Asylatts, Sciatol.

known to no one present. Dr. - then asked if the personing was intentional, and the spirit reppot out that it might or might not have been, a discrepancy, of ourse, noticed by more than one present. The spirit, however, proceeded to say that he had left £70 when he died, whereas Dr. - only got £22, other particulars were outered into, and altogether, Dr. ---- was seimpressed with the revelations that he paid a vista to the wife of [The Editor of "Liouv" desires it to be distinctly the captain of the vessel, who had remained in London, and Free and concretene discussion is invited, but version are of gotting some popporanat with some mater-oil when he was ill, he got precesse said. A copy of the reg was obtained from the owners of the ship, and Dr. - found it deflored most materially from that handed to him by the captain of the ressel There were other mysterious circumstances composted with the affair, which we are not at liberty to state, but altogether such strange secreta transpired, and there was something so unantus factory about the marrative given by the captain, when it came commit a original lawyer with a view to ulterior proceedings.

We give the circumstances with out expressing any opinion of one own. We may, however, add that Dr. ---, who resides in the neighbourhood of Brixtol, is a man of the highest profeminal and personal respectability

Dr. Davey, on being written to in October, 1884, wrote au foliowa

4. Restland-road, Brittol. October 31st, 1844

Draw Sir, -It was, I think, in 1803 that I had a son of mino dso at sea from prison, when on his passage hence from the West Const of Africa. The matter was, as supposed, duly reported to me by the captain of the ship, but within the year is impressed I got to know something of Spiritnation (so-called) and at a someon in Lundon, I learned (from my deceased son) that the roport of his death, as it readed me from the captain, was untrue, that in fact his douth was due to the stoward of the ship. who gave him a quantity of the assessed of bitter simends, in some mater-oil, metond of poppermint, for which he (my son) had saked. Of the money part of the question, I never know any home, the young surgoon, after a short illness, died , the captain thing, but among my son's effects there were simply a few cappare. though there were good and valid reasons to suppose that he had some £70 in his possession, when he died. "Spirit unlisted" in a great fact , from 1863 to this time I have added much to my first knowledge of it, and cince 1803 have had many interviews of a Priceonal Character with my son

The facts governoy have in 1863 were all verified anthrongously, t the gentlem born with what of the quant, who, after a time upon in mo, and an are highest since on an before, palson is be cared a account follow and star men a to the

games, desirous of developing independent sixte-writing given to the captain, and which he believed could have been phenomena can be witnessed and semething be learned experimoutally of Spatianism.—Spiritual Offering.

### THE RERMETIO SOCIETY

Viter in the stong of the present session of the Society for the very in the control of the present session of the Society for the very in the control of the present session of the Society for the very in the control of the present session of the society for the very in the control of the present session of the control on . 24 h a Mr O. C. Missey read a paper establed. a exhality," in which an analysis of so-called "selfconsensations," mes attenuated, with a view to show that a true acjarate interductity had not the grammitee of consciousness, the by a secretar a presentation, determined in relation so at a a very that maginition, was a moutal or thought here It was, however, the control object, about which all maintaining consessus housity throughout the changes of these states. "The algal representation, Ego, being ence games by assembles with a dubt to consciousness, has become a real power of unnutringing this portionly content as the claracter and will of the mid-cales? It, the pload is the central point C which the imbigual modes of consciousness are attached This marginary soil is all that consciousies over informs to of no to our individuality. If, for instince, I am aware or in a dream, and magno negatif to box sing, or a wall, you would may that to an Dunion superinduced upon my true personality. Nevert ideas, for myself, for my own consciousness, that per wouldly is wholly murged and inqueried in the imagnetion, with my little meaning or content as is Being ("with a big H ), for some of our chilosophers. If you restore use to sarity or waken me, I revive to the bolish in another self, associated with . This question, which had pertmaceously met them at every turn positive mode of conseptiment." It was admitted that this was only an answer to the atleged testimony of consciousness to the more of the annual the proof of force or territories are was proposal. For more manely the sourcementary a more training क्षा कार के का में का में का निवास का कार मार्ट मार्ट कर कार मार्ट कर कार का का का population of the state of the same of the same and the "authorit," which representation in regime to Heronco or I mitation, was entirely determed by the year-Lenlar states, or contonly, of the entretomor-

The are a to the inportant change from o in ... the connectioners which all feeling must connected that the time to the time of the particular jective rank, and then to seterman the section representation Ego, This reflection was a recogn tion, a literal re-cognition of the feel age, a mental acknewledgment and appropriation of them, whereby they were raised from their original objectivity in consciousness of there estration, and were thought as subjectivo. "The semestion of taken up rate the family by an acof retaintion, an whom one anyo. I find cold on soon tracks as econition automobile by remain of this acknowledgment of it " Some explicit electroteriorities in the nature of thought is true body mecowary to determine a semantion as phenomerble ar painful. We may perhaps derive some none dance of each to the sympathy with animal suffering from the consideration that side in the process should of this deliverance. A pure subjectivity anthinking beings do not make an attieve Ego out of town without content is unthankable, and yet it is affirmed in the sometions. That animals foot pain at al, is possages in the age elementary power of thought appropriation. The is ne so specific summation as paint or pleasure, only sometimes which through being appreciative to a declaration of freedom, and as nea shanameshe ar namful. Thosas or this are that is a significant become with reference to usedfine the rick of the

The property of was then made to the dominant paychied the calmer of the Ego, the result being thank and define, it becomes the greatest of realities. Kny, that the secondary mode of consciousness, reflection as thought. could be detected in the very process of constructing that sense in which the ideal is not the real), the negation of this magnisty outity, the represented sei of a re-

country of many way a consister with a room must be to-morration. The relf of consciousness might be a fiction, but has to do with important one and impedity " it was a fiction determined by real states of concessment and those might laive, and probably had, a very transcendental history. The resemblance of the alleged laws of Karnie remearantion to the reciprocal influences of livredity and cover at their own distinct personalities. For it is just in this very ment was adverted to. The main thesis of the paper-that the sense and conviction that personality consists, it is the selfmideridual Egu is a thought entity determined by reflective consciousness. Deep, truly, is that dream, nor is its fabric baseconsciousness appercenting upon the primary—was then applied in explanation of the Buildhist doctrine of destroying individeality by medication. That was a great advance upon the old ascence nethod, and even upon every religious principle which, e the cross one me the Ego, still recognises it as a fact, other. that is, then the creation of consciousness. A thoroughly consistent idealism cannot admit that, and it was the discovery of this idealing which separated the Buddle from his five

ascertic or aparas na, and fed to the great, me, ta on beneath the look on a tree which will also be ugue teast. an external lintary. Thought can only resolve what thought has created, and the method of Boodhum is psychologically amentific. The root of Egouna was to be extirpated, that runt seing "attachment" to objects-to objective life. "A perfect intellectual conviction that a thirty actured in undescrible makes to cortain to be no win by, and feeling. This reprint the district for the desire to attain the ideal stage of margination -po-agention-without which it is moffestive. No merely ethical principle is comparable for efficient to this flat contradic the states of connecounters were grouped by association, thus tion of the remon to the amplicit proposition of the desire. For the desire has to gain a cartain sment by the mind to the monediate desirability of its object, an amont which, being a more taking up into the raised of the soggestion of the deare, is quite engantent with moral dasapprolation. Accordingly the Raudhist monitations go all directly to the point. By ty is the attinuates up of all deares in the will to be to be an area will tol centro of desiros. If we can once for all see than Ego as a flettimus subject of a common wife it wight a section with the further sectaphysical question. Some in a set of str. maght will be experimentally justified, for the ballumention will melt away before the steadfast gone which it cannot bear. The average man is not man as bjoot, the feeling, how, and spart from the latter is for me a more blank alabraction, a second one and make a deet mode. As mere object it expires. The objectification of the fictitions "subject" is a custing of it out and off. But out and off what?" The answer

the argument, must ultimately be nought in the old Vedentiti refrictale of the one ! salf within the self "- the mane in all. The a filenity in the way here—so for at converted Buddham -arms from the disposition of some of our leading anthonties on the subject to detach Buddhuan from the earlier philosophy of the Upunisheds. There was the less warrant for this seeing that one of the litest injunction of the Boundary line To has the plan, as reported in the Cheek of the control by any man that they should reject all future versions of a version which were not in accordance with the scriptures—the Yeaks. Now they know what semerally was the conception to be found there. There was but one self, differentiating by ancomove and Inscrete acts of imagnitation, as in droug on our single plane of mis and so we often aplicourselves up into divorce apparently

s met a worker's. Thus to find. I the solf within the self was to dupol the successive stages of Egorty and therewith the abjective fiction. It was not annihilation, not loss of life, but twee a me we don't life, if only we excluded from the conception of life its active functions-a difficult condition truly. But short of this experience it was inspossible to survey the question. What then is the subject to be delivered from the great "delunes of operciduality"? "We are not, however, debarred from recognizing an affirmative, as well as the negative negotion of every content which can constitute subjective character. Every negation of the Ego which becomes practical such in the pointing of an indutorsic at so! There a st such a self as we are muchlo to there and the to actes in the act of positing, through negation of that which we can a re if all fictitious individuality is an ideal product (in the againsty outify, the represented set of the man of the man of the rest to the News their pointed out that not discuss on the rest to the News the rest or the post of an extense for college at the form to green a control of the are consequent historical existence of those as organic subjects of evolution and on, the whole proposition of Buddhisus, that the thought object

The paper concluded "To one who has entered into the aparit of Indian thought it is should arrusing to hear people oppose to its principle their professed sense and conviction of less. But not to know that it is a dream in past that Avidya (Ignorance), from which there can be so awakening. But the dream has many stoges, the Avidys many degrees. So let no one fear the loss of his individuality, for as long on he desires it, as long as he believes in it, he will not, for he aroust lose it. For it is that benef it originates, and re-originates in that desire,"

The above is an abstract of a considerably longer paner. In

### CORRESPONDENCE.

the course of the discourses which ensued, it was objected (by the President) that the distinction between individuality and personality—the mere " mask" of the individual—had not been sufficiently kept in view, and (by Mr. Roden Nool) that the reader of the paper had not succeeded in showing how objective differences could ever be derived from an unity which did not subjectively contain them. To the first objection it was replied that in the view presented, the distinction could be only one of degree, the individuality, relatively to the personality, would be a deeper and more pertuanent Ego, but would still be reselv able into the higher unity of the only self. The survey to Mr. Koel was that it was the separate operatic representation differences which was said to be finally resolvable, the analysis thenselves might metaphymeally or oternally pre-exist, and omandested ultimately as functions in an universal orgabut the separate self-consciousness of a function would be discount. The self-consentations of them all sould be the single

### RECORDS OF PHENOMENA WANTED

We shall be pleased to receive from our readors brief reports at the name an attaged to two conditions. (1) That a colourism state ment of facts without original be given ; and (2) that communications are accompanied by the names and relirence of these concerned, not necessarily for publication, though we should naturally in the to least their some of them. Amongst the phenometa referred to may be usen usued

Hann on Houses Contract State Forms Ma State Forms Чеченовани. Dansusanee The six and consolete at the Special new Agency of the Special Bucke The H and Don't Movement of Material Objects Provence a la historia without Physical Contact.

Friends having had experience of any of these phonomena will be doing us a service of they will report them to us, giving-

[15] The tutures and addresses of the persons concerned (2) The ricemutances under which the phenomena look place.

(2) A brief account of the occurrence.

Letters should be addressed to the Editor of "Lis HT," 16, Craren street, Charing Cruss.

Promines is a law of nature. Man in but a part of a to your rat or of things. He cannot get out of nature, nor e to depote a section of the second strong from the I trusted up any of the At he was a loc larged the said of the same travers a same to be same to come or of the first range ann , the tree grows with its top toward the sky , burnen mature tends to the ultimate over Divine-ward.

Crieg as Seener Powers sufert his head on the Spring the the came of gapter on the state of the state of until they said seeining more could be done, and we daily from the more discass. I went, and he would have visited him, given a manusc but for the distance, twenty rates. Seeing my industri, he said, "Lot on see what can be done, come with me." He led me to of attention to them, especially intely, and think them capable two darkened rooms , told me to sit in one, while he shut him of regification. The school of any day which na do to self into the other. In a short time he came to me, mying. We have treated your son , he is botter , he will get well On returning home I found him titting up in bod talkin: cheerily to his mother. He got better When he was able to go out he tooks chill, through which he refspired. I returned to Dr. Loukes. and he did as before. He is now well. No memoriass were need That is unexplainable by us as well as marrellous, only boing for his view, consults them exclusively, and by a method of his equalled by Bible surraches of old. Thomas Gorman. Witness, own, which is ingenious and plausible, but on which I am not H. E. Irish." "On this list day May, 1885, before me came much disposed to roly. I suspect that modes of divination by Thomas Gornan known to me to be the individual who astralogy giving true results, may often be confounded with axcented the above, and acknowledged that he executed the directions, and that may have also led to many of the Arabian mand .- L. Robinson, Notary Public, South Colten, N.Y."

[it is preferable that correspondents should append their names and addresses to communications. In may case, however, these must be supplied to the Editor as a guarantee of good

Astrology To be not far in

She I so had a more purposed a resolved me by your correspondent " Elser," I would be the first to tours mm for his valuable maggestion with a view to the collection of ne ngarsarfi, e a atrib. Lang semion that an astrological society, of which I work a momber, was formed some years ago, but was not sufficiently known, and soon course.

What is most wanted now, I think is for a few persons who are students of the subject, and fundar with its rules and to thoda, to serve upon some principle of investigation, and see sage in the collection of sufficient that for each board of inquiry sudertaken. There could then be a wester of tabour with the Mr Martland, and others, and the proceedings terremisted at object of striving at a valid induction, should the results justify that, or of showing how for the elements of a rereally exact. I love long pursued a method of my own, which I believe offers the only month of secontille verification , and I hare lately obtained actualisatory inflimative results, but I am sempol for want of data, which are required in an abundance o a obtainable by any single ind ridual veidions much greater energy and storily parastence than I possess. And I must add that negative results, or the very small constant margin of effic matice ones in excess of the withmotion probabilities, have rather discouraged me. Still the margins are usually there, as for no I have gone, but the labour is great, and co-operation much recurred

As to the " directions" referred to by "Blor," I have page of the primary and the were to your to the list that may particular direction A second of a contact of the other very complex . not orations in the horozogo, manual be affirmed. The tendency, as fortunate or the severae, is the most that our so produc-

spinence. The expansion are established another the nest same or he are a climetaran (the term-are mothed), and I believe I have forms them to be so. Hat being formed a sea t sangles" of the figure, they also require great exacttade in the Same of birth, or the tane of the event will be too directions to enable us to proce the connection. And one wasteness of the " science, by that during the many cent area of its cultivation, current authorizing have adopted different superground time. That, however, was no doubt greatly and to the ambition to obtain a closer tumporal comerdence between the directors and the event than the conditions admitted. At · the parellols manual by " Ebor" signifying doubt, it is to be abserved that astrologous do not predict weath from may single direction, but require a " train" of ovil directions, concurrent within two or three years. Certainly, I have known rapt narallels of one arother of the "infortunes" with the sun or moon fall within two or three awaths of the death, according to the Office any published now as the wind to the transfer as and incomerce of time subspiced now as year for a degree of are. But I should not say the direction " council" the death, or that we selectedy state the following facts. Our boy. Parillor the satisficated nonnection was proved, without a more constant Correct, had been suffering for three months with occubro conneithence of the two things than can be truly alleged. I have sound meningitis. He was attended by three good physicians, always protested against the practice of writers on astrology giving a lot of affirmative cases without the last apparent per expected in would be relumned by death. Business calling mu to caption of the charactery principle that solveted fustance and ve-Potadaue, N.Y., my friend there, Stophen Grover, told me to nothing at alt. If that were allowed it would be easy a demongo about my sen to Dr. Loukon, for he had saved a boy suffering strate that thunder stories always happen on a Friday, or any

As to the secondary directions. I have also paul a good deal acribed as the orthodox one, and which is at present represented by Mr. Alfred J. Pearco, the able author of the "Text Book of Astrology," " Science and the Stars," &c., considers them as operative only for a few weaks (as is probable), and by themselves of quite tanter importance (which I doubt). other hand, "Raphnel," who can quote emment old authority subtleties, now ascally descarded. On the other hand, I have

ong seen could by to the operation logs chore to me and he state rate of many underly all the branches of astrongy, ac-closing generalized and "horary" or diversity For instance, I do not blank the "locaship" of the "house on have

specific influence ascribed to Ummu. This planet having only been assessmed within a little over a hundred years, it is remark able that all setudogers are now agreed that directions to him denote events of a 20 - and unexpected (anally sinister) character-entastrophes in general. I have mysalf observed attek ug astances of this, and lowe comme the behef in it It will be highly incoresting and maps, of to meastern what experience reveals about the nativologies, in mance of Net and We have but about forty years of possible observation, and should begin to know something about him. I have somewhere road that the discovery of a new planet concides with a special development of a character correspondent to that of the Liebe, would have set about it in the number described, of distat. The revolutionary are would thus have been denoted by Umbus, and Miss been suggested that Neptune exuscociated w his a now ideal orn.

### The Historic Jesus of Mataroth. To the Edutor of "Louist."

Site,-I am grateful to Mr. Roden Novi for hastestanony in favour of the decteme of the " Personal Christ," in appear to the same of the less grand the Herman a society, who would a seem to desire themselves among to those false mornets who env hat his Christ is come in the flesh "-

They are not solve your become there already becomes a the mirroulous element in the history of Jesus, assert that the history is assisted, is easily understood, but that those small do se who believe in Modern Spiritualistic phonomena, in which may be found a reason of almost every mirror attributed to Jesus. is collectly to understand or to excuse

That there may be a few discrepancies in the details of the Fatte Chapely may be admitted, although I assert that there is not one operopancy of importance. But those for verba diseraphicates are to me a confirmation of the genus tensor of the historic recently for had those been faoriested, the authors would have externily compared the texts and rendered them exact in all

We all know how it loss been "proved" that the first Namelous naver existed, because all his biographers not only differ in untities of detail but in essentials, one characterising hum as an almost infall tile dentiged and another describing him to a vulgar charlaten, and yet I suppose there does not exist one I c as he ing who doubts that Napoleon, was a real personage

from the mane reporter, very not only in nexteen of detail, but magnetion. - I beg to remain, sie, faithfully yours, often in manustal matters, eliciting letters of probest from those contermed.

That the hutoric Jenus, as a lare feet, may have little refluence on the souls of men, most thinking men will admit, and that the doctrine of the potentiality of the Christ in Man is the ossence of Christian Theosophy, all Christian mystics will at

To duny, on the other cars his historic Christ is to mage that the Christ of God, the Divine Son or Word, less never fully rescored and transquied say hance being on this planet, and to assert, in the writer in today a langer does that sucoracy or communications are necessary to the regeneration as by water and the Spirit, is to assert that of which we have no addutitie proof or historic confirmation in the history of the human men.

True, perhaps some men and women may, by self-hologising, believe that they remember their former meaniations, but there have existed store the Jays of Jesus about fifty thousand millions of human beings who never had any knowledge whatever of any such process,

Those who have passed into deep trance often say, "The the finds." And so it seems to on that Jesus the Christ was

GEORGE WILD, M D

### "The Resorrection Body " To the Etitor of " Laurer

Six,-In a letter signed "Lily," which appears in "Liour" for June 5th, a very theatrical performance described in very a consequent in a very section, set neglect sail or interescepted. Theatrical language to attributed to Liebig on the authority of section of the section of science of singervace a, and not morely of truntion. That is the | to "dissolve by chousenis" a human budy, to reduce us one hundred and forty-five pounds of matter to an "impulpable elementary condition," and to seafter the same upon the " view-

Now it is said that Liebeg occasionally perpetrated and published " tall " scientific jokos, and I sen inclined to think it possible that Dr N B. Welle has got hold of the wrong ond of one of thuse. Of course, anyone who chooses to exercise the requeste care alse pationed can dissolve a or can or any ther organised body rate its ultimate also ats seek on has the decomposition of the matter companing a lauren body was to be decounstrated, no chemist, and least of all with the quantity of nesterial mentioned. Kenther would ie, our any other " carthly " operator, have been enabled to appeaul the whole of the elements of that body in the gaseons form upon the "viewion our," as some of them are not smenable to that process, either in their free state or in their various combinations norther and he reduce surthing to an impalpable condition, because gases are perfectly pulpable forms of matter as it is known to us. We are told that " the process was slow." No on it it was every Sinco "chemicals" (a magical word) wang pool acts in the desired result a considerable time must have seen required and the Youlest are must have been reaclesor east y as accessing for the notes and the ungs of the ant-moly repeated apeciators

I many such know the as we possess of matter and its howar war good to been gation of the difficult and intricate become no of S. r. an sea, it should be remombered that species in this direction can only be attained by those who have special knowledge, and that nothing will be gare a and much may be lost, if these who are not thus quastion make the attempt

I can, sir, yours faithfully,

A SMRITERIOR AND A CHENDY June 23rd, 1885.

### Liebig's Experiment. To the Editor of " Leave "

Non.-In reference to "A Speritualist a" letter in your last same, will you allow me to say that the result of my impuriou amongst men of practical science, is in exact opposition to "A Sprittedist," viz. " that there is no sould that Licher's alloged auccussful experiment as a possible one," as I stated in general turns in my previous letter. Therefore as men of science, like moctors, disagree, we have only to wait for Dr. Wolfe a reference to that work of Liebig a from which he has taken the record of Again, take any event occurring in our day, and you will this experiment, and which having been related and published Sine all the morning papers which have not taken their narrative by him in such full detail, can hardly be the result of his own

Janu 27th.

### THE SPIRITUAL OUTLOOK. XXXIV

(We shall esteem it a favour on the part of our readers if they vill forward no for use to this column, may allowious to Spiritualism and Psychian! Research they may come across in the course of their repding. We use a great many of these surselves, but it is obvious that there must be many references to the subject which do not meet our oyes. -- Eb. or " Lt ... "

The gathering of facts is the beginning of all true secretor and philosophy. The appeal to the readers of " Linux must, therefore, bring good results. An American portedical with the title of Facts is doing the work of you cetting and recording the phenomenal basis of Spiritual Philosophy. American secular nowspapers of the first these freely, and even segurly, publish well-nuthenticated accounts of spiritual manifestations. Here we must for the present roly chiefly upon our own journals.

One enmous "fact" respecting Spiritualism must not be lost reality and solidity of the sperit life infinitely transcends that of sight of. It is that many of those who know are not very assume that others should be in the same position. So far from wishing and is the most intense August personality, in all we know of the to gather and publish facts they are not only extisted but a hitle tired of the phonomenal. "Why multiply facts? We have enough of thorn. Give us what they are meant to teach,"

he as good so a thousand when we are sure of it. · III-

July 4, 1885.]

Only, there are many millions of people, scattered over the earth, to all of whom these facts are of interest. We do not know why they have come to us at this time-we do not know that they will be continued. Here they are-here and now are, they would be earefully observed excelully recorded a nely published for the benefit of present and future generations. We are told that spirit manifestations will become more and ruins the proper sense, will Providence raceive the petition as saore common and perfect, so that the great fact of unmortality read, or as originally written P' Talk about Occultion, after with be one of many discount or a news or all men. On the than ! other hand, many book upon Spiritualisms, as it now exists, as a passing phase of life, the records of which may be of infinite value to futore genurations.

Consider how different it would be from what we call "Christondom" If the art of printing had existed twenty conturies, have the chance of seeing such a splendid sight, for the magnetic ago, and nempapers had been published in Jorusalem. Consider aum of humanity in general with the steaming funish of how valuable our new recorded facts may be to three who live sensuality and spiritual strophy-debars by magnable repulsion two thousand years honce. Only, the wonder will be that they the visible presence of the Martor. Under very favourable conwere not printed in the Times, the Daily Pelegroph, and all the daily, wookly, and countally periodicals. And when our remote descondants read the testimony of scientista like Grookes, Wallano, or Zöllner, they will wonder why such facts were neglected by Darwin, Huxley, and Typdall.

Our duty to the present and all future generations is clear and imperative. It is to carefully observe, record, and publish the facts of the spirit manifestations of our times. So we pay our debt for whatever the past less given us. So we make up for past neglects. But we can never sufficiently regret that there were no daily and weekly newspapers printed in Egypt, or the days of Moses. What trouble it sught have saved that good Bishop Column, who for the want of such testimony was of Thomsophism in the street Matter Cortlant. The letters panished to the Zulns! In the meantime we must comfort oursolves with Mosos and the Prophote in a revised translation.

I am obliged to the smonymous editor of The Gorell Magazine for three numbers, 3 to 5, the provious once being out of print-and therefore spoundly social It is a pound advanced thinkers have had no European special organ for the cluedation of Mystical Philosophy; for the leading Spiritual papers are of necessity compelled to dornte must of their space to matter permissing to their own branch of Psychology."

I don't quite see it. A Spiritealist paper dachs with spirit he all the manufactations—only whom a thing is manifest it seesen to be occult. The orident object of Spiritualism is to parent what is ordinarily helden. The mission of "Leony" is to rea judgment of their poors, while we examine what is within remove darkness. When we throw light upon Occultion a our reach, the manifestations of spirit power in the presence of country to be necess.

of man's spirit can be demonstrated, he a gothern of third diwhat need one we have of phenomena, e her of Occurs an or Spontanium! When a proposition is as chair as tost two and two make four, or that the three sughes of every triangle are judicial. Ho says. "By the testimony of the Thousephs equal to two right angles, where is the need of facts ?

The occult "buden invisible, accret, unknown, onderpowered undatected (Weaster) we certainly have in the occasion for and when anything a breight for sent) to Ligar it could be so ult The moment aspiret manifests by araterialisation. If it any way he ceases to be seen t. The very object of spirit manifestation is to inverse deputation. In in the higher (occupt) th olds of makinose (, soint on a rate of a woman, it put after requires substitute a substitute of the soint of being revealed by Spirituanian in fu filment of prophecy

For all its occultures the Occult Magazine is quite worth reading. Some of its facts are very striking, and some are droll. I read, for essemple, that morning service at the Canterbury Cathedral concetimen begins with only the official staff, and ends with a congregation of two portions—while the salary of the non-remident Archbeshop is £15,000 a-year—the aervices, in. oluding prayers against the Makdi, being cocult enough for anything. The Japanese tadion of writing provers and praises on wheels, moved by wind or water, in more occurrent, and may he more effective.

We must recognize also this mental condition. One fact may , " A clorgyman writes to the Church Times that he was the first to use income in Protestant Episcopal worship, and promises to ring into Heaven any five virgina [wise or foolish?] who will give him the money to buy five chiming bells."

Hara also is a good account of a debate in a thoological nominary After four hours' controversy blero was a ue on the question: 4 Suppose a prayer on a formal occurrent is read from a printed slip, and a typographical orner completely

The Gerult Magazine, which in spite of its cognitions is still published, tells us that "the Adopt's estral apparation, or double, as a fact, notwithstanding the pools pools and success of the vain-glorious and concerted. Few, comparatively speaking, domain a woner they acometance approach to individuals who are carrow, devoted to occurs souther are if carrow other by a persons where from he are on ear project their total deno as to appear of a distance from their so a Peruse he works on Gament, Emperioses Crown Ower Hoseitt, Don Monumentz, &c. &c., and you will find many outdoors. At rare times the doubles talk, sometimes they wander whileh the subject's body is asleep, semutimes whilst awake, and very often the apparition is the forerunner of death."

Second yards of the columns of the Chicago Religio-Philoamphical Justical are occupied with a raylew by William Emmett Colonian, of the expusare of Madama Blavataky and the miracles said to have been written by Madeine Blavatsky, on which are based the securations of fraud and various duplicities, are denounced by her as forgories. The strongest point in her favour, with those who have not the advantage of her personal acquaintance, appears to be the testimony of her distinguished conductor Colonel Olcott, to whose character and mediumistic work "monthly journal," published bourses " until the present time, especially the exercise of the gift of healing, we have the highest

There is no need of coming to harty conclusions in these matters. In our crimenal jurispractions it is a maxim that every accused person is to be considered more at a still be as preven guilty-and even the verilious of junes are sometimes wrong, and impocent persons are imprisoned or langed. Perhaps the both we can do in to leave the wonderful Adopts of Thibet to our ow mediums in both sides of the Atlantic, with such testimony as we had last week from Mr Meugens, of Calcutta, now And then, if " in Occultum the existence and uncertainty making explorations in America. As a clear-honded man of outstoom, he seems to mak there ugt is reliable with aud.

The spirit of Mr Coloman's article our bardity be called thomselves, Madamo Blavatsky is a wholesale liar. How hon does proving Coulomb a liar close Blavataky? It is not the Combinutes mesupported statements that convict Blanchtely it or on danging evidence of hor own letters , and so for I have not near a particle of substantial evidence that they are not genuine Latin't ry and get he committee's report and see if as jith no is notinged weathy if noing after avidence. Rurathe are some evalence if that fact, and if nugle of that nature a administ I shad cake pressure as an act of datice, in pre-menting it to the reasons of the Jonesof. As it now stance, however I am Freez or an eventhe reterral grounds and their authors guilty of systematic fraud.

Mrs. Cons L. V Richmord's Work in England.—The guides of Mrs. Richmond with to amounted that their medium will be at liberty to make engagements to speak in the provinces between July 12th and September 20th. ### INFLRENCE AND PERSONAL OBSERVATION

Appare was resulted as are the menoment of want be torned the material sation of spiral forms, and the production of independent writing at across languages with in closed and fastened states and books, to the manatested, they are nevertheless, of almost daily occurrence, and to a sing in ger moness as we do, we for to see that, they are a whit more marvellous and mospliesble then are to explain the info-history of the universe—a theory which the an appeal facts, and inferences deduced from many of contains many millions of more unbelieveable marrieds the facts, which occupy the attention of scientists.

generally selieve that the cur, earth, and all store, planets, which may be observed by any rational men-why should and nebule, were, at some period in the immensurable past, the leaders of science not examine the alleged facts of counting masses of highly hested gaseous matter, that by a Modern Spiritualism, and from observations rather than process of cooling and consequent consocidation, those masses from more prejudices and process options deduce their in assumed a more or last solid apheronial form, that after ferences? If such a course were followed the result is not having rotated mil tons, or it may be billions of yours, rings, difficult to be foresoon by those who are familiar with the mis finally spheres were thrown off, which in their present facts. stage of consolidation form sure, planets, and moons, such as probably belong to the unificons of star systems now so do or an yet invisible to man in the infinitude of space

Scientists further believe that under certain physical combinations and conditions of matter, life was growed, at first in a low and feeble form; that by development and evulation differentiation gradually sucreased, and that now all forms of animal and vegetable life on the surface of this and nanumbered malions of other workle, are | listed in, the German language. The translator is Count the offering of primal protosocial organizate, which by a pro- Schonfeld, a half be ther of the Prime Licektonatein cost at present inexphension and their appearance on every developed world, and that from what may be termed that made matter, there spring thaple organic vital forms, duposed to Sprituature. Sorely it ought not to be a difficult late, melluses, fish, amphibia, reptitio, bird, marrupat, and anadrupedal manufalia, at last culminated in the Tower of organic orontion, Man-man in a low, rade. payings and unintellectual state at first, but finally man who in the ong process of the ages has culminated in the philosophers, posts and metaphysicians of the austorical era,

All these opinions are inferences deduced from observations on solar and planetary motions, resting on Laplace's researches based on the order of the introduction of vegetable and amount life, founded on the testimony of the rocks and from the embryonic and other researches of biologuets, a reference to the princil development of man and other amonals. This is, however, little more than inference, as have been observed, such as we see daily in the human Westminster, S.W.

family, but any change such as the austinee of a fish to an amphibian, an amphibian to a tree reptile, a reptile to a bard, mayor !- although in paleontology, the apparently connecting links between fish and reptile, reptile and bird, are often disentembed. The real transition, however, has not yet been observed, and has not been historically recorded.

The dectrine of evolution, therefore, is a dectrine founded on inferences, based upon the relations of observed facts, extending through countless mullennames of time, and is never in a single instance the result of the observational experience of a single man.

Do we deny, then, inferences? Not by any menas. We rather accept them as legitimate inductions from the conaderation of ancient and modern facts.

Inferences from an extensive, and, as is freely acknowledged, a very incomplete hody of facts, are justifiable, if the facts as far as they are known point in one direction. But inferences from observed and frequently repeated phenomena, that can at almost any time to reproduced, and may now be observed by any man of a judicial and critical mod, are far more valuable as a busis for theory than oferences from facts indiscriminately acattered over the face of the earth, which require the languist life and most devoted industry to execute a limited number of them. A account the inner as bound, therefore, to establish has theories on his own printively limited observations, and on the tests monies of others whose powers of observation and truthfularmare only problematical.

If the secontific world our nocept evolution as a theory than the materialisation of varible human, forms out of in-Seventists, in view of web-abserved cosmical phenomena, , visible matter, or the writing within closed slates or books,

> THE Earl of Dispressor, a Spiritualist of many years standing, has been appointed Parliamentary Under Secretary for the stontes in the new Blinistry.

Ir to no secret, we believe, that several monitors of the new Cabanet, an adaction to others in the Government, are favorably which ofter passing through protugue, expenterate, article matter, with so much inflorance, to get the chroxicus Witchersft Act repealed.

A Spiritualist and journalist of peaky years' standing, luttree to ongage in literary work of any kind. Manuscripts propaged for and put through the Prom. Compilations, abstracts, and critiques explied, &c. References to Rev. W Stainton Moses, M. A. (" M. A. Uzon."), Mr. B. Dawson Rogers, of National Press Agency, and many others, -Address, A.B., care of the Editor of "Light," 16, Graven-street, Charing Cross, S. W.

SOCIETY FOR PSYCHICAL RESEARCH.-A general meeting of Nebular hypothesis, and from biological and paleontological this Society will be held on Priday, July 10th, at the rooms of the Society of British Artists, Smilelk-street, Pall Mall. London, S.W The chair will be taken at 8.30 p.m. The section, which will be partly of a conversational character, in open to members and associates, who are at liberty to invite friends. Members and associates will be alterated on writing their manus as the door. Persons who do not belong to the ir no single astance - the records of the past, or a the bounds will be mounted on the production of an invitation-card, experience of the present, has the evolutional transition duly filled in with one or more names, and agreed by a member been observed. Sught modifications in form and colour or associate. Edward T Bennett, Secretary 14, Dean's Yard,

### LONDON SPIRITUALIST ALLIANCE.

On Thursday evening, June 36th, a Conversations of the Alliance was held at the Banquetang Hall, St. James's we ducharge our plain responsibilities. Hall. There was a large and industrial gathering of Speritualists and friends to welcome the President, Mr W Stainton Moses, after his long and severe illness, and to listen to an address from Mr. Thomas Shorter entitled, by the following address .-

LADIES AN GENTLEMAN

Jely 1, 1585.?

more my friends here, and to thank their once store for all the kendness they have shown one. If I do not find myself-as also, I do not-up to the old standard of work, I feel that I can roly on a kindly canadomation which has never failed see, and I can hencetly protein that no effect of mine that our fairly be made shall be lacking for the furtherance of the end that we all desire—the advancement of an intelligent appropiation of that complex and intricate subject that we call Sparitualism, It has not always been fortunate in its methods of presentation, there is yours for the provinced there. But it deals with matters that are in their oscential nature of absorbing interest, and it touches all that is most stomestous to note as an insportal bong

You will expect from me summandent of what this Society is doing. We "have done what we could " and I have the highest authority for believing that that record is one to be conmended. You are the arlaters , you entrust as with certain powers, we see them as far they will go, to the less or our ability, and at our winest discretion. That is all that we can be because a hose surced common secure and franconvicdo , for, by solemn plodge gives at our birth, we may not get into debt, nor do work that is ready to our han a when the material means are not forthcoming

We have taken a home for outselves at 16. Conven a ceet Charing Group, a very control position, as likely, we think, to be medal to our members as my that we could life upon. We have placed in a cony and convenient room the library which, by the grace of the late Control Association of Spiritualists, is iffunctuated the world in this new bygone ago. now at on oppose. It is at the full service of our monitors. and it is supplemented by a member of Spiritualist Journals of this and other countries, which should be of interest, and which will keep us, at any rate, if we read them, from becoming manuscand grown and will be on the abreedth and generously of therest and a refellows which is much to be donired

and to place its resources fully at the disposal of our mombers. we cannot at present afford one. It is fee you to enable the Council to supply this grave defect, and so to place the resources of the Society unreservedly at the disposal of all our members throughout each day. This we cannot do with the funds which we at present adminuter. The value of the library and of the realing-room would be so seach subspeed by the presence in

such a nocorousy functionary. For the rest, the various spheres of unefulness that lie que before us are more surily left to be tended by private offert, ticular usure under by a spirit, which cirius seemed to see hard y booanse we have not the means of attacking these. No one who has not been inside the movement-who has not received, as I La cuone scores assurance beauticion if era begging for guidance, help, enlightestment can form any mea of or a at coaring that there is for spiritual food. The class for error, Fo They make good their claim, these manifesting spirits, so be of the bread of life! The cry in error ringing in my cars. Men and brethren, my friends who have this great truth in your presention, how long is it to go up in vain! I do not for a constituted as they are by virtue of its myriad and manifold because lose sight of the efforts that are being made outside of experiences. I am not sure that I can frame any adequate idea our own larders to most this growing want. I am thankful of what the deportment of an elemental spirit, or of a spirit for all agenesas for the dimensionation of knowledge. But none which was in fact the asterd soul of the are non ought to be the loss I feel that all combined are miserably madequate in do Nor am I much concerned to specifice. When I find a spice. the preasing work that ought to be done. There should be no putting forward my such come was such as only its according over his month purlousion in this matter. I, for one, am thankful for any all due care. In the mountains, these beings, as far as I have help in doing what account to me to be a place duty, and I shall more myself acquainted with them-and I have had many be proud to co-operate with any main who will lead a helpful apportunities if a dange-are thoroughly and cascutally hand in doing any part of the work that God, in granting an human. They could not play the past they were any this blessed experience and knowledge, has laid upon every one, thing class. Their knowledge of us and of our numently, their

great truth, stewards for the nighty Martor, labouring for the great account. There is no room for small perlougies in such a work. We shall most our account the better in proportion as

The presence of Mr. Shorter on the platform to-night secontextes what I am saying. We are a society of old Spirit nalists, of persons who know what they believe, and who, in cirtue of that belief, have plain duties to ducharge. The name of Thomas Shorter carries too back to an ago with which some "Modern Spiritualism the Progressive Development of of an lare present are, perhaps, unfamiliar, to an ago that is its Phenomena." Mr Smanton Moses opened the meeting already instance. When he was working with the cautious care, the thoroughnous, and the indefatigable industry which obaractorised him he was associated with many great names. " There My first duty, and a pleasant one it is, is to express were we as on the earth as those days." I do not presume to my great thankfulness at being permitted onto again to greater a year of execute. This is not the ham nor the place appraise individual effort, where all laboured for a common

But some named rate at once to my 1 ps. There was William Witchmon, who did so much for the literature of the movement, and with whom Mr. Shorter was so alonely associated in the conduct of the Spiritual Magician. There were Mr. and Mrs. Newton Greatand, honoured members of our own Society, Thure was the venerated name of Mrs. Howitt Watts, now, to our enduring sorrow, removed from our modes, though, as I have good cause to know, not less active in promoting the work that she level and adersed by her labours. There was her husband Mr. Alarie Watta, with whom I am proud to stand here to-night There was William Howitt, whose designty deads in defence of our faith are master of communickness lodge, and of store our acknowledgment. There was another of our melubers, General Drayeon, whose ectentiale acquirements and unvarying readinust in defence of our faith did us, and stell does us, such invaluable service. And, not to make the list immedestarily long, there was tions, making it as a lay Spiritudists under a very deep debt of I wanted the many what is what he man. Not want I could a for an forest appropriation of the same term of the processor of with Spantashing-He, and Mrs. S. C. Hall. Those and many perce-for my list in no way protonds to exhaustiveness, nor have I time to enquerate all these honoured maner whose praise is frontier in our months-there are some of the stars that

I have always felt that we are greatly indebted to these carry pameers. They accumulated rich stores of fact which hely luve handed us in us, a deposit which we hold in trust for the government that shall in its turn ancoosed us. They have given to us a poliment system of philosophical exposition, which, if it does not explain all mysteries, does at any rate give a reason T make the reading-room and library thereoghly useful, also explanation of the origin, cause, and purpose of those monifortations of the power of apriles. The explanation of he we need an efficient secretary. We have no each officer, and Spiritualist—the Spiritualist hypothesis, we will call it, if you sloras-loss, in my judgment, never been succeedably impregned by any offerts of the many divergent schools of thought that have bushed themselves with these problems. For payableunless I must make two excepts us, which in very truth, prove the rule, and which are in character and intention, quite exceptional -neither in my own now large experience, to a in what I the room of an intelligent person who could receive visitors, know of that of other investigators, have I ever known a single distribute books, and answer inquires, that I can hardly but in which a spirit manifesting in any way whatever, at a traging that the Society will not feel itself impelled to provide circle, or to a modum, in public. or in private, ever claused or presented to be mything one but the spirit of a departed the new beauty 1 1 . K I may have heard some change to a parmade out. I have even heard some that are preporterously absurd Shakepores desporately illiterate; Miltons both " mute and inglerious." But of the essentially human character of the manifesting intelligence I extertain no sort of doubt our brethron, sharors with us in the experiences of earth-1 to monidod by its discipline, scarred by its sus and sorrows, of us. Stowards we are, one and all of us, cutrested with a characteristic foibles, the information they give, the vary

(July 1 1883,

blunders that they make authorishly demonstrate that they possibly happen that it was impossible according to all known are of our stock, men and women with like passions to our selves. This, I need hardly comind you, is a very strong point in our argument and it has never, I repeat, been successfully combated since those early days of Spiritualism to which Mr Shorter's presence carries us back

Then, then, is part of our atheritance from those early days -facts and their explanation. But this does not represent on total labt. Those gentlemon whom I have hangel, and others of manly and simple courage, manifested at a time of no ordinary difficular. At a time when it needed a brave man to arow belief that anglet imperil his constation, his prosperity, may, his are noted in the majors of time feetings. It is upon at an forward as the champions of an anpopular cause, and the aposities of unwelcome truth. All honour to these for what they did. They made it possible for their successive to carry on the work which was bequeathed to them. And they have left to this Landrena ago-an ago enervated by its prevailing faithless note, by the correcting Materialism, and its harting, land Agricatiolary, -- an exmands which it sorely needs. This is, unless I women a wake no ago more the face of which are written certain dominant notes or characteristics, an instability of pur our which positives testing effort in his sy in femore which a keral too tast of mission a confession and a coloulating selfishness which louds a man to attack what moreananto circles would be called a wholly fancy value to be own comfort and reputation for "maleness." W Spectagents partake of the spirit of the age. We need stiffening, we want or r parposes made more firm. And nothing will do for us what we want so completely as the cultivation of a spirit of simple and nineers self-assertion. We may learn somewhat of that lesson from the men of whom Mr. Shorter is te-night representative. I her, with those introductory remarks, to call i apon han to delicer his address.

Mr. Shouren said .-

My acquaintance with Spiritualian dates from the time of its introduction into this country more than thirty years ago, and by my association with its literature during a large portion of the time, as well as by personal investigation, I have kept myself fairly concernant with its many phases up to the present time. I shall to-night made wholly of those phonon-rewho are from a to us a me which I can populately testify. My of equ. to p. wo red. a mat to prehe a a matery ser t existing in over each for me occurrence, nor is give an expoart woof he woweness of he we just, but namply to done that those phonomena, in the order in which they have been premented, are put the result of moddent , that they did not occur fortintously ; that they are not without a purpose or aim , but that there is a method in their development -a law of evolution to be abserved in consection with them no less apparent than Challenged in cort ordings to be object the one prior a rober in 193 of that their development has been activity and progressive.

At the time of which I have spoken, when the subject was first attroduced to my notice. Specitualism was known amongst us only as a aret-rapposing and table-moving. Those terms were facil these spiritual of the state of the state of the very together and One is surequire notion to if these photometry as ver see given to the world. They were her and it a are hough per units in him eta med into ypite six it into-term scornce need hardly remind you that according to the elements administration outside only in any beautiful and a property of the exbil throughout Service has a worly downton hitter organization this record source. In these rappings we have determining vary in force and intensity from a faint tick to a blow like that produced with a aledge hannage, and yet of the two factors which science duclares

So with regard to table moving. It is asserted that a in various can take dang except a rough some form of mechanica force. Yet here heavy ordina were moved without the application of any motor force. It is true that a very entinent professor undeavoured, as he thought, in deal a fatal blow at what began to be called "the new superstition," by the invention of an aigenious instrument to show that such moremonth were produced by the unconscious intogular pressure of the sitters. That might apply in those cases where isteral pressure was exerted, but it could have no application in others where no upward movement was observed in apposition to a downward presides, or where no contact took place. We were told that under these latter conditions the thing could not presentation of the materialised spirit we have first the sparie

laws of mature. The obvious rejoinder was that, spits of talk about known laws of nature, the phenomenon actually occurred, and it was only rendered more necessary to fend a different

Still it might fairly have been contoucled that if the phenomena were lunited to sounds and merements—if there were no intelligence behind them-though they might present an interesting problem or furnish suggestions of a new who stood forth with them, have left to us a brilliant example, force which science had not recognised, there would still be office, there was it were in to a children expended of the property of the property of the state of found that these phone -- a way because ages of come gence, that they postered a power of adaptation his sitely raried in force at suggestion, that they could respond to questions and give answers; and that them sounds and movemoute were simply used as a new code of signals, that they could select and arrange letters of the alphabet so as to form mords and souteness, and answers to questions relevant to the matter in hand-then it became evident that there was some therefore acts and than come are not age top were. There were abilities to idente a fair spens to associate with integenerated as a stream of not take a giver that the form out the if more stent about sometime gone, due to make an bettle production of an agree of and force and when or what forms that this intulgence uniformly, permanently, and overywhere, affirmed itself to be the agency of departed human beings, of those who had ence lived on earth-and very generally the friends of three present—then the wave question at innese were Sparrow was not Sadditeoption was calsol. It became exponent that I the phonomena went no further, here was the paraifestation of a power-a new basis of holief, close, pulpable. and expuble of verification popular in its mountion, apposing to the great body of men, and therefore, deserving of the IND DISAL COURSE DOTA TODA

It was seen assessful that if a new mode of astercourse with the apprit-world had been opened up, that if this intercourse were to be profitably catended, this method was producedly millicult, and that some more easy mode of intersuction must be The demand was promptly med. It was found that grete manger a street as a street a street in personal for the is higheren men every as all contracts. In this way near only amore in compact to a suit bing messages, and carborate

Six may she tunnam cases but the whom regained that ambject to this control Some were used for personation, representing by characteristic action, gesture, and deportment, sempled was desired to be recognised by those present. More free no war the world organic only white so the laser in this way many memogen of eye with a to affection were given to copt or friend a non-regatives and as to a control because more poplied pointed de sace were were and or some bushess. possing trees approximal on anbjects suggested by the audience. To diese a chiese in bleat the story greation for he trink one to mainfestation here transless may lit. Its introctions, and with feet or it is a gire y ways teat I have here it insteed any a norm. In these phenomena, as to nature, we have a dual and regress to development, so in the great kingdoms of inture, from the near to the region de from the regetable to the a may and harmon. And an worker each kingdom I ere is a corresponding aterior development from granito to diamond in the unners and, on, how most and belief to florer and tree to the regetable kingdom, and in the animal kingdom from monkite to mannial, from lowest savage to the highest type of civilized man, with find a corresponding usa devel pager in the programma. to be indupensable to the production of sound only one was of which I am speaking. The phenomena goads from the spuritcap to psychography, and from table movements to form manifestation, and we find in each a corresponding interior development. For instance, the movement of the table was simply the manufactation of the power of spirit to control physical exhaustes. This by natural evolution involved the power of immiporting material objects from place to place, and to increasing distances It also involved the power of apicite to cause what is called matter to poss through matter, or solide through solids, as, for matance, the pussage of flowers, fruits, shrubs, mow and see, and even living organisms, into lighted and warm rooms of which the doors and windows were closed, and all ordinary means by which such things could be imported carefully guarded. So it was with other phenomena. In the case of the visible Then sport from began to be seen; these at first were vague without a witness. It has left its mark on all history and and indefinite in outline, they gradually, however, became literature, it has scaled its impress on every age and nation. mure distinct and individualised. The boad and best were then Throughout the world, wherever human hearts have boat, shown, and badly the full form, frequently bearing the majoress wherever men have hepod and suffered and experienced the of some departed friend or relative. In all this you will pera x , r , and the eventual at his followed the natural of a mystery which awalhot us round—the consciousness of a er rome so pie t con tex from lower to higher tomin physical to psychical. In all his phenomena here can men a mutual correleration and confirmation of the cissus put forward of spiritual agency from the first outh confirming supporting the other. Thus the original emertion that departed formed by psychography in characteristic handwriting, and ap- home, who have but glimpass of the glories of that sepernal pended autograph , in the clairvoyant perception of the spirit world, who have heard faintly and afar off the achoes of that who claimed to be present, in the personation and dramatic chost invisible in whose music is the gladness of the world representation , in the spirit photograph, and in the form man; who have sought ougorly for some response to that ory which early which exhibited clear characteristics of radividual has welled from every human heart wherever lever and friend

It has been erged that those phenomena were low and unspiritual, and materialistic in their tondency and character. It may be that this is not altogother without foundation if we confine our attention to the purely physical side of the phenomens without regard to their spiritual significance. But it is deserving of note that contemporaneously with the manifestation of aparit power there have been other and larger merements which we are too apt to disregard. Contemporancemity with Modern Spiritualism, or slightly overlopping it, we find a remarkable sector of illustrations of spiritual notivity manufacting itself the seek and the churches. Whilst the phonomens of Spirit malren are one a triy adapted to most a acoptest and agreeter age, satisfied with nothing short of sensuous demonstration of spiritual existence, yet there has always been, and probably always will continue to be, a large class of minds who in all things spiritual are conservative in their liabits and associations, who cling to the faithe they have inherited and in which they have been trained, and to whom those phonomens would present no attraction, who would regard all manifestations from the speritual world which did not come through traditional channels in methods according to prescription and precedent. as disorderly. If this order of minds were to be resolted it would have to be through other months, formul, cold, and care montal, as the Churches had become , they required by any mount to be aroused from that lothergy so fatal to the higher faculties of the coul. Thus the spirit world, in its universality and through its abundant resources, found the best methods of stooting title class of minds, and I should be presenting but a narrow and partial view of s grout subject if I did not briolly glames at the manifestations which have taken place outside Spiritualism in order to most the needs of the great body of people who could not be affected by such phonomena as we have been considering.

Take, for instance, the outpouring of spiritual gifts associated with the name of Edward Irving, the speaking with tengues, the discerning of spirits, and the gifts of healing. Simul tannously with this there was shother movement very different at kind affording in most respects a contrast, not the Council hepod to meet their friends at the chambers in minitar in its spiritual working. I refer to the strange revival Conven-street. of accient Judames on the Western Continent in the Church of the Latter Day Saints. With all the follow there was in it abundant evidence of an outpouring of sparit power.

I might also refer to the ware of religious revival which | spread over this country a few years ago, and inconnection with which occurrences took place strangely like the phenomena of Modern Speritualism , and still more recently we have had what the phenomena of materialisation. There were in both the same is known and what Sparitoniuse recognize as spiritual harding, called in the Bothsham the faith cure. Only within the last separate form -the same indistinctness at first in the mask-laid low weeks we have had a conference in Loudon, attended by Incor presented in the carifer planes, the same luminous drapery

presents and appeared contemporaneously, and to show that there is a parallel between the servement called Spirit. nalism and what it taking place in the Churches and in the world. It confutes that sophists to which David Humo gave corrency, that the paychical phenomena of our time and the thirseless of a former time are necredible because exactedy to all the house, who said that I was be there time of the occurrence burnan experience. They are nectually not continty to all of such a phinomenon in her presence.

hand; then after a time the hard and and were exhibited, homes experience, for the spirit-world has never left itself sparit-world ampanging on our own, and enveloping as in its atmosphere. We may be, some of us are, insensible to these higher harmonism from the invisible world, yet it is also true that there are here amongst us those of more ethoreal mould less closely pent within the body's present wit have made human spirits were concerned in their production was con- excursions from the into that realin which a to a new fourand child have one by one disappeared into the realms beyond who have eighed in the agony of their heart's beconvenent for The touch of a vanished band

And the sound of a votes that is said, and who have betoned not altogether in vine to the murmure of that mighty comm whose waves ever beat on the shores of our immortal life

" And through their deep rolling. Have hourd their awoot calling Of specits that sing in a soft under tongue The sense of the mystical march And have cried to them softly H Come nearest ; come sware

And lift up the up of the dark are speak elegent,

And tends us the song which he song Mr. W. Steinson Moses then said it was his duty and a great leasure to move to Mr Shorter a cordial vote of thanks for his metadmerable address. He had found honself wondering, as he tetemed to the closely reasoned words of Mr. Shorter, how it was his roses was heard so coldons, and why, if they could not always have the privilege of listening to his voice, they might not be materiated by his large sagarity and experience, them, he that medium of the Spiritual Press. He wished Mr. Shorter might And it within his hauet to lot them hour of him more often in the future. He further wished to restify an emission he had made in montioning the early noncess of in mey mont, although he did not pretend for a moment to ment of them He had strangely emitted to mention the mane of a lady who was a monther of the Alliance and to whom all swed a cory doop dobt of gratitude. There was no book in the literature of the morement more alits in its defence of Spiritualism than that which is outilled "From Matter to Spirit." And in mentioning Mrs. de Morgan he included her husband Professor do Morgan, from whose pun came the profess to that volume , both stood in the most honoured places. He had also to announce that this meeting closed the present ecesion, and an adjournment would take place to October, when he hoped they would be able to re-open these rooms. He trusted to be able to open the cossion Minuself by a paper. Until that time

Mr. Shorter, in roplying to the rote of thanks, referred to a point which had cooped thin when speaking—the remarkable arallel which existed between the visible presentation of the materialised spirit form and the spirit photograph. Eretyone who had collected any number of these photographs would see that there was a very close correspondence between them and vague and cloudy appearances proceeding the presentation of a

delegates from many countries on the Continent and from the United States of America, at which abundant testimony to remarkable cases effected by faith and prayer was given.

I refer to these examples in order to take a larger and more comprehensive view of the phonomena of Spiritualism by Miss Wade, Mr. Tiethens, and Mr. G. S. Dartor. A grand comparing them with other phonomena which and comparing them with other phonomena which are against the second of the th Brumment and Some

In this way I received compromisations from my deceased husband and my mater.

### ROMANCE AND FACT: A STORY OF REAL LIFE.

BY SAMUEL EADON, M.A., M.D., Ph.D.

Norton is a charming village in Derbyshire, about four In ... all these respects Spiritualism is fully as miles from Sheffield. In the valley beneath runs the river advanced as is seconce itself. We know, practically, the Sheel, and the Meersbrook, separating, at this point, Yorkon to the war of species on the search at the present share from Derbyshire. Higher up the valley are the rules may, and under ordinary cond tons, quite as well as we of Beauchief Abbey, embosomed in woods. About 130 years ago, lived at Norton Hall, a fine mausion near the of disease, of means, and of the human intellect, and we willage, the ancient family of the Offices , and, at Norton know how to combat their ovil effects quite as well in our House, directly opposite, resided a gentleman who owned large landed estates, named Newton. He was on terms of interesey, socially and politically, with Mr. Officy, The destruction of energy" in Spiritualistic phenomena brought latter died in 1759, leaving a son, Edmund, between forward, and we are told that scientific men will seek for eighteen and nineteen years of age, and two daughters, four-"precise answers" to the question where the power comes teen and cleven, to whom guardians were appointed. These from "before they our accept the Spiritualist theories." But grandians sent Edmund to Eduburgh to complete his studies, sobody sake them to accept the Spiritualist theories selecting as his tutor, although Edmand had been brought up a Nonconformest, a clergyman of the Church of It has usuary been the boast of science that it scoople, England. Before setting in Edinburgh they made a tour and co-ord inter, and studies all the facts of nature in order through the Highlands, passing a few days on their way e splain them , but with respect to our facts it applies a with the young Dake of Argyle, at Inversey. Eduand afferent rule and asks for a complete theory—a "procuse wrote house that his tutor was not used to polite society, explanation," before it will even be to store one. We and asked his guardians that he might be superseded by are informed that, in order-" I'm example a harmony another, but they disregarded his request. When fixed in hetween Sprittanism and seems I was a new cory I Edulargh he made the acquaintance of Roy. G. Curr. submit, to show the origin of the energy when a at the minuter of an Episcopal congregation, who introduced has disposal of spirits," But science itself does not yet know to merety. But the tator reported unfavourably of Mr the "origin of the energy" of gravitation, yet the theory Carr and of Edmand's proceedings, which brought of gravitation is its proudest boost. Summer only guesses clustesteful letters from the guardians. Gradually such at the "origin of the energy" of the magnet, and in natrangement established itself that he cessed to corre-

As soon as young Offley attained his majority, March 21st, less probable guesses as to where the energy of the sun 1754, he cut off the entail of the estates. On the first of June comes from. It is surely not scientific to demand of a new he executed a will, making the Rev. George Carr, with whose and very difficult science the complete solution of stamost family he had demostreated his solt executor, and familiamental problems as a pressure or to resign and to leaving the whole of his real and personal estates to him and existence, yet that is how the writer in the Journal of this wife and their heirs for ever. Two months afterwards be died. Mr Carr wrote, of "a fever, heatily, and unexpectedly " The last passage I shall refer to is that in which the critic | Has body lay in state till September 1st, while arrangements were made for his interment at Norton. When the news reached Norton that he had deprayed his sisters of the family fortune there was a learnt of undequation from peer to peanint. The Duke of Devoushire, great grandfather of the present Duke, who had been a friend of Offley's father, said that Mr. Officy had not the power to alienate the anorstral property, and that he would spend £10,000 rather than the daughters of his good friend should be despoiled. It was thought that the young squire had been the subject of foul play. The gardener of Norton Hall said that he saw the wraith of his young master enter the hall door at the very hour at which he died in Edinburgh. This was thought by some to be a Divine interposition for the purpose of leading that so many people who dony that we have any evidence to an investigation. Whether this should be viewed as a the power to mespiritual as well as material forms) my the wratth of his young master, was a matter of belief.

The fact is, thousands of such appearances have been recorded. It is too late in the day for them to be put down to imagination. What is this imagination! Ask Stewart, and Reid, and Brown, and other metaphysical philosophers, and each will give a different version of it. It has been the came! to carry every bundle of the unknown along the sands of the mental desert through all time, whenever the learned attempted to pass from the confines of the material into those of the spiritual domain. It is a fact well authentiented, that the spirit of a man has come to friends the moment it had left the body, thousands of miles away Spirit, set free, is independent of either space, or matter, or time, The whole human race are merely millions of spirit-bodies, covered over with an organisation of flesh for temporary uto in this life. The spirit-body is the man really. When the human spirit has ascended through the brain, and the silver cord been cut which connects the corporeal with the spiritual body—the real man has passed away into another state of being. It is not the material eye which mus, but the spirit eye, making use of a certain special material organisation ereated for the purpose, and so of the other number. It is not the material brain that thinks, but the psyche, or soul, with the spiritual brain, p. corebral matter for its manifestations in this life . and so with all the other organs of the body. Some are born with what is called second night, i.e., endowed with the power of seeing spirit without the interposition of a Salpetrière Hospital. He has made many experiments had a me am. Thousands have been hung because they with a treat me steries subjects, and with results the present world I specify the seem for to a sign an a greek dearly and it is to the first and any proper of the carte what we 1 45 94 1 2 when o to fit was if he we had also the war a frogs of Luna ever an are see with

July 11, 1883.]

Whether the wrath of young Officy influenced the mand of Mr. Newton to defend the young laden, so wrong !. ly depeared of their inheritance, we know not; but if nut, there were other motives powerful enough to reuse Mr Newton to hattle against injustice. The guardians were supine; but he procured from them power was him to not as their delegate, armed with which he, accompanied by a friend, went to Edinburgh On the road they met the corpse at Perrybridge, on the way to Norton. Mr. Nowton produced his authority to the mon t make der from Serria of Green arrival in Edinburgh, ar injurnal or ha free and a maver he practical the he se of the Rev George Care. Mr. New or was e for objections to the validity of the will that very affect would be made to upset it, that the Duke of Daversher would gave £10,000 towards legal expenses , that he houself would excride every penny before such injustice should be perpetrated, that the young gentleman having made his will under the roof of those to whom he had left his property, without a friend of the family to advise with, or to be cog susant of what was done, was not to be tolerated , that the most rigid inquiry would be made as to his disease and the manner of douth; that he had stopped the corpse at Ferry-

to accept £2,000 and relinquish all claims under the will.

Five years after the death of young Officy, one of the daughters married Mr. Samuel Shore, who afterwards readed at the Manor Hall at Norton, till be died in 1781 Arr. Office Shore. Los son, became partner in the old bank at Sheffield, under the designation of Parker and Shore.

bridge to be submitted to a pest morten examination! At

this, Carr stood panie struck. A second interview was

agreed upon later in the day, when Carr and his wife agreed

Such was the romance enacted at Norton Hall about 130 years ago. Often great results depend on what appear to be very small incidents. Who could have thought that Mr Newton's kind act to the children of his old friend, Mr Officy, would ultimately have been pregnant with such great commercial results to a whole town, as it really has been to that of Sheffield? A great deal of the prosperity and enlargement of that rapidly-advancing town depended upon the success of Mr Newton's mission to Edinburgh , as by the restitution of the property to the Offley family, the old bank of Mesora. Parker and Shore was enabled to lend a normal course. When I magnetise patients in nervous beloing hand to thousands of deserving manufacturers, who attacks I observe that, in making pusses from head to feet, without such help could not have pushed their way, some the head and chest are the first to be visibly relieved. This to affluence, and thousands to comfort. There can be no doubt, when a broad view is taken of this Norton romance, that this one kind act done by Mr. Newton for the Offley family, more than a century ago, has spread happiness through thousands of homes and for several generations, and many of their descendants at the present time little dream of the real origin of the comfort and happiness by which they are surrounded, viz., that of the visit of Mr. ruling in nature, in the macrocosm, no doubt, rule also Robert Newton to Edinburgh about 130 years ago, on an in the individual human being, the microcosm. errand of friendship, justice, and mercy.

### ON MAGNETISATION IN NERVOUS DISORDERS

(From the Journal du Magnétiente.)

The nervous system is subject to various strange disorders which, when they present themselves, as they most usually do, in the female sex, are included in the general term of "hysteria"-a standing perplexity to physiological physicians. It has been latterly recognised by some of them that hystorical subjects are most susceptible to the Samre of metals. A treatment of nervous and other disorders by the application of metals was origina a the late Dr. Burg, and he called it Mutarlotherapia Ti s treatment has been taken up by Dr. Charcot at the which have been surprising to him and his colleagues, and these results were found to be similar to those obtained, , upon the same patients, by the incidence of electrical light upon them, the vibration of certain sounds, &c

On those experiments of Dr. Charcot the eminint professor of physiology, M. Richet, remarks: "These a is, and at the r woulders and marvers without a vert experiments point to the probability that Metallotherapia acts solely by giving rise to feeble electrical currents which excite paralysed nerve-fibrils and revivity their sensibility

Such experiments may, perhaps, lend M. Richet and other scientific investigators to inquire into the equally demonstrable magnetical and electrical influence between one human being and another, and which, as a there postic agent, they would find superior to that of metals

This was the case with Meanor. It was with metals that he first experimented , but he discovered that a real therapoutical force passed from himself, and that the action concurrently of the metals was superfixed.

For my part, having treated a vast number of patients suffering from all forms of hystoria, neuralgin, parslysis, epilepsy, chores, &c., I am able to affirm, unheritatingly, that there is no remedy equal to the human magnetical in officeres.

I have observed, in practice, that, in all disturbances of the nervous system, there has been ever excitation on the one hand and prostration on the other, general or partial

It appears to use that, in a healthy subject, imagnetic currents go from the centres of the nervous system to the periphery along the norve-tracts and return to their points f departure, in a kind of flux and reflux, and that this is proper to the normal life of the individual. When physical or moral couses distorts or derange this current there is disturbance or derangement of the nervos through which the influence pusies, hence afterno cons of the reas and decrease of vitality in organs or parts, resulting a disorders more or loss grave, manifesting themselves in a thousand forms, and ending, unless remedied, in organic changes difficult, if not impossible, to cure.

It is according to this rationale that I understand the action magnetically of a healthy subject, whose nervous system is in normal equilibrium, upon a subject whose nervous system is not in equilibrium, and that it is the best means for re-establishing order in that system. Once repport is established between the magnetiser and the patient, the nervous currents in the latter bogin to resume their corroborates the rationale that nervous disorders are no a butable to deviation of the nerve-currents, with which congestions are concomitant.

It is to be noticed that in treating nervous attacks by human magnetism, they pass off with convulsive movements in the patient, analogous to the shocks accompanying the restoration of electrical equilibrium in nature

### THE HERMETIC SOCIETY

The tenth and closing most in of the anomer session of this Society was hold on the 1st inst. The material The Camin it is if Na in was introduce by it is absent. Dr. Millia. Kings on a ser family in our wing or mass but

These was aparton hatra on after the Society and yer was no mar a rior and appetite plant. he equision is necessary to salvacion, and that only by realizing in the acts of salion to a staff here has been been as an apparent became a check of river but group and we be seethe same good and the strong of the same and force only in agency the knowledge of the mean, with the Last I a great, all those Stations and their Intermedianes being s own to represent so many stages of inward progress and evolution in the samily life.

The spiritual mothed of aterpretation has always been adopted by the mystics of the Church, with the coult that faith we make them knowledge, that tradition was converted into experience, and that, apprehending Christ scentding to the spirit, they thennelves were implied with His haptism, drank of Hu cup, and ascended with H m in heart and nund into the Heavenly Knigdom of the Inner life.

The minth article of the Apostles' Creed, the Communion of Saints, interpreted on the same lines, is and of the highest freeportance and interest, constituting the bond submiting be tween the Church ristale and invisible, and implied in the interunion and imaginalitity of the upper and on the less of a may 3 have been seen of the more to all to be been a fine place a miscous his every contract for Hay how works An arms to Charles to the processing arms the longer of human ratures, and honce, the assuplament and perfectionment of earthly and material extatence by the immanence of the world [ otomal and officigons.

The Church, so thus symboliced, has three divisions, the colonial, the torrestrial, and the purpotorial, or a mean wat trafe, souls in contact, and souls in pensago, or a secon-The upper or celestial Church comprises, first, all just toperfect, the spirits and souls of the righteous, who have attained the Assembler of Christ and passed into the root of the Lorenza next above this part, all angels, the mes, per mest the domations, and powers, belonging to the general of a base or ammeticin, the churchen, samplism, and sophereth; and, limitly, at the very apex, the Godhesd theil. These are the three divisions of the upper transpe-

The lower triangle, which represents the Church terrestrial, comprises, reckening from above downwards, first, the whole holy of the clost upon earth who are matracted in the mysterica of Christ, and multibled in the disponentiation of the Green, next, a note who been I they nated in one whence are any a . . the same and those mysteries by inward initiathe but as a to open communion with the yields Church Layle in the region, or condition, denoted by the notherment at a of the lower triangle, are the souls in prison, those when not lieving yet attained to the commontances of things spiritual, are in a state, not of grace, but of an, and are undergoing the experience and purgation necessary for their salestion.

The Communion of Saints is the bond of solidarity by which all those theirman of the Church aniversal are held togother and contain each other by mutual charity. Christian doutrino insiste that no man liveth or doth to hunself alone The merits of the mouthy are so many prayers applicable to the souls of all who desire and and accompant. The oblation of Christ extends to all who examplify and participate in Christ . and every such sout, according to its degree, becomes a fountain of grade flowing forth upon the world in beaugn spirituaefficences, a vehicle for the tentomenion of the Divine light and his which are of Christ. The just are thus fitly compared to the much and the planets in the firement of hearen c lightening the earth by virtue of the reflected and duplicated glory which they derive from the central sun , and every hely and was man is a distinct gain to the world.

These Divine occult influences are attracted especially to some in affinity with them, the set of whose tendency is in the some direction, and who are united in intention with the partrealer energy which they dispusse. The merits of a St. Francis of Assist may peculiarly encourage one, the victory of a St Mary Magdalone, or a St. Agues, another, one may gather errougth and light through the influence of some quiet and humble

George, a St. Michael, or the hold peoplet who was a voice crying in the wilderness. Not that the grace thus conveyed as necessarily derived through those who have been recognized and canonisod by the Church. Even these are themselves but representative groups of valiant and victorious sperits forming as marry constellations in the mystical firmament as there are phases of virtue and of grace, and focal points of beavonly effulgence, to the furnation of which all ages and religious have of the Christian faith, showing that a right belief in them | contributed. A Hernes, a Buildha, a Pythagoras, a Socrates a Dantel, a Hypotia, a Joan of Arc, each in his place and degree, not merely leaves a trail of glittering radiance across our heaven as he posses on his way to join the heat triumphent, but continues overmore as a positive, actual, energiong potency to reinforce and suntain the stream of his influence.

There is no force but will force, and prayer is the most potent, subtle and contentrated form of will form, and when exercised by souls whose whole energy is polarised and focusted upon its employment, attains its highest efficacy. The ferrent prayer of the mint, therefore, avails much. His intention, united to the Divise will, becomes a miracle-working nower. Not that pateral law is arrested or suspensed by it, but that it constitutes a higher activity of natural law, precisely as magnetic attraction constitutes a higher activity than that ester in gravitation. To exercise such a force in its suprement mode, the mental and psychoconorgies must be restrained from being descipated in the world, and assolnously area in return of its means of securion and in its quality contemplation. Where the active energy of the individual is concentrated in a polaric cumulus, this becomes, as it were, a redient point, emitting light and force of a peculiar and miraculous order. Such is the mint, who, whether dwe me on earth or departed from it, is a fountain of grace, and centre of t our a power document I'm or a) to premented

The correspondence of the Turn of a commontraceath of prayers, of good works, of accommental grace, of memories The members of Christ's body can do nothing alone. All pany and act for others and in the name of all, not vicariously, as substitutes one for another, for that would be subverseys of justice, but sucharistically, by a communication of blossing a grace to the namer women with one it start and gree and receive beneated the its best both among the living and the sparted. Not with immentations and bewailings, then, should we calebrate our dead, for those detain and disturb, but with prayers and oblations and acts of Divine union performed on their behalf, samestly descring for them consolation and st-onetoont with God. For the doubt of the body in no burrier between soul and soul. Love does not die of death.

Such is one aspect of the Communion of Saints, in its relation to the threefold Church in the worlds of time and of cturnity. But the mint has also special relations to God and be other mints. Those are planes of the dectrine which are familiar anysthes with at East and West. The Consumous of Sunts with God consuts in the relation held by the hely soul to beavenly environment. The status of any particular soul is doturnized by the especity it developes for correspondence with its environment. The more circumscribed this correspondence, the lower the rank of the soul in the comount of the universe; the faller this correspondence, the higher is that rank. The unaparitud man corresponds to the limited environment of the outer and lower world only, and is tamble to recognize aught beyand this. In relation to all wider and higher environment he is dead. As for a creature without eyes, light and beauty exist not, so for a mast without spiritual perception the spiritual world and the corelation of the Divine are not. "To be carnally missled as douth." But when the soul rises into aporitand correspondence and developes a cognition and experience of Divino environment, it attains the communion which rolates it anone sately so inc. the Communion of Sainta, in this bidy one was an former and modes of knowing are lost in actual union with the Divine. The highest of all attainments in to transcoud knowing by being , to exclusing the consciousness of outer things for that of the inner essence, and so to merge the finite selflood of the man in the infinite selfhood of Deity, as to realise experientially the words of the Athansaian Creed, "One by the taking of the manhood into God." For the Communion of Sounds and their conversation are in Heaven, the environment to which they respond a the Infinite Pleroma , the honda of the limited selfhood are broken, and conncipation and apotheosis attained. God is the onvironment of the mint.

The communion of the mints with one another follows front type of holiness, and another through the overshadowing of a St. I their communion with God. They have all things in common the paramed of the religious of there is a sough score only and that stone is Divine Love. This is the central point of the not when towards we half paths converge. Hi by a sit parmer thither by many reads, but all are prigrems to the salf-same shrine. The last utterance of the saintly life, the final sappration of the suntly heart, is always one whether we seek it in Vedanta, in Islam, in Hermotic illumination, or in Catholic mysterion. The Actus run all of Creek though was equally with the Oriental theorophies, pervaded by the spiritual thirst for union with the One and Eternal. The Enneads of Plotinus remain for ever a monument of expectance to this end. The same spirit gave religious for your is the noblest minds of the the age. The states and a for the I have what we

### HOW IS PREJUDICE TO BE OVERCOME?

A professor of science a short time ago was asked the question, "If, under what appeared test conditions, you witnessed some of the phenomena of Modern Spiritualism, such, for example, as the exput materialization and dematerialisation of apparently living human forms, or writing its various languages within carefully closed slates, would you necept them as facts!" He replied, "No mount of evidence could convince me of their genuinences , there is nothing in my mental nature with which they would parmouse. I would rather believe myself mane, than believe that the alloged phenomena were genuine

A strong case of this kind a not of frequent occurrence, but similar views, variously modified, are very prevatent, for England, and after August 31st for the Australian Colonica. and the vast majority of educated men believe the phene

or investigation of may and.

rather than real. There is not any same man who can finally restat manifestly conclusive evidence, and the dogmatte rejection of known facts can only remain stereotypes and permanent by refusing to examine ovidence, it being annosable to reject facts if they occur frequently and under test conditions, they must in the end command neceptance, and the bitterest and most conservative agschover must at last yield to the force of cumulative avidence.

The double proposals which have recently appeared in one columns of "Las str," via, the examination of testimony and cross-examination of competent witnesses by the | a most able marrier, and was listened to with great attention. excentive of the Somety for Psychical Research, and the publication of carefully observed and recorded phenomena, apart from theories, by well-known and fully accredited restructors, are possibly the best means of directing general natent on to the suggest phenometal of Modern Spiritualism.

The value of these two forms of evidence would be ineroused by the systematic republication of the early records of "The Origin of Races", in the evening upon "The Earth and Movern Spiritualism, and specially the evidence of such men as Wis. Howitt, Dr. Ashburner, S. C. Hall, Newton Cross July 11th, at 6.45 p.m. upon "There is no Death, or, Man and land, Professor de Morgan, Robert Chambers, Robert in Great Fature Life. At S. oth Shields Society's Robert, Stephenson, Bongaine Coleman, Robert Bell, Dr. Dexters in Candina-street, July 16th, in the evening upon "Death and Stephenson, Bonjam's Coleman, Robert Bell, Dr. Dexter-Judge Eamonds, Professor Hore, Epcs Sargent, Date Owe the only Dr. Carto Wilk seen. ### CLASSES O. AND R.-PSYCHOGRAPHY AND MISCELLANEOUS PHENOMENA.

Scance at Mr Eglinton's. Five p.m. Monday, 29th June 1585. Present (besides the medium) Major Taylor, Mr. Leonard

The three gentlemen took their seats round the table in the usual manner, Major Taylor, who was souted at Mr. Eglinton's right hand, holding with his left hand Mr Eglinton's left hand. Hir. Leonard, sitting on the right of Major Taylor, held with both hands Major Taylor's right band. Mr. Eglinton's right hand was disongaged.

The stance lasted for over half-an-hour, and no results whatever were obtained, though Mr. Eghpton was bolding Sitting in a quadrant of a circle and at a distance of from six a slate under the table in the usual way-

Conversation turned upon an experiment that Major Taylor had made at a previous seaner, when the number of Amanous; Mr. H., a gentleman from Edinburgh; Miss P. matches in a match-box, from which an indefinite number of Mr. P H., My. Barkas, Mr. P. The medium was Mrs. P , a matches had been removed by two or three stiers, had been married lady about forty years of age. correctly written on the slate.

Mr. Eglinton regretted that, on the 'occasion referred being used in the experiment.

It was determined to repeat the test, taking every premution that could be thought of

Major Taylor chanced to have in his pocket a box of "Tandsticker" matches. Major Taylor and Mr. Leonard then went ande to the window and marked with their unknown quantity in the box.

Mr. Leonard then replaced a few (he knew not how many) in the box.

A slip of paper was placed above the matches in the box, and the box was closed.

Neither gentleman knew how many matches were then contained in the bax.

All this was done out of sight of Mr. Eglinton.

The slate was then esrefully cleaned and examined. A slate

The match-box was placed on the slate, and the slate (with match box and pencil on it) was held by Mr. Eghinton under the table, with his right hand.

Eglanton's thumb was observed by Major Taylor to remain above the table. Mr Eglinton, being then tired of holding up the state, placed it on the table and covered it with

Mr. Leonard raggested that a newspaper should anvolope the whole

The slates were again examined, and a newspaper rapped round thou, the fold of the newspaper being

Mr. Eglinton placed has hands on the newspaper, one K. Communion with the De of them being jound to Major Taylor's, and while both the parted L. - Materialised Spirit Forms, bunds of the medium were in full view of both gentlemen, the sound of writing was heard.

Major Taylor removed the newspaper and then the top siste, and "16" was found to have been written on the bottom slate. Major Taylor opened the match-box, and he and Mr. Leonard counted the matches, finding sixteen of

The slate pencil was found to be slightly abracled.

The box and cover were identified as the same that had

It was thought that all possibinty of fraud had been aliminated in this experiment, and it was therefore concluded -from this and other results of a similar nature-either (1) That there was an intelligent entity at work sport from the medium and the sitters, or (2) that (a) in addition to having clairvoyant power (i) the medium was ablo, consciously or ancousciously, to influence matter in some abnormal way.

A G LEONARD, M.A., Highbury Quadrant. Le M Taylon (Major). Royal Military College.

## CLASS L-MATERIALISATION

On Friday evening, September 3rd, 1878, a schnoo for materialisation was held in an upper sitting room, the size of which was 14ft, 6in, by 12ft, 6in. In one corner of the room an augle 60s, by 50s. Din. was acrosmed by a suspended curtain to coven feet from the curtain, were the following persons, who sat in the order recorded :- Mr. Mo., Mr. M , Mrs. H , an

We first ant hand in hand round a table and had knocke and rang, undructing as to put the table within the cartained recess above referred to and me for materialization outside of to, the match-box had not been marked, for (he suggested) a the recom. The medium, Mrs. P., and her little daughter, Sadducean world would my that another match-box, with a Fanny, set on two chairs facing the curtained recess at a known number of matches, had been substituted for the one distance of three feet from the curtain. The company sat, also facing the curtain, at a distance of about seven foot from it as above described. A lamp was burning within three fact of where I set and with such brightness that I could see all persons in the room and could easily read time by my watch. I sould see both mediums with once, and the space between them and

After sitting about fifteen minutes we were told to remove mitials both the box and cover. Major Taylor then the table from the recom, and materixisation would take place. removed a large number of the matches, leaving an The table was removed, and mediums and sitters set in the open room in the same order sa before.

After sitting about ton minutes a small, white, flickering, flama-like rebetance about the size of a man's hand, appeared above the knees of the lady medium, her hands being by her sides during the whole of the scence. It increased and during hel in also and brightness, and at last continued to grow until it covered the head, shoulders, and body of the mechanin in a fleecy, white, semi-transparent cloud. It then took a more solid and definite shape, and descending to the floor, appeared like a young female, at least five feet in height. This form moved piece of thate pencil, with charp facets, was placed on the freely about the room, was visible about fifteen minutes, and gradually declined in height and width where it stood, until the form was about eighteen makes high, and during the whole time I saw the hand of the medium langing passively at use side. Thus amall white form again began to rise and increased in bulk, der the table, with his right hand.

Some ten menutes clapsed, during all which time Mr. the floor, she were white, flowing garments, and had a normal size, and coming forward post the lady medium took wife has nover seen any Masonic prayers, whether in Carlille, a hand of one the sitters between its finger and thumb; the or any other real or sperious ritual of the Manania Order." tections in size and distinctions it dickored away on the either of the persons engaged in the experiment. enquited floor. This closed a very remarkable alance. I have which could be confirmed if necessary by those who were T. P. BARKOL F 0.8.

for these "well-known laws of nature." We see them violated has been more solidly eartaln than those original rapt. on every side. They are broken at every sames. They are not saide in mine-readings and faith-healings. Thomsands of laws of nature-with what usually happens.

In a recent number of the Speciator is a very diever dis. ensemble of the theory of mind-randing or tennaler of thought in Masonic prayers

out the prayer and at the advancement of a Mark Master Mason." Agreetic could have written such noticence. And the apower came " 'Alanghty Ruler of the Universe and Architect of all worlds, we beseech thee to accept thus, our

on her head a large, old-frahioned, Quaker-like bounce, welfare of all mankind." This prayer was written off inshe touched the bands of four of the sitters, taking stantaneously and very rapidly. It is a very remarkable them between her finger and thunsh, and also permitted production indeed. For the benefit of those who are not them to feel her draw. This animated form was visible for members of the Craft, I may my that no prayer in the slightest about twenty-fire minutes, and at one time it mercased greatly degree resembling it is made use of in the ritual of any Masocae n bulk, rose to a height of about eight foot, and completely degree; and yet it contains more than one strictly accurate overshadowed the mechanic. The form again descended, assumed technicality connected with the degree of Mark Mason. My form then returned to a position about two feet from the Here, 'hen, assuredly, was a formula composed by some medium, and four fact from where I sat, and gradually intelligence totally distinct from the conscious intelligence of

The writer in the Speciator says, "We are sammed that without commont given a plain unvariated record of facts, bles. Newsborn, leaning back in her chair, sitting with her eyes shut, and a single finger on the Planchetts, could get long and rapid answers on subjects not in the loust present to her thoughts." A mind other than her own moved her fingers, or, as it seemed to her, moved the Planchette and her Suger, and wrote things of which she had not the least knowledge.

This is interesting-but the writer in the Specialist might I'We shall esteem it a favour on the part of our readers if they find much better facts in direct spirit writing. There are now will forward me, for use in this column, any allusions to Spiritanlism innumerable witnesses to the facts of intelligent communicaand Psychical Research they may come seroes in the course of their tions being written up exclosed slates, on paper that in books or reading. We see a great many of these currelyes, but it is shvious boxes, where, so far at we can see, any communication with any

In these cases why dispute the only testimony we have? For My suggestion as to the adventage that might be gauce example, I hold in my hands a pair of states, carefully, from a state of seven con or some good mechan, seems to have accuracy fastened and sealed. I hear the count and fool the usin mach in his State of One before I made it. At a pro- tremor of writing. Opening my packet I find a letter addressed luminary occumention before a justice of the perce, an evaluant to myself, in a well-known handwriting, signed by a welllawyer toutiful that he had made a sareful examination of the known name—those of a person so longer living in our natural phenomena of Spirituation, and had no doubt of their reality ( whathle condition. How am I to explain a fact like this upon Othors configural his testimony, and a large body of sworn any but the spiritual theory? Some spirit, having a power over pyklonece was branght before the public and reported in the matter of which we can have no conception, has done the with What reason have I to doubt that it is the spirit is pretends to be? But, in any case, it is the work of a sport

Runlly the more simple the phenomenon the more conto me words using but as at was constant to be "well tracing it in. The first we heard of -- thirty odd years ago-- the kin we have if out a Shall was sout over a space of the rape, were admirably adapted to call attention and then convince occur relining on dence, to three months' lunprisonmonts. The those who heard them that they were made by spirits. The laws of many as understood by a Bow-street magistrate, stood Rochester knockings called attention, answered questions, spelled storages. Away from the moduus-from any person who could have rapped-you not only heard the rap but felt the As we go on in the path of progress, we care less and less jar. In thirty years of almost continuous observations nothing

A writer in The Agende is customly more no Popery Spiritualists all over the world have seen, heard, and falt things than even the Rock or the Protestant Shooterd. ' Even the which no one can possibly recondle with what are called the Government," he says, "there are [were 7] sealous friends of Popush priesteraft, who are eagerly anxious to drug us back into the darkness, superstition, bigotry, florenery, and persecution It usually happens that water comes down from the clouds of the Popish Church. But outside this little island, there are m gentle showers but the other day a "waterspout" on two outdred millions of rabid Roman Catholics, whose subtle Moxica destroyed some hundreds of people. How such a mass cant and vectorous priesteraft are perpetually welling up among of water was sustained in the air is a puzzle to science. Sea us and threatening to overwholm us. Sixty years ago a Roman Using fall for adoust. So common a law as gravitation may be Catholic was scarcely known in this country , now we see prosuspended by forces we know nothing about. Our work is to bably one-third Papers. And this restness of cast and register facts whatever they may be. The why and the how trouchery will-perhaps before long-lare un into a trup, and vitoriy extinguish the only spark of freethought and mental daylight there is in the worki.

If the progress of education and common-sense were not the relations to some of the photomous of Spiritualism. For enough to move the world from such calamitees, Spiritualism will example, the Rev P H. Newsham writes a series of questions do fit part. America is Spiritualistic. England is becoming so he one room which are answered in another by the Planebette on day by day. France, Germany, Russia are in process of which Mrs. Newsham is reating her fingers. She gave, in this conversion. The knowledge of the facts of spirit life and power way many things utterly unknown to her-for example, some has placed a rest body of thoughtful mem and women quito above the influence of any fanaticiest whatever. Faith is For example, Mr. Novaham in one room wrote "Write are known there man end to all delucemes. Only an utter

The Againstic, as a know-nothing magazine, unturally ignores brother, whom we lave this day received into our most honour. Spiritualism. If its writers would but condescend to know what able Company of Mark Master Masons. Claim into be a in really going on in the world about them -if they could open worthy member of our brotherhood, and may be be in his their eyes to the facts most worthy of their observation, neither own person a perfect mirror of all Masonic virtues. Grant that the Pope nor General Booth would seem so very alarming. all our doings may be to thy henour and glory, and to the The men and women who have lived upon our earth are wiser

THE

### HARMONY OF SPIRITUALISM AND SCIENCE.

A REJOINDER TO ME, ALPEED RUSSEL WALLACE, LL.D.

By FREDR F COOK

Speritualism no voice equally authoritative with that of presence in the universe, except by the stars verbal and Alfred Russel Wallace. None, in my opinion, has brought unanistalable degree that it is the product of organisation " f to the investigation of Spiritualistic phonomona better Let us bear in mind that we are not new dealing with disciplined faculties, a freer or less prejudiced spirit of phenomena, but with an everlasting and eternal verityinquiry, and, above all also, none has been truer to his with the essence of being. Has matter this essence ! lights. Behind the great scientist has always been clearly Obviously no. In it then permissible for us to assume discernible the greater man-the lever of justice. Feeling that it is the one thing in the universe that is able to go thus, it is with considerable reluctance that I constrain outside of its own nature, and impart what it has not itself, myself to withhold annualified approval from any public . . , the assence of being, consciousness! Phenomena atterance or statement of his. While I may differ from him modify phenomena, but do they also modify essences ! When momewhat as to the relation subsisting between Spiritualism we speak in terms of evolution of things-in-thomselves, are and amenca, no difference of opinion in that regard could we not bound to presuppose a process of involution freighted induce me to unter a word of durant, were it for no other with all that evolution under the most favourable condiremon than that it would not be becoming in one who is tions is able to express? The case is plainly this Either not a secretisal in the legitimate sense of that term, to matter does it all, or matter does essentially nothing but enter the lists against to distinguished an authority in call out what is already in. Now, what is it that rosts at science. And even along lines of deduction and speculation the basis of being 1. Coviously to a conscious iess. There-(where the terms on which we might meet would be much fore I spir t in the assence of being it must be in and of nearer equal), I should still healtate to take more with him, stelf conscious. When we say "man an apprit, what do were it not for what I trust is a pardonable concern, that we mean I. Does mortality give consciousness to apirat or Spiritualism and all that flows from it shall not be judged cose spirit give consecuences for a muted period to at less than its best, its profoundest revelations, its despest mortality? Here we have planty the whole distinction and completest explanation of the mystery of being.

Spiritualism was never so live a subject in this country as at the present time, and, consequently, the article from tion is expressed cannot bejuggled with. This new wine is not the pen of Mr. Wallane, published in the Boston Herald for old bottles. Immortal things are sternal things, eternal some time ago, is attracting an unusual amount of public to age are auchangeance things what is called out of oring attention. The whole tone of the statement is admirable, into phenomena must not by any confusion cutier of terms the scientific presentation of the case is remarkably conservative in comparison with the "claims" usually put forward wrested to being nothing can be added. However being in behalf of Speritualism by pseudo-scientific believers, and may exhibit itself phenomenally, essentially it must ever it is only when Mr. Wallace enters upon the deductive or purely philosophical aspects of his subject that he fails to be at his best. Nothing, for example, could be finer than have in active energy. And what is not potential can never

"Modern science utterly fails to realise the nature of the spirit consciously can never be put into it by any promusd, or to account for its presence in the universe, except cess that is admittedly unconscious. Plainly, then, by the mere verbal and authinkable dogma that it is "the consciousness must be for us a yield of the spirit and not of product of organisation.' Spiritualism, on the other hand, matter. Man is neither more nor less than the momentary recognises to mind the cause of organisation, and, perhaps, battle-ground between the two. Spirit informs matter for

even of watter itself, and it has added greatly to our know-The Harmony of Spiritualism and the distribution of Spiritual Spir beings, yet separate from any human body

Thus is the true Spirituanitic position, and the line that demarcates it from the ordinary scientific point of view could hardly be more clearly drawn. If this stateessentials of being. Yet, on reading further, I find that - this is not at all what Mr. Waliaco means, for he has this

"On the spiritual theory man consists escentially of a spiritual matters and mind intimately associated with a spiritual body or soul, both of which are developed in, and

by means of, a material organism." To my raind this is a plain case of spiritual suicide. And when he regards the idea apart from the particular application of it, Mr. Wallace thinks so too, for have I not already quoted him as saying " Modern seiones utterly Speaking after the manner of the world, I recognise in finite to realise the mature of mind, or to account for its between Material sin and Spiritualism in a nutshell, and the day is not far distant wher the terms in which the distincor of ideas he put into being. From being nothing can be remain unchanged. Potential energy in essence has nothing added to it through any phenomenal exhibit such as we become active—and, by a parity of reasoning, what is not in

the purpose of overcoming it. Matter resists. This conflict, that man is the measure of his numb, or spirit, or soul, is to re lists, itself in consciouances of spirit, gives us the give the entire case to the Materialist. For the Spiritualist phonon or a case I Ma was when the conflict is over there not ing remains, not a tota. That patter assisted being is an end of man-thereafter you realise yourself as spirit time a go es l'in extron to as consciousness there is you realise yourself in your entirety—as a complete and its red a cour binitation, realising, itself only under consciousness, instead of as a succession of states of time and space conditions—shall be its form eternally, is an consciousness. To express spirit in terms other than ontological conception separative that me may well ask in consciousness is to express it in terms of matter or in terms plarm if it is to this that Spiritualism is bringing us. of nothing-the Unknowable of Unknowables.

determinations is that time and etermity are not interchange- man is but a temperary expression of that which in its fuladd terms, and that a time product can in no wise be truns ness is an eternal background. The soul does not exist for laied, or transmitted, or transmistantialses into an eternal man's saturaction, but man exists for the soul's saturaction. verity. Yet we have this passage from Mr. Wallace :-

"This world-afe not only lends itself to the production." by gradual evolution, of the physical body needed for the other as complementary processes, then not only have we a growth and nauralment of the Assam and, but by its perfect whole, but a philosophy of eternity that brings the very imperfections tends to the continuous development of idea within human comprehension. Ce bugher aperitual nature of man. In a perfect and he re-mious world parfect beings magnit possibly have been prosted, but could harrly have been everyed, and it may well Wallace writes :be the evolution is the great familianental law of the universe of mind as well as of matter."

can over be added to or taken from the universe. Now we a I agree that through the processes of evolution seauthing is added to the phenomenal universe, and were con if a t by in all probability the only means of developing our those assuming that the type or idea as an eternal principal inghest suoral qualities samusarised as "love" by St. Paul. expits in essence, and all that evolution means is that the and 'altrumen' by our products tenshors, which all adon t principle is clothed with materiality or otherwise brought must be cultivated to the atmost if we are really to make to outward cognition. The strength of the evolutionary progress toward a higher social state. [Then follows an idea rests in this, that it admits of an illimitable background of real and eternal vertices, and hence is the widest possible philosophy as an incentive to duty, after which Mr gatoway through which to make exemuons into a world of Wallace continues, But when men are taught from childideas. But this vantage ground, this laghway to appritual bood that the whole material sourcess exists for the very realities, Mr Walaco not only ignores, but in effect cuts purpose of developing beings pomenting them attributes, away whou he gives atterance to the purely materia as a [demanded by attrusm] that evil and pain, sin and sufferthought that "it may well be that evolution is the great for damental law of the universe of sunstant well as of matter. | developed here will make further progress towards a nobler So long as mind is conceived as morely a congerves of sense. and happer existence in the spiritual world, just us propertions, and the product of mind is assumed to be the ophe- tion as our higher sional factings are cultivated here, and moral apprehension of external facts which we comprehend under the term knowledge, the even term of a mark and an pessible outen absolute necessity to thought. But when mind in conceived on an elemini principle (and nothing less than exert world, and the continued setual reception of teachings this can be predicated of it, if it been dowed with immortanty | Gross St, then, indeed, we shall have in our midst 'a power there can clearly be no talk of evolution. Even in this may that makes for righteousness. torial world there can be no naturalizary, no complete under hold that the obverse of this proposition is also true, and impact, and the principles of justice and equality are in-

only, and what gives you the larger statere is that asspirit no de y ag out to conveye that the outward product so Happily, the answer is far otherwise, and "the continued For be it from me to degmatize about what is possible actual reception of teachings from it" (i.e., the world of and what is not poss do in the universe. Yet among sonis), to which Mr. Walloce so confidently refers as dethinking men, among men theroughly grounded in the stated to work mighty changes in the world, is gradually fundamental conceptions of science and philosophy, a few but corely, posting forward into harmony with the thought throgs are posited as fixed starting points, and one of these that life is not an accident but an oternal verity, and that This is the order of involution in contradistruction to the order of evolution, and when they are set over against each

[July 18, 1985.

So much for the metaphysical aspect of the contention. Now a word or two bearing on its moral relation. Mr.

" Pinaly, these teachings of Modern Spiritualism furnaling with the much needed loss of a true ethical I believe I am not mercocwhen I assume as afundamental system. We learn by it that our carti-life is not only a position of senemorthis: that nothing ementalise indestructible proposition for a ligher state of programme spiritual statement but that his he we are use it simple for as its your worst for men, the air pervasing in terms within a are carra as dissertation on the utter lande uscy of modern ing, all tend to the mine end, and that the characters when all this can be taught, not as a set of dogmas to be blindly accepted on the authority of unknown ancient writers us as seing for sied on forest knowledge I the

Mr. Wallace here starts out with an admirable pressue, standing of avolution, except as it is conceived as working to. I that this carth life as a school of preparation for higher outwords a definite reality-otherwise it is clearly a miracle. In workings, that suffering and ain are the real things that tome manner all forms must be eternal existences. Now maid make for progress, and that the characters developed here isomoof these eternal forms; and whatdustinguishes stasform we make further progress towards a noticer and happier is consciousness, and it is nothing less than a materianstic existence in the spiritual world, but when he ados as a vagary to hold or declare that consciousness, the one thing necessary corollary that this progress towards a nobler and that constitutes mind, can be added to or substructed from. happier existence in the spiritual world as in "proportion as That of which we have at any time been conscious, though our higher moral feelings are cultivated here," he not only outwardly forgotten, must for over ramain in consciousness, slaps his promise (as to the office of sin and suffering) equally or it is cternally lost. Unless the seal is a conservator of the face, but destroys the entire ethical basis which he of consciousness by reason of its indestructibility, there can seeks to establish. From Mr. Wallace's position an be no spiritual awakening in realms supernal. And con-ethical out-working is an utter impossibility. The sciousness in and of itself can be expressed only in terms of chical structure of Christianity is falling to pieces because constituents, whatever you may or may not be, the soul at m not builded on the eternal principle of restice and must ever know itself and all its belongings, and being im- equality, and Mr Wallace's scheme labours under the same mortal it can be concerved only as for ever in eteriaty. Mind defect. If in consciousness of soul I choose a certain human may readily be conceived as the measure of the man, but to expression, then the responsibility for existence rests with

volved in the very idea of being. But if my existence is due to purely accidental conditions in matter, there is, to been with no element of responsibility involved in any names and addresses to communications. In any case, however, existence that goes to myself, all responsibilities are thus those must be supplied to the Editor as a guarantee of good either imposed upon me, or voluntarily assumed by me, as may happen, and there is, furthermore, an utter demal of the element of justice or equality. The Christian scheme, while it fails to throw any moral light on the incorpolities visible here, at any rate throws open the like the product of a desire to here, a rate of nor same door to perfect equality in Heaven, if you are inclined to accept the terms on which it is granted, but the Spiritgalism of Mr. Wallace cuts away justice and equality to the very root. What we are, in so far as we are known to ourselves through present consciousness, is the product of sible, in chief fallacies. forces over which we have little or no control. If my parents are wicked and dissolute there is small hope for my being anything class and however much this oppressive sample reason that the term "leaders "implies followers, am order of nature may be necessary to the up-building of the race, it cannot be applied to the individual, unless it applies equally to all individuals. But we know it does not so apply -we know that the difference in natural codowments is coormons, and if it be true, as Mr. Wallace affirms, that on "progress toward a nebler and happen existence in the though we may differ from Dr. Wyld as to the sense to be meribed specitual world [is] just in proportion as our higher moral feelings are cultivated here," then the injustice, the cruelty, the discrimination, is doubly refined, and the order of the universe a hideous meckery of any conceivable D and comony. Obviously then, we must look deeper than that which we know as discreted existence for the harmony of the differences which we observe all about us. If you answer that all will be equalised in the end, I have a right to sek for an explanation of the difference in the beginning. I am not now discussing physical existence, but moral existence-and yet between the two there must be an exact correspondence. Whatever I suffer must be a necessity to my being, and, inevitably, to avoid invidious distinctions, it must be in one form or another, pecessary to all beings. Yet the infant dies without any experience whatevever And the good man dies without any of those experiences that come to the bad man, and, broadly speaking, the good man is good because he manot help it, and with the had man it is much the same as to badgest. Obviously the inequalities we here observe must have their moral as well as their physical meaning, and whatever happens to say one must be a necessity to him in his divine nature. If, however, our beginnings are here, if spirit is evolved into discrete existence through matter, then obviously no moral necessity can by any possibility be predicated of the human differences that we know. Eternal life will not permit itself to be conceived under the form of chance, yet chance it is, if the promised "Spirit of Truth," when He comes, will receive evolution be not complemented by involution, if whatever goestohuman experience is not the laworking of the sovereign soul for its own antisfaction, and if a moral necessity does not inform and impel each act toward the goal of trons-

### Dr. Wold and the Harmetic Society. To the En tor of " LIGHT "

Sig. Do Wylo's effect of to 445 out reads at much more against these who premine to differ from him, then of a desire to alucidate truth, that were I to follow my own impulse Ishould leave it annoticed. As, however, there may be uneng your renders some who imagino, that because a charge is unonswered, it is therefore unanawerable, I will indicate, as briefly as pos-

In the first place, there are in the Hermelia Secrety no per some whom Dr. Wyld is entitled to call its "leaders," for the the members of the Hormetic Society are wholly employed and independent, and are not, therefore, followers of any persons whatever, but purely and simply of truth

In the next place, Dr. Wyld has interepresented the position of those when the assents. We have notther "tunned the and Coast more had allows Christ his coppe in Kindletha to the latter expression.

Respecting this sense, it is necessary to remember that the fact that there was a difference of opinion in the Presentive Church -not whether Christ had some at all-but whother the manner of Hu coming land been such as to cognititute the anticl pated coming "in the flesh,"-shows that the phrese bore a meaning so subtle and coult as to be readily susceptible of

Had t limit indeed "spine in the flesh" in the sense musted on by Dr. Wyld, and been an altegether exceptional personage, nitracelously engendered, a performer in public of numerous suspensions physical acreets and so different in kind from my men as they made homen rather than a morely superior ou and the two war we many we believe have been so apolite and flagran but no newtron could have when a solic an certainly it would not have been a deposition of Paul But no far rum the bean, the case then our a numerous party which hold that Josus was but an augolic or phantames appearance, unrolated to humanity, and that con sequently no manifestation of Christ in and through humanity or the first mea in hereby unique beings find avine

Br Wyld, however, not only assumes the right to be positive about a matter concerning which there was doubt then, but ak a a view which, as it seems to us, neither the Apostles our their opponents held, and historis to invoke anotheris upon those whose respect for religious truth prompts there excelledly to search the Scriptures for its real meaning and inteninstead of foliting upon it their own preferences and see, one conclusions. It is oridertly but an ungracious recupiton that at the hands of the Dr. Wylds of the period, in one he ventures to differ from thorn. As it is, it may well be that in refering to accept the mode of coming I have suggested as a "coming in the flash," Dr. Wyld incurs for hinself the condemnation he scoks to pass upon us.

Even if we had made the denial parribed to us by Dr. Wyld. the fault-if a fault at all-would, by his own showing, be a venial one, since he holds that "the historic Joses, as a bare field, may have very little influence on the souls of mon," and that notwithstanding His "full possession and transportation by the Divine Word," Jesus so slightly transcarded the medium of the period that "a replica of almost every muscle attributed to Him may be found in modern Spiritualatic phonomera And, further, even if we lad deared the "historic Juans, we should not therein necessarily have affirmed that such Divine postession and transmitation had never occurred to any human being on this planet, sooing that similar experiences are ascribed in the Bible to two other persons, Enoch and Elujah so that Dr. Wyld, when he estes the transmutation of Jesus as an unique event, shows himself to be as eleuderly acquasited with the Old Testament as he obviously is with the New

The very paper on which Dr Wyld mainly bases his strictures admits the probability of there having been some special figure which served as chief model for the character delineated in the Gospels. We have demied only the proposition that there is in

As if despairing of proving his case by remoning, Dr. Wyld betakes become to assertion, and this in the most degrantic fasoron 'I assert" he save, "that there is not one discrepairs of or sutance as the four tompels. But only " a few ver an diservances after best and as to afford confirmation if the regent remeas by most in that they were not take the street s The hardihood of this interance extreme as a section of a only objectionable feature. As a rect unquarted contradiction of us it is also discourtoous. There are plenty of ways of expressing dissent from an opponent. without plainly implying that one considers him so un-The presumption of it, too, is arousing, or, at least, would be its ottorer to have followed the developments of modern research in these grave matters. Dr Wyld evidently supposes that he will have settled the question to his satisfaction when he has sue counted in discrediting us , whereas he has, on the contrary, to deal with the vast array of competent and midul scholars who in the last half century have devoted themselves to the inquiry, with the result of demonstrating absolutely the hopeless disaccordance of the Gospels, both with each other and with contemporary history, and the large extent to which they are reproductions of logords, and compliations from literatures long pro-oxiatout; and, somequently, their non-historical character. These are results arrafangably catablished for all who have carefully and candidly amminoù the grounds on which they rest And you they are to be disposed of by the simple isse distinf and who is no much of a tyro in the subject that little ever three years ago, in a discussion upon it, he expressed surprise at learning, among other disorepandon-all of which have alrely exercised the orthodox-that the Gospels disagree se to the day of the Greeifixton ' As he had taken their agracuous in this and other respects for granted, then, so now For his letter shows that he has not unproved one interval by acquiring further knowledge of the subject

To cite but a few of the contradictions to which a bolisf in the seasures as historical and concordant commits its holder. He must believe both that Jesus was mineculously born of a virgin mother and the Holy Gleen, and was not derived from the house of David audalso that He was bernauturally of Joseph and Mary, amee only through Joseph could He have been " of the seed of The stracesting to the floth." He must believe both that Joun und g was to Egypt, His percents having field thirtier out the night for wing the said the Magi, in order to menpe the manace e en by terms and a nat He did not go into Egypt but remained where II was been to be better sed after "gh days and ofter only days, to account any His parents to Jerusa on for His most per a partition tod a vist winds was repeated overy site centive year fortier to years and course totally like here was to remeat to or appearing by He of. He must be sever both that the notices of Jeans was to fully aware of H . Devine no our and musion as to treasure in nor hear a cry an elent concering Him , and also that she failed wholly to comprehend His allosions to His possiliar nature and destiny, and joined His brothron in an attempt to withdraw Him from a public curver on the ground of madness. He must believe that Jetus was gracifed both on the day of the Passovor, and again on the day after the Passover, that the resurrection occurred under four different and incompatible acts of circumstances, a different set being detailed and positively stated in each Gospal , that the ascension occurred both, as described in the Gospel of Luke, on the same day as the resurrection, and also as stated in the Acts, which purports also to be Luke's, forty days after the resurrection, and that Judge both returned the money pand for his treachery and hanged himself, and also did not return the money but bought a field with 1t, and died therein of an accident. It is, of course, open to Dr. Wyla to plead that the parentage, birth, crucifixion, and ascension are not matters of importance, and I ma quite willing to allow him this loophole for escape. But he cannot avail humself of this plea and still retain his belief in the historical character of the documents which thus differ respecting them, beeing that they, not to mention the system founded on them treat them so of the namest importance, and that, if not history cal on these points, they are not entitled to be regarded as historical at all , but, if of serious import, must be regarded as we regard them, namely, as mystical.

As for the pretended doubts about Napoleon, Dr. Wyld forgets that there remains a very substantial residue of indubstable fact in his case, while in that of Jesus there remains nothing after the doubtful parts are climinated.

[July 18, 1585.

Had Dr. Wyld really desired to promote knowledge he would not have emitted to potice the striking demonstration gives by me of the fact that so far from Josep being represented as claiming for Himself an exceptional physical birth, He is represented as disclaiming anything of the kind, inamench as He is made to declare it necessary to every man that he be been again precisely as He Himself is described as having been born, namely, spiritually ;-- "Water and the Spirit," and " Virgin Mary and the Holy Ghost," being but symbolical formulas for the soul and spirit of which man when regenerate is "born worthy of hood as to be best met by a flat contradiction again." But Dr. Wyld passes over the conclusive proof that the subject of the Gospele is rully not a particular luman to but for the tanlancholy proof it affords of the atter failure of personality, but the interior and spiritual personality of every regenerate man, and, so if under the impression that an amertion needs only to be repeated often shough to convert it into a fact, he proceeds to reiterate his disbolief in the doctrine of physical rebittle or " re-incarnation."

His remarkature are no test open to objection for their superficiality, their dipputor, and oven their insincerity. The negative experience of a majority, however large, proven—as Dr Wyld wall knows-nothing as against the positive expericates of a minority, however small. Movertheless, he cites the non-experience of the unjointy as an argenous against the doctrine. The remainteener of past existences belongs, not to the specificalistic, but to the spiritual, consciousness, and to an interior region of this , and it is therefore not comprimble in the order of experiences of which alone, as I am forced to conclude, Dr. Wyld has cognisance. Of the profound philosophy of the electrize, and of the sanctity of the experiences on which it reets, to is obviously unawate, or he would not make contemptuous reference to the latter as by secribing them to a process of self-biologising." The roply of Joses to Ris disciples concerning this doctrine, though at evaded the question, naither was

scornful por demod at Limited to a single earth-life, the experiences requists to enable a "Captein of Salvation" to be "made pariest through suffering," would indeed be few

Equally fallacious is his demand for "scientific proof" of the facts of the spiritual consciousness. As if the reality of a remote memory of any kind was espable of sensible demonstration ! While his denial of there being any historic confernation of the doctrine seems to imply that Plato, Pythagoras and Buddha are munos as strutige to him so those of Esoch and Elijah appear to be. As a student of such subjects he ought to know that the whole of the ancions religious comprised the doctrine of transmigration, and consequently of re-incuration. But there are students and students, and Dr. Wyld's letter makes it difficult to clear him with those who murit to be called surious.

One remark on what Dr. Wyld so warmly cologises as the "testimony" of Mr. Roden Rool. The argument from the alloged necessity of a realised ideal of perfection in another as an aid to the purson of it in encoulf, if valid at all, must be valid in most other than that where the perfection in question is spiritual. In it the fact that the belief in the existence of none sumoendentally physically-beautiful specimen of humanity is necessary to enable us either to aspire after physical beauty in ourselves or to form a conception of perfect beauty for ourselves? Assuredly not. We some the less recognise and desire beauty because we know of no one perfectly beautiful. And the artist is none the less able to davise a perfect type became he cannot find a parfect model. For all that is necessary for him is to have suitable subjects from which to compile the manifold excollencies badonires to combine into a single image. Greek art was a new revelation of the beauty of the human form. Yet it needed not that any one individual be transcendoutally beautiful, or even that there be more beauty than usual in the world; but only that there be an enhanced perception of bossity. Why may is not have been so with the inspired artists to whom the world owns the portraits of its Christs? It is none the loss a "coming of Christ in the fiesh" that His lineaments be distributed among many. But Dr. Wyld sides with them who may " Lo, here is Christ, or lo, there '

Regretting the length at which I have been compelled to write, and trusting that any reply that may be made will in some degree tend to edification, -I am, de.,

Enwand Matriage

Roden Neel and the 'teaders' of the Harmetic Society are so much limits here on this phenomenon being bond Ade. The matrument in disagreement as Dr. Wyld sooms to think": namely, on the question of the leatoric Joses.

All that I my is, that Mr. Roden Neel and myself are es exact agreement on this matter, and in disagreement with the 1873, at which large crowds attended to hear her discourses, views expressed by the leaders of the Hermetic Society , for which were invocably artificised in the Daily Neves, Morning while I and others most entirely believe that Joses Christ was | Post, &c., &c. not only an historic Person, but the most important historic Person this planet has known, Mrz. Kingsford, on the con-Hart, if she "has never demed the historic Jette," yet mys "It does not matter to me whether the George's are true or not all sides we see men bonding in comment embersons to get at the on the merely outer plane.

man can know any fact, and therefore cannot set it down , and may have been invested in the past, and in spite of the cent of I am quite sure there is virtually no such thing as history

There are remarkable statements, and I would sak , Is it not a cherished ideas may entail fact that 2x2=4, and can I not not it down! Are those not three (note, that food generally satisfies hanger, water quenches thirst, and fire warms! Is it not a fact that Mrs. Kingsford is president of the Hormetic Society, and that the president not only doubts the historie Jesus, but amorts that No man con know any (set, and that there is no such thing as lestory"; and when her beography potocs to be written will those facts in her belief not | the seribes in the temples ! be set flown and accepted as historic?

Mrs. Kingsford further says "I shall be glad to receive any resilty logical and scholarly rectification and explanation of the many serious and important minitalements and incometension undoubtedly existing in the Gospele. These difficulties do not concern more details but the facts of the life itself "

That there are minute and verbal variations in the Gospoli I have already admitted, but I dony that those in any "serious degree affect the grandour and varietatilitude of the historio portruit, and I would ask the editor of " Leauer" to permit Mrs. Kingstopi to substantiate her statements in this respect,

True, the innocents may not have been managered, and cortain taxes may not have been lovied at a stated time, but if no, these details would no more detruct from the grand truths of t is historic representation, than similar historic inscentacion was waken our bearf in the historic Cromwell or Washington.

much in proving the modern phonomena of Spiritualism to be conficul with the mighty works of James 1

In reply, I my that I moves thought or attempted to prove any such thing. I only said that the Agnostic who disbelieved in totracion has an axome for regarding the interculous life of Josephan mythical , but that those who, like Mrs. Kings ford, believe in the phonomena of Spritualism have no such excuse. I used the word replies as signifying a copy, so far by the came hand, in so farms it was spiritual; but the value of that copy is very small as compared with the original, and there is no identity between phenomena performed by earth-bound spirits and the mighty works of Jesus, which came from the fountain of the All Spirit, through the highest incurration of the Divine , and I searred that one who so ardently toaches the grand saystac doctrine of the possibility of the Incurrention of the Christ in Man, should yet doubt or deny that this sublime sles, in its completeness, became a unique fact in the person of , the hustoric Jesus. GROSSE WYLD, M D.

> Intelrational Speaking To the Editor of " Laour."

Sen,-For some years past the extention of Spiritualists in Lordon appears to here been devoted mainly to the investigation of phonomenal evidences.

There must certainly be a large number whose experiences In this direction have been conclusive, and who have been convinced that each phonomena are the result of action by unecen intelligences, exerted with the direct intention of producing an educational effect on the minds of the human witnesses.

Such experiences must create a desire to learn something about these unseen operators, and the ferces with which they

We here at present, in our midet, an instrument used by the uneen intelligenous for importing such information, the subject being hypactised by the invisible operators, and in the trance state used to give expression to their will.

The trance state us, of course, well known to Spiritualists who, in many instances, have witnessed thus condition in men-Sp. Mrs. Kingsford writes that "she does not think Mr. bers of their own families. SHAPOWE OR, Mr. JOHN WETHERSKE'S EXPERIENCES OF AND THOSERTS ON STREET ALBOY

recognised domain of science. The best exotoric definition of characteristic of me, and was religiously asked for, but it might be it is Psychic Porce. This power or force is containly intelligent, even if oftra-human. It classes to be a force from 'over the river,' from departed spirits, it claims to be from the loved and lost, from those whose bedies are mouldering in the grave, assuring ne mortale that they still live. This intelligent 'psychic force" has never claimed to be anything also but a departed har a se g in a single instance, from the first manifestation in 1848 to the present to se-

Is will be gathered that Mr Wetherboo occupies the same platform as myself. He is a Spiritualist "hard shell," as he reight perhaps say. Renders of the Benner of Light are used to the quaint, who remarks which he contributes from time to time to that journal. They have in this book assacthing that they are sent one a redection of quarter was as appropria ready to the kand than a man of newspaper articles.

Mr. Wetherboe a own account of the way in which he became a Spiritualist is as instructive as anything contained in has book. Dooth had removed from his family a little girl of six years old. Mr. Wetherbee, at that time, was a Material ut . Mrs. Wetherboo had been brought into contact with some Spiritualists, and was argod to assume her grief by endeavour ing to open relations with her lost child through a medium Sho did so, and her account of what took place did not impress her hunband, "It second nilly business," he said, "and trade no ampromion on one but I saw no have in it, as it occupied her mand and gave her something to think of,"

Is chanced one afternoon, as Mrs. Wattaches was going at for a walk, that the me he sested a these paper coming " see her The me a second of a meaning a Mrs. Loods, of whom Mrs. Wetherbee had incidentally heard, "On reaching the house its Carver-street, they found that Mrs. Loods was absent on a visit to Judge Edmunds in New York They we's turning to go when they asked the girl who had opened the door if she know any good medium, "She gave them the address of Mrs. Hayden, of Hayward-place, and the ladies mont directly there."

his natrative sely straining. I continue it in his own procise

I was in her library up stairs, and alone. I had some writing to be, because opening my mind, and in their connection with my wife, who had just gone out, as I have described, and I began to corb-I said to myself, ought I not to look into this matter, and why is a necessary to go to a stranger to get a moreago from any of my departed friends? That has, thought I, an unreasonable look to begin with. I had forgotton, or it did not occur to me, that King Saul, when in grief and core distressed, had to go in that way to the woman of Endor before he could connect himself with or got a movage from his departed friend Sarmal. In beginning this cogitution, it rester appeared to me that if my little daughter was alive. though invisible, or any spirit of my loved and lost relatives of friends had any message for me, here and now was the time anplace for the manifestations. Here in this room is the old table and on it the old Dible, printed in 1731, that old familiar facos of my youth ant at and turned the leaves of the book, and showed and explained the pictures in it, and I began to grow sentimental with the pleasures of memory. I seemed to grow hospitable to the idea, or rather to the images of these old faces that were as vivid, in my mind, as the old book was that had outlasted them to my season. I believed everything was subject to law, and that it was possible that the room was then full of spirits though my intellect was insidel to the idea, still in my beart there arose a escreel voice which cald it was a possible thing. Perhaps there is something you die?" The reply was I reviewee That and did not her wasting which I have not got, thought I, which, if I had, or was in the right condition, these old familiar faces, or some of them, might bene out of the ailcut air, or in some way manifest or reach me Some remembraness of formly love, that need not be mentioned now, but may be before this book is ended, had some effect upon the air, as some call it,-I did alone what I would have been subursed to have done in any company. I said to the circumanitient | concluded that Nasan Gibson might have been some person that I vacant air vacally, if there are any beings present who can hear me had mot there that I had forgotten, though it cosms she had not

(thinking then of my child, listile, and my sister), I wish you would be present whom my wife attends any of these sittings, and will you send mos messages and resemboring I had had messages now and then, love-sending or renombrances which had no "I am sure," says Mr. Wetherhoo (and when he mays that convincing character to them, and what unyone could say, and not he means it), "there is a power, impulse, or force in mature not become of the way; so I said, send one take message, -which I then coordinated as yet by amonoe, or as something outside of the repeated. I will not repeat here the message I asked for, it was construed lumoronary, and in the connection seem frivoleus, for divide I in cases accounts to historic contraction. very pensive audortone, and on this subject whatever may be my manner, I am ut heart always serious.

It occurred to me, also, that spirits aught see and not hear, and aving a pen before mo, I wrote the message as well as speke it, and folded up the paper on which it was written and just it into my deak, where no one could see or get it. I certain and not refer any response. I did not eak for it with any falth. I do not know as if I ever would have thought of it again, except that the subject, in its connection with my wife, was often in my mind, and the trilling circumstance would, therefore, not have been forgotten. I. however, had the feeling that I would give all I had in the world of there had been any foundation of truth in this matter, which, how ever, did not seem to me at all probable or possible

I did not know, so I have already said, where my wife and gone What I in count drough , not lone alone in my library was known only to myself. Late in the accessor I accessist, and on my refuse at tea-time, the first time, my wife sam to me was: There is a message for you from Hastie," hand ng me a seath, redicting style of paper, the looking at me, all all ve with expectation, for she know, amiler any circumstances, the message would please no, as a definitely characteristic one, of or for me. I unrolled, read it, and found a long string of lotters and divided into words, out it was the memore exactly, when divided off into words, that I had asked for a few house before.

The sittent at Mrs. Bayden's in thus described :-

These ladies, when they reached the medium - more a Hayward-place, found there the lady, and mates was the and come for, and were invited to all down at the table mod for the purpose of spirit communications, the modium sitting at it also. The slater held the pencil, -also had been requested to by my wife before enteriors, to see if it made may difference. Hape were at once board, the spirits answering you and no to questions. Some the alphabet was used, and as the letter wanted was reached a rap was beard, and thus some singular but very tene measures were given intelligently in this way, but they need not be recorded here. After a utile while the letters of a message read : " Hartes is here," My wife mid : "I am glad you have come; have you anything to say Mr. Wetherbee know nothing of all this, and this makes to your father ! "-and three raps insected " Yes." The alphabet was then used, and the letters noted down as the raps sign that the also one and, when finished, it was a string of lectors, as I have said, not divided into words, but which were easily read, particularly by my wife, who now that it was somewhat characcere a new armer a would please up and perhaps be a test. She the me know are she had, it more and given it to me, and I had tole on the sens than I have asked the spirits to send the soresing and the string of letters written down in that way, -the other wanted being rapped at when it was reached, -and in their whole ness was in message I liad toked for in the manner stated.

Mr. Wetherboowsa, naturally impressed by the experience, and under the assumed mune of Johnson went off to see what he could get for himself. He thus narrates what took place . -

I came to the same more owner under the amunied mann of Johnson, and hearing the raps was told they were the spiri a and that I could sak thum any questions. I began by asking the investige if they knew me, and the roply being "Yes," I said name " and the answer was, "John Wotherboo," I was both surprised and interested, for, as I have said, I was entirely anknown to the medium, and though she sat very near the table, I could see she did not touch it, and if she bad, under all the streamstances, it would have made no difference. I then asked a "Will you tall me who you are?" And the mps spelled the name of "Steam Gilson.

I was expect up a would have been Adeline. Ha to be more other bear spire and I ad not know any Special spleads and aboung to bring der a mind, among over que cons. I said. We obtailed visited it a great deal. I then asked : "When do you are the the apply was: "About nine years ago," This was inferestin , for my mater was living there, lad been married a year or more before that time. My unmarried sister was a guest of here much me, and I began to dwell on it in my imagination, ... build easilor in of the time, and for the year or two prior to the nine years mentioned by the spirit I was there near half of my time, and so I forgotton me. I then asked the spirit : "Do you know my sister" The reply was "Yes." "What is her name?" And the letters in

<sup>&</sup>quot;Handows." John Welberhop. Calley and Mich. St. 64, 1885. Lundon: The Psychological Press, 14, Course-sepost, Churing Gross, W.G.

to myself, she is mistaken; it is going to be Eliza or Elizabeth, and have no slater by that name. I said nothing, and the next letter was an O, then a T, and the rapping stopped. At first, I did and recognise it, but as quickly as I saw it read, Eliot, then I may it was my sister's name, Elliott. The spirit had spelled the name in the panal way, but our Elliotte spelled it with two fie and two fie, And in the diminished form I at first did not recognise it. It was for better in the way manifested, for it showed the aparit was not get, no i from his wond. I seen saw this that was the name of my living shiter; but I wanted the name of my dead one, or who was now a spirit, and the reply was "Adeline," which was correct

Speaking of this to my stater in Providence, I found her no better off than I was, she could remember no Suma Gibson smong ber acquainfances, but in the early part of her married life -a ten or eleven years before this interview—also had a domestic "rong with her by the name of Sonon it might have been Sonan Gibson, | but also did not know whether it was or not. As the communication was so correct, even free from any minul-reading, it seems to me reasonable to suppose it was the Susan that was the domestic Imagine the situation, and see how natural it is, on that basis. She was the family servent of Mrs. Elliott, my dister visiting her whose name was Adeline, and I was often there. I asked her, an a spirit, for my statur's name. I was thinking of Adoline, who was 6 spirit, but the spirit of the dom wite said " Elint," speaking of her mistress by the name she was known, and then of Adeline, as rhe would have been known in that boundhold.

It seems to me that this case is good and sufficient to earry the superstructure that Mr. Watherbee built upon it. It made a Spiritualist of hun, and he has remained one ever sines.

Our author was entimately acquainted with my friend Epea Sargent, and has some good narret, was of experiences with him Rord is one with the medium Colchester, a pame well-known in the caract of a of 8 cm a six

We were scutoff around a table at the pleasant home of Daniel Parrar, of Hancock-street, Hoston, The inblowest about four feet by two, square. There were six persons making this circle, consisting of Mr. and Mrs. Factor, Mrs. Wetherline, Epen Sorgent, myself, and Colchestor, -two on each of the long sides, and suc each on the ends. I had an end seal, and the back of my chair weagainst the bureau that was on the side of the room, and Sargent was my pirel-cit. We were having a very satisfactory time, with a variety of manifestations, and the circle was a remarkably good

Colchester said to me: "Take a few of those plain white cards. (they were on the take (or the purpose) " and just them in one of the drawers back of you, marking them first so as to know them amount I did so, cutting a crooked place out of the corner of each any strong them for the purpose. There were als in number of the stead soketh or a the drawer to a take a hand ful of those engone," said be, " and throw them in, and shut the "It may be well to say that the disposer was quite to the white, folded cotton materials, having no spare room, so that the cards and war is were a tolera its come marks a

We proceeded then with the manifestations as before, and in perhaps about half an hour, in which we had other santisetations, Mr. Colebester said to me : "Botter now open the drawer, and see how the cards look." I get up, and laid to, as before, in order by more my clique to us to open the east and sed, in which were since the aix cients while carets are fourse a return architer; ) drawn on each of those, -tlowers, fruit, landscapes, and a Arand the colours used in the pictures thus drawn were near against the crayons or pencils that were put in the hurens drawer. There crayons that we left on the table were not on present in the rec a re-I hardly need to say that this was done in a brightly lighted room, and nationly had any access to the drawer, and could not if they had derived to, as I was sitting so closely to it, and had to move my chair before I could open it.

One more piece of evidence—this time bearing on the question of spirit-identity—is all that space permits. J S Threaler, a close friend of Mr Wetherboo's, was known to him, and jokingly addressed in correspondence as "the Sage of Philosopher " He was a man of wide experience, and had been for many years on the staff of the New York Heroid, when be | adve as of the cetter to take Wetherber. This is important to a full approcession of the evidence

Mr Welherbee had gone (in the year 1891) to Miss Shel- It is sure to be welcomed in America. hamor's bome untals, and after receiving some messages from [

reply rapped out were, E. f., I. Noticing them then, I thought other spirits, there occurred what I will again allow Mr. Wetherbee to relate in his own way

The control afterwards and address up me. There is a state who contest to you also wanter the recognised the unit of any or and the age of any or who are the second off and make to inche age of any or who are the second off and make the second off and make the second of any or and the second of any or any or an area. off and many to nelle age I and Vice to we've to he name " Hwill see if I can get R," said the central; and after some heritation said something that sounded like Prasher, and John or James; but as I knew no James, and no Frasher, I said "Cannot some of my spirit friends tell me his name?

The spirit said he had tried hard to manifest, and had promised one that he would, and the control mid he seemed disappointed and porsevering. I said : "Toll the spirit to come to the Barner circle, and try to manifest there "; and the control said he would if he could. A little while after this, "Lotela" controlled the medium. is an indian upitit of a lively turn of mind, and abe said

We, herber et hat spirit that knows you is here still, and wants to be er green I said I wanted the recognition as much as he at annu was sorry was a new him when mer marge methers might miss out and some with a b I, "the "Sagn of Galveston, in I tend This ie. He is use months ago, and promised to manifest to me when he went use if

The spirit was delighted to be thus recognised, and late more so, -for it was so impossible for our arquaintance to have been known by the medium, and the cognomer of "Sage" was whelly con a mount a new termate. This was an extremely interesting pflant to not out the cuttons was the mercage man came from him alter a fer at the Jones o rele

I would be come I do no go of on have not be we was intained it will be a more a to see a more a set of a see and not be seen to district to post set me and not be every to the and there eaf of was a on he on the sec sec and but the private on the cir know Mr. To good or of ou chees correspondential relations, and I do not believe a management world knows that he was in the habit of addressing me as Wy Dear Philosopher," and that makes it a test. He refers to me, as will be seen by his message, as his friend and philosopher, and I can show ever two hundred lutters from him, beginners, Ma-Dear Philosopher," preserving to me as his philosopher and friend, which is a feature in that momage. The general contents, also, are such as to be unmistakably his to anyone who know the ferror of so interest see Above and beyond this interest evidence of what I shall hereafter say of his message which frees the commun. ention from any suspicion of mind-reading on the part of the spirit that would have made him, pomibly, an olica.

Oh, how my heart died within me when he closed the recourge You may say it is from J. S. Thrasher, of Galveston, Texas, to his phomopher friend Jone Wetherhor, of Boston," broke my heart. Everything also was perfect. I don't know that I would have given to have had that spokus an I, in giving his name, instead of a J. I falt and know it came from my Galverton (cloud, but why spirits so often get twisted on some triffs that the wan bimself navor would mintake if he were in the form, but a spirit often does, is one of the unaccountables.

There was no mintak og the message and the direturatances as being from any friend, the "Sage," but the J coming, instead of an I, led me into a careful investigation, and I spent three evenings carefully reading his letters, and, to my great joy, I found two of them out of the lot signed with a J. That settled all the other I'v to be J's, and in one letter, where he was quoting something of mine, and putting his own version also, he put at the end of muse as author, J. W., and at the end of his J. S. T. Before I had discovered the fact, I wrote South to a friend for information, and have received a reply that his mittal letter was J., as his friend writes me in reply to mine, that his name was John S. Thrusber So it seems the spirit was right, and I was wrong. If, on the evening that I spent at Miss Shelbamer's circle, I had known this that his initial letter was a J-I would probably have made my connection with him more readily, and when the spirit was saying John and James, and approximating to a Thresher by saying Franker, I would not have had to wait for the "Sago" suggestion

sloce I recognised him; but in the out it was all for the best. There is much is this volume of the highest interest to He rejoined by beginning his letter, "My Dear Sparitualists, careful marratures such as I have quoted, wise reflections quantily phressed, hits of philosopheral ponduring and speculation very provocative of thought. The contents of passed on to the next state. A large correspondence had taken the book are of varied, and perhaps upoqual value , but absent place between these two friends. " He signed his name on he every tasts will find cornething of fact, philosophy, or exhortstwo or three hundred letters as I. S. Thrasher." The I was then to eatisfy it. Its highest recommendation is, to my sund, unisistakable, quite identical with that which represented the the transparent sincosity of the author, and his even garretous propers of the first person, quite different from the J in the explanation of his own mental states, and of the effect made upon him at various times by the phenomena which he witnessed. I trust the book may be widely read in this country.

" M.A. (Oxox.)"

### THE SPIRITUAL OUTLOOK XXXXI

July 18, 2685 1

will forward us, for use in this column, any allusiems to Sparitantism. have ceased, or how can it have ceased? Our parsons' ensurers. and Psychical Research they may come across in the course of their | tions will not alter God's laws." reading. We see a great many of these ourselves, but it is obvious that there must be many references to the subject which do not meet our eyes. -- En, or - Light -)

The 1Fhitchall Recess for July 2nd, quotes in its entirety the article from our columns, " on the recovery of lost property by spirit agency," and the "intelligent" criticisms of the editor of that journal will be read by the readers of "Leant" with much

He mys "We have so often described miracles of this kind that we do not now purpose going into the conjuring tricks, which would readily account for such remarkable phenomena. All we wish to my is, that we are very suspenses about this slate burn nom. We cannot, try as we will, make out what connection there is between a shite, a slate pencil, and an inhabitant of the unseen world. We should like to have the adventures of the Irish halfpromy carried on by a frying-yen rather than with a shale. When the spirits can do with a frying-pan or a tour rack what they can do with a slate, we shall then believe in thom. Until then, however, we shall be irroverent enough to consider Spiritualism to be a modern word for humbug. May we suggest-upon the hypothesis that our supertinent want of fash is erroneous and unwarranted-that the authorities at Scotland Yard should ongage a few Spiritualistic mediums as

When this brilliant editor's doubts have been asterfied by the employment of countless frying-pass, and the sensible suggestion has taken root among all classes of Speritualists, I shall watch with interest all that may be said by the sceptical world of the " latest crase" of a boliever. We are in lebted to the Prove for much, but we have special resson to be proud that the editor of " a journal of politica, literature, art, and counmy parsuits," circulating, we presume, among the educated classes, should have the inventive genus to suggest the use of frying-pane instead of the ordinary writing-paper of commerce

Since writing the above another issue of the Whitchell Rethe appreared, and "One Who Knows the Truth" writes as follows to the editor. "I have just soon a copy of a recent seems of your paper, and I much regret to find that you snoer, on an ignorant way, over the wonderful gifts that Mr Eglinton has received from his Maker. I my 'ignorant' advisedly, because you have no right to meer at anything that you know only by hearmy. Now I who write to you went to see Mr. Eglinton by appointment. I took with me my mother, my sister-in-law, and my wife. I bought two new single alates at a shop, and my sister bought a double siste. We four set in Mr. Eginton's drawing-room to full daylight, a common deal table before us, with no cloth on it. I wrote a question on one of the slates, and then featened the two slates together face to face with a poses of string, petting maids a tiny piece of alato-penoll. Hr. Egitaton held the siste just under the flap of the table, in my full view. In about thirty seconds I heard-so did my friends -the gentle acratching of a slate-pencil, and then it cased. I united the slates very carefully, and there caw an answer written under my question, and the tiny point of pencil remaining at the last line of the last word. The same thing occurred with my sister, and her own double slate. She had an answer that the person she cought to find in the spheres could not be found at once, but that the intelligence or spirit would seak for him. Then came attest that would have satisfied even you. I isahed the two sixtes as before together, having previously cleaned the tlates, and saked another question, and put in the mass cramb of pencil. Mr. Eglinton then held the slate high up over the table with one hand, and my ninter held the other end. Longer time was taken now before an answer came, and Mr. Eglinton seemed ratch distressed. In about two mirutes the pencil began writing, and, as before, anddenly stopped. I opened the shates and there was a distinct answer to my question, written an closed and teed shates, held in the sir by my mater as well as Mr. Eginton. There has been, and will be, plenty of humbug in the Spiritualactic phenomena, but that does not the least affect the facts, absolute facts, such as I have just roughly had secure at the facts, absolute facts, much as I have just roughly had secure at the marvallom, wat most simula, acts of they may be.—Racatal. your paper to encur at the marvallous, yet most simple, acts of they may be. - RAGARE.

communion hat are da'y occurring between the spirit works and our own. The Bible is one long has my of the comme more [We shall exteem it a favour on the part of our renders if they between the heavens and the hells and earth. Way should the

> The Electricus Agnostic "Saladin" does not meet my challenge fairly, according to my notion of the fitness of things. Probably he may be better engaged in fighting Mr. Bradlaugh. He, like Mr. Huxley, Mr Tyndall, Dr. Carpenter, and other illustrions usen, is committed to pertain opinions which it might to troublesome to change. Mr. Bredlaugh ran an awful risk when bount on the contenttes of the Disloctical Society Of comme, I do not expect any free and accepted Agnustic to risit Mr. Eglinton.

I observe that a "prophette conference" has been held in Exeter Hall, to compare notes as to the proximity of the Second Advent. Are apiritual manifestations fulfilling the prophecies? Is the Salvation Army a sign as well as a wonder ! Are the parthquakes in divers places" to be spiritual or material i

"Tremendous woos," the Rev. M. Baxter says, "must seen come upon the world which at present is alumboring and heedless of the bomb-shell that in a few years is to burst a se-But we are always having tremendous wees-the Soudan desaters, for example, or the cholors now reging in Spain, or the dynamite explosions.

On the other hand, The Chemien publishes a sermon by Rov. H. J Camble, Upper Clapton, who doubts if mirneles are frequent, necessary, or even useful. There is not a trace of miraches in the 2,500 years of the Patriarchs. Mr. Gamble holds that numcles began with Meson and ended with the Apostles. In the present day they are not needed.

No not needed, and here comes the reason way. The greatest pretouder to mimoulous power late bosts for Charch of home and the evidence for many of its mirades is apparently as strong as that adduced by faith-healers. In the Laucet of June 21st, 1885, Dr. Buchaman, Professor of Climical Surgery at Glasgow University, writes thus "I have no doubt that some of the parsons who went (to the Grotte of Laurdes) lame and emppled were restored to the use of their limbs, and were relieved of pains and aches." And Dr. Buchanan goes on to give an account of some of his own ourse, which he considers quite as remarkable as either the Roman Catholic miracles or those of the faith-hadors.

The Roy. Mr. Camble's conclusion is that "The apparnatural is around and about no. Not all the rationalism or sceptions of the ago, not the elect and penetrating light which science pours on every wonder not the descreen of ures that have been palmed on the creduious, can effectually dispose of all the marvels which are recorded, and to which testimony that has not been shaken is borne. There are dresus, and visions, and magnetic forces centring in certain individuals, enabling them to perform wonderful things, and there is oridence for all this, so perfectly trustworthy that we are constrained to admit that there are more things in the world than our philosophy draums of, experience verifies, or reason confirme." 4 4

But why not say, in so many plain words, that the facts of Spiritualism are beyond denial?

The doctrine of re-incarnation is not commonly recoved in Eng and our on the United States, where Mr. desto Shepherd nake the appear on offerto be extend it, and we are informed that it is a tenant, The people speaking the Latin diale a, once of France Spain Portugal, Ital Region South America, and Mexica, all accept it. We be explicitly attended extrengitions the bases for the social reforms to which Spiritual tonds.—Le Spiritual

### STATUVOLENCE -1

### By WILLIAM HARRE PAUNESSOCK, M D

The term Statzvolence is derived from two Laun words, viz., status, a state or condition, and role, will-meaning as long as they please, or as it may be necessary to effect thereby a state or condition, owned by the will of the patient and not by that of the "magnetizer" or oporator This posed, and cast it off at piensure. This fact proves that we condition is identical with natural someambalism, differing may, and often do, create the illa that afflict us, ever in our note in being induced with the consent or will of the matura condition. What stronger proof than its demonjut at . Meaner apposed this state to be caused by a mix magne was and to se mader his water when the luminost the goddike power to feel or not, or cure himself power was wholly in the patient, and the curve was a independent of anyone? We would, therefore, say to all have been effected by it were samply the result of faith, or educate the young in the art of Statuvolence, and the a belief, upon the part of the patient, that certain effects, follow of the past, as well as of the present, will disappear would follow the manipulations used, or the laying on it as the ranng generations shall embrace the truth, and beh nos proct sed

It is high time that the truth in regard to effecting cures was qualeratood by the public. But before it will be possible for Statuvolence to effect a general relief of human structions assure go in are those which will tend to suffering the 1 he reconstructo abundon the idea of an quiet the nerves and relax the muscular system wome magnetic is doesire," for that prevents the study of facts, which would demonstrate its folly. Man, although calculated to excite the mind the latter, by relaxing

or other things, by rabbing or handling, and, being able to the production of the state. peculiar in every person, enables spirits to approach those ... After having been comfortably sented, the patient who are near it as well as if the medium were present, should be directed to close the eyes at once, and not to If, therefore, the persons to whom such paper is sent are open them until requested to do so. Closing the eyes charvoyant they can see the spirits thus attracted by it, is important, as it prevents visibility and externaand if diseased, and have faith in it, may be relieved, but in objects from attracting attention, and the request not no case scall they be so, or well one care be effected, if to open them is designed to prevent him uniking the they have no faith in the healing qualities of the paper or attempt, which will bring the mind back to the surroundof the spirits. Indeed, all cures are the result of faith, ing objects, and thus disturb any progress that may have or of a condition of Statespolenos, induced by that bolics, been made. After closing the eyes, the patient should be or other causes which are possible, among which are ex- directed to cast his mind to some familiar place, just as citements of all kinds, whether of a religious nature, if he were really there, and in thought to place himself

or of fright, four, hope, joy, grief, or a behef and in the power of men or spirits, &c. A study and experience of over forty years has proved this to be truebut it we take time for the masses to readed that Statuvolence, or educated communitations, has developed facts as [The Editor of "Leaux" degree it to be distinctly extraordinary as they are useful, and consists of powers, which to be perfectly understood, we have been obliged to compound into one word, namely, elementalistics, or the ability to see, hear, trate, sinch, or feel independently of the external source, or by the mind or internal faculties, which demonstrated these truths to thousands, as the future, no - doubt, will to all-that those persons who have been properly taught can throw their body, or any part of 11, andependent of the rest, into or out of the condition in on cinatant, and when the body, or any part of it, is in this state it can be rendered entaloptic or machable to pain by an not of the patients will, and the parts can be kept in that state the cure. They can also create pain in any part if so disstration do we need to verify the fact that man has within come masters of themselves a

CARWELL IN " Forth.

Astraces. -The American Spiritualists have a problem to soive here. The journals of the United States contain reports of the examination before a local court at Kanasa City, Missourt, of Mr J H. Mott, a medium, on the charge of frend, brought by a man who, to prove that he was right in mying toot a we ended meterialised spirit was the medium singuised, equates a consured hiptor upon it, which colour was subrequiredly found upon the medium. As to Mr. J. H. Matt. genuius mediumship, testimony was given by Judgo Ess, Ex Mayor Chase, Ex-Sheriff Anderson, Dr. Thorne, and others, whose tostanony no one could dispute. They ewore that they had seen at the defendant's stances forms of their deceased reintives, who had proved thour identity by their conversation , that they had seen the medium while they so talked with them. The proceedings drow great srowds, and the reports were telegraphed to the great newspapers, and have been copied by nearly every journal in the States. All this shows that the interest in Spiritualita is increasing in America.-Le Meseger

# THE HARMONY OF SPIRITUALISM AND SCIENCE

# BY ALPRED RUSSEL WALLACE, LL.D.

I find some difficulty in comprehending the exact position of Mr. Frederick P. Cook in his elaborate to see what such person may be doing, at the same "Rejoinder" to my article, but with your permusion I will briefly notice his direct criticisms of my views, because they the Whon the patient tires of one thing or place have a certain amount of plausibility ewing to the extremely

Mr. Cook first objects to my proposition that... " man This shows that if they do not enter the state at the first mind in the abstract or as a fundamental principle, while in the former I am dealing with mind at individualised in Is ag in the condition does not prevent patients from the kuman form. There is, I conceive, no contradiction in

Neither the one nor the other, but, mortality is the mount

His next serious objection is to my supposition that It may well be that evolution is a fundamental law of the universe of mind as well as that of matter." Thu, he says, is a purely materialistic thought. But here again it is clear by the context that I am referring solely to the development Teach the young Statuendance, if you would render posterity of individualmed barren minds, of which above we know, or can know, anything, not to mind in the abstract, of which we know absolutely nothing; and I see no materialism in the supposition that such finite individualised minds can only be produced under some law of evolution

The last special criticism refers to my belief that spiritual world" is dependent on the cultivation of our higher moral faelings here. My critic says that this is an after ema, of justice or equality, because our moral nature, the of " From Tribane," hate which it admits correspondence were as our environment, is imposed upon us , but he us Spiritum. This speaks well for Spanish liberalines at does not my whether he accepts the alternative position, that all are to be at once good and happy in the future state, and that the most selfish, victors, and sensual are to make equal progress with the benevelent, self-merificing, and virtuous. It seems to me that this latter condition of things would be the most opposed to justice, and even to soules down to the sorth ferming the only messa by which the possibility, and would render the present world, with all its stoy is emulied to scent his master's feetateja, sud so, because triols, a hopeless and implable mystery, while it is certainly his master's cant has been involuntarily charged with it, the opposed to the whole body of information and teaching

It seems to me that my critic, throughout, confuses ogether the general with the special, the universal with the individual, in discussing the relations of spirit and matter, while he equally confounds proximate with ultimate results in his remarks on the spiritual world. My observations and rensonings have been confined throughout to the nature and relations of individualised human meads and their proxi more on street in the spirit world. Speculations on the stare or man of mind in general as well as those on the r more states to water human minds may attain in the min to future I out upon as Stoget or beyond the range of on for other case to be therefore atterly untrastworthy and

The Special office cours to decide special care to the defence I med my an to the sea means for my cetting can be made assaults of encuries of the cause considering that he progress of Sp scaalism orporeds upon measurablely and that every glow amed at mediums is an attack upon the cause

Ticite," says Mr. Martland, "a few of the estimalictions we age of the East point both to the same light which will no ment believe that if Christ was not high of Joseph and Mary Ho the minds of the next generation of our children a could not have been of the house of David," Now Roman

> However, so to this there is nothing for or against it in the letter of the Genpels although the tradition roots on the more authority as the authenticity of the Gurpula thouselves, viz., , the nativerity of the Catholic Church. But very different as Mr. Maithaul's next assertion, vis., "That we must believe that Jesus dal go down into Egypt, His parents having fied thather on the night following the visit of the Mugi, and also that He did not go into Egypt, but remained where He was born, to be circumcised the eighth day, and after forty days to accompany His mother to Jerusalem." New, sir, permit see to my that any the same and the same a monet a creed like this with the witness with present of our such about him pass were and such making a service.

We containly do believe that Jasim writ to Egypt after the departure of the Magi, although it need not have been the night offer anastly. St. Matthew simply says, "When they were At the suns time, we believe then he could by St. Lake, viz., the Circus and and by then you ...... orno-initially took place before the visit of the was not The skepkerds of Bethlehens were sent to the a performed to balo sympted in swaddling clother," that food satisfies hanger, and the like. These facts and more of a Ma \* v alled to the "home" where the " young

The Arabian astrologers "saw His star in the East"; they knew that a wonderful Child -a mighty One-was born, and they with many a to smooth Him. The journey alone would firsty core rescue if they came from a come-at-able part of trabia materal of from Pennis or India-as some think they did The " young Child " visited by the Magi is always represented us a child able to stretch out its hamls for their gifts, so there was sample time to be presented in the Temple at Jerusalem before the manages of innocents began. Moreover, the children slain were aged up to face gence. The two Evangelists simply relate different events in the life of Jorne. Bt. Luke mys nothing of the flight into Egypt or the cause of it, but states someomorely, they give us or no some whatever "a life of that the Child "grew up at Nasareth," which is quite consistent with His having visited Egypt. Take a London boy of twelve . What, under such conditions, can we know or divine of the world it not be quite consistent to my that the child graw up in London, even if he had persed a year of his babyhood in Paris !

I cannot perceive either "discrepancy" or contradiction in the statements of the two Evangelists, so that if there is any As for my own personality, I doubt much whether it will be confusion in Mr. Madland's mind so to the going or not going an historical "fact" eighteen conturies hence, that I lived at all, into Egypt, it is produced by those wise men of the West, who much loss that I was "President of the Hermetic Society." If have enlightened the last helf-century, rather than by Matthew

Then Mr Muitland fancies that St. Luke contradicts him Chillord, of Joan of Are, of Marie Stuart, and of every other self with regard to the Ascession-in his Gospel and in his hatory of the Acts. Now, there is not a word about time m a roady, I am aware that many approved "facts" which me, the last chapter of St. Luke, except that the disciples having note Jeans, Who ramshed from their night, returned that more and I have observed a similar state of though in respect of hour to Jerusalem, and when they were talking on this mysterious subject Jesse again stood in the milet of them. But what time slapsed between their return to Jerusalem and the time when they were " thus speaking " St. Lake deponeth not in his Gospel although he does in his history of the Acts of the Six, I am in after headlerment at Mr Martinid's ex. Apastles. And with regard to the alleged discrepancy in his an pleas of "discrepancies" in the Grapala, so perhaps you will manner of Judas doubt, it is a merely rectal one. Bt. Matthew a way to keep a few weeks on a subject on the first place tells us that he three down that the typ process of after at the to remark that there is no need for Mr. Wanthand to deem min. Tempte and went as he got he used. Then the cheef practs sel may ted secure Dr W o is unconfitour coon, it is nicely took the silver pieces and bought the field to bury strangers in, thussed "assertions" of "discrepancy" with a "flat contradition." as it was not lawful to cost the price of blood into the treasury. Why, in the minic of Wonder about a Christian not emort his. St. Luke in the Acts, mys, "This man purchased a field with perso by " factly control sound an armen host at the risk of our the reward of integerty, and falling headlong," &c., &c., but the life, If nocessay, like some the tran Knight of old ! Dr comstruction of the reras in the original Greek might just as well Wyld is not bound, more than myself, to accept to guides the oc-removes. "With the reward of iniquity, to this man a field " best army of compotent and candid scholars, who have was purchased, "&c., &c., and the manner of death recorded by manuel the last half cer my by scarching for "the the two Brangelists might easily have been coincident, ere some or in he spets, a prefer once to the animately seeing that such an oront happened in the neigh sour asset

results ascrebed to Junas. As for the nat sanding size ones, that Immediately followed in North America, and Afghanutan Christ a 'mother justing His 'brethren' in attempting to with respectively, and regard to also paid to the position of the uras II on from a public cursor on the ground of madness," why luminaries and the planets an the places referred to at the thes not Mr Maithand give us his authority in chapter and verse? Unit, the poculiarity is certainly striking, not to mention the Sarely he cannot expect such startling information to be recent conjunction of the sun and Saturn, and the papers they accepted merely on the "face dirit" which he hamself condumns ! formed with Uranus, taken in connection with the collecty But I may not take up your raluable space by parating natters explosions, carthquakes, &c., of three weeks ago.

Surely the matter should be taken up, and, if even q , a further, as these alleged discrepancies have doubtless been answered over and over again. Must cortainly the New Tests. me a security of executation of our Lord. St. John be extracted for the benefit of humanity generally, instead of expressly states in figurative language that not a touth part is recorded, but enough as related to set before us the high and hely standard, the "Excelsion," the Hope and Comfort of so many palgrim souls. It is, therefore, very evident that people like Dr. Wyld and myself, who see testers in a different light from Mr Maitland, are quite prepared "flatly to contradict" these who ensist that the Evangelists contradict each other, and we see no remote why our "presumption" should be considered assummg, or, at least, more mauring than the presumption on the other side. Neither ought Mr Maitland to call to "flippant, superficial, and insincere," without any proof worth mention mg. Even if Dr. Wyld, like myself, had the humility to acknowledge that he was no profound Biblical acholar, we should at the same time consider the above terms equally applicable to Mr Marthard, or even to the candid and competent modern sages wheat he so much admires.

April 10th, 1885.

# THE GREAT TRUTH OF SPIRITUALISM

LIGHT.

To many the demonstration of the certainty of a future life seems to be the great achievement of Spiritualism , and it is surely no small one. To establish as a known fact, what to the great body of philosophic thunkers in all times has been at best but an uncertain probability, is an immense acquisition in the field of human knowledge. It is one so great that it is so wonder that multitudes of men, and especially those accustomed to depend on the results of speculature legarry quite as much as those who have rectived all their beliefs traditionally, should start back at so bold a claim, and refuse to concede it. This must for a time be pardoned to them, so long as they can plead imperfect religion, as they will long continue to do. acquaintance with the full nature and measure of the proof yet only for a time, for the evidence when all seen lacks nothing of power to carry conviction. The doctrine of a pr theology and philosophy most of them-u at not notice future life new stands as truly on a " scientific sess ins any of the doctrines of natural science, and only awaits, as one by one these have awaited, the slow defeat and return ment of prejudice.

And yet, when one reflects, the demonstration of the have fact of a future life, apart from all a formation respecting its nature, conditions, and connection with this ate would be a piece of knowledge of little value. Wheren could it help me? How ments, guide, or comfort us? Merety to know that a life of some sort awarts us. one on who per ape the present as no owner ground in which (as some confused dreamers seem to have imagined) to this by the most absolute and indissoluble connection of our very personales might inappear, and which would, therefore, be no life to us,-of what are would this be !

deceased spirits can return to us, make known their contraved individual existence, their emential identity of character, their unchanged affection for us and even their attests. guidance to some extent of our steps. These truths, so for as they can be proved such—and they would seem to be well mutained in the experience of many—are very precious and inspiring. They have much of the power of the grand old doctrine of a Divine Providence in all the events of our lives, without its terrible difficulties, its often appalling, staggering aspects, for we have to defend no claim on the part of the manatering angels, of their compotence, commeiones or any teaching, so long as it is uniformly and emphatically inminito perfection. To have oven the imperfect sympathy and guidance of those who, escentually like ourselves, have passed through our experiences into those which yet await us, and so would seem qualified to throw some light upon our way, and to send back some words of cheer and patience, this, if remonably verified to us, is no trivial thing. Yet even tare, in which maintudes have found unuperkable comfort is not the great truth of Spiritua sin.

We find this only when we come upon the certain and indissoluble connection of classacter here with destray hereafter. This is, for practical purposes, the most important principle that any religion can teach. Archigion or aphilosophy which does not employing it, whatever attractions it may possess, whatever consolutions it may bestow, is little clasthan a beguiling deceit. As a guide or incentive to right living, it is well nigh worthless. If it allows thus great principle to be set uside or even weakened by false theories, as, for instance, in respect to the nature of forgiveness, as is done by some conceptions of "the Christian acheme," it cripples itself sorely for all mefulness, nay, may make itself positively "the minister of sin." The Protestant sees this clearly enough in the old Rounah contrivances of indulgences, dispensations, penances and musses for the soul's repose, and denounces them for their immoral tendency. Not less clearly does the thoughtful man, unfettered by cocleanastical creeds, see the same in certain dogmas of vicarious sacrifice, of the also under consideration.

substitution of penalty or the satisfaction of Justice upor the innocent in place of the gunty, of impated six and imputed righteousness, and wonders not that the practice of the so-called "orthodox" should commonly fall so far below Christian ethical theories. Most of the world's religious, so far as they have been shaped by the caming of men, have introduct in their teachings the destrictive neresy, viz, some serious modification or evasion of the great, anchor geable, necessary, moral law, "Whatsoover a man soweth, that shall be also resp," and in so doing have paralysed much of their power. In offering this easy bribe for acceptance to millions of the weakly thinking they have one only demoralised them, but they have repelled in great numbers profounder muds from all the profered forms of

Not no Spiritualism. However obscure and unformed many of its exponents may have been-certainly untraner. able with what quammity, the world over, they have escaped this grand mustake? They have not vitrated this carchnal principle of all rational moral government-that character is the only basis of the awards of the life to come, the only parent of destiny-by any evasion or qualfication, latent or open, shrowd or shallow. How happens that I That these humble men and women, professing to be only the monthpieces of more exalted made in the world of and the large with plinost one necond in all parts of the co-illand world and in all its civilsod languages taught one continct, empiritent, aumodified view binding the next life character and destiny, as no religion known to them had done-is there not here a fact somewhat remarkable, one Evidently the lare fact of a life beyond the present one that calls for some adoquate explanation ! Does it not is not the great truth of Spiritualism. Nor is it that distinctly point to a source of their common sentiment on a above themselves, one which, however difficult it might be to verify in other ways, is by this alone strong y

This, then, we pronounce to be the Great Truth of Spiritualism. It is practically by fac its most valuable. No religion can contain one of more worth to mankind. It is one wine cores man, women and clear of national years can understand, and one which every day and hour of then lives they have occasion to remember. However it may be observed and practically denied by other forms of religious entented by those of the invitaworld, no one need ever ask, "What is the use of Spiritualism !"

And of all men, Spiritualists should be the last to discount the doctrine in their own practice.-Religio-Philosophical Journal.

The forces of case of serious as sentence may be useful for the bit of the abouting to continuously and greate unider what the spector contracts in a general trains a may be oba nel (2 as grave, auxilia e contenta qua la to a some who mire enteroporated by MA was as as as Spirit been a and proving that ap are wap-arabeens as our may be really under the direction of some unknown agent

On Thornton, January 25th, 1885, I was on a visit to a and Mrs. S. They were all quite ignorant of Spiritualion. The account of some of my experiences excited their curiosity, and an impromptu table idence was proposed. Knowing that sensonally I had no mediumship for enoung or gesting cape. I expected nothing but the usual maying at some able, however, after many time, considerable trong are given, menonger. Experience barries rengler me the such it is, some broods an atmosphere of suspice a loss some one to consciously it automatically present in the table I saked if raise could be fathy yet distinct raps. By and bye these came eleaver and withholding all names from publication. But Captain S. (now process, and answered with perfect intelligence, but never in Africa) would, I am sure, for the benefit of science, be happy or the centre of the table, which sound they most closely him. I will therefore supply his address to suyope asking me. rescondited. By this mount we bearned that Mrs. S. was an extraordinary interel medium. The whole company were intel excited by this success, and were maximus to give up every evening to the further investigation. Some notes I have by me, Monory, the with the rape, among other things, gave the Chloring message, " Religion true bates not a living woulthe morning at breakfast the convenition had turned in forgive nest-one of the company maintaining that it was theoretically good but prechanly importible.

njum the above message. One of the company noticed it made a verse, and we all tried to recollect where it was quoted from, spell, that he sees four toen who wan' to strangle hou. but unsuccessfully. I then told the company of the case in physician certifies that he is out of the minu, and arrangements (\* M.A. Oxon \*) "Spirit Identity," where a quotation given at lare being made to send him to the luminous asytum at lax helic.

a scance was afterwards curiously discovered as al by spirit direction, and I suggested that our sparits might likewise belo to. setting was held that night, as we all wont out, Captain S. and the son to investigate a materialization assure given in the town, the rest of us to a party

On Wednesday, 31st, Captain S., the son, and myself, went out to a public source in the town. In the meanwhile the rest of the company-all ladies being left to themselves, started a scarce on their own account to test whether the eags were not a trick that I or Captain S. was playing on their credulity.

To their surprise the raps came, not, as before, gentle and penceful, but load like hammerings, and not only on the table but on the floor and the walls. They spelt out: "Knowles spare room." (I think this was the name-my notes fail me as to it). They then could. Frightened, thinking this was some violent spirit haunting the spare bedroom, when we gentlemen arrived home late at right we found them all eagurly commitering if any one of their ampaintances had bette this same. We were appealed to, but none of us could recollect such a petton to estudiesterily account for his presence in that room. Just then one of the girls (one of the five mediums munot by the sperits), recollecting that the gas land been left horseng in the library (used by the family as a spare sitting-coose), slipped out I the rain without asying a word, to put it out. As she was a are, no. her eye fell on a book in the shelves bearing the title.

has when Poenis," Struck by the concidence of the mone, she trok down the book and opened it, imphanted, and there, comewhere in the muldle of the book, her eye fell spen as illustration, and at the foot of it the line, "Religion true lates not a living soul." The next day the other visitors and myself left.

For the benefit of Spiritualists I will add the sequel of those experiences. Convinced by each startling evidence of spirit presence, my relatives were for a month most eager in declaring their conversion to Spiritualism. But their " paster" and other well-meaning friends warned them to have nothing to do with Spiritualism, that it was a device of finbut and had been forbilden by the Bible. (N B. The "spirit" breathed in the menenges as to purper and forgiveness weight nothing with this close of thurkers. Such is only the "activizous" of Satab.) Two of the family were ardent admirers of Mesers, Moody and Scintive. The party there consisted (besides the heads of the Sankey are nake, heir advice on the subject, Mr. Sankey, family) of one non, three desighters, and two possess, I a dark doubtless with good intention, warned them solembly that no good came of it, and that from the experience of a certain friend of his he could my it led to insently.

Consequently they withdrew from their agreement, and all connection with Spiritualism. Captain S. has gone on to inrestigate and has convinced himself of its truth 'Mrs. S. hus been pather shaken in her belief by dericale of Catholic and High Church schools of thought.

According to the requirements of the editor I enclose the names and addresses of all the sitters, but under the abovegiven. To the surprise of all, the answer was given by three cmentioned circumstances the readers will readily excuse my recents londer than the drip of invisible dreps of water right on his return to answer anyone waking to communicate with

F W TREBURN, M.A. Westware No. N Devon July 3rd, 1886.

Opension (\*)- M. Sanvaget writes to the Recus Specife. m my diary, give me the result of each evening. On Friday, A short distance from my house at St. George's live the widow the 20th, some two or three new persons, very scaptical, were Robert, seventy-two, and her sen, thirty. Five years ago they present, and no mps, only tiltings, were obtained. On Nature complained to me about noises in their shode. I went and saw day, the 27th, our first company were by thousalves again and that it could not be introded upon from without. The new said raps were obtained. On Sunday, the 28th, we were again by that his bedelothes were matched off at night, kitchen utensils ourselves, and raps were obtained alternated with tiltings. Five sampled as if they were beaten, thrown about and broken, be: m of the company were named by the unseen agencies as medium - m more no pathing appeared to account for the notion. I tool tatic, and were advised to form a "Holy Society of Mediums, them than one insurfaceus were somet on caused by special and to sign that night an agreement between thousands to pray lead it is that the commended the long one of our encourse and to agaithst night an agreement between themselves to pay each us that the commendes the fage or of our encounter much and morning for one another, whereby their medianishing that wit amovers my have dequed them, or have been with by much helped. This was accordingly done. On Members, the "With the rains among other things, may the that the pures, &c. had ceased. # REVIEW

July 25, 1883.]

THE VIRGIN OF THE WORLD, of Hermon Mercurius Triamogestus, now first rendezed into Euglish, with Ramy, Introductions and Notes, by Dr. Anna Kingsford and Edward Mailland, nathora of "The Perfect Way." May be obtained from the Psychological Press, 16, Craven-street, Charing Gross. 10s. 6d.

The title of this work, which is produced under the auspices of the Hettnetic Society, in its reality applicable only to about pos-third of the ancient matter which it contains. The to appropriately ernament the volume manufer consists of five other Hermstic treatises, oin, Ascieptas. The Definitions of Asclepsos, Hermes to his non Tataes, Hermes to America, and short fragments reacted from various actross. These are truly kindred works, parts of one trhele, and our remarks may be taken as referring indifferently to any or all of Sirci

It would be unpossible, within the Emits of this notice, to give even a successful research of the multifarious contents of those renerkable productions, and the carious student who desires to dire into their anysteries must resort to the book itself for that the pure war was a little can give him. Suffice it to my that, Grounds Propus.—By all means send us the adversary cutting and be adversary and a sufficient surveys usuful reforming to a handled house. Such exceess are given usuful the the court die externa section it is generally controlled threes the work compathin for each that here in a through the worte a context means of This will be a necessary to the he olin sepher to who every sutward being, set and system a significant of litter entity of and an rise of ore whether the claim has or has not been made in any particular matanco-if the hasis be a true ope, it may be held to be pertified. The weeks under review, then (great as may be their sterest, regarded as expositious of a phase of ancient and to scientisic and motophysic teaching), will be more decily at preciated by many, se voiling, under those external forms, an occult doctrino concerning the genesis, furtures, and destiny of the soul, under the title of a Virgin

Those treatmes are generally supposed to have been the product of that remarkable period of spiritual and intellectual activity which formeed steel at Alexandria in the curior con tures of our era. Though attributed to the mythic Hermita Tristac-arise their actions of a markinson, but whatever elements of the thought of the time they may contain, there appears to be a strong infusion of the primitive religious and philosophic teaching of that earlier Egypt which was then become ing embalmed by a memorified form. The thought and the dimenlogy are those of the science and metaphysics of a lonput age, assections crude in conception, and elementary or form embodying certain broad generalizations of truth, rather than minutely accurate presentations of St, of which that age was incepable. Equally elementary and general, then, must be the mystic meuting into which the instructed reader would

Some there are in those days of the opening of the spiritual phologophy and the secret ecience of other times and other peoples, of almost forgotten dates, to the pase of the Western world, who, moved by a very natural reaction from the forward rush of modern thought, are in danger of attaching too exclusive a value to the teachings of entiquity, and who, felling on their knows to worship its wisdom, close their ears to the voices of their own age. This reaction is inevitable, and presupts a profound searching into the lore of the past on the part of its enthusiastic votarios. While this is likely, in its way, to be productive of much general good, the wise will over strive to

The action of a man's mind is not always essential in the
preserve a just equipose in their judgments, remaindering that
the second of the many voice in the world, and none of them is called faith, always essential on the part of the patient. Once, productive of much general good, the wise will over strive to there be many voices in the world, and none of them m without understanding," and, like the bee, will, with skilful after lecturing at Waltham, Mars., circumstances required that discrimination, suck hency from every wholesome flower. In I should also by the side of the father of my hosters, Mrs. I should also by the side of the father of my hosters, Mrs. I should also by the side of the father of my hosters, Mrs. I should also by the side of the father of my hosters, Mrs. I should also by the side of the father of my hosters, Mrs. I should also by the side of the father of my hosters, Mrs. the present work, as its most others of its class, the thoughtful student will often be delighted to detect, and things that are crude and charlete, many evidences of deep finites of meight, one that her father was quite well, and folt granula to use for genes of wisdom, which he will levingly persue and carefully his core. I did not understand. She they and that he came that he will realize that over all there reigns an downstains early, after my being his hoddellow, and and that nterms seriousness, a devout reverence, a noble dignity of thought and expression, well fitted to reprove and correct the cynical indifference, the concest, and the forward disrespect and that he got well from that time, and kept so. Any action are outirely wholesome, treating, as they do, upon matters of of the matter is this, that my arm was controlled by a spirit, the greatest pith and significance, in a spirit of love and and that the invalid was cared by a spirit a magnetian blending the greatest pith and significance, in a spare of love and and are the first my own, and transmitted through my physical system, wisdom, whose daughter is Peace, and our thanks are due to Certamly there was no action of will on my part, any more both the translators and the enterprising publisher for enabling than any notion of faith on his for he would have get away the Engink reading public for the first time to perme in our from the pressings of my abow if he could —Professor own tonesse these rure legacies from the Old World.

CAPWELL, Falk

As to the execution of the work, nothing but praise is to be accorded to all who have been engaged a un publication. The style of the translation is admirable and this affords some guarantee that the rendering from the intermediate French original is faithful. The three introductory essays also are chuscely written and are very instructive, and the typography of the book is most pleasant to read. One improvement there might have been-and, if a second edition should be called for, we hope it will be made-by formaling a complete explanation of the fifteen excellently engraved symbolic illustrations which

# THE SPIRITUAL OUTLOOK

MAXMI

I'We shall esteem it a favour on the part of our readers if they well forward us, for two in this column, any allusious to Spiritualism and P-yehlerd Research they may come across in the course of their reading. We see a great many of those earnedres, but it is obvious

The Whitchair Review is doing good work for us, and for it salf, no doubt, in giving close accounts of psychographic manafestations with Mr. Eglinton, Forexample, a gentleman writes due he wont with his mother and sister to Mr. Egiluton with heir own states, thoroughly secured and held by themselves. trick-no fruid-was cossible, and they got entirely entire Incincy wricten communications from their spirit friends, Such facts, in respect to Mr Eglinton alone, can now be proven by hongireds of witnesses. Better, for some, than that any one can have the oralence of his own senses.

Mr. Wallace, the authenlist, pasts the author very clearly. He says that in fact in matter has any better evidence than spirit manifestations - that is, that under favouring a root are a A own forces, guided by involligence, produce sensible, audible, vuible manifestations. That the intelligence gooding the force is was to be welknow. This is to some our friend or near relation, was well proven as such a fact can be.

The Ohio lawyer, Mr. Beste, counsel for Mr. Mott, a medium which is not affected by any of the owner pertaining to this case. It roundled drug." wal only say that the whole world, or a purtlen of it at least, has agreed for many years that contenuation and verbal contmunication with the spirits of the dead is not an impossibility. Lot scapekrism may what it may, lot incredulty speak as loud as t will, the fact still remains that numbers of the most report de man of this country are from believers in the faith of which My Most, the defendant, from expenses

It may be paid that the bettef of any manner of many a reación, for example chos not oroce a true a at here ateanniveds of talkions of Buildhists, Mehamedone. Assessing Catholics, &c., who bollove in their respective greens. Yesbut it is not a question of a belief in certain doctrines, or even rough anid to have happened conturies ago, but in actual, thent protent from soon, heard, and felt by thousands. Of the instances recorded in the Beble, for instance, minimum my, I be Boye their because they are written. Of the facts of Spirit unitary thousands of living man and women can say, I know them

to be true by the evidence of my own senece.

Hore is a bit of testamony in a letter to the oditor of the Whitehall Resign , " Then came a test that would have enturied even you. I maked the two slates as before together, having pr smealy elected the slates and secon another question, and pe in the same crumb of pencil. Mr. Eglinton than held the slave night up on the table with one hand, and my auter held the other end. Longer time was taken now before an answer came, and Mr. Eghuton seemed much distressed. In about two mosutes the pencil began writing and, as before, suddenly acopped. I opened the slates and there was a distinct answer to tay question, us it more crossed and took plates, held in the air by my an or as well as Mr Eglinton. I have the slates still test (I retic there) and fastored in a parcel, and shad be good to the w them to you in m September when I that be in London.

at more than a maintelest of healing us "duty vouched by and that many at Lourdan, at Knock, and especially those of Partier Mrs how, the temperance reformer, and of the function Prince venent us, who smong hundreds of cases in Europe and America, sured in 1822 King Louis of Bavaria of desiness."

Here are two cases, reported by Professor Onyuma, of the to the Court at Stauffenburg. His arms and legs were entirely paralysed, hanging also those of a deed man, and his face was of a corpse-tike peller. On the prayer of the Prince he was in Recte Sparife

scaptay cured, true to his feet, and walked perfectly to the peofour automatineer of all present. A structure of Burgaruer near Mariners adia and not for two years the use of his egs he was brought in a carriage and though he was mly partially relieved by a first and settent prayer of the Prince, at the third he found housed perfectly well. Someter outlances, fairly that there must be many references to the subject which do not mathematical, in ght or mail their manufaul. Yet a presence of meet our eyes.—En. or "Liour" these our stardy Protentantism refuses to make wasage one single unscriptural dogme, which the Church of Rome teaches."

> But if the miracles recorded in the Bible attested the truth of its doctrines, why not now? If people believed "because they saw the nighty works" wrought eighteen contentes ugo, why not to-day? The logic accurs lane-but the facts are what I am most concurred about.

Cariously enough, Worsl and Work, while endorsing modern ourselos as undoubted facts, pours a bucket of cold water over the "Faith-healing of to-day." These cures, it mys, are worked by "the power of expectation. It matters little what determines this expectation, only let it be present in full force, and in certain cases a cure follows. We have ourselves seen repeatedly the powerful effect of substances altogether laces upon patients who had been persueded to believe them efficacious. How far the mind can act been the body for good or ill has not yet been exactly determined. There can, however, be no doubt that in a very large number of cases an expectation of recovery, which may, in a contain sense, he called faith, our presented for fraut, so a second or seed a second activities in no total degree to the desired result. This, let it be must at other factor of whether Mr. Mos as at or west, a restell more defined in no total degree to the desired result. This, let it be needed, in not faith in finish as the present, whether it be that a something which each on a set does for an self and anothering or laying on of hands or the action of some variated

> Yes, but why does not this explanation apply equally to afractor of healing two thousand yours ago! And it is also to be observed that so such theory can be applied to the greater part of the miracles of Spiritualism. Expectation cannot came a monage to be written between two slates, solelly fastened together, held in your hands, sealed up in paper, &c. Expertawe will not produce materialisation. Expectation will not put on a man's wrist an iron ring which cannot be passed over his hand. Expectation carnot tie knots in an endless cord, nor thread a chain on my arm while I me bolding another person's

> No. Solid mirroles like these cannot be attributed to exoctation or bellef. The facts, as thoroughly attested as any facts can be, examined, trated, and attested by men of acience. admit of no each explanation, as they admit of no donial, contrury as they may be to all the "well-known laws of nature" -there they are solid, underiable facts, from which there is no escape, and which must leave their influence.

> No secupe, friends ' Christian or Agnostic, you cannot got away from a fact. There it stands, a solid diamond rock anad the billows of speculation or emotion. Ignore or deny it, there it is, ready to smash your theories to atoms. A fact is some thing you cannot get round, or over, or through,

> So I say to all Spiritualists—gather your facts, record your facts, marshal your facts. They are your imprognable fortross, and they are equally year resistless artillery. No theory—no system can statul against facts. Principles must harmonise with facts. Facts give as principtes.

Six. Though sympathining with your desire to close the disso on on this subject, I must nevertheless sak to be allowed to make a brief reply to some of the atatements contained in this world's " Laure,"

The transporting of Dr. Wales. The equilibrial with he objects applied not to himself, but to his style and argument. If flat contradiction in a matter such so that under treatment in on discourteres, then, and then only, was a not postation in advance pretentions personal clause, and not writeusing the term. I believe, however, that I was justified in Thus much as to the style.

A h regard to the argument to which I applied the other done not entudy encount-on, for instance, Dr. Wyld's argument no. But it may be after all that the solution of our delice and and the same of the same of the same of the same to the same of th as it is, I hold that I am justified by the facts of the case | Wyhl's mistake in this matter, but a man a man a Br, Wyld roplied to use by an argument which, he wall knows, a re was with b movell

Dr. Word's removement for the "belove I disciple "cannot ! where But a newflow between us is 1 of what that scople wrote, but what was his meaning. Dr. Wyld in his present letter simply restorates the expression before employed as order to sugmetive us as "false prophets," without taking the mealiast notice of my suggested explanation of the meaning of the phrase "Come in the flesh"-thoroby aggravating his orimel fault. We maintain no less etconnously than Dr. Wyld

. Other Jesus Chant has come in see Seeli," and by that magazated the Christian disponention. But we differ Dr. Wan and the same and an area and as we test r view is the true one, and that which the "beloved disciple" | designation House, a

In the a speciment substitution of the word 'mythical avature - bitch I med-is, I hope, due to accident rather than design, for the perversion involves a serious misa sexual as It is however, along from his remarks on the Merculous Conception that his own view of what is nuplied as that event is neither mythical nor mystical, but materialistic and that as, for him, "Christ Jones" denotes, not Man regenerate and purely spiritual, but a physical and historical personality; so "Virgin Mary" denotes, not the human soul bosono pure and fit to be the "mother" of such "Man reprograte," but a physical and historical personality. But perhaps Dr. Wyld is of those for whom Adam and Eve and the serpen are " historical" personages. If so, it is no wonder that he falls foul of us who hold that the Bible teacher by mesus of parables. which, referring to things spiritual and in perpetual course of precisely the insulance on the materialistic, because historical, expressly specifies His mother as one of those concerned. view that has wrought havor with Christmaity and even with religion itself.

I cannot but regard Dr Wyld's allusion to what he considers the exposure of "Koot Room" as unfortunate for his case. If only by showing how auxly a fictitious personage may come to be accepted as a real one, the history in question is suggestive in a direction the very opposite to that which Dr Wyld would appears. Concerning the onse itself I pronounce no dealt with it I have a decided opinion, and find it not difficult to with the Gospels " believe that has be lived an perhaps he did some embrech. Does not my far and distribute annuable though somewhat centuries ago, the "presentant" of a certain other personage. Empetuous, opposite see that even if har latter does not call him an equally seconful repudiation.

"We have married as many letters on the outport of . The linearite armine to un could find specified. The correspondence mind now, he accordance with our injuries, come.

to Dr. Wyld's admissions in past years, I amsorry for it. But I alluded only to what he loss said repeatedly and before others, and was in no souse pereste, but has since been beene out by bis were published lettern. If Dr Wyld can my the many of the remarkable niterance he maribes to me, I shall be content to mear the represent due. This, however, I know that he . . . not do for, whatever may have been the remarks on which he bases his statement, they were certainly not as he represent thum, first, became, however high I may besieve to be the authority for the dectrins of re-births, it is con- an to ay practice to rost any doctrine on authority, and still, less expression, "fortaken of the Gods," would uply my bestef or a previous subsyment by him of Divine communion and hardy at I should be to cred. In M. In this while prince guide in an expansion of the course and desired which the yet to formal the grounds which would justify me in about from majorities, which he cortainly does not regard as sound in here is to be found in the proverhial difficulty which persons of regard to things spiritual-janot to be "dippant, espericial, and Dr. Wyld's nationality are said to have in approhending a joke.

t por a despice beam exponence of Dinome defect either of apprehending and a second and a contract of the second and a second a second and a second a second and a second a his accuracy, all that he can possibly be sere of is his own belief as to what passed on the requirem or necessions to which he

One word of thanks to Madame de Sietger for her excellent letter. She is indeed right, it seems to me, in her reprolation of those who, in their determination to have their human God, have exceed Christianity to be descredited, and seriously endusgored the whole fabrie of religion

It is impossible for me to deal hers otherwise than very open sity with Man Canadadl's elaborate discould be 1 at 1 therefore content mysel with manufacts a rew of its lane a points, as a means to a judgment of the whole

1. Miss Campbell has saidly mutaken both the scope and spirit of my remarks. For those who, being sincore in their beliefs, defend them by sincers arguments, and even if mutaken have taken pains to learn. I have nothing but respect, no matter who is reject are an to such as new my strictures bord to price men I was to a partie to the of argument, outply you my a part in section that I my dress me expression the mes and her application of them to the whole body of those was share the same views is at once unjust and unjustifiable

2. So far from my interpretation of Mark till being "asounding," It is the obvious and only one possible. The word, v. 21, translated "friends," means undoubtedly, says the learned Dean Alford in his scholarly work on the Greek Tonta ment, "relations," "for the sense is remand, v. 31, by the word, ode,"-therefore. Mureaver, his note is headed "Charges chactment, are not "historical," but true for all time. It is against Jesus of madness by His relations," and the text

3. After saying she "has never read the works of scholars either un one side or the other," but will "simply let the Gospels speak for themsolves," Mass Campbell proceeds to not forth, not at all what the Gospels say, -namely, that Mary, as cousin to Elizaboth, who was of the house of Aaron, must have belonged to the tribe of Levi, and was not therefore of the house of David, but what "Roman Catholics are taught in their earliest lessons " by their pricets, and is rested by these. spinson. But concerning the spirit in which Dr. Wyld has, not on the Cospels, but on a tradition in apparent discordance

also intimately amociated with " a tree," would have found in for the particular opethets by which I characterized that of Dr. Wyld, there are yet others which might be used, of a If I have indeed "somewhat overstopped bounds" in alluding marcely less favourable mature? The most forvent faith and zeas caused affers a dispense with accuracy of atatement and logical coherence. She seems to regard her acknowledged want

lint now if such rule were applied to the discussion of other who accept the doctrine of the Musculous Conception, which subjects as, for instance, chemistry or astronomy? Would also seriously conflicts with another and even more cardinal dectrine not consider as guilty of something not very unlike "pre- of Christianity, vis., that of the Inspiration of the New Testa sumption" the movies whe, "having never read the works munt, of scholars on one side or the other," should undertake to I w

If no I support, Miss Campbell thinks the presumption is ours, for declining to accord the secondard presentation of these matters, I would refer her again to her Mible, where, as she will find, it is always the practic who, slike in Okt Tostament and Now incur the Divine reprolation for precisely the degradation of betterne from which we are undervouring to rescue Chrischanty. If she can show that the prophets are against us we alm indeed be answered. But we know and respect the Bible for a work tox out the district from pay ton's discussion Doger sales a quest to a Tipe salest rotate all he a reason of large bookers of an dame

Your Cooper low your K of any state out the other is to come or or a contractly to e say a march that the war and eather which a tout part in this con to city a see Jesus of the Cospela was Indeed an wise. In it, thus, such a character that the Church contomplates when, in its offices of the B. V. M., it puts into her mouth the words - I dwell in the highest and my throne is on the piller of the church. I made an unfailing light in arise in heaven Ann, as a new I overspread the whole earth "? Or when it says of hor The Lord Rinself created har in the Holy Chest a sel las at among all His works 't And declares, n . . . Y as Mary was taken up to the Hosvar's . . . . . . On Some of Kings alta on His starry throne? I have not been present an array of the soul materials in mile colling, as at some Divine and human, they transcribe was a way true. But they represent the myele sense of writ large," and the opinion of the Calvisiat has been expounded the trapel, and therefore, for your correspondent, though a Carbolic, are "quite open to doubt," and the only areso that is imposedive in that which, by applying them to an historical arminality, tooken them wantling were that nomense

In reference to the "correspondent" whom you answerst such longth, I would aid to your answer these two remarks--(1) That a careful examination of the subject would show him that so but from Cattacking Christianity " we are doing the one thing that can rescue and save Christmanity-manuely, restoring to it in spiritual sense. And (2) that the course he progresses to you a ' Journal of Psychical, Occult, and Blysnical Research that in demanding as I understand—that it should deal exparticular department of one of them. Spiret down to my hand as a department of Occultum. It is easy recently that you depre ated the establishment of a reval suggestion, on the ground that

ably confident that were you to do as your correspondent it would very specific be found that snother paper of the kind perord with such stultification. would really be manapoundle.-Young &c.,

EDWARD MARTIANIA

# To the Editor of Living "

Sin,-I have been much interested in the correspondence recently carried on an your cohunns entitled, "The Historic I have no desire to traverse the whole subject, but should like to point out to C. C. Campbell and others that it is evident that neither Matthew nor Luke accepted the destrine of the Moneculous Conception, or they would, giving us their genealogies, have given that of Mary , as they have put done. They were both very mareful to power that Justin camp from the loans of David, and from the soud of Abraham, so they traced him in uniqueon line, apparently, which went to establish two clause saids by Unicellisat ja min sheed here getreatopies decome meaningless. they prove not up, and point or nothing and wing contra- gentle, carnest, and true love for our general and suffering kind, theory are terribly in the way, their authors sought to show the forgetful of self in the love and sympathy we bear to others.

of study, which presses sount of knowledge, as a positive quali- lineal descent of Josephone Abraham and David, and in making heation for the trak of defending her religious convictions. the attempt have finited. This is the logical position of those

I will not seek further to traspess on your valuable space, or estradies of hand those who had devoted yours to sarnest! I would give your correspondent some references respecting the Himougo of Mary -I am, sir, yours truly,

Winchester, July 20th, 1885.

# To the Editor of " Laborr.

BIR oft meens to me that if the Hermstie Society is to be Act at its word, according to its exponents (for they will not altow us to call uses " leaders"), all should heaten to join that exact a manufacturity, and become mystics like themselves, for we are told by on- buly, "There are to re-births any more for the soul at has found Christ Joses, while, probably with the muste dip of tak (we need not my breath," as that toght get we into a new difficulty), that hely tells us, " James Christ comes in the fieth when He is mearmate in man, and this is the way He gomes to all arguing.

Another buly of the same cothesiastic bond expresses herself as " thankful to feel that, after all, their wings are safe." While a gentleman of the man happy family delivered himself thus to instorical observator, then untal his mother have been on like Dr Wyld. The views I hold nome from the highest Divine fountain of all truth, and if you to not accept them you must be a man formken of the Gods." How glad some would be to bulieve this, if men, or even ladies, were to be afways thoroughly contided in ! That gentleman may believe this blumit, but where are his proofs? As though are, what evidence have we that his to trot a new groundless assumption?

Thoroin an advato of a fighe Church of Rease we have been told these many years, but I, for one, do not whose it, though it is grounded by a far greater weight of tertions from great and good men than this new version of Hermetic teaching. Some, too, have whispered, " Now prosbyter is old pricet.

"Many are called but few shown, I am among Electon that happy lot." But here are the Hermetic exponents assuring up that the bleasings of salvation come to old mention. On this point they are quite south to the Selvetion What on enlargement of the old lines. What a sesignifully broad interprelation ! Who would not be a saystic if he could be no conscientiously! If he could abundon facts and take up with myths, which asceed he must do I as a sale be see of these new authorizets. For a prominent and a expensent who densire to the term " leader," tells in in the constant of your paper would be not only 'schools," but it is man at the wary fact. Man is incompetent to a requiput and illegions. "Litery" in the very next number of y are a texaste post to gradient an article time. Packs are Christiat wester thing. Ame to be time there new mys an clusively with things apiriture at a remains out it should atterly before, and would knock away, the should emit the whole of the adapted it professes or transaction. The basic on which Modern Spiritualism hange, which is founded on facts. And yet, when it mits their purpose, these Harmonic exponents stick to facts like other people. In St. then, a fact that Mr. Maitland's views come from the highest Lience " nuillees to meet axisting requirements. I feel toler- Divine fountain? If he denies facts, like his president, he stultifice himself by much an observation, and rurely can find no auggests, and exclude the classes of subjects to which he objects, fault with these who believe in Spiritualistic facts being in Wic. R. Toxillimos

# To the Editor of " LEONY.

Sta. -In the article quoted by you from your contemporary, the Change Religio, the great truth of Speritualism is said to be the certain and indiscontale connection of character here with doubley hereafter." This, it is claimed, Spiritualine has evidenced in the reiterations of spirits who communicate to us from the other world. However much the manifesting intelligences after upon other points they are agreed here, " that character is the only bean of the awards of the life to some, the only purent of destray." This is an important " fact," the value of which cannot be over-estimated. Admitting the truth of the statement I feel inclined to sak why all this war of words and betterness of fooling in respect to the ideal or real (historie) James ! The Man or negatical " Christ" ? Whether real or mystical, historilowers of Janus, viz., the elentity of Josus with the callor symbolical, in any case, the characteristics set forth are 10 a see Messas one the Comment of prophety in respect of identical, via, the recounty that each one of us should live pure where it But in neglitery the doctrine of the Meracuscus lives, animated by pure and modifiah purposes, and practically comlate the Exemplar by "going about doing good," in the sweet,

dereted efforts we make to penetically embody this law of love who lived (or did not live), somewhere or some time, mount in in our daily lives and academly sim to achieve the ideal in our phrase, a symbol, or an altegory he is suit to have uttered or own experience?

August 1, 1885.]

been patience, undersome, and gain strength through effort and anystery, while starration, discuss, degradation, and death enterprise for the good of my fallows, what matters is to me, abound everywhere around them. Presibly when discovered the whether one or other, the symbolic or historic, view of Jesus he teacher meant no more, the truth behand the symbol was form correct f 1 can neither prove the also rove, but, use way or the other than the command, 'Help, confort, and sless your fellows, pther, this I know, I must live my own life, he saysolf, be held do justly, love morey, and walk humbly with the first accountable for the metice and " deeds done in the body," go to "my own place," not for what I have believed, or doubted, depented, and depraced uses and women, and depraced children respecting Joses, but for the seed sown, the influences exerted around us, degraved because of the vice in which they warm beby me, the example I have set to my fellows.

" For modes of faith let graceloss sealots fight, His cou't be wrong whose life is in the right."

conscions that the answer my own conscience gives is not thought and life! In there an practical way in which the altogether saturationy, realised to the full the agrificance of golden rule of Spiritualism." character here the parent of the demand Spiritualism makes upon us to do procted work for destray hereafter"—can be applied to the building of a mobile nur own needs, like the horse leech demanding more and more. without giring a return unatintargly to others around us! quest of a question Army, but it is doubtful to my mand If we reached some glad to any, gone for its all a world to tell them to every creature, regardless of disconfert noopposition I St. Paul was a familie, perhaps, but he was me carrost, and meant what he mid his philosophy did not seed his not an it as an extelluctual and the dogs Sphitardour for human salvation, he feit he must plack men to an unline. The "head" without the heart is dead, has neither brands from the burning." " New was the time," but he want, warmth, love, nor soul. We must put the "housts" of love and to work at it no successfully that, although personnel to the " - r, othy into our Spiritualism, and " go out into the highways ho made a mark which will live an long as Duty in an byoways stal compel them to come in," if we would be recognised by man-

818,-I go to entirely with Mrs. Kingsford and Mr. Markand in their implance on the symbolical nature of accred Scripture and, at the same time, by the idenyneracy of my personner war enabled to subscribe to the conducting paragraph of Dr Wy . cour in "Liour," of the 14th, with regard to the "sutches burners personality" of the Len seems ("ross seed ) am induced to refer such gonains inquirers as are seeking towards a reconcellutton of them views, to the writings of the car y achierimon, who were philosophers as well as theologisms, Thomoghlets, and saints, who, having recapitulated the whole of religious dectrine experientally within their own lives, were able to appreciate the superlative and arring return of that cathelic advent of the Son of Man which was consignt to then within the veil-not a Christ, but the Christ, and only Son of God, universal as the exceds symbolically rehearse

Joby 20th 1885

# To the Editor of " Leont.

Stn .- As Dr. Wyld, Mrs. Kingsford, and Mr. Manland baye been good enough to allude in your columns to my own personal belief about Chress, will you allow me to say a word more on the subject i Though in general agreement with the teaching of the two latter, which seems to me, on the whole, of high value, I am in profound diagreement with them, at Dr. Wyld rightly states, on the question of the historic Christ, though I can lurdly think the pages of "Liners" a fitting place for a long decreation on the oridoneus of Christianity. To enter into the historical details touched upon by Mr. Manhard would take up too much time and space. Still, his averagent of the unknowed character of the Gospel parentive is an vehicutest and positive that a word some called for in roply. For my part, I ontiroly agree with Dr. Wyld that the discrepencies do not affect the substantial remainty of the history in any important So ,-- I trust you will allow me a few lines on order to place particular. To me, on the contrary, they are proof that it is not a connected forgery Discrepancies quite us serious are to be found in the nerrative of events of which no one seriously doubts the historic verseity. The French and the Boglish give, and have always given, different versions of the Bettle of Waterloo, and yet the history of Europe since that event can mently be accounted for if the battle never took place. Nor to my until ear the modern bistory of the world, or of the Christian Church, he accounted for without the amountation that the New Testament biography of Joses is in all comential particulars correct. The discrepandes alloged, moreover, are from the result of more minanderstanding, as the Rev. G. Allen showed in the convernation that took place after the readof my paper at the meeting of the Hermetic Society out corning what Joses is stated in Matthew and Mark to have told His disciples about mosting them in Galiles after His squarection

One of the difficulties trimmplantly raunted by acoptics was their area in labours, dangers, and sufferings, were threen to the , that Cyronius (or Quirisms), ascerd , to Jusqu'us, was not Covernor of Syria till sight years after the birth of our local, though Luke states the contrary. But it has now been established by Zumpt, of Berlin, that he was twice Covernor, and the first time from a.c. 4 to a.c. 1. I myself was witness of a battle in the Lebanon between mountain tribes, of which I gave a perfectly honest account; and a friend of minu, present at the man, lattle, gave a different version with equal heavily Arged, that battle sever took place! May, but had we been concreting a story there would have been no discrepancy

Not the most sceptical of critics new disputes the genuine ness of four epistles of St. Peal. Now these must have been written, at the latest, 26 years after the erucifixion of Joses. And from the allusions in them to most of the important oronto mountail in the Gospels as to noterious and generally-received facts, we may conclude that those margatives are fairly security in their relations. Moreover, it is orident from these quatter that very much the same destrined beliefs concern society, greatly infinement its law, and even alonged the tenure ing Christ obtained entong His disciples at that early time as have blanced among these since. Yet surely had those marratives was spiritual parables, or mythe only, they would hardly have got thenouslyes generally resolved as sober fact within so short a time after the alleged greats, while a multitude of contest pornties were still living to correct the mistake. And the difficulty that these werederful spiritual parables ... which have so imposed on markind, and changed the course of history-most ness are encented for the most part by more or loss illiterate Galilanns, Mr. Maithand meets by samibing them rather to tearned Alexandran Jors. But how reconcile this view with in out our new y of some of St. Paul's Epistles ! Wa how wif in the a factor and done post ten a good to the a part to Jack to stand and accounty adverse and to orence by His followers as Divine.

Then the Epittle of Clontont of Rome, the companion of Paul, formel written on the Absorandrian MSS, of the New Testament, presented by the Bymotine patriarch to Charles 1., and now, 1 believe, admitted by all scholats to be genume, testation that the mine alleged facts as we have related un the Gospela were believed in that early period of the Church's history-a like tottimenty being burns by the Epotle of Polycarp, the personal friend of St. John, and that of Irenect the franci of Polymer ; while to use it certainly appears that the Divino Elementty of Jesus Christ is an clearly taught by the Symptic Gospels as by that of John, though not no much mainted on, and philosophically expression

Why slid not Celem, the great heather opposent of Christianity, who wrote early in the second century, dony the Geopole about Joses and a great number of Hir myings, as no influenced and, in part at least, transformed society then the, orging that these facts and words are derived from mounts written by the disciples of Jean. Why did not the Greatic because men aperation has Makespeare, whose names have been with > 1 was still alive, dispute their authenticity? But this touches the possibility of emounting, and creating in many died, we have all the same facts (meaculous and others) cited, 'my argument from the amperior transforming and attendating and the same dectrine concerning Christ deduced from them fortund a concrete array exemple over that of an about morely He says, moreover, that these facts are derived from the conceived in the annal. It is surely unquestionable that a h consist cares to seeds, were to be typically a six to a sub-boundary look it Gordon, or the Cure D'A a sixt her paramona. He informs us also that these water has people than they (say an Africa Ayecs, or a Grace Darlin " ... been read systematically in the churches from the beginning see to similation, and strongthem them for virtue fa-Indeed, there is no trace onlywhere of any question on manner t were alequent, and more than more sol tars at all being raised concerning the authoriticity of our mant of an But it is not equally obvious that the contempla No. Testa and the carliest agen of the con of physical boosty has a tendency to produce physical the same of the same beauty in ourselves. Yet that should be say to warrant Mr case If a great a man a constitute what is termed a Mutland's negative argument from analogy. If a fairly First Canon. Ironeus mys he had known Polycorp, who was to also moral do a way to be a new to be to be familiar with many persons who "had scott the Lord," and at a ug of the first a set to beard the returnish man repeat "all they had told han about not. The not of my story passes and His miracles and destroys," Indeed, "the tests on to on Cason," as Michaelia observes, " is so not y an almost a see look that this may happen on whoreas such a possibility it thing that amount blenchire could power on a construction by the same than of the most abundantly attented books to a super sel on of the churches they founded by the Apostles themselves—the Eucharistic as universal value of the saints' morit, and of their pealous ours with which the sacred banks were preserved, special present quick a a, a thorner were men, in virtue of their own go recess and a series of the transplantation of each a dis-

And to my much the history of the rise and progress of the Add to the state of the first of the state o roction of Jesus Christ in all essential particulars on a sehave these recorded, oven as the recent history of Ennyproves the actual occurrence of the French Revenution. For I suppose Mrs Kingsford can hardly be notions when the amores to that virtually there is no such thing as history . And yet there are grave divergences in the accounts that have comdown to us of the Great Revolution. But do apparent differ seases in the reports about the day on which Jesus was eracified throw agricus doubt upon the fact steel? Burdy no Constitutes a standard by Marcon Street in the section of the growth of the section which is the By hanges the hade a the state of was you need to be de telescon Securitary and except except to m. M. months in the median for you must be a way to a visit at all. The Enclosed of the leave of the and in which is in the temperatury to a torrane. I'm and Jacob at a Borrot me of the year due at therefore is a take one of mil-

part of the second contary, as existing in all Christian com-

munities contrared throughout the world

With respect to my argument from the moral influence of a laying oxample being superior to that of a morely conceived blook either Mr. Maithaid has musapprobereded mu, or I have failed to understand his answer. He says that for a sendedto realise an islent of beauty in a statue it is not necessary for him to have a perfect stodel of boarty before ham. Now, Seet, I think that statement open to question. It is plausibly contouded that if a aculptor socks varsous features of beauty different models, he runs the risk of putting together at in agrueus whole. At any rate, he will cortainly seek for a model as perfectly beautiful in every respect as he can find And among the Grooks I do not doubt that many individuals. bountiful in almost every respect, were to be found. His seathetic sense, his gentus for beauty should also go far to help hum an exentacts

But Mr Martland is certainly wrong when he says that for this new revolution of beauty there was no need of "more beauty than used in the world"; that ancommon beauty very surely existed. I think, increover, that the genius for moral bounty, in proportion as it don't with a higher type of excellence, is also a much rarer type of genus. And here it is assumed that there were many such engaged in the imagination of Jesus Christ. Remember it is not a popular ideal of goodness, juther one utterly opposed to the expectation, and aspiration of those who at that tone were looking for a Mesmal. It is, moreover, not the steal of the Alexandrian Pailo (see "Philochristus"), nor precisely that of the Steam, Epicureans, or Essense. believe that had the mythopicists put together the character of

authenticity of the Gospel narrative, if it was open to him so. Climat from diverse models of excellence there could never have to do? whereas he estes nearly all the facts related in our four resulted the being congruent Individuality, which has for so long

I as we then, are those maginative artists, far greater, Mar one over Vacuation became and the distribution of the second and the second and the second second and the second seco John Martyr again, who was born in the year that John sation the character of Jesus. It does not in the cesat touch to as an extern and magner on to that of netrolity and life, we

# THE SPIRITUAL OUTLOOK. 11111

[ Wo shall esteem it a favour on the part of our readers if they will forward he, for use in this column, any allusions to Spiritonilan. and Psychical Research they may come notices in the course of their rene my We son a great many of these extenders, but it is obvious the trace much be many references to the subject which do not most our eyes,-En. or " Limit.",

Monaignog Capel, of all prizate and prelates, has been leaturmy or Spinisher and of all places in the world, at Solt Lake a y Ha stack at a serie of made on on a quempt. Carbone doc to, a in an having a contralyment officence

He took it for granted that his sathence were Christian, If they had been Agreetics he would have taken other grounds. Every Christian believes in direct communications from God Brory man, woman, and cheb percent and community to consciouco-a universal communication which tells us what is right and what is wrong, and the bull-civideed African posterior It as well as the cultured gentleman of Europe

Bendes this, the Church was constituted to reveal the will of God to man, It teaches that there are personal angels and flerila. When a new died, if he had lived a good life, he was manufliately taken into the presence and friendship of God. If he had committed sine, he would atone for them in purpotery . but if he died in blanchemy, was unto him. There was no advetten beyond the grave for each. Of course there was no room for Spiritualism in such a system.

M magner Capal and he had been clover enough to unmark by a motor on. In one case a sound of thunder coased when the fout of the medium were placed on a cathion, in another, when a slate-writing modeum went to Paris the spirits could not write

This is too silly, oven for Montiguer Capel - Every Spare tusque knows that with Eginton or Slado memages are written in Latin, Grook, Franch, Gorman, Italian wrote questions us a locked state in four languages unknown to what he is talking about. the modium, and, while the date was looked, he got answers to pack question in the language in which it was written.

Monateuer Canol, hereever, had the grace to acknowledge then he and: "Many of the laws of nature were yet inperfectly a alterstood anemorano, so-caused magnetised mandreading, and other recordingly supernatural phonomena set sigto the science of biology, and would you be explained by the laws of science. What would have been thought three hundred yours upo of a tnau who should know declared the possibilities of the telegraph and telephone? He would have been called a ing man. Scientists sin medica mer were watching and vertigating biology crossly, and the explanation would come

But suppowers that all that is counted for Spiritization in true, and duricumarkance Monagnor what good is it. What there shall be at least fair play not belief, but something like

happiness is there in the knowledge of a few raps, a little slateger ng, and an internation that 'so and so is happy in the spirit land?' It wrooked the physical organization. He could almost tell a Sparitualist from his knowledge of physiognomy By the wandering eye, the gloomy disposition, &c., he could point them out. He had good anthority for atting that the end of many Spiritualists was in the lumatic asylum."

This is very bad, or woold be if it were not false and ally. Religious manus is common enough. A belief in the orthodex

is blambony, and he contioned his become against indulging in It was as if a man should ask to patent a small tub to cross the Atlantes when there are already magnificent ocuse steamers. which make the voyage in miety. Spiritualism attempted to dethrone God, the laws with togeth to communication with the mentile were fixed, the in his diseas for any an it or, further rate site secrets of the samples S, rue on has haits existence since the Witch of Endor called up the spant of Samuel, and evidently the witch made a much better job of it that do the medium now-a-days."

A clover man, this Moungnor, but it might be cetter comfor over no clever a man to take the trouble to know what ..... talking about, or to stick to what cannot be known, and therefore cannot be contradicted—theology, for example. The idea of pong to Balt Lake City to great the least Well the assessed a of Spiritualism now learn that the first condition of giving a good secture on any ambject is to know something about it

Resolving their probably insperfect report of Motor to a face of lacture, copied in the London Catholic organ, the " - 1 cannot but wonder how this man over became Moragues ; and I do not wonder that he was allenged in England, and obliged to to be some softer field for his labours. The lecture is false but it is worse translated by a semiconcil

F 7 azample—can may Speritualist believe in the boun fider of a man who could prefer what I have quoted above with this declaration !-" He would give many Spiritualists the credit of being beneat, but the drops in the cracible was large and heavy. ft was also true that many bright and intelligent minds had belief in it. He would not speak from projution, but from an impacted investigation of many years. Curiosity was a good thing in itself, but he deprecated it in a marker of religion to had investigated it from a scientific standpoint

The declaration of he late Cromwell Variet, a thorough y cientific man, and a model arrestigator, was that no man of science ever investigated Spiritualism without being convinced of its reality—that is, without becoming a Spiritualist-which is true even of those who began with the intention of exposing what they supposed to be a delusion.

Moneymor Capel is no more shallow than are most of the religious apponents of Spiritnellium. We can understand its being denounced as fraud and imposture by those who have not examined it. The world is full of men who judge without examination; but is denounce a thing so fraud, and condemn it at the sums time as diabolical as supromely ally The best thing as to know what so ; and a sum who stends on a Mr. In atome platform, or gets into a pulpit, should take some pains to know

Our Calcutta friend, Mr. J. G. Mengens, now happily reralling in the American Spiritualist comp-meetings, but written a close column in the Branes of Light, howled-" How I became that there are spanifestations not easy to explain. But a Sparitualist." It was a simple, somethic method, open to every intelligent person. He rend the published works of scientific investigatore like Crookee, Zöilner, and Wallece. On a visit to Englaces he never personal revestigations, and then invited Mr. Eglinton, the meaning to Calcutta. Few men care done more for Spiritualism than Mr. Moogens.

> It species pretty clear that the Seypert Community of the I in viers by I Pennsy's as in its too is, a more of the in retaining if Spir its son. Mr. Herry Sey set left is a surely thousand others \$12,000) for the over a new of Secretarium It was well-site are commoned the nights class of man testamens that

passivity. One strong will may prevent all manifostation. It m taid that the amount of wilful opposition in the commission is very trying to the mediums, and murs, if it does not entirely prevent, the action of the spirits. If it were a question of chemistry, mental opposition would not matter-but then it would not exist. An investigator of Spiritualism should be as accurate, but also as unprejudiced, at a chemist or physiological

August 1, 1885.]

For example, when some of the members of the community were present two slates were bought joined with hunges and polish, then to get through a montal proposace.

An American newspaper, the Samtoga Engle, announces the accession of Ray, John P. Newman, the fermer paster of General Grant, and one of the greatest pulpit graters in the Methodist church -- to the runks of Spiritualium. The conversoon is not a sudden one, however, as Dr. Newman has been for yours an intelligent investigator into the phonomena auto a student of the philosophy of Modern Spiritualism, and It is said that his wife is not only a strong believer but is herself a medium. De Newman is a regular Baratoga amusar guest, and a great favourite there, and he will, without doubt, be warmly welcomed before the Savetogs Society of Spiritualists

A very few clorgymou in England have investigated Spiritbelieve, and most of these have visited medicine by night, and moleon only to intumto Itionds of their observations. M Harrow, Mr. Page Hopps, and a few others have had courage to give their testimony to the truth. Many more have quietly profited by it. It is a mine quantion that of our duty to tall the truth. It depends upon the good it may do, or the harm of withholding it. That knowledge which we value ourselves we naturally wish to give to all around us.

years of his life become a settled prescher in Birmingham, is said apprehension. And so our own thoughts, in the degree that to be the spirit central of Mrs. Groom, who lately make at the they were foreible and distinct, would be phenomenally pur-Caronelish Hooms. His most intimate friends in Birmingham are more by another "spiral with should objectively aspec astrofod of his identity, and some of the matter given here was mend the n. And indeed of a corresson ence tona a higher tertainly worth, and characteristic. He said;" I offer you no croed plane to a lower, or from the relatively subjective to the but one Bo a believer in God, file angels, and the spirit-world, objective, are just such representations, then is one whole ever working out the highest dictator of Divise window . . . With all my earthly knowledge, I found myself just like a babe enthe shores of spiritual existence, waiting, still waiting, to see the applied by way of represent to every attempt to make the conrealization of my hopes. I have found my wife, I have found my ditions of a higher existence estantifically conceivable. There child. This is undeed Heaven. . . Before I passed out of the is, indeed, one way of doing this which must always stoke a body I was a minister of the Church of the Seviour, Birming philosophical protest. That is when "matter" is accepted as ham, I was branded, when first I went to Birmingham, for an absolute entity or substance autocodent to consciousness, being too free in religious spooch, and for not teaching their and in merely attenuated for the support of a consciousness canonical croods. And now that I have pussed to the Botter Lauxi, which somehow, and for that sole reason, is suppored to be I thank God that my people, as they pass out of the body, join more spiritual. The dualism in our conception is not resolved my Church in the Reavenly Spheres." We are apt to expect by adopting one side of it, the other side immediately breaking two much of our spirit friends. There is progress, step by step out in the antithesis which marks the earlier stages of idealism -not milden transformations. There, as here, we live and Both those views, however, are at laut professedly mount learn-but with Eternity before us we have no need to hurry.

organism, its bleam of expression and operation. But with metanted power and intensity of the enjections lafe its expressum or phononous must correspond by mobility, flexibility, and adaptability to the oner impulse , in a word, by "diadity Dur bodies here are more solid, not because they are more

not a sufficient to the residence of the description of an arrow upon to take at the white The are which objectively expressed is mobility, or that condition of matter in which it readily yields to, and represents the force by, form, is still comparatively are t

When, therefore, the reviewer consums "Sylamon mentafor aser as, "aphritual impurity to solul matture on the grants. thests of the book, that "nucler" is to be foundful with the whole universal medium for the transmission of ferce" p 11 a a man war white preserving the continuity of to be the manufestation, depriver matter of any distinctive elemeter of its own, or spart from the quality of the force which it expresses and transmits. If the book lays strong as in doubt it does, on the material espect that is became this aspect, in a constant phenomenon, is the dijuge of scientific apprehension. The organism is just the stude of receptivity to, and reaction up-as a question where i there a nation of a new manager. A security or a second can prope, it is to ther justicial for minuterial is, at me, but essures one or shor aspect as it is regarded from the objective or from the subjective point of view. That is receiv was region. But the water and distress and matter, or spirit mad heat strongs in the oth of range, but to our conception of those I was one not as a consist was the mode and the state of the state of the and the apark of this gestication on morally count to be depositive the dualistic falling is arraphed which derives force from its nie was nymint fe ex nee

the purpose of Symmum acts west, photogramment of a new annability, and at the same time to vincento for this somedality a spirituality which should not imply a false antithesis, it was necessary at the extest of the work to research the mountie conception of feros and teacher appearancements nature and delight of life ar is and budy, without which no theory of evolution is as a not be the the world proposed but they again, and a me for men we are great a septemble of andres against the and a finite of the party of the second

I sopeth subset his test at the san fee the nation of the and stand are just y of the greater to be a fer to force are separable as the second as a manufacture test section in dealing with the mond force who was a tert care in dynamically in the actions of mon, he was not transgressing the limits of legitimate actentific investigation, and that mich investigation could be purited upon a basis in the strictest sense nonterial, the great burrier would be removed which as her fore closed the most supertant of all branches of autoritatio study, and he would perceive in the experiments which have been made in the micros of t molecular physics, whereby smaller molecules have been revealed. by the use of modern appliances than could previously have been approhenited, oradoness that material atoms may continue down are not negligible to be one and the like feet a of the human eye is not as we refree upon as faction of a senior beyond which, he may show to say, no form or matter exists. However, as one book said, his dislike to the pursuit of further investigation into the more halden secrets of maters, has been due quite at much, if not more, to the manuarties of those people who claim on nequalitative with experiences which transcond not to which ere, they say, supernatural contest reor purely spiritual,—as to any positivo disinchastron or a part

are no arther than the misroscope cuts reveal, or to have no senso of want he cannot touch and weigh." The dualism is question "has not merely had the effect of driving scientific tuen into a mirrow groove of so-called positive unvestigation. but at his excrehed a most perniculas influence again the opposite c and or marids, who is it has conflitted to the no loss narrow greave a sparitual degrastion, thus separating the students of external nature, and of internal trath, into two violent imagings, so far as any energies become due to us, it recentles a prooplist of truth, and we almost unavoidably are expectated uppropriate to that

were that until at ashere, he ugh an objective aspect, that more repellant to the class which has dealt exclusively with as, phonomonally. And that which for external observation, what it has termed the spiritual side of man, to acknowledge will be an appearance, a body, will for the ambject be its | the all pervading presence throughout it of matter, than for the scientific class to anknowledge the existence of the moral element in every manifestation of force.

Pope Spiritualists' Only the other day there was Mr Roden Noel chiding them for their too great readings to adopt a materialistic conception of apirit as a subtler material form of locky, and resinont Rationalists have repeatedly denounced deputeranal Spritonium for a similar degradation of 'aparitant' tiless, applying to it such phrases as "a poculiarly gross form of materialism," and so on. But the above apology for scientific men at their expense may well try their patience more than these seperators. As if it were their business, rather than that of the scientific people who profess "exact" concepfor private laterance and apprehens purity to tenuous matter tions of nature, to discover the fallery of the time-honoured dualism in these conceptions, and so if they are responsible for the grouness of the erientide mind, recognizing no phonomens of force which connot be assecuted with the matter of the

had at hidea maning protes a silah a migdar sin aspent of consure, the an attack of the sure of the same of quoted may be admitted. That the false separation of force and matter, sperit and body, in nature is responsible for the dymon, hitherts irrecumulable, of human thought into materialistic and aptenualistic schools, is a proposition which only requires adoqueta statement to include seasest. And its clear recognition almost entirely removes objection to terms nology which would otherwise be appropriate to a one-aded

There are in "Symphonesia" three a court records as which may be commissed, first separately, and then . . . . mibiration. One is, that muso-consectoration in organic aredation may be raised to a moral quality, taking the place now accupied in most of us by the ideal or meta-dynamic conscientifican, all moral evolution in the mos or the individual testifying to a corresponding biological process which is connapoct of it—as subtle of a movestay of adv few and a numerical with the establishment of a new organic besis of the a rad life. Henceforward the subject of this completed rooms—at any stage, that is, of its completion—is not under "law" of a higher or ideal consciousness, imposing a painful and doubtful struggle with the lower sensational and selfish matinets, but that consciousness has easted the lower from its sensptional rantago ground, and now itself rasts on this as the

Now when the reviewer tells in that "the "new creature of mystical arience is not a flashic but a spiritual horag, and represents the "great work" of the Hornestats, the redemption of spirit from matter altogether, whather solid or flordic, and not the reconstitution of the undividual of any particular kind of matter," it is very evident that he there conceives metter as determining emeciousness, and not as determined by conscious-Now that is cortainly true of all organic conditions of meanwearen, which, so such, modute the will force, thus belonging to the definition already referred to of "matter. But he forgula, it segments to me, that there are or may be many regardentions or "rademptions", that the Divine power, which on any organic bases in consciousness, passes downwards, or from which from an auch last a rotage to another militaring at at playth from into a the lower are to the pest may be and thus it in," that whereas consciousness on any organic beam is determined thereby, it, that condition of "matter," is at the same time resolvable, and thus redeterminable, by another force-matter combination, a committee scaler state peagain consequenties. If we see that young consist sit y refuse be recognized a parties are amply in the case the contract appear of a certain relatively stable condition of consciousmess—which stubility is expressed by the term organic we see that the 'matter" from which we would be "redocuted" is that firsty of consessuances at any given stage which is then the service of the individual. If, as the reviewer toys, the "great work" is the redemption of spirit from matter altogether," that is an atter passing out of manufestation, Nirvana, the only condition in which the term "appernatural" has more than a relative sense. That, no doubt, is the undefined steal of Buddhisun. undefined for the very resemb that it is a supermatural condition in the absolute sense, the conceptions of reason being always scientific and concerned with nature, whether in ats subjective er objective aspect. The evolution of the soul belongs to the natoral series, and to opposes supernatural ideal to any account of that evolution is cloudy preferant, however right it may be of that evolution is clearly irrelevant, however right it may be philosophically, to point to a consummation which signifies no more than that the natural process is completed. Est the great sideally. And perfect antellection would be that in more than that the natural process is completed. Est the great which the normality of the process were suppressed, the result teachers of old mainly meant by "matter" the lower quality, being intuitively prosent. This is just which happens in developed of amention corresponding to the greater organism expressive an expressive is a superior mode of knowledge to that which we now rejected at the process were suppressed, the result teachers of old mainly process were suppressed, the result teachers of the process were suppressed, the result teachers of the lower life. The pure could had still us "calculated and the lower life. The pure could had still us "calculated and the lower life. The pure could had still us "calculated and the lower life. The pure could had still us "calculated and limitation of the process were suppressed, the result teachers of the process were suppressed, the result teachers of the lower life. The pure could had still us "calculated and limitation of the process were suppressed, the result teachers of the lower life. The pure could have a life that the process were suppressed, the result teachers of the life that the process were suppressed, the result teachers are processed as a life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed, the result is the life that the process were suppressed. of the lower life. The pure soul had still us "vehicle," its ; zome assender Neo-Platonic speculation dustinguishing but work bodies terrestrial and ethereal, and sanguing the more tentions bodies to the parar souls.

August 1, 1885.]

To understand the first of the three leading ideas in "Symp neumata" on which we are now engaged, it must be remout hored that all more and speritual emotion is therein concerved an the maintion of a higher organic degree, inclinate for our lower degree, but tending to become the ultimate buris of the whole conscious life. Not till we have examined the second idea. which tells as what this new life of the androduct, to be thus plumated, really is, can we see that the moral quality of the nonestime to completely guaranteed. But then we can see at once that sensation, and the organic "matter" which both mediates it and as its objective aspect, are correlates than which no two sides more inseparable out be imagned. Now, if further we recognize in the growth of the moral entaciousiest a sense tional element, the internsty of which is the measure of that consciousness, we saust admit that a new moral surface will be a committeenal basis and impulse of the will, making moral action with the will will be used to be and a count that this development matroctive, cortain, and delightful, united of difficult, pro- discuss and as a finite rector of the Divine love and encious, and passful. The distinctive external aspect of this are principle, derived from God to man, and thus easy our be organic sistere, as fluide rather than solid, in the material realised and expressed. expression of the expansive or spiritual quality, which has now prevailed over the contractive quality represented by the solid form. The reviewer is known to be an emment student of mystical—which are really philosophicals—conceptions, and thus SPIRITUALISM IN LONDON & THE PROVINCES

correspondence in cartainly not strange to luza, Our consciousness is semestional, emotional, and ideal. The middle term partaken of the first and third, like physical solute.

The identat will certainly be repelled by the prominence concoued to "esmestion be repelled by the prominence concound to "assession to devotion should steep to seasons simulations, and assesses "Symposument," unless this indissoluble association of the atterly unprofitable and moless deguines. The feeling, there also with the conceptual consciousness is understood. There is fore, was widely spread that, after all, "there may be some no greater fallacy than that we cannot will what to believe, since in truth we believe nothing which we do not will ! But this "will" is not conscious volition , it is pre-disposition. As such it is a mode of usuability, an interfere faculty, as truly a some for truth as seeing is a sense for its objects.

Now it is with the evolution of this faculty, in substitution of the present physical basis of consciousness so the "ultimate of man, that " Sympuomnata" is concerned. Naver as an for the moment whether the book has rightly defined what will come forth at this consciousness, we have first to see that it has rightly described the basis of the new consciousness as sensational. For this, the "alluring tones and larish promues of sensetional compensations," the "ascription of physical attributes to spiritual principles," is one of a long list of charges against it, for which the closest examination I have been able to give the text discovers no real, and sometimes not even an apparent waterit §

# STATUVOLENCE H By W. B. PATINDSFOCK, M.D.

As the art cannot be demonstrated upon paper, a description will give but an imperfect idea of the powers of the Statuvolist, or the possibilities of which he is expalde. Statuvolence, being the foundation of aprit control, cunnot he separated from it, and as the ages or seent of musviduals in the medium of communication it should be perfeetly understood. As far as my investigations have go in I find it snaply to be the effete materiality eliminated from the body, and, being peculiar in each individual, is more or loss electric (and not "animal ranguetic," as generally supposed) , consequently, being material, it can be seen by risirvoyants commuting from the bodies of individuals as they are more or loss exceted. Indeed, a Mr. William Underwood, of Paw Paw, Michigan, in so electric that he can charge a Leyden jac, and by breathing upon, and briskly rubbing a handkerchief can set fire to and consume it. I state this fact upon the authority of Judge Hilton and other intelligent persons of Paw Paw, Michigan but like all other cases, the abundance of electricity, an his case, in outside of faith, destitute of healing qualities. I have stated that the ours eliminated from individuals is the means of spirit communion, and there is no doubt that it enables spirits to approach persons, especially those who are sensitive, and by adding or combining their spirit ours or materiality with that of the medium they can effect a temporary appearance or materialisation. This body being then simply electrically and spiritually material, upon being more than substances which are gascous.

conviction with it, I would ask how it imppens that the same fully developed and rendered useful at will, instead of , the terrise attacks crises nervenes! - Revue Spirite.

depending upon a myth, or on others, for that which was The House as two persons of the wallers the management of the Persons of Provide Persons as it requires demonstration as well as personal instruction, and, although namy have entered the state naturally, they are personal instruction as generally ignorant of their powers, in well as of how to develop their possible qualities. Religious excitement, joy, fear, grief, a belief in the powers of mon on spirits, dec. have produced the condition, as well as electro-magnetic machines, &c., but to become a statuve let they must be only can they be of any use to thouselves or others.

In militian to the natructions already given for enter ing the conditions, there are others of real importance to those who have entered the state from whatever cause, and desire to become perfect in the art. When persons, there fore, desire to lown how to render the body muonsible, they must be directed (when in the condition) to sicaken the head only. This being accomplained, the body will be in an insenuble state, and it will be impossible to fullet pain upon any part of it, although the head in in a untural condition. An act of their own will, however, can render any part sensitive, independent of the rest, and they can then also let it fall back into the insensible state again in an instant,

processing has a sweathern by the first selection the broken by a substitutional years of the weaking the then, by the same power, to let it fall back into the same to a again. A little practice will soon one do people to effect this very readily, and they will then be a de at any time to throw may part of the body into or out of the state at

The peoperation of this power by those who are engaged we are recession to be oblits, would not only prevent a sa tera , but move thousands of brules, no well as leven, that now are destoned to peris-

But this subject is as undless as it is sensitical, and until public at c. ic. a corected to its importance, and its possibilities exercised to their full extent, humanity will be onliged to suffer the consequences of a neglect say in as as at a unifortunite

Ommetox.-At Rions, a young man, just liberated from his military sorvice, on resuming his work as a modelier in its "grabbed," its constituents separate—and, mone of these for a shop, had to leave it and lie down from a souse of utter be a undividually solid, the body cannot be held any for one when he was soized with a fit. He body was twisted also the bones, as length of air he on one the left the It has been argued that because some persons feel a shock a wagth of built as over men. It is in. On the fit going off. upon approaching paper said to be "magnetised," it is a he was calm and rational. He had frequent attacks like thus proof that it contains animal "magnetical," and consequently One night the doctor prescribed a calming dose for him. When that it will care ducases. But as the assertion carries no morphine, but he shall not take it." Whatever he said in the attack was spoken as if by another individual through his mouth. pensitive persons (being strangers) have sat quietly beside [ went in once when he was just out of a fit, and he said to me. the, and fall nothing until my name was mentioned token as he pointed to the fact of his boil, I See there he is who is they would spring to their feet and declars that they meet a known a softer. He is macking at your powerlessness, but felt such a "magnetic shock in their lives." It is very you women can't you protect me?" Some of the neighbours evident, therefore, as they felt nothing before my name care and that he was possessed of the devil. The vicus came and mentioned, that the shock in all such cases is a result of their transaction of prayers with him. Some dolts mid that it was men creating, and not through any "magnetism" attached to a nature I took a friend, a medium, of the same ago as the seen creating, and not through any "magnetism" ellacted to patient, with me, and he had a pleasant and rational converse such papers, or to myself. All cures, therefore, that may have how with him for some time, after which these fits, which had been thus effected were the result of a statuvolic power recurred from time to time for a month, anddouly ceased. He within themselves, which a proper education could have did take a little medicine prescribed by Dr Fabro, who called

the telepathic theory, or principle, to a very great extreme of a planeaette in answer to the question, "How shall I In his effort to use it in a minute of a mainting spirit agency | believe? And Mr. Myers believes that this mover was from phenomena which have unusely been attributed to that, given to the form of that complex arrigans as a secon source. He says, "Telepathy is among the supernormal moons reflex from the writer's mind"-or by the "unconnety ties in which we have reason to suspect the operations arious secondary self." He gives to this mysterious agent the key to unlock all the "stone of unconscious mornery," It will be observed that thus language is very guarded - whose extent in any fashvideal's mind it is impossible

There is really no the which in be consistently that the writer or speaker could never have possessed."

It will be clearly seen within what narrow limits, under ( to:, by judicul evidence. As Spiritualists, and in view There are many though in human nature which psychical of the records of Spiritualism, we are willing even to accept

approximated to a solution of the problems involved in Grant the existence and the alleged capabilities of this these latest acts sties, or processes of human nature. Air suspected "unconscious secondary self"; and psychian takes Myors speaks of them as "supernormal", but we those the place of Spiritualism. If this unconscious agency them neither above law, nor in violation of law (almormat), within human nature can construct anagrams, it will be ut in a cordance with laws (normal), the operation of collicult to fix a limit to its alleged powers. It may rap, which a not understood. They are not the less normal, tip the table, materialize its hand, face, or full form, get because they are not more frequently ar commonly displayed between slates and achieve a psychograph, and, in thert, go and observed. Up to our time, psychical exploration has through the whole gament of the se-called spirit manifestabeen superficial, and has not found "reason to suspect tions. The only obstacle to this conclusion is, this suspected the existence of such activities. Now it does "suspect", agency is not yet proved to have any existence beyond the and if it is logical and truly scientific, it will go on to test conception of the psychical researchers or of Mr Myers; and prove, material of "begging the question, making but when this obstacle is removed, the Psychical Research suspicion and hypothesis the basis of learned and ingenious Society will be functur efficie, for the mysteries of ration aution, as useless as a chain that is loose at both ends. Spiritualism will have been, not explained, but explained

self" may be good and sound, but, at this stage of his which in thanks the author very much. Jurisience of Light

# A PUZZLE FOR METAPHYSICIANS.

Angel S Many

The following narrative of a vinon and its verification is from the pen of Mrs. H. W. Baker, in Harper's Monthly Magazine, In reproducing it we have only cavitted redundancies of expression.

In Voyember, 1854, writes Mrs. Baker, the thip "Sophia Wasar," Captum Codman, sailed from Boston, bound for Polyra Italy. On board mus the Roy, C. Walker, who had been prescribed a voyage for the benefit of his health; he was a relative of the owners. With him was the Rev C Stetmon's as Frederic both of Modford, Mass., who was also recenan alog a voyage for a similar reason. The latter went on board resolved to take the active duty of a seasons, with the consciousness, it will far more govern that domain than be to the stand to the stand have been stances governed by it. It is also true that it is symptomatic with a doubt at the stand of carde or car. We know the circum stances through the vising man's family being on intimate terms with

Towards the end of 1836, when the "Sordin Walker"had been away two years, I had (continues Mrs. Baker) a nearly fatal when along homogrape, One night, when along the very many friend, Mrn. Button, left my bedrale, to an add an area of had taken by mesh in a carthe majority forms and were not at a second to at the majority and a second to Astronomy To a see lates to be such that the life board to the second to How gone

which the less advanced would regard as superhuman, but which est are not flow or vine at our revers a section ties would built type tending rapidly to become normal in mankind. The or or one is accordance from the range of starting and govern also by a territories for as four of a covering age at Sympa and a concern a class age at the standard and conclusions of the sciences began to pure the diverse constraint of a race as no reson of norm and I was the individuality growth in the larger mass of intelligent plent entires. The true body is the expression of the conscious - e-que, who date not give free play to their own pure impulses ness for the time being, and corresponds to its quality.

The great change in consciousness to which all moral progreen totage is the living sense of because solidarity. The phonomena of sympathy, practical padanthropy, absorption of the mind in world problems, the growing dissolutation with self - ed interests, those latter-day tendencies are merely the the avenue of the principle which has been in each with color by rough at my exit its care that are a the organic stage of which was selected as a way a Caratest. They is to say, the tendency is now recognised for what it is, wheresa in its earlier stages the humanitary lustinet had to work unknown by means of agencies which seemed self-neck ing merely. "Symphetimita" traces with philosophical moght and powerful expression the workings of this force as it appeared first in the practical energies of representative menthen in the growth of the mond ensures as in the I tenocinal systems, this in the intimating process of its descent it reveals itself under new organic conditions of sensibility. Beginning in mathetive impulse towards amorting and maintaining homen adulately in the external order, do off a see this devetion next attach there connection recognition ir institutions, laws, and amendities. The intellectial progress which succouls advances further the humanitary napolic, or rather as the symptons and expresses a of its advance. But the epock of pure thought our only attent to describe a few season statement of the problem of human life and despite a field tion just been use it discovers that not in the fidewith where a lies. And there we much remain, measure now order of personne experience can angune the mandate on the anterpretative force tions of intelligence, refining to be ignored. The fatellest of selongs recognises only a seasonal season for the Europe for of must planys belong to the external and a conas on at know that even a alight shifting of the age is

r reshib to if sepondality, discloses a new order of positive and irrefragable experience, by nafelding new faculties of se so has prese soon. It will noccept up tostunony to such expose on a constitution atmospheridal principles of biological es are no six ald be enticipated

In the fine and impresence chapter on " Intellect," this madequacy of mind to transcend or staticipate aspectored in privatedly stated. Stronge as to many it must seem, the " seen if light and leading," those who carry intellectual culture ansecond do attamment to their highest points, are not in the van of evolutionary progress, and "cannot be considered as the special children of the movement, as the products of its most marked forces, nor as the hamilds of the next departure. For those who put forth the pretention to lead, and who mainly are the most followed and admired, are at this hear not men and women with the leaden fire that propels maid and destroy in the main, but men and wenter of the luminosis in west which foods itself from with at a re-college, exercises and cannot produce it; which dissects the sents of force, but does not transant it; which registers, classifies, and averages observable facts and acts, but less an scase prophetic of different tausibilities, which is, despite the anquestionable grandeur of de perspections, and the vestly increasing numbers of its presented, nevertheless that class of intellect which marks the close of a long growth-cycle, and will not prounce another It is the intellect which stands with its back to all the future,

The phase into which secure has most recently entered came to be the phase one of a sch fresh sciences will spring, for science in this novel mood comes to kill nature if she can-comes to forbid that men shall feel in other ways cost these she has made note of, and therefore comes arresting, of she can those new activities which grow from new somettions. Science to-thy is so absorbed in investigating that world of past experience to which it estentationally confines thelf that it denies the right of fresh experience that part of the scenes which, though a small part, senses held translates as life into its appropriate form and representation,

Unit supposition we should have permanently among us a race in stry orange of popular imagnation, have grown to tyran a in tion can perception, lott they incur the ridicule, ce sun or concer a tait or open those who worship not at the popular shrine. . . The true genius of the human family is not that which shines , it is growing quietly to be the form which will receive and reductribute the spiritual powers that are fast perminating now throughout the universal human breast, and notice no churn to power as mind alone." To the question which here auturally arises . By what new experience, then, a this statement substantiated? the back is a reply. That reply us, in a single sentence, " personal sentiment of universal quality" (p. 252). "The sense that formerly anothered, by weight a a tations and the more money winners positive to makers to a the tenant of the or case, has become a common and fadmour

split to must be without as a more weeks of a time century in only marvellous proportion throughout all highly developed some unities , and the sambers, yet was-united, who hold r man berst of form the latent force of this high sense, and on not crew at the transporter regions of the outer tetrorbots, a at t to an uncorposom reservo in the embattlement for right which awaits only, for the most part, a touch more of the fix algorithm a tay have decorrage threshold a constant making the way good (2.3)

In other to materialize the connection between the man for the discountries which is the discountries to backwith reson a ordine a tary in this times to that the full metaphysical against one of the latter should be appro-

The proper for a waveful which the decided maintain of all undent natures challenge to war to our our provest in experience, in that the absoluteness of union means constituted singly at he was a single of a consumpty of the facilities in to a national service of supermental method within the modern and the forces turning from another metire than one humanitarian, withor inspossing the quality of their housemess" (p. 218).

"The question of how personal actialection shall be ostensed, is closed; and reopers as the demand for possession by his larger self, his entire race, of life expectly for perfectment

Now a this through the strictly logical, and thus seriously de aquite of the munt plementary germ sympton active in an article munt, insplan a continuity of the in one concess as organic. It was positive from the best, the consequences of it is its inthe there are a Ty the ight, now ideally visible, if my ments to be I huma prigitess or this earth-for with yet gior attanta not mado k anato scenare we are reahistory the vary of its purpose, and see in all its bewildering revolutions and anarchisa, its wars and politics, the steady pressure of an anitary ife princip against reasting, our retreating ad viduolant. It is each at was our bone that afo-principle can cultivate it age at all sade of outer arthretical and lower inclination," so that ' his moral statute adds to steel growth upon growth with a rapidity proportional to his ready bedience to the claim of each Divinely tyranmeal impulse is weil and elequently set forth in many noble posta, ex-

But the chief thing is that the aftrustic motive which has beyelviore been regarded as a special virtue, an adventment of the moral life, is now to be recognised as the essential principle of true humanity, the characteristic quality and demond of a equerounces really human

Now if it is essential humanity that is hereafter to be expressed in the individual consciousness, the first ovidence of this being the negation of self-control individuality which such a development amplies, nothing can be warning in this new consciousness which belongs to the true and complete conception of most. Thus much we can may, a priori. For, on the hypothesis, it is now a metaphysical life principle that has diffused itself to exost. It would atrangle the future rather than allow the through consciousness so at even to find expression in organic free development of forces with which it has not learned to sensibility. The motaphysical is no larger metempirical, and deal. That portion of the high intellectual movement of our therefore even to sensation and perception must be revealed day which, though a small portion, is the most remarked, and whatever belongs to the vitality thus derived. Every faculty

sophical sees, or may manifest in an exalted emotion, or take may execuse. form of beauty to the senses. If the Divise nature or feren is bounc, and man is God derived, this essential biumty will be present in his new-found consciousness of true humanity. And if that consciousness extends to mater sense, the latter will deal a in the its own mode, as sensetional recognition or even oba congresentation. Thus the woman as soul principle, becomes for sense a woman but for sense only further consideration on the "Symphotonia, and some other points, must be reserved for a concluding articly e e M

# (To be continued.)

THE D MANY OF DARWIS. The Borgett Series. No. 2 1 inf con y sac a low Later and Laurial, 1995. May a a set to aga to Sychological Press, 16, Centren

When Professor Elliots Comm put forth his well-known Biopen: A Speculation on the Origin and Nature of Life,"I had samme of astroducing through those columns that little work to English Speritualists. It seemed to me to contain within its exty-six pages of dainty quarte as much sense, insight, and matraction as I had found in many a more protentions volume of ten those the size. I me glad to find that the publishers is v arranged with Dr. Cones to bring out under his editorial derection a " acries of concine comys on live questions of the day or of historical research in Rolligion, Science and Philosophy, prepared by writers of the most entirent ability." There can be no question of the value and interest of such a series if the level of the first volume our be maintained

The second volume as also from the pea of Professor Cones. It w a manually prepared as a monorful address to be delivered for he have a trust my of the National Medical College at W.s. ouglos, at the opening of the session, October 2nd, 1882 and we have it without material alteration. It must have been, I cannot but think, with some considerable surprise that the Professor's audience listoned to this lively jon d'esprit, to what he hunnelf calls " these anagogies, veiling from the unwise the first principles of biology." In style as well as in matter the address to as little like the dull and respectable orthodoxy of seconce as can well be omesived.

The form is dramatic. The scene opens with the burnal of Durwin in Westminster Abboy. The verdict of science as delivered through the mouth of the President of the Royal Society, Professor Huxley, stamps the value of Darmin's life-

Scene two is isid in the underworld. Darwin descends into Hades, and witnesses the transformations of matter from Monor to Man, the evolution of a human body. He sees the processes at which he had in the main correctly guomed: or rather which he had in a measure demonstrated to his fellows. But he had perferee stopped there. Into the intere of man when freed from the body he had not penetrated. He was now to follow the transubstantiation of matter from the corporad to the appritual state - the evolution of the human coul. How his Diemon (Socraton) teaches him, most be lourned from the book rised. No extracts for which I have space would convey my fair race of the name are

Sceno three is in the overworld again. Socrates and Darwin our cree, and the Socratic method is applied, with abundant humour and skill, to test the Darwinson theory of evolution Here is Darwin's summation of his fath.

SOCKATES. - "Do thy duciples search a Psyche in the body? Do they think of man's undying destiny?"

DARWEY .- " Do they not, they mis the spirit of my teachings and the lars of Nature, couched in all phenomena of life, have no agnificance for them. There must have been the time, the place, where Being from Not-being came. There must have been the ungin of life, in time and place alike unknown. To this not ecionee nor philosophy applies, but idle speculation drifting,umntelligent, or reverent faith as fotile. Nor am I one with those who, bringing all things out of nothing, would discourse too knowingly of Dorty mor yet with those who, fatness, would being all things to mought by stripping them of meaning.

and, therefore, we are not to be startled by the statement that But, given commit continuity of Being, I would seek the processes sanso will personify that which, metaphysically concerved, can by which a something is evolved from something antecedent and only be distinguished as a principle. For it is the function of the orderly unfolding of embedded life from simplest animated sense to dramatise, to give us an object, a representation particles to bodies most complex-man . . . As the end of Such representations are as real as any representations can orolationary process is not yet, science will wisely not no limit possibly be, but we must remember that they are only the sense- to the possible, presuming not to say what form and substance form of cognition. The very same reality may inspire a philo- Psychonicy assume in future states of being-what Logos Nous

Of what use is the investigation of the se-called plane. to reconsty rises to the lips of all thoughtful persons who have not exactined the subject, and upon whose attention it ! is arged for the first time.

facts are worthy of examination , that the physical phones of the party of the physical phones of the physical pho toons vaible at spiritual scances are as objective and real; chemist, the studio of the artist, or the work-room of the mechanic, that they may in many cases be tested in the same manner, if not to the same extent, as are tested many of the ordinary phonomona in nature, via, by night, henceand musual facts, they are therefore worthy of examina-

merely as physical, but as psychological facts, and point to a tield of inquiry in direct antagonism to the prevalent unterialism of the age. The ordinary philosophical arguments in defence of a continuity of being after the death of the body, fail to satisfy critical and segment wants that have a been trained as biological and physiological sciences. The Old Testamout is practically silent as to a future ofe for norm the problem of mediumship, and the tendency of man and the teachings of the New Testaisent respecting a future state of conscious being, do not, confessorily, commend themselves to the many of the broad and entable stadeuts of nature.

If the facts of Modern Spiritualum antufactorily prove, as they most certainly do, that there is high intelligence, or indeed, intelligence of any kind, apart from cerebral organisation, and if, beyond that, the invisible intelligences who communicate, persistently and systematically affirm that they are persons who have been embodied in this world, it is difficult to see how such facts can be logically rejected, and not difficult to see that they are merupatible with Materialism and Positivism, as commonly taught

"life and immertality " to light, and believers in Modern Spiritualism instead of looking to the grave as a hopeless leap in the dark, are cheered by the prospect that death is to the virtuous an immediate portal to a brighter and better condition of being.

If these alleged facts be true it is not difficult to recognise the Cai Hone. The great present want of the world is an assurance as to a future life of absolute justice, reasonable retribution, and unimited progress, through self-sacrificing efforts for the good of others.

### THE HISTORICAL DEVELOPMENT OF THE PSYCHIO FORCE THEORY

Carl Kissowetter contributes an article in the July number of Psychiada Studies on the theory of psychic force in its a writer development. The writer shows that the contention between this theory and that of spirits has ox me. It is very ex see that there is, a carry see to run a apare the stead of the faction to many colors or and a stead actualizationily solved a cut of a cited and the an in an exclusive belief in sparita." The inquery is not tracer to a the Alexandrian school of the New-Platon . A we assure continue later (who explained even "physical manifestations by the action of the soul-force), Alberton Magnus, Roger Busin. &c. Montion is then made of Peter Pansonara, who systematically expounded the sies in his book "De Incantacomput," written at a time when the witch personations in to not of Modern Spiritualism? In a question that spot | Daty had exceeded all former experience, an explaining the a chosed distilerie paychently and attrologically. singularity of the views of Cornelius Agripps with those of the modern Theorephate in this respect is remarked Particeleus, Van Helmont, and Florid are likewine all The answers may vary according to the intellectual authorities on the magnet powers of the (unconscious) soul standpoints of the inquirers. # CLASSES K AND M - SPIRIT IDENTITY AND THE SPARIT RAP .

It a few said that the communications reserves from mese me accordes to the spa per the most of the said the the arrange grat least that the information imported is within the knowledge of the persons present. To show, however, that that is by no mount invariably the case I should like to give you the particulars of a sounce hold some time age at the licens of a Mr. Mansell, whom the messages obtained were in no degree whatever within the knowledge of any of the sitters, but were afterwards extendestorily verified. The acciding on the occurrent was Mrs. Everite-a buly widely known and highly esteemed and get Non-context of the first to the devices to the cause and the computey included Mr. Everitt, myself, and, wife, Mr Manuell, and two or three personal friends of his, all being well-known to each other. I ask your attention to the name of Mr Monoell, because on that will lang none of the interest of my marrative

We were citting under the full blaze of a gas chandelor when some lond raps came upon the table. Mr Ereritt che is sered to get the name of the spirit spelt out, several tomes without success. I suggested that perhaps the spirit had not communicated before and did not know the usually adopted segmals, and I requested that one rap should be given for " No." two for " In serior and three for "You," and that for other answers the sperit should rap at the letter required while the alphabet was being repeated.

I then saked, "Have you organizated before!"-One load rup indicated 1 N

"Will you endeavour to spell out your mane while Mr Everitt repeats the alphabet?" Three raps, "Yes."

Mr. Everitt repeated the alphabet very quickly, and I per-celled down the following letters, "TH 4-M A-S-M A N-S

"Oh," I said, "Thomas Hansell! This is a friend of yours, Mr. Mansell." But Mr. Manual and No, he know no such person. Nor did anyone else present. The experiment was tried again, with the same result-"T-H-O-M-A-S-M-A N-8-I repeated that I had got the mone letters as before, when a loud single cap indicated that I was wrong; and so I saked the sport, letter by letter, how far I was overect. I then found that

T.H.O.M A.S.M.A.N" was right, and when the alphabet was again repeated I learnt that after the N T was interiors. and not " S." the letter mimediately preceding. The same was then without further difficulty spelt out-" Thomas Manton Questions just to the friends present satisfied me that no one in the circle had the slightest idea of who Thomas Manton was ; been in the other life. The answer came-8-I-X

"Oh," I mid, "six years?" An emphatic " No.

"Perhaps you much tex years and so many months? Tell us Aparer O'T.E.

14 Oh. six years and ten months?"-- " No."

" Go on "-" T E E---"

Oh sixtoon years? 13

W. .. a HUNDRED

That was seen that you have been in the other after V on district Justin Well, try again. - Sixteen hundres and seventy-seven

Do you mean that you have been in the ther life authors hundred and seventy-seven years ?"- No

Le a mean that you entered the other life in the year 3 410

Toll as where you were born !

Answer, Laurencelydard !

Knowing nothing of such a place as thus, I saked where it rea, and the reply was spelled out correctly and rape y

Whore were you huried?" Steat New up a

The marit afterwards told us that he was a Noncombornist divine , was at one time chaplain to Charles II , was ofterwards spected from the Church and imprisoned, that he could say as more then, but that if we wanted further information we could hearn semoth ag of him at Wadham College, Oxford. Headdo. he ne that he had been introduced to the same of a he conformat friend whom he had not in the other afe, Dr. Jahor Burns, who while in particular, had attended some of Mrs. Everità a adament.

On turning next day to a Clarge Lat in search of a paral of a mans that might bow some resemblance to " Laurencely dard. I found " Laurence Lydant" in Someresthere. This gave me some lepo that I might flui all the rest of the narrative to be correct, and as the readout method of testing the mosages, I requested the Rec. W. W. Newbaild, who was as the habit of frequenting the British Misseum, to endeavour, if possible, to verify the facts for me, telling him, however nothing more than that I wanted a brief sketch of the life a The par Mean on a New order and drying. The following is the was was the Nowbankl applied to too both day, and which, it will be seen, proved the necessary of the communication is grocy particular.

# EXTRACT .

"Maxiox (Thomas), a seamed Nonconformist minister, was toruset Laurence Lydered in Somersetshire, in 1626, and educates at the Proc School at Tiverton, and at Wadham College, and at Hart Hail, torford. He then studied divinity, and was admitted to descouls orders by the colebrated Dr. Halt, Bishop of Exeter Victorians and fire mine one at Sent in hear sections, at the same or appared the cases to under, where he was admired for one purper the meter area amount 1648 was presented to the living of the New Amounts by Colone Popular and here preached those for the up on position of St. ones are St. Jude which he after wante published in 1631 and 1632. During his residence at Now ington he often presched at London, and is said to have prenched the accommendation for the Sons of the Clorgy, an institution then set on fact r cells through he principle of In I an are on a bishop, who preached the first. He was also one of those who were called occasionally to preach before the Parliament, but being strongly opposed to the execution of the King, he gave great offence by a sermon at which he touched on that subject. In 10. I he showed equal contempt for the tyratery of the usurpers, by preaching a funeral sormon for Mr. Love, and in neither ease allowed the fears of his friends to provent him from doing his duty In 1050 he was presented to the averag of Casen Coolen to be bad, afterwards Duke, of Redfere, who had a log respect for him. At this church he had a numerous auditory or us up Unker, who was one of his honrom, used to say he was one of he best preschers in England, and had the art of reducing the substance of whole volumes into a narrow compace, and representtowards to a require an event of East or eye on but for their at the Household He was not on ret a loby Parliament one of a committee of devices to draw up a sekenic of fundamental doctrines. In the same year he was appointed one of the committee for the trial and approbation of ministers. In 1660 he co-operated openly in the restoration of Charles II., was one of the ministers appointed to wait upon his Majesty at Breds, and was afterwards eworn one of his Majorty's and I must asked the sparit to tell me how many years he had chaptains. In the same year he was, by mandanes, created D D. at Oxford. In 1061 he was one of the commissioners at the Savoy Conference, and continued preaching until St. Bartholomow's Day "We make no apology for reprincing this case impour of our cuties as one I is a good case of its air and should we thank now or no over in less. Record consume for the sake of future convenient, particularly during the indulgence granted to the

Nonconformists from 1948 to 1070, but was imprisoned for continuing the practice when it became illegal. # RATIONALE AND EXPLANATION

BY S. ELDON, M.D.

A place human development, and there will be an Omega , familiar to them. They are the godinar of this earth, or in the language of Aristotle, a beginning, a saddle, and and course to fashed (as the Scotch say) with the an end. No power can stop the on-flowings of these waters importanees of even a fresh suggestion in the domain of human advancement. From a hidden fount they gusted of science unless from themselves. They are the forth by an Omnipotent fist, and onwards they will roll great "I am" of every ago; those who alone can paer till lost in the great ocean of an exulted order of being into the future, on well as tell of the doings of the past The spirit of man is embrined in an subodied form, and There they stand, like a mighty Tmoriffe, as if the vast sea the Book of God-star-studded Infinity and occur-grated of rolling overtexand over-developed phonomena, surging at Earth—was thrown wide open for its mente-cerebral its lang in over-conscless foun, was always in a state of development. Without a guide to instruct, or a guardian perfect coim. Nothing seems to affect town; hereby the angel to correct, man had to read off, as best be might the experience of past ages, nor the changes of public opinion. mysterious symbols of ereation; and he has read them, and but the use of anhumm of forms of knowledge, nor the that, too, with wondrous success; but ages have been the evolution of new relationships, as startling in their results term-time for the acquisition. Sometimes he has fallen into as they are grand in intellectual conception. There they griorous blundans; at others, the spork of truth has been remain, soild as granito and impenstrable as adamant. elicited by one electric or edic flath of genus. At one time Surely such incarnations of self-exteen cannot always he has been clated with success, at another, he has stood remain unaffected by the clash of dreumstances and the and gazed, and and "Tell me, created symbol, what meanest rush of new thoughts which flood them on every side. At thou?" But no answer could be get. Night after night the present time mines of fresh strate of thought are conwould be think, but empty conjecture was often the only tixually being opened up, sparkling with dismonds of pabulant for the future workings of his sporit. By observat matchless benuty. From the artesian wells of a dogged tion and experiment has man invoked nature, and the result persoverance, lit up with the star of germas, bubble up, over has been, more or less, as admixture of truth and error; - and muon, streams of ideas, bright, levely, and fresh as if manufergreetation and multranslation of nature's symbols direct from the throne of God. Nothing is still. The are apparent in every domain of learning; a thing quite un-world of mind is shaken to its very centre. Change is sex aroulable, as error is necessarily inherent in the development | the characteristic of everything. The old in thought, feet of spirit, when in connection with organized matter. The mg, one after non-m lest in the coming-m-tide of that which thought to be truths of one ago have been found to be errors in fresh, and new, and startling in the next, and by refining and analysing processes, repeated We see the truth of these remarks in the reception, by again and again, real knowledge has at last been arrived at the scientific men of our day, of the discovery of a new Truth is not so deep down in the rock that the bonner force by Baron Reichenbach, which he has called "OD," of genus cannot break through and brang it to the law, which is thought to be different from caloric, light, heat light, but a certain class of men, endued with conceit, and electricity, magnetism, or any other dynamic influence at the pride of place, have, in every age, assumed a superiority present known. Although this new force is highly refined over their fellows, and prevented Troth from showing her and attenuated, and requires parties who are "sensitives " radiant charms as soon as she might have done. These born, to peresive it in the dark, yet, by Dr. Gregory, the are they who, in every period, have thought the human interest aguisace professor of chemistry in the University mind had reached the some of its power, that the whole of Edinburgh, and many other gifted men, not on v the wide universe, in its every form of manifestation, had dis- proofs of its existence, but its absolute difference from all closed all her secrets to the flights of their genus, or to other dynamic agencies are considered as complete and comthe profondities of their researches. In their estimation, vincing as any of the demonstrations in the elements of nothing could be developed or known which was not already | Encild. Adam Smith's "Wealth of Nations" was a dead

282 tous has scotte been unpeded and sivinsation kept back 302 Although we live in the latter half of the muctoenth century, this made kind of opposition to a new truth in 300 often yet seen. Men of a certain ninke of until hate new ideas, and not their face against them with a The Editor of "Leaves if to be distinctly determined opposition. Strange to say, this is often the understood that he can accept no responsibility at to the case with men if sarring, and the more so, indeed, if Free and courteous discussion is invital, but writers are Their self-sufficiency is a complete barrier to the inlet of conceived opinions, or already-packed-up notions, in quackery, charlatanism, sheet homeonie, or sensething SOME ODD "FADS" AND FANCIES; THEIR worse, In fact, these men assume a thorough a ow see of the areans of the universe. In their hand is held the key to the temple of all knowledge. letter for 100 years, till Cobden and Bright rose to demonstrate

the good of mankind. And so it may be with the discovery society. of "OD" by Baron Von Reichenbach, but we hope not. Take two similar glesses of water; let transmitted sample form, and also to expinin what this new "OD differences. force in and point out its hearings, as manifested in . From the moon "OD" streams down, and its effect on them, in word, thought, or action.

not eat from a spoon made of powter, or Britannia, or realight had sent a stream of "OD" through the wire. Corman metal without names, or drick ten, or collec, or | Reschenland, the discoverer of creceote, paraffin, ammung " oddition" appear in groups in a fibront individuals. For glass, showing that it was material. example. He who linter yellow, linter the looking-glass, Professor Endlicher, who was a demi-censitive, was unwel, in the nave of the church. These eduction or without his knowledge. Having mt for two hours in poculiaratics, seem to have relationships amongst such this extreme darkness, the professor, in terrified astonish-Language and Page

of a chair, the two ends being free. Let a sensitive hold like the leaves were direly visible. He also may the cat, the hand two niches from the pointed end, and he will feel a fine butterfly, and the bird, all glowing with this beautifully cool air , but, from the other, or blunt end, a warm air wif. desicate Odic light. A man, in the dark chamber, feel to issue forth. Let this crystal be next taken into a appears, to sensitives, first like a radely-formed enow place of deepest darkness, the sousitive will seen porceivs man; then, like a warrior dressed in armour; and the whole body perveded with a mild aght, and from the astly, he looks like a Sery giant. The semitive, pointed end, a classi flame, as long as a man's hand, will looking on himself, seems all aglow, his hand presupported; but from the blunted end, a yellow-red sort of a senis the appearance of one held close before a candle vapour will appear to be issuing. This delicate light can in a dark room-longer than satural, and from every only be perceived by sometives, and Reichenmach has tested longer a floare-like extension seems to stream, the last it in every possible form, in thousands of cases. Being joint and the finger-nails being the brightest. The human more refined and delicate in its manifestations, than body is not only all aglow with "OD," but the colour, or light, or electricity, or magnetism, by Reichen-right hand and right foot, indeed the whole of the right bach it is named "OD" or the "Odic" force, and ade is of a bluish colour the left hand and left foot, it is found in all bodies throughout the wide nurverse. It in fact, the whole of the left side is of a yellowish colour; streams from our great day-star (the sau) with the com- the "OD" quantations from the body being precisely mon light and heat, but, it is neither of them. The similar to those coming from the crystal, the magpointed end of the crystal gave out a blue flame and a net, and sumight. It has been found, by experiment, refreshing coolness, so, by experiment, do the blue mays of that the Odic sensations of touch were different, the right, the sun. The blant end of the crystal gave out yellow and or blue hand, being put into the left, or yellow hand, of a red mys, and produced a lukewarm, disagreeable sensation, sensitive, produced an agreeable, coolish feeling; but the for all forms of ignorance—to account for the varied rise to an unpleasant feeling, and is therefore avoided. Per-

to the nations the marrollous adaptation of its doctrines for "oddities" which attract notice in the different grades of

Neglected though his work is at present, a gentus in God's light fall on the one, and reflected light on the other. The good time will doubtless spring up, and show its bearings on water in the first glass, to a sensitave, will taste warm scrence, and on an enughtened form of Therapeutics. In and betterish, that, in the second glass, cool and sourish these papers we propose to open up in a succinet and No h mistry at present known, could detect such delicate

society. These are hought by the compressionable to be the poor se is are is well known, and has been so, from nere farence, peculiars les, or one eles es tel those who show thus minera stal; hence, from the Latin ferna, the moon, the word lunated is derived, and the place of his confine-In society there are to be found many persons who hate ment is termed a lunatic asylum. All lunatics are sensitives, yellow, but nearly all love blue. These two colours are either natural, or superinduced, in a greater or less degree polar opposites. Many a maxim likes to lack into a mirror of impressionability. Moonlight, being reflected light, a and admire her own their rottes, whilst others turn away, glass red held in the left hand of a sensitive, in the moon's with a feely g of unconness, as if it breathed a hateful ways, will convey a lukewarm senention; but when drawn breath at them. Some people who travel in a mile ty ato the shade, the sensation would be cool. The same carrings (however severe the wenther) must have a experiment tried in sunshine would be the reverse, whilst window down, and are thought uncivil by requesting the here in sanishme, the red would give a cool sensation, but but, as we shall see further on, there is an unate when drawn into the shade a warm one. Take a copper feeling for it. Others swoon away in church, but wire, put one old in a dark chamber, and the other in are well at home. Some counct sit at case soon he soon the end of the wire in the dark chamber between two persons, but must git alone. Others can attenues with a those as one as the finger, showing that

chincolate bodied in brans vessels, without discomfort, and other substances well known to the chemist, and Many persons dislike much-cooked victuals, fat, or sweets, "though hat, not lesst," but greatest really, of this Othe but much prefer cold and slightly sour kinds of food. Some force, took one of his sensitives, Miss Nowotny, into a feel uneasy if you shake them by the hand, but to hold chamber of the deepest darkness, to test if she could see their hand in yours for a time would be perfect torture, mything. Unknown to her, a magnet had been placed. Some people go to sleep at once on the right so ., others After some time, she said she saw a magnet with a blue can never go to sleep on the left. Now are these more flame stre ung from the north rad, and orange-conoured funcion, or the result of bad habits, or of defective educa- flames streaming from the south end. This light was collected tion, or of discuse I Searcely, as some of these so-called suto a focus, reflected upon the wall, by means of a burning

he who loves to sit alone, opens the windows of the rail put into the professions darkness. A cat, a butterfly, way surriage; he who can alcop only on his right side, is a bird and a plant in flower lad been placed there other, and to acronge themselves in groups, and it will be mont, suddenly eried out, "I see a blue flower-a seen, later on, that the cause lies deep, and is inherent in gloxiana"; so it was, a gloxiana speciesa; and, as nothing can be seen without light, the bods, pistils, Obtain a natural quarts crysta, and put it on the arm anthors, flower-leaves, stalks, all were aglow, and even so do the yellow and red mys of the sun impart a similar left, or yellow hands, being joined, or even approximating, sensation. Thus, it seems, that the colours, him and produced a disagreeable coolish seasation. This experiment yellow, have other powers besides making themselves was tried with more than a hundred sensitives, and always sensitive on the retine of the eye, and there will be found with the same result. Hence the reason, why some people something more than more fancy—that scape-goat word dislike to shake hands , they are sensitives, and the act gives

hars this may be at the bottom of the balait of some persons giving the finger only, the less the surface in contact, the alighter the sensation of unpleasantness. It is also evident why some persons avoid crowds, as people before, or behind, offer resistance like poles, and thus give rise to a peries of disagreeable sensations. For a similar reason some men cannot ride on hornelastk because the like ades of the rider come in contact with the like sides of the animal, the gentleman, in this case, is a born sensitive. For a aimilar reason some ladies cannot carry little children on their backs, not even for a few minutes in play, because like poles they are brought into contact, the ladies, too, are

August 15, 1863.1

At a banquet, the guest to be honoured is placed at the right of the host. It will now be evident that there a a deep-scated cause in our Odic natures for to a imb emoriaarrangement. He, on the right hand, gots the " OD negative of the left, who, in his turn, receives the positive "OD" of him on the right. The one on the right gives as much pleasurable feeling as the one on the left loses, and rice result. This custom of honouring a guest is not merely formal or traditionary, but clearly springs from our immost natures. There are thousands of cases in life, of which this will serve us the key and the explanation , and, consequent y, it will be seen that the peculiar people called "oddition," are really natural consitives, whose feelings should, at all times, and under all eircumstances, be most scrupulously respected.

# (To be continued.)

As to the operation of will and faith in magnetic cures, Mr. Cadwell, who gives loctures in the United States, writes in Facts " A man came upon the platform at one of my lectures at Welles Hall, in 1873, among others who offered themselves as subjects for memorio experiments. I found him a good subject. He was evidently a obranic invalid. He got better of his illnoss and wrote out his case for me. His name, it appeared, was Augustus Done, of 34, Broadway, Lowell, Mass. his doctors had told him that he was consumptive and luck heart disease he was weak thin, we git to only 194 pounds, and anable to work. Two of his second cancer told him that I cured where I measurated. He knew no long of mex notion, one gove sented to their helping him to the Hall, and then up the platform-stops. After the experiments he walked home, alegawell and naturally got so much better that in a few weeks he rehe is strong, rugged, and weight 200 pounds. My will had | the whole investiture of some. That also is the expression for named his work, I have just (May, 1883) seen Mr. Data; been exercised, not to core, but to use him as a subject for my measurin entertainment, and so to his faith, it was no more than acquiousing in the recommendation of his sequanitance,"

Vector Hroo's friend, M. Bomon, thus writes in the Mersis Smrite:"The last time I saw Victor Hugo ho said, 'If we see no more of each other in this world we shall most in the next." His wife and daughter, whom I mut in London twenty years years ago at Mrs. Milner Gibson's, were also Spiritualists. After the death of his two sons he wrote, " While we wast, death somes, and they to whom he comes leave behind them monraers. But putaence ! One after another we all go. Douth hath taken the young , but one day, perhaps soon, the some will be followed by the father, he will lie as if asleop, he will be put within four beards and be beene to the sembre opening of the carth, the grave What looks like a departure there is really as entrance. Then he will know what he had hitherto dinily believed , the eyes of the body closing, those of the sparit will open, the invisible become the visible, what to man is the world, will be to him oclipsed, while tilence reigns around the grave, as the earth is thrown upon his coffin, the mysterious soul is pussing from disness to light , those who, to him, had disappoured, reappear the truly living, who in the correstrial shade are called the dead, present themselves in the radiance of a new vision, call lovingly to the new-copter, shedding their smiles upon his danded countenance | Thus goes the soul that bath well done its work, learing here some regrets, followed by serrowing faces, and perhaps some tears, but received into the realm of oternal brightness with joy, the garb of mourning exchanged for a robe of rejoicing. O my loved once I'r

### REVIEWS.

# "SYMPNEUMATA."

(FROM ANOTHER POINT OF VIEW )\* (Concluded from p. 379.)

It is no disparagement to the experience described in this book to my that it cannot be estimated without reference to the now psychology which has grown from the study of sommanibule conditions. In its most recent developments in Garmany, that payabology is also a philosophy which fully recognises aim's transcendental individuality. What for the philosophics of Soliopenhauer and Hartmann is the "unconscious" source of communitation in the property of the property bach a subject, melading, but far exceeding, the personal solf consciousness. The gorm of this view in modern philosophy is to be found in Kant a suggestion that there may be two persons of one subject. But though independently arrived at in recent speculations, it is very similar to the account which Swedenlage gives of the two-fold consciousness of man as a spirit and as physically embedied. And it has very important consoquenees for the interpretation of all transcendentally derived experience. For, as the normal Ego knows nothing of the transcendental subject, may entrance of the fatter into its conamountoes is as that of a stranger. There is, to use Du Prel's expression, a "self-aundering" at the threshold, when this last all displaced to submit a transcendental content. In the deep drawn, or communicabile consciousions, the transcendental subject stops forth as a second paraconlity, the necessary form with which the dream-organ (wherever we place it physiologically) myosts the new impression. Hence, the "guides" and guardana" of sommunbules and mediums. Mercover, we now know that the communicatio, or transcondental functions, though never mingling their corner mucocourts and a wiking is at a more code men y their with well, our with

and act amultaneously with it. The read concounters is an one, and by far the most important respect more convenient with reality than that of some, for it is a faculty in more entimate repport with nature, but he another respect it is the source of an illumon to the lower consciousness which has to translate it into the terms of solite.

The personification of the Symphonius may be such a translation of the transcendental consciousness of the indivisible biguity of man. But not on that account would it be an experience less significant of a genuine decelopment of life Nay, as a constant phononimon it would be equally real with us of a transcondental nature. That size would be an illusion. for a degree or mode of consciousness which should otherwise mediate the forces impinging on it. In this sense of iduation s such as all objects lication or mainfestation : it is the Mayn

of the world

That sense should represent according to its degree and node every emential fact of the inner life would be a consequence of the conversion and purification of the sense conser-us ous from the exclusive attachment to externally derived objects, which comes from solfish pursions and desires. This is usually described as a conversion from sense finelf. But the ' subsurface" sensibility of which we hear so much in this book is to be regarded as the true ultimate of man, cased over, as it were, by the incrustations of a bater consciousness, an out growth of susceptability to sub-human unfluences. This subsurface consibility is identifiable as the cost of the somman who nonscinusnosse, a receptivity to transcondental unpressions. Any disintegration of the courser nerve enfoldment may partially reveal its netwitten, and thus it is that in the once of seminam bules and modulums those activities are not ordinarily associated with any special moral elevation. But there cannot be a doubt that atrophy of the conver semibilities would result from their disuse, that is, from constion of the desires they mediate and gratify. Biological evolution, by which the present sub-surface sensibility, with its finer rapports, would become the external degree of human consciousness, is thus an affair of moral orelution. Only thus could this subtle organism be protected

See Barrier of this book in "Ironit," April 11th, 18th, and 25th of the samt year. Symphosometr may be obtained of the Psychological Press, 15, transfered, 5. W. Price als. 16.

from the infestation to which it is pseudarly expessed when its susceptibilities are quickened by abnormal conditions. Even under such conditions, as in the case of someonebulium induced by disease, it often mediates an exalted moral consciousness and in el gence, such as may not be apparent in the morely personal character. That is the intergence of the transcendental exhmuvitably accounted, a " guar are or coalpremature and impropured exposure of the finer organia. Every normal evolution, however, tends to the expected of surorgan has been such an exposure. Nature, or the divine operaof which is ristup from acan jectice may stops everything

for its products as soon as it came do no safe y som seems of have found in the teachings of the Buddha maxima of bounty The power of a finer organization mainta a riself active exection, and truth, and an example of a singularly self-denying and sold body of man upon this earth would be dependent on the moral exerciseing life conditions from which physical conditions, representing them, originate. The hestile forces of an environment may be reholled either by a greater resistance of their own nature, or by the dominant energies of a superior nature. As long As the human individual is impated, he cannot realise and wield the psychical forces which belong to amential humanity. But when the unity of the mee is a living fact for every member of it, the wast reservoe of force can be drawn to any point where they are needed, and the individual suit of armour can be discarded. Such a suit of armous, according to the conception of

this book, in our present solid organism. We have heard some complaints lately that telepathic pay chology is being pressed too far. It is destined to be opermonely extended. The human mee is an incheste organism, the it terms supported when are out as yes apparent between its more with accept announces in the other a. This individual again actores ancho ing thought and support and transfer to they are sail, and openal case of the great business appear which will come to absurvation with every advance of the most dy cor acropaness. Once see that the development of wider and more real sympathics, the sense of a larger self, enemavenues of transmission for appeal and response, and it mode no prophetic institut to foretall that telepathy will solve the problem of Southhem. And the extense of take pathy is the biology of the feture, for it will know the exemption of a new againsts, the organists of liminate sodarity. That those who are studying those phenomena well so much patience, caution, and scientific acumen would anxiously reputation association with such speculations as these, and wour corner yes avoid all protestage generalisation. I are of course aware. They would be perfectly right. But as a less responsible writer, I am concerned with applications closely assecuted by a book which to many readers, I am afraid, must appear not less wild than mything I can my on my own account. You to me it seems that one of the most prognant thoughts of pur time to that which ponceives even the provinces of physics and physiology as dependent on moral causes, and as modefiable by thurn. That, the principle of a spiritual energy pressing outwards and "making all things now" through human con recomment, in for our tre case, as newage of Symmatic mate. Nor in it accessary to have the familiest serious, areast sent of tite apoctal form of that conservances which is automates. in order to see that the relation between metaphysical principle

Space and reteure fail for the consideration of further questions. It would have been better, perhaps, and more sceept ubic to the reason, had I lat the book speak oftener, and upor more points, for itself. But my object has been less to raviuw it as a whole them to assuritate and reproduce, as best I could, some of its conceptions, and more especially to obviate objections of an alleged insternalistic tandency. It is, purhaps, meritable that misconceptions should arise. The great theme of psychical evolution, in its analogous applications to the rece and to the individual, is a field of speculation that has come turder literary cultivation within the last few years. The manfully forms of this conception mark it as an opechal development of thought and experience. Its several exponents, preoccupied by distinctive forms and aspects of the idea, may be little disposed to recognise each other as colleagues, but the fact remains that all are training students whom the larger insight of the future may comprehend in a single school, or, at least, recognise as alike logitizate offspring of a single movement.

and evolutionary process may well result in it.

A BUDDHIST CATECHESIS. -- The Biogen Series. No. 3. By Colonel Occots, odited and annoted by Professor Course. Besten Ester and Laurist. May be ordered through the Psychological Press, 16, Graven-street, Charing Cross, S.W. Colonel Olerat a Buddhurt Catechian has been long known to

It has had a wide Eastern circulation, 17,000 in Coylon, portablive the threshold, who then of course speaks as, and is 15,000 in Burnah; a French edition last year, a Gorman and an American this year. Its agreement with the Canon of the other hand, the history of many mechanic, whether they are Southern Buddhist Church is guaranteed by the certificate of the recognized as such or not, sufficiently illustrates the danger of a Righ Priest Sumangula, of Caylon. It is, so doubt, a good and true presentation of dectrine which has more of interest for the Eastern than for Western peopler, but which cannot be without faces in due course of growth. Every differentiation of an attraction for three who remember that this form of faith suffices the spiritual zeeds of some 450,000,000 of our common mee: no less than for those students of comparative religion who

> But there would have been no cause to direct attention again to a work already so widely circulated, were it not that this American edition to enriched by a number of suggestive notes and comments by the editor, Professor Cours. Some of the statements made in the Catochism have proved thought-provoking to hat an have caused him to make some criticisms, and to add some cluniciatory notes which very largely increase the value of the book for Western renders, and which, I trust, may show to Eastern students also how, in some though, we differ from their opamions.

> An insomes will task in y meaning clearer. At the opening of the Cates, so we are told that Budaha was not a God; but in furn a man, though miernally not like other men, i.e., in moral and montal qualities he excelled all other man of his own or subsequent times." On the the editor remarks, " Non-Buildhists, of curres, may take exception to this statement, each in favour of his - wit system of religious belief or moral philosophy. But Christians can hardly do this with propriety since they have contained James Christ with soil, those rom v grants from the oftened year beyond a comparison with other men. Let it seems out 1 g the esto recognise the scalter one a hotrous master of perfect wisdom, the gentle Nameene, the very Christ and later brother-edopt of Gautsons, whose similar life and nearly identica it belongs have to long ill unified the Occident, with the aght of Divine train. It spic of an that many of his homensa sulliversita have been able to offect to the contrary." Thus is a type of communt, vindscating in an undogmatic and unsectarian space, without any space of theological bitteroom, the clause which Christ's teaching, and his sinless life and example have on those who know them, for which many of as will cordially thank Dr. Course

> The autiject of psychical phenomena in all branches also receives considerable elucidation from a number of able notes explanatory of the text, or intended to supply emissions or to corroot statements made in it. The question of re-birth, for example, gives opportunity for an interesting statement of the beheft of French Spiritists, and American and English Spiritualists on the subject. The law of Karma finds clear statement, and the parallel line of thought in Western Spiritualism is brought out. We have various instructive discussions on maused words, such as soul said spirit, indicadnality and personality; and some serious attempt to elucidate the meaning of such purely Eastern terms as Nirronn, Demokan, Kamo-loos, &c. It is the more interesting to Spiritualists to find the points in which their experiences and behefs ampings on Eastern thought thus rindscated and emphasisod, because Profusior Codes makes it very shandantly clear that he has no sympathy with that crude and group, not to may valgar and repulsive form, of what is generically known as Spiritualism, which, in his own country and clouwhers, has done so much to bring contempt on the whole subject.

There are further, some notes on Apparitions (p. 16) on Atheram, as shown in Buddhistic teaching p. 56), on adjustry (p. 58), on Ascetic Development (pp. "1 64), and on k wired subjects, which tempt me to my that a text so annotated in of more suggestive value than an elaborate dissertation of an maepensent character; might have been.

## CORRESPONDENCE.

I find for July , " Satura on the ham writing. What long practice might emble us to do, we cusp of the 120s in sporte to 4 rooms shows that secret crime will be brough to light in The control area of the revolting duclosures in the Pall Mall Gazette is striking

both Zankiel and Raphaol prodict "storms non floors. which were in fact reported in the newspapers of the followin, day from various parts.

# The "Uncentrious Secondary Self." To the Latter of Lacut

Sin, Being dec dy interested is the subject of "automatic writing. I was good to see it last week a number of "Liony Mr. Henry Kname a creation of the national by Mr. F. W. H. Myors, attributing writing of this k aid to the agency of some unconscious or socondary sulf" rather than to the external agency to which at is grainly attributed by Spiritualists. We raust all of us find life a sufficiently difficult matter when reapprovide only for the decays of the one "soil," with which we are to really well are conver that what will become of us if we should find ourselves auddency conferrated with a 14 accord solf, of whose very existence we had previously been in total and

happy (gnorance) Mr Kiddle argum against one metance given by Mr Myars of the presence of this "unconscious and socondary self," because it was able to write a rather "complex anagrom"; but here at loust the convious performer in this curious partnership of " selece" (the one who had his hand upon the planchette) could have done quite as well as his "meconacious, and generally electring partner, and could have made as good an anagram. But how will those who hold this porplexing theory explain it, when what a done by the "unconectors" self transcends altogother any power possessed by the conscions or original self ! As a case in point, I need not go beyond myself-or myseless, as I suppose Mr. Myers would say, though at present it sounds curious. My hand both writes and draws automatically, by which of course I mean that I hold, but do not myself move, either pon or pencil, and both the drawing and the writing done in this automatic way are altogether impossible to the only " self" of which I have any knowledge. or in which I have any belief! Most of my drawings are wild and boantiful, and as mysterious almost as the power by which they are produced, but they are altogother wamesning, and, therefore, have caused to interest mo, but the writing (absolutely | desire his services are requested to make immediate application. automatic, or I should not trouble to be writing this) professes Address till August 21st, 28, Rue Washington, Paris , after that in every instance to be the writing of departed friends, and in date, 16, York-street, Portnun-square, London, W.

every instance appears the exact handwriting of the friend profess ing to write, and as I know that it would be just as impossible [It is professible that correspondents should append their for my "conscious" salf to take up a violin shuplay like Josephin nation and addresses to communications. In any case, however, as it would be to take up a pen and write like any friend I have. either on outtle or in Heaven, which of the two explanations of I those manyellous handwritings out I likely to accept ! The natural one they invariably give of themselves. Ata I, however, to accept, is face of this, the unnatural and extremely poinful one that, all this time-all unsuspected by my one frace self- there has been some second self, with powers in one respect for surpassing my own, and which is now for the first time exercising those powers for the sole purpose of deceiving me and macking me with a baseloss hope—the hope that those are living whom I had mourned as dead, and are even able to speak to me again, able to use once more the hand that was always so ready in their service, and to tell me by it of their perfect happiness and of their undying love '

But indeed Mr Myers, further on in lds article, makes special reference to cases in which " the handwriting of the dead is said to have been reproduced," almost admitting as it seemed to me at the time I read it, that if this could be proved his theory would be incapable of explaining the fact. I am sorry I cannot quote exactly, having lent the number of the Proceedings to which the article appeared, but the sense of what was written I can promise to give correctly. "Handwriting," Mr. Mysre wrote, " is a desp-scated thing and may possibly have secrete to tell us." So far I believe, I am exact even to the words which impressed me so much, booksee I had found them so true , for the handwritings of which I have spoke have indeed had "secrets" to tell me, and as for a handwriting being "a deep-seated thing," so much does it soom to bie a part of annualyon, that it would surprise me San, -Without laying under stress on the following cases, I as little for a fracial to be able to speak in the excetanal poculiar may surely leave out of the question, since, except for the purpose of committing forgery, who could practuse anything of the kind I but having alluded to this, I will just ony, that I never For the 6th of August (conjunction of Satara and Marks, in any of the handwritings my hand writes automatically and so perfectly, copied of one of them one single stroke.

Mr. Myers says that to most such cases as these " repreduced" handwritings, his theory might require some modifica tion, but what I more than bolieve (and hope) is, that if some day Mr Myorashould mublish a third article upon " automatic writing," he will not modify or alter in any way his theory, but that he will abandon it altogather; that a desper study of the subject will convince him that the existence of an "unconclous or accordary self," andowed with powers often quite different. and sometimes much greater, than are the powersof the visible or ere seed, must be se imaginary and nereal as it would certainly to troublescene and perplaxing. -I am, sir, yours, &c.

SATURDAY, AUGUST 15th, 1885

# THE LAWS OF NATURE

Man's conceptions of the laws of nature have always been visibly medified by every marked increase of his know ledge, and the supposed improbabilities of one age have often become the acknowledged actualities of the next

vals, discoveries are made which of necessity unforce a cuck and all mexplicable, and yet all are accepted as facts, recast ng of our supposed knowledge of cosate laws. A few feet to feet with our own offspring

The daty of a student of nature is not to circumscribe her deeply prepadiced and blindly conservative world. infinite resources, but to attempt to discover them, not to affirm à priori what can, and what caunot be, but to discover ;

We may dream and speculate respecting the mysteries of the universe, but at no point can we say to the human mind "Thus be shalt thou go, but no farther." Hora shall thy proud inquiries cosso. Our knowledge of nature and its laws is manifestly imperfect and incomplete, and it with a private circle for six weeks. Reference paralities to were the height of felly to assume that finite minds had reached, or could reach, the solution of the infinite enigns. Let facts speak, however opposed to our preconceptions, and let our only care be that they are facts and not plantesies, realities and not illusious.

and apart from experiment it is next to impossible for the Modern French law, however, does not maction this part of most suggestions human mind to predicate results with modical practice. The Court of Cassation has just decided that certainty. It is true that there are cases in which shrawd the herm of a physician cannot sell the practice which he had, inferences have anticipated experiment, but experiment, on the ground that it was not an office transmissible at the option and experiment alone, affords a cortain foundation for reliable knowledge

The inferences we draw beyond the range of experiment are at best but tentative hypotheses in explanation of occult phenomena.

Take for example the phenomena of light and rision, luminiferons ether, which is supposed most satisfactorily to explain them, and yet the explanation, which rests on theoretical mathematics, is only believable in the assence of a more satisfactory hypothesis.

Men of science require working hypotheses, and in a phonomena of right and vision. No theories of vision spirits. - Reme Spurite.

fully explain the facts, they merely take a few early problematical steps towards their solution.

Light, heat, gravity, and magnetism are supposed to be intimately correlated, and yet there are only few substancos which light, subtle as it is, can penetrate, and all substances are pervious to gravity and magnetism; they are forces which no known substance can resist.

It were the height of folly, therefore, to assume that we have reached the boundaries (if they have any) of nature's laws. The laws which rule nature may be, like nature A reduction much our series of a last series of the series uncoming flux in all the past, it is illegical to affirm "Light" may also be obtained from E. W Atane, d. Are Maria lane, that progress has now mand, and that all alloged discoveries must absolutely coincide with what we are now supposed to know, and cannot go beyond, or in apparent opposition to, our present knowledge.

We are in reality only groping tentatively among the minute laws of the Almighty; we see nature as yet through a gless darkly, and the truly clairveyant vision of nature which mankind may hope to reach, is yet in the far future, a future which will be the more speedily reached by the leaders of science modestly feeling their own ignorance, and honoutly testing every alleged new fact renched for by credible and capable witnesses.

To demand of discoverors of new forces a clear explanation of the fundamental laws of the forces, prior to The laws of nature are to us what we know of nature, investigation, a unreasonable, inasmuch as all the recognised but as our knowledge changes daily, so do our conceptions primary forces are as yet inexplicable, gravitation, light, of nature's laws. The modifications may be shy to our heat, magnetism, actimum, atomic affinity, life, sensation, they are certain and constant, and, at not very long inter | . a ught, known almost from the infancy of the race, are

her case some striking phenomena presented themselves. Anne had the faculty of seeing at a distance, and through proving the transference of ideas from him to her not physical obstacles. The records of somman ballic clarryoythrough the channels of the senses. Here are a few of his ance abound in instances of such clear perception, but subjects presenting the faculty in the conscious unmagnetised On his inducing the magnetic sleep, he held towards state are very rare. This is the only one I have met with

> In historing to discussions upon our subject, one is sure such cases as I have related point to its true significance? Wo see in them that things amagined by one individual can exust as real objective things to another.

> It is astonishing that men of solones should neglect such interesting studies studies which would throw a flood of ight into the minds of physicians, priests, and philosophers.

# ABNORMAL FEELINGS.

Herr Jankowski communicates to Psychische Studies the company, of which Anne was a member. On the evening of further results of an experience which in me case, has been a lost rehearms, Anne did not appear, and as her part was con- and with a rare power of solf-observation and analysis an important one, my brother went to her house, not far, Ho was not allow the term " deceptions of sense mere feeling nover decerency for an enting of draid and seeing in as the Mate on cof cognition are taken. The a sure white it is about day free from docut in error it is mental addition. and attribution to the pure feeling that deceives. Here Jankowski brother restained to make a further expression of acting even declares from his own experience that there is no decaption even by the sense-masse in helitemation, if the understanding governs them. But whather he means that the understanding can detect the subjective character of the images, or only not at once. On meeting her friends she congratulated them believe in their objective character (as was the once with Nicolai). upon the favourable change of the weather. They were decade charly appear to the most interesting feature in the article withouses and of a mount feel again lieb his thinks underlie many beliefs, superstitions, mystical, and even philosophisal. He seems to have experienced them al., and very graphically describes them. There is the abnormal sense If the ideas conveyed to her mand in the sommambalic (1) of space, the external consciousness of things undergoing no change, but the individual accoming to himself spatially slevated her when she returned to the normal. There was nothing or depressed to not alto degrees , (2) of time, when we feel very in her appearance, in the sommambulic state, indicating to laged, as though we had lived often in past ages of the worlda third person that she was in that state. Her magnetiser an experience naturally suggestive of the Re-scars more know when she passed rate it from a slight convulsive move of the restrantations when they are appeared a account fool og of eterer y in which all hat is a night our seen is fit I witnessed, for myself, these and similar phenomena as storns. From this forcing he make the doctrines of through the same sensitive subject, for my brother's affairs. Past your and accounty may be derived. (4) The some of calling him abroad, Anne asked me to include her among dream. "One goes for a walk, and suddenly the world about as my patients, for a return of her cough in consequence of a seems not at all there, as though all were a dream, but one is not disturbed, as there is no negation of the minds of men. During her treatment, which was progressing well, I that beyond muself is anthing—a terrible Egoren. (6) The He conscious that idealism may thus originate. (b) The feeling was one day called upon to make a journey, but, not to an oran a sense of the amount. All objects are transfigured interrupt Anne's treatment, at the usual time for her, as I some facte about here had come to life, It is very I secladed myself, and magnetized her from where I was transfery. (7) The abnormal feeling of the mystical. These at some miles distance. On my return in the evening I napressions, which are grotosque and often changing pervervisited Anne, and found that she had felt the magnetization stems of the historical, seem to be mis-maned. (8) The feeling that everything is clay, this is connected with metaphysics. materialism. (9) The abnormal feeling of small life (the world in a great poultry-yard !) (10) The mysterious and exalted should be remembered that the force we use is not feeling of Revelation. The thoughts now take on the garb of revealed truths, and the force of this feeling impole to humble Some days having passed beyond the time for my recognition of this character (11) The abnormal feeting of the brother's return, I feared that an accident had before Prome, which the writer does not further describe. In conclusion him, and resolved to seek information of him through toucho maintains his very strongs and questionable or position that great systems of religion and philosophy have consoriginated. from viciting her for two days: then I went. On my explanation of the character of Mosce, Joses, and Mahomet, entering she said, "Why have you not been before? I as also of Caghostro, St. German, and others. Deceivers they

# ON THE MAGNETIC FLUID

By Da. CHARPICNON, in the Journal du Magnétione.

The Journal du Magnétoine of March and April contains a communication from Viotor Monney detail ag experiments recently made in London, and reported in the Philosophical Mayacine, by some English men of science, who have repeated and verified some of those by the distinguished Reschenbach, by which he demonstrated that about one in ton of those experimented upon perceived, when is perfect darkness, a luminomity about the head and hands of certain individuals, as they did about electrical bodies, about tangnots, particularly at their poles, and about other bodies, notably metals.

The relation of these experiments calls to mind my own In 1839, which I justituted to establish the existence of the human magnetic fluid and the filliation with the other imponderable agents in Nature, all emanating from one source. My experiments were published in my " Physicsogie du Magnetisme," in 1811, and in a second edition in 1848 also in my " Etudes Physiques sur le Ma\_ etion and wid-

It is well to re-state such expense ats new, when hypnorists and others are in it vonferating that the h a an unguetic fluid is only to be ranked with some of gives enavincing proof of continued existence the obsolete hypothetical conceptions of the Middie Ages In my "Physiologia du Magnetiene" (chapter 1.), I wrote . When may netwed somunimbules, apart from each other, have agents placed before them they say they see of the magnet, but loss abundant and less bright at one than at the other. A pair of pincers being he I harizontally before them, they may they see a light Unit your good a my them but when held vertically, in lerence to be remarkable, that the pincers seem then to be charged with the fluid. One semanubule, led by the similar appearance of the fluid from the singuist to my own asked me to magnetize her kutting-needle. I did not avenced, but she still said that she saw it could be done," On this point I will quote what Dr. Despines, of Als, wrote to me in 1841; "I have witnessed the spontaneous magnetization of various small tools used by Madame Dand, the extrapping paties to f whom I wrote in my Observations de Mar ne Fratra 231 She was copployed in a watch manufactory; various small tools which, handled by her during the days immediately preceding one of her cataloptic attacks, became so magnetic that they attracted the little ated pine, surews, and filings, on her work-hench, to her great annoyance and that of her captoyer

Leould furnish further correboration, but enough, my experiments have been confirmed by those of Despines and of Burg, at los "Meterlotherapis," as well as by those of Reichenhach, verified by men of science in London.

The phenomena of hypnotism, fascination, &c., do not in validate experiments demonstrating the acting reality of the human magnetic fluid , the foreign show perturbation of the normal state, disturbances of the equilibrium of the corolimal functions, easily offected in some individuals by audden impressions upon the senses, by fixed gazing, concontrating the attention, by any cause, in fact, divorting probably got the best of it. nervous force from cortain corebral fors to accomulate t apon others

We hope Payet lead Busearchers will make a note of the following, from the Banner of Light. Professor Cadwell states that on one occasion he described past persons, places, and constant influence from all around him tended to make him one. occurrences to a lady, of which she had not thought for years but when she questioned him a s at what she was they think no strongly he perceived nothing, that is, he had no impromien from thoughts then present in her saind, but he had of thoughts of which she had no present memory.—Harburger of Locks.

# THE SPIRITUAL OUTLOOK

We shall exteen it a favour on the part of our renders if they will forward us, for use in this column, any affections to Spiritvalien. and Psychical Research they may come across in the course of their roading. We see a great many of these exmelves, but it is cirries that there must be many references so the subject which do not most our syes.—En. of "Light"

The Rev. Charles Voyacy, who proaches every Sunday to a ongregation of unlightened Thearts, has printed a sermed on Spiritualium, Mr. Voysey admis that there are phonemone which need explanation, and are, therefore, worthy of investigation, but he fears that we are too credulous. Accepting the first Article of the Aposilos' Crook-possibly the last-he rejects what lies between. When a clergyman of the Established Church has the courage to declare his nabelief as well as his belief, and take the consequences, I think he might go one little stop further, and examine Spiritualism before nonneing it in a published sermon.

The first thing to be settled in regard to any question of fact is its truth. When that is elected, the nature, cases, and effects may be exaculted. If the amerted facts of Spiritualism are true, there can be no question of their importance. They change the whole aspect of the world, and the destray of all hamamity. No truth can be so important to man as one that

Word and Work still writes about "The Mend Care Craze," It ments that human credulity has no limit, only people are more the end or the contraction of a morbit expectation than the and the story of Divine lure, though its evidence is averprount the metal a fine vapour, like that from my hand in machines. It then goes on to my. "Hundreds chant to me, settled that we it necessitated at both poles lave been bounded in varying degree by mind-care treatments. Many such become themselves healers, and thus the new idea has spread. Just now the religious features of the new departure more prominently engrues public attention, and elevermen of all denominations are perjously considering how to deal with what they regard as the most dangerous innovation that has in he direction of the highest or him, they declare the threatened the Christian Church in this region (floaten) for many years. Scores of the most valued Church members are joining .. Christian Scientist branch of the metaphysical organisation, mel it has thus far been impossible to check the defection. It is a movement for-maching in its industries and including many thousands among its sympathison whose ordinary good intelligence extitles their judgment to respect."

> And what is the "Mind Cure"! One of its apostles says Homon its your mand that God made overything good. He not the author of discose. Therefore, as discose is not a and the no existence, but it is merely a delucion of the und, the effect of fear. Four a faith saverted and perverted. You are to man the confidence of your patient ; make him toll you the cause of what he thinks is his disease. But with your corer mind you see that it is not sickness at all. You altain the power of healing by dwelling mentally upon the truth and warlow of God, and then the fasts of the healer meeting the four of the patient produces a chanical change in the finish of the system which results in health."

> Anyone who has seen an exhibation of the influence of one strong will over others in exhibitmen of what is rather absurily called "Electro-biology," in which one mind controls the minds and bodies of a dozen passive subjects, can see how such a power might be, and often unconsciously is, need for care. In thousands of enous the physician strengthens and curse his nationts, whatever may be his medicine; and the man who swallowed the prescription, instead of taking it to the chemist,

> The laying on of hands, the amointing with oil, the forward and offectual prayers, are all modes of extensising the same gift of healing which medical diplomas cannot confer. When the "surenth son of a serenth son" was selected as a honler, a

> So mind acts on mind-the teacher, the preacher, is made arrong gifted, and elequent by the magnetism of pupils and congregations. The supply follows the demand. Associtive, sympathetic speaker rectives, combines, and distributes the

feelings and thoughts of those who listen-influenced, doubtless in many cases, by groups of spirits who faid unconscious mediums for their teachings. And just in proportion as our pulpita are free, and our preachers are not tied up in theological erstems, will there be genuine impuration.

August 15, 1885.]

Christ told His Apostles not even to consider what they were to say. St. Paul wrote courtles, but not his sermons. No Joseph a written nermon may be inspured, but an extemporational one may be helped by the congregation present.

A Rev. Dr. Gordon is denouncing the muid-cure oraze of Beston, regarding "the whole system as a sort of witches canidron, in which every concercable heather and Christian heresy is seething and aimmening to produce the subtle emence called mental medicine. Then, as I am six d y a lation aspecially are or awn and the ayarem under the impression that they are getting some finor quality of Christianuty, Dr Gredon products very said consequences to morality

A friend sonds me a slip cut from the News of the World, containing a story entitled "The D--- in Dunchester," copies from The Argary. It is one of many straws which show which way the wind bluws. Even ten years ago no sungazano editor would have accepted a story so appernatural. Now we have them everywhere—one of the many signs that we have entered upon a new em which no one in the early part of the nineteenth century would have considered possible. Fifty yours ago the world account utterly materialistic. Now the tendency is quite in the opposite direction.

A friend kindly sends me two extracts from Lord Malmesserve Memoira. In one has specific of a spectral illustrawhich constantly appeared to Lord Eglinton , the other refers to the late Emperor Napoleon III, ! " After dumer we smoked torother, and the conversation fell upon nictures, about which the Emperor (Napoleon) professed complete ignorance. We one got upon Home and Spiritualing, which I mw he half worl in, and as he spoke of the many doubtful pictures in the home I suggested that it was designable that Mr. Home should call up Tituan's spirit and sak him whether he really pointed the Pictra took advantage of tan t anglest be such upon which be looked displaced, saying that if we can be some as we believed our religion would be a very easy task." (p. 563.)

The late Emperors of France and Russia were threoughly continued Spiritualists, because they were open-minded, exteful, painetaking investigators. Napoleon III had frequent sources with Home, the Brothers Davenport, and other mediums. The Czar Alexander had seances with House, and manifested his personal friendship for him by becoming godfather to his son, and giving him his education. What is known to one Royal Pamily is likely to become known to others. Some Providente of the United States have been pronounced Spiritualutsn-tably President Loss on.

Clargymen of nurrly all denominations may be expected to oppose Spiritualism from joulousy or fear. The Church of Rouge charge an immense number of significatations and all sorts of miracles. The lives of the saints abound with them. How natural to claim a monopoly ! On the other hand, Protostantum law tangent, in opposition to Rome, that all suiracles coased with the Anosthu-and door not like to be contradicted by present factal. Here we are, then, between two fires.

Then come the men of culture who tell us, with Matthew Arnold, that miracles do not happen-only we happen to know that what are called miracles do happen overy day. And the men of ecsence tell in that our spiritual manifestations are contrary to the "well-known laws of matere"-so well known that nobody has over explained them, or even told in what they are. Why then all this from and noncome about facts that any one may observe and be perfectly astisfied as to their reality?

Happily, so amount of scolding or awaring, preaching of (maying, can change or do away with any fact, or provent any genuine manifestation. Light has come into the world, and whoever may love darkness better than light, there is the light for those who seek and love it.

"Knaves or fools," you my. Well, which was Profestor Bare, of Philadelphia; which was Professor Zollner, of Luipzig . Professor but term to the last of eminent man published in every number of "Lienz." Were they, or are they, all knaves or fools? It comes to that, why shirk the question? As Spaniualists we do not say here is something which happened 0,000 years ago-if you don't believe it you are safe to be damned and parish avariatingly." No , quite the contrary. We say, here are facts occurring every day all around you, for which there are thousands of living witnesses. If you will examine for yourse'd y at wall or convenced that you will live on after

It is not a question of what imprened to Moses or Paul two or three thousand years ago, nor what is baliaved to-day by the Pope or the Archbishop of Cantarbury. The question is as to the reality of phonomena of present daily occurrence in hundreds of places, in both hamapheres, witnessed and attented by as honest and intelligent men and women as live upon our planet.

Born at man breef. When you say that Spiritualism is imposture and delunion, you my, in effect Myriada of people, apparently as honort and intelligent as the general populations of ne a set enhybitoned countries, are detailers or deluded-knowes. or fools-porsons whose testimony is of no value as to present facts, occurring from day to day under their own observation.

Of norms, upon the common theory that all mediums are apostors, and all aunifostations frauds, every protended medium must be the basest, lowest, vilest of humbugs, and all Spiritualists are sittler knaves or fools. Now it is estimated that there are 7,000,000 of Spiritualists in what we call Christendent-all of whom are knaves, humbers, and importersexcepting these who happen to be feels-credulens latets, who, for thirty years, any, can be constantly cheated and defeateded. and whose testimony esment be believed as to the most simple facts under their personal observation

Victor Hugo was a thorough Spiritagent. He wrote As I a preach my earthly end, Anche must ma thear ata Impon at a aph ones, when a blend To welcome me from star to star The tomble not an online night It sate thomoghtare—a way. That closes in a soft twinght And opens in oternal day.

In "Les Contemplations" he says, "I feel that previous to my countouce on this earth I have already outeyed my boung." "Say not to die; way, rather, to be born

In "Les Minérables" he says . "God can aile nothing to me happings of those who love such other but to give them the end out duration of their love."

And more vigorously, more beautifully, if possible, he says in the moon, above quoted :-

"As I approach my earthly sud-Much planer can I hear afar Immortal symphonics, which blend To welcome the from star to star Though marvellous, it still is plain A fairy tale, yet history Losing earth a Beaven we gran With death, win anmortality

For fifty years my willing pea, In history, drama, and romance, With satire, souncts, or with mon, Has flown or danced its busy dunce All thomes I tried and yet I know

Ten thousand times an nucl passaul. Remains in mo! It must be so, Though ages should not find me dear

When unto deat we turn once more, We can say, 'One day's work is done '. We may not say, 'Our work is o'er, For life will scarcely have begun.

All poets, indeed, are Spiritualists, at least on their poetscal side. A poet may, indeed, by a sort of mental duality, imagine himself un Agnostic, but on the poetscal ade he is immertal.

# ON MAGNETIC SOMNAMBULISM

(From the Journal du Magnetsone.)

of his Rerue Scientifique that he has with say war nambulasn. The nequaintance with human may a tis as annual appreciam, and if Physique had not taken it up under a delusion." after him we might have heard little more about him." Magnetism belongs to human nature, and the knowledge of it goos back to remote antiquity; but it is to Mesmer and higher faculties exhibited by magnetic sommanibules. ins successors that we owe our present knowledge of it. He was the first to promulgate it to the world, and he had the foundations of a new therapia, the wants of which is yet to be appreciated by meants, whose tendency to abuse a m public esteem has always seemed to me as mean as it is unjustifiable. But justice will be done to him by posterity

M. Richet erroneously confounds magnetism with induced comparehabing, which is only one of its effects. Here is another of his errors he mys, " If after a few beances there are no results the subject may be regarded as on unyielding one", whoreas practice touches us that the somnamhalio sleen comes on squatimos only after weeks, and even a rare cases," even months of treatment.

Then he says that "mental travelling is only a kind of sommurbude reverie without any relation to elective facts." Mental travelling is a reality too well established to be disposed of by a wave of M. Richet's hand.

He says, "One of the most interesting phenomena of sommunde is n was brought under notice some therty years ago, by an Englishman nomed Beard. He deconstrated that if the limbs of a subject in someonicalism are put into Reprinting position, that position induces (or the subject) sents ments in conformity. Thus, if the arm be pulled straight and the flagers doubled ato a fat, has face assumes an expression of anger; if the passes are joined, he falls upon hot known as if its prayor," de-

Further study of sommanbulic phenomena would show M. Richet that such changes of expression are datermined, not by mechanically placing the mabject's limbs in this or that position, but by the augustions thought. I have repeatedly produced such effects by my will alone, without any outer manifestation of it. I there fore conclude that the determining cause in the phenomenon is mind acting upon mind. I am ready to dominatente this truth.

Of sommonbalic lucidity M. Richat myst:-"Magnetisers declare that the intelligence of somnambules can draw saide the vail of the future, penatente the mysterics of the distant present and the remote future; that they can be mentally present at conversations going on at the other aide of the world, and magnetizers call this faculty 'lucklity', but, we have to dispose of such fables," do

Against such a flippuntly expressed opinion we set the testingny of man who have studied the subject, men of unimence, that the facts thus decided are real and not to be disposed of so summarily by M. Richet. I could fill a vounne with such testimony, but contest myself here with quoting that of Lavator, whose truthfulness and intelligence of Leed Houghton, a Spiritualist of many years' standing. The none will call in question. He wrote in German, so his deceased pobleman attended many of the ordier stances of Mr. testimony will be now to many of my readers. Writing to volume with such testimony, but contest myself here with testimony will be new to many of my readers. Writing to Makdoughl Gregory and Mrs. Lettus-Group. his friend Campe, Lavator says ;-

# THE METAPHYSICAL SOCIETY By "M.A. (Oxon)"

The August number of the Nineteenth Century contains Hutton, editor of the Speciator. In a prefatory note Mr I was four was, "Can Experience prove the Uniformity of Knowles gives an account of the formation of the Society Nature" Dr. Ward opened it in a paper, and Professor of which he acted as honorary secretary. In the an united Huxley, Father Dalgarris, Mr. Ruskin, Mr. Bageliot (oil for of 1868 the Post Laurento and the Savilian Protessor of of the Economist), Mr. Fitzgames Stephen (now her Ja tec-Astronomy (Rev. Charles Pratchard) were Mr. Knowies Stephen) Architechop (now Cordinal) Mann : . . . . quests. A good deal of talk on speculative subjects led to Martiness are represented as contributing a most interest the idea of forming a Theological Society for the frank and ing discussion

blems on which divergent views have been held, continued of a French type of playfulness in his expreste shed its light-"light without heat," as Tennyson put it mion." "Then we heard a deep-toned, musical voice is Death? " "Has a Frog a Soul?" " What is Matter?" were freely mingled. It was Mr Ruskin's." And so the "The Personality of God," "The Arguments for a Future sketches go on "Fitzjames Stephen remarking in the Life," "The Soul before and after Death," "On the Words mighty base that always exerted a nort of physical autho-Authority of Miracle," "Matter and Force," were among upon Mr. Stephen with a benign smile," as he administered the subjects considered. The Society "finally came to an to him a dose of St. Thomas Aquinas; and, as the Archend, because, after twelve years of debating, there seemed bishop ceased, Dr Martineau-"we had now got into a little to be said which had not already been repeated more region where no less weighty a thinker would be adequate

than once." It is much to be regrotted that such an idea provailed. There is room now, there always was room, and there always will be room for such a body of thinkers. I can conceive no time when they would not find a place for their disquastions, short of that for-off Millennium when all perplexities shall cesse, and all problems find a solution in understood that he can accept no responsibility as to the aunlight of perfect knowledge. We are a long way opinions expressed by Contributors and Correspondents, yet from that beautiful condition. Moreover, since the Free and courteous discussion is invited, but writers are Metaphysical Society died, fresh problems have arisen and a work for such a society which many would be glad to see filled. It is also much to be regretted that no records of the papers and discussions of the Society exist, "They were absolutely confidential and unreported," and so are lost to us, to our great sorrow

Mr. Hutton does not set himself to report any special an interesting account of a typical meeting of the once meeting, but only to give "a remainscence of the sort of famous "Metaphysical Society," contributed by Mr. B. B. debate that used to go on." The subject of this typical

free discussion of such subjects. Mr Knowles promised to In the course of the paper, Mr. Hutton gives were form such a society, and found ready co-operation from such graphic word-pictures of the emisont man who surrounded men as Denna Stanley and Alford, Archbashop Manning, ham We see Professor Huxley with "rich and resonant Dr. Martinean, Dr. Ward (of the Dublin Review), Mr. voice flashing out a acceptical defence of the use of the Hutton (of the Speciator), on the one hand , and Professors In to in Board schools ," Mr Fitzjames Stephen, with his Harley and Tyndall, Mr Fromle, Mr. Walter Bagehot, and deep bear vaice, criterizing the Claimant's advoit use of his Sir John Lubbock on the other. The original name was committed for perjury; and Professor Tyndall, "with wisely abandoned for that of "The Metaphysical Society," elequent frish voice, descanting on a proposa, for a prayurunder which title the Society became famous. It was at gauge, which had lately been made at the instance of a various times josned by men of world-wade intellectual celo print ent surgion the Contemporary Review. Here is brity. In its list of members are included the names of James Hotton with its wester and surgaine, I had admost Mr Gladstone, the Duke of Argyll, Archbishop Thomson, he is bectic, fideolism," and there "the succeile Archbishop Bishop Thirlwall, Bishop Magoe, Lord Selbourne, Canon of Westmanster, every norvo in his face expressive of some Barry, Dean Church, Rev. Mark Pattison, Professors Henry | and fee, ag ' Dr Ward, "one of our most unique men Sidgwick, Chillord, Seeley, Sylvester, St. George Mivart, bern hamiled, to his own apprehension at least, all strong and Lashington, Mesers. Frederick Harrison, Frederick lights and dark shadows. . . A more condid man I Pollock, W. R. Greg, James Hinton, George Grove, Leslie never knew. He never ignored a difficulty, and never Stephen, Pitgames Stephen, John Morley, Grant Duff, attempted to express an indistinct idea. His metaphysics Robert Lowe; Sir Alexander Grant, Mr. Ruskin, Mr. were at sharp out as crystals. He never seemed to see Froude, Dr. Maurice, Father Dalgarras, Dr. W. B. Carpenter, the half-lights of a question at all. There was no penumbra Rev Dr. Morley, and many others hardly less eminent. in his mind." Father Dalgarns, "one of Dr. Newman's This constellation of intellect, gathered from all sources, framediatefollowers, who left the English Church and entered the one requisite for inclusion within it being an earnest the Orntory of St. Philip Novi with him, a man of singular thoughtfulness and intellectual capacity to deal with pro- aweetness and openness of character with something -on the dark places of thought for nearly twelve years, which dwelt with slow emphasis on the most impartant meeting once a month. The subjects discussed were of the words of each sentence, and which gave a surgurar lorer to most varied character. "The Theory of a Soul," "What the irony with which the speaker's expressions of behef Nature, Natural, and Supernatural," "The Nature and rity over us," and the "Archbishop of Westminster looking

giving to all his consonants that dutinet sound which is so these curious conquests effected by pretentious physical rare in conversational speech." All the various person- marvels over the gaping intellectual credulity of moral alities stand forth clear and distinct before us.

summary of it. But some meadental points are interesting with the aid of alittle water,a disease of thirty years' standto the renters of this journal. Dr. Ward, we are told, as which are taken a not dependent on magination. By 't ought we might as well expect the amformity of mature a means not auterst tion and hysteria flourish and to be disproved by the efforts of Spiritualists to turn a table abound amongst us to the confusion of disease and death! as the these of lot tud me can though to be arrested by Mr. Bagehot was of opinion that "it is impossible to thereon a time Dears a means attempt to exclude the may what the uniformity of pature means. We cannot Down of Westmaster (Shaney) from the last of Select exhaust the number of interfering causes which may Preachers at Oxford," This question of the uniformity of owns, that a if courty. That is true; and it needs nature crops up perpetually through the discussion, and especially to be borne in mind by those who deal with the always with a certain luxity of thought and expression phonomens that engage the attention of the Spiritualist. The I is the various speakers seem habitually to ignore the fact inducates of mind on matter, the phenomena of human nature, and that what seems to us on a given occasion to are but little understood. The interferences that may he "contrary to the known laws of nature" is possibly come from varied conditions of observation, or from the continuey only to such of those laws as we are at present trresponsible will of the unseen beings with whom we acquainted with. Mr. Runkin is the only speaker who have to be are at present unk own quantities. We are demonstrable uniformity of the laws or customs of nature on a of whom we know very little. There is which are an wn to us, it remains to me a difficult ques- no room for degmentism. To use again a serviceable phrase, tion what measure of interference with such law or custom we are but children playing by the fringe of the great occan, we might regionly hold miraculant, and what, on the con- beyond which lies the land to which we are surely going. It trary, we should treat only as proof of the existence of some in storm-tossed and wild one day, and we know enough to other law intherto undiscovered." And then he refers to be able to my that a gale has hashed its surface. But on the attested case in Paris of " a pensant garl, under certain smother day it is placed, and no ripple stirs its glassy calm, conditions of morbid excitement, being able tomove objects at till suddenly a swell sets into shore, and the little waves roll some outained from her without tour angthem," Spiritualists know very well by repeated and most accumic observation disturbance, but had we known more, had our horizon been that such power of mos agobjects without contact is a fact, wider, we should have seen a vessel passing by beyond our os demonstre de nei as full y a me et at a asarber facte in limited vision, and should have known that its wash was n scales with he known award patters, which select he r mon nee its. His thoulty in the old and familiar one that men of science of the secondary refers to investigate the immature dabbler who knows everything, and has at them at all, or give them but a superficial and tuned attention chastly for the purpose of founding upon their senity own private use and emolument; what with the purblind observa as weap a ter dile but plausible theory. Watness the general refusar of mer, of science to investigate the and little about anything else, and least of all about himself; phenomena of Spiritualism at all, and the theories which the and what with the omnucions theologian, foolshest of all, scientific members of the Society for Psychical Research | a a count or sec to the refere, it is monstrous hard for poor have considered sufficient to account for automatic were at Truth to get any fair treatment and kindred phenomena. "The scientific man," says Profossor Huxley in this discussion, " justly fears that if he many amiable men's hearts [a.c., by reporting against their | interference heliefs], and that, if he does not wound anniable men's hearts, "Taxastan Digging in Consequence of Psychola Illusion and he shall compromise her own character as a man of access." Hallocination," is an article by Herr Witig, of much interest Thut is the frankest confession I know of pure selfish vanity for psychologists, in Augebuche Studies for July. un the part of the man of seconds, and of bigoted intolerance . BY S. EADON, M.D.

born sensitives , the sommambules ; the easily meanerised ; perhaps, as appropriate a name as any

162 margitives, of all classes, of all ages, and of both sexes- moment's reflection, and yet they have the effrontery to say their circumferential edges without even interpenetrating with those of the orange-red of the left. The human body both parties be inordinately impressionable an effect can be healthy, as well as its abnormal, and unbealthy conditions left shoulder, will give rise at once, or shortly, to a cooled, reversal currents may be the cause of insanuty in all its hand stroke down the left shoulder of another person, gently discuss. The man from of a chira of an absort countless and slowly to the elbow, a chain of unnamorable cool points number of cooling points is something more than a " ament-- in fact a sort of cold stripe will be felt, and this is called ablo maze of lying and deceit and superstition." It has, a near by physicians of an advanced school of thought, and without doubt, laid the foundation of thousands of spiendid if a series of these " cool stripes" be scientifically made all cures, as may be read in the pages of the Zossi, of which

SOME ODD "FADS" AND PANCIES; THEIR over the body, an agreeable coolness will be perceived, a feeling of rest and composure induced at once, sweet charming, and delightful. It matters not whother this chain of imprinerable cool points be made with the hand, or a orystal, or a bar of iron, or with a bit of stick, the effect It will not be inappropriate to point out persons most win be the same, since every substance in nature, whether likely to be sessitives. They will usually be those the tone atom or world, is unpregnated with OD. It streams from of whose health has been lowered by their modes of life, as the Milky Way-the lengthened pathway of our own and men of sedentary lashes, clorks, needle-women who work verse-and is probably the connecting link of sons and of long and sit much, the hardworking student, and all who planets, of visible universes, and of all telescope nebule. mirrage systematically, for a livelihood, the organic laws, in abort, perhaps, of all forms of matter, scattered through and bring about a relaxed and irritable state of the system out infinition, boundless, eternal, incomprehensible. As Sensitives may be arranged into three classes first, the a counte force, Reichenbach calls it OD but being an healthy sensitive; second, the sickly assistive, third, the element in the constitution of man, it has been on led by diseased menture. These manifest various degrees of many different names : by Von Helmont, Messuer Deleute, capressionability—the Baron cometimes finding that those and others, it was called magnetism.' As a cosmic force OD in the best state of bealth often may the magnetic light with or the Odylic force is the name now given to it, but, when the greatest clearness. Besides these, there are the naturally thought of, in respect of man, known otherisms would be,

the highly nervous, and those quickly put under biological It is a strange thing-and yet a large developed solfimpression, not to mention others with a cast of immity exteem must be at he bottom of it-that people dark pass about them, or with a salde cloud of suclanchely over over- a ope for of either yet or may on subjects to which they hanging them. Of natural sensitives there will be found have never given a half-hour sections thought or attention, about one in every twenty-five persons, and, according to said of which really and truly, they are mostly in profound the calculations of Count de Treston-who made nearly ignorance, and yet society teems, thick as motes in a sun 2,000 experiments, and kept records of 1,200-about one beam, with people of this kind. These even are some fourth or eac-fifth of the whole population is macaptible to excusable than another class-your clover or learned man, dynamic influence. It may be as well, also, before follows ... he who is distinguished in some domain of science or of up the subject further, to state why the Victoria pions. Diterature. This kind of man will often condening new phor selected the word "OD" to express his idea of this thought of which he knows nothing at all, from pride of new force. Seeing that "OD" was found everywhere, but place and position, and his opinion will frequently have concentrated nowhere, and that no special or separate some great weight with people in virtue of the real knowledge for its perception had been bestowed, as light for the eye, or which he personned in another department of science. But sound for the car, and, as no odylio battery had been in- this is absurd, and yet it is the way of many. It is only vented to collect it, or odometer to menaro it, it was found a undependent mind here and there that has the courage a matter of no little difficulty to select or surent a torm, to exclaim with Hornes, "Nullius videous furnes non expressive of the nature of this new force. The word "OD" rerbs sungister" (I will not pin my faith on any ion a was at length adopted, and its etymology is thus accounted alsowe). His ignorance is no more wiscom per so because for :- Vit in Sanacrit means "to go." Vad-o (end-eyo- of his knowledge on other subjects, than that of the veriest red-co-red-o) in Latin signifies "I go." From its Old clod-pole. His opinion, in his own downto of study, is Norse "I go quickly, or haste away," and is found as Wodon valuable as he understands the subject in all its runificain old German, and means the all-pervading, and after trons and bearings, but on subjects of which he is ignorant, passing through various dialects, this word assumes the form and to which he has paid no attention, his reservious are of B'nodin or Odin, meaning "the all-prevading power," worthloss. I predicate of people of this class, when society and which was finally personified into a German desty, gets better educated throughout its every goods, will be Leaving out the postdix (in) there is left "OD" to indicate appropriated at their true and correct value. No reflex glory the name of a force which rashes through, and percades from his own special department of study will either cost a an versal nature, and which, in the ordinary conditions of shadow of doubt on any new truth, or remen other people's humanity, has no special sense given for its perception. cutinate of it. There are those, both learned and ignoral to From the experiments of Baron von Reichenbach with who have never given psychological and dynamic states a professors, physicians, bankers, mochamos, Government off-hand, that no influence can possibly come from the officers, servants, noblemen, and even members of the Imperia. human fingers, 'although it is on record that thousands family it access that the human body is enveloped in a leave been sent into a recuperative could tion and cured of delicately attenuated atmosphere, extending two or three diseases of every kind, the blind mide to see, the lame noches from and around it, the right half of the body to wolk, the deaf to hear, and, what is more, and to book atmosphere being of a bluzzi colour, the left half of a sort besides, sensitives, by the hundred, in pitchy darkness, have of orange-red. For the purposes of reciprocal influence, seen the fiery bracket of the Stroket, Fr gers as the blue the odyler atmospheres of two persons need only touch at light from the right hand streamed forth and communities each other in the slightest degree, but if one or a constantly producing OD, which has its normal, or produced at the distance of inches, feet, and even of yards, and it is not beyond the domain of probability to say of Of course, body to body, as the right hand placed on the this delicate and rabile agent, that perturbations and agreeable sensation. Sty,-Since my last I have paid a visit to the Spratnalist Camp Meeting at Onact Bay, and I think what I saw there may be interesting to your resders. Genet Bay as a charming little place, about fifty miles from Boston, and is rapidly developing into a place of considerable importance. There are quite a number of protty houses and cuttages, and several hotels, a fine tempte, and a very delightful auditorium in a grove of boautiful trees. Sunday, the 19th July, was the opening day, and the exercises consusted of suppost selections, vocal and instrumental, in the morning, followed by a very able lecture by Dr. P. L. E. Willia, who treated, in a locid and begical manner, the various phonomens and truths of Modorn Spiritualism, In the afternoon accord fine or prompts pooms were given through the mediumahip of Miss fenute Hopes, who in her turn was followed by the test modum, Mr. J. D. Stiles, who for the space of nearly an hour a also-half, under queit control, gave test after test to the amounted eneed. Anything more remarkable than this gentlesome test mediumship it would be difficult to find. I am not exemporating when I say that he gave the sames and described the appearances of hundreds of sperits, giving full particulars so to names, business, agos, dates of passing away, &c., &c., and every mense that he gave mot a recognition from some one or other to the vist audience. I not quite a number of friends whose acquaintance I had made at Lake Pleasant in 1882, and 1 was grocywhere cordially and kindly relocated. Mr. Alborough was good ourogek to invite me to the evening adapte of the Rorry sistors, and I very gladly availed myself of his kind offer. I found a very large gathering there; indeed the rooms n the very pretty cottegs tenented by the Massa Berry were just as full as they could be without under crowding. The circle was very harmonious, and the manifestations simply matrollous. The mines huted about two hours, and with sourcely a moment's interruption spirit after spirit appeared before the curtain (indeed the first spirit appeared at the curtain before Miss Berry could have had time to reach her reat). I did not count the number of spirits that appeared, but I should my fifty, or pectty mostly that number, while the quit that controlled Miss Berry stated that at least as many more were organ to come, and would have done so had the power sufficed. Four spirits manifested and spoke to in and I had the astudaction of recognising them all first my brother-in-law, who passed away in 1872, and who was conspecuously tail (60t. 4in.), next my mother, who gave me the spirit means also always page, and who reminded upo of her having already materialised at Mrs. Rom's (the account of which you will remember printing), and, lastly, my sister-in-law and hor husband, who pussed away in Judia within a month of mach wither nearly ten years ago, appeared area-in-arm just as plainly and distinctly as they ever appeared in the earth-life , so distinct indeed were they that I recognised them the very moment they , appeared although say cost was some way from the oabinot. There were several well-known medium in the circle, viz., Mr. and Mrs. Fletcher, Mrs. Folsom Butler, and others, and several controlling spirits, notably "Dawdrop," the bright little angel that controls Mrs. Flotcher and whom I have long wished to see; and " Wildflower," who controls Mrs. Botler, materialised and came not amongst the sitters, apparently with so much case and nonchalance as though they wore mortals in the circle. "Wildflower" disappeared belund the centain, and a moment afterwards what looked like a white handkerchief appeared on the floor in the front of the circle. Several people reached forward to peak it up when, like a flesh of lightning, what at first looked like a handkerched suddenly became "Wildflower," so plain and tangible as any mortal, and as full of life and glosas possible. I may add that my little friend "Dewdrop" called to use to come near her, and she then whapered a most wonderful test in my ear, which would have given me quate emough to think of for the rest of the evening, spart from any other manifestations.

the Banner of Light, but I can only my no description, however, Spiratures,

vorus two give anything like an idea of the marvellous facts that are presented at these circles. These facts are simply stapendous. The world may call fraud and may go on, to fix storms shame, persecuting and huraming its mediums, whom it should be the first duty of every intelligent Spiritualist to protect still the work goes on and the fight will not be kept back. I have seen a good deal of the movement since I came here, and I much regret having to say that in many materices the bitterest foes of Spritualina are not those entande, but these unide the ranks, who seem to grow more marrow-inmided instead of expanding, after getting some few experiences and charge on bohims the veil

It is none of my business to not secondar, as I am only a chromelor of facts, still, as an intelligent observer, I cannot help socing things that occur before me, and I facting to the ejamen that there is too much desire upon the part of some to play "Pope" in this movement. Reference to the past history of the movement, however, shows pretty clearly . At " the intelligent operators at the other out of the line" knew their business a good deal better than the would-be "Popes" on this side, and at far as my experience and observation go, I find that the rife of Pope is speedily followed by downfall and utter ablivious Spentualism, which is any count, country be made a run in party lines, and will continue its nourse despite all chatacles. I are getting protty tired of hearing mediums abused, and it seems to me that if there is may be so up about the meanings the most sometic long the Spectar stacould do would be to surround the mediums with butter

The frat unity of the When Cross, while has de hond quetion is the city in sping its work very motey and life est-programmy high rope top estrangely and unless him growtly waken some nervement for the better protection of mediana and for giving them more harmomone surroundings will have its mountion are long from this centre. -- Young faithfully,

Boston, 16th July, 1885. J. O. Meccasa.

TRANSLATION OF DR. E. VON HARTMANN'S motives of the editor as well as my own. WORK ON "SPIRITISM"

Minacy for his roully response to a request to underlake has professed an examination of the subject has treated could that longers the completion of the task, the value of with them. Now for the first time, a man of commanding this add to the literature of the subject will be it tellectual position has dealt fulrly by us as an opponent. ouly appreciated. On more than one occasion Mr. Mose v. thoroughly, at least to an extent that indisputably qualifies one contributed very large vit. acrestors of knowledge in than for gratical examination. And while formally declining though the last, not be the least va make service he has put a He even arges research by State-appointed and tion of his la ours. We have little to add to the facts are a priors incredible or "contrary to the laws of introductory note which appears in another column. In mature," He exposes the prelevance of "exposures," and the main it is what we should have written ourselves, and blows to the winds the stoped parallel between medians and the position he takes up has many points of agreement with, conjurers. And if his application of the psychology of and but few points of divergence from, that which we have, in common with many of our ablest contribufail to receive benefit from a critical analysis and protection of mediums. the sticking of new light upon the facts, its theories, and its methods. Hold givers strongly as we co. that the apprixual theory is the legit a ate outcome of the facts, spaced me a schole, we cannot fairly raise (nor objection to the closest scentiny of the bases upon which we lacyo founded our beact. We have musted, over and over we be a little er will lose, maything by free inquiry. Therefore, we feel sure there is no need for any apology for bringing Dr. klarimann's views before the readers of LIGHT "

It would not be fair to the author to discuss his arguments and theory precement, and we have, therefore, wen at to adm t un at semesion or his book until the com-

edition.

Dr. von Hartmann for his ready and courteens consent to the translation of his work, and for which he has foregone the usual honorarium.

PRELIMINARY NOTE BY THE TRANSLATOR.

The entirent Gorman philosopher, Eduard von Hartmann, author of "The Philosophy of the Un. conscious," having conscuted to the translature of his recent pumphlet on "Spirition," in the first instance for the columns of "Light," I have undertaken the task the columns of "Light," I have undertaken the task the columns of the editor. In accordance with conductor of the columns of the editor. In accordance with conductor of the columns of the editor. the translation will be a complete one, and will be unaccompanied by any comments, liberty of prior or subsequent adopendant criticism of course remaining. I therefore take this opportunity briefly to explain why I am thus matrumental in reproducing a work with the conclusions of which I myself only partially agree. As also (which is more important), the disagreement of a majority of the subscribers to " Limit" is likely to be far greater, I shall be glad if what I have now to my represents the views and

I look upon this pumphlet as the most formidable attack that " Spiritiam" has had yet to uncounter. It is so on The thinks of all Spiritualists, and, indeed, students of the very ground that will recommend much of it to our sym every la sea of oven the secretal are to Me to C pathetic attention. Hitherto, every serious opponent who arms s, a the best of most a very laborious task. We deather with defective a formation or refective caudour refer to the translation for these columns of Dr E vor or both. The refutat in could be left to the ever recurring Rartmann's brockers on "Sportman." We have little facts and the ever-widening range of public acquaintance minifest, and that Mr. Money's generous labours will be He has taken the trouble to get up the facts, if not quite respect to the unbjects with which we are specially con an unreserved acceptance of the evidence, he has come to the Gener. This was notably the gate with his able transla conclusion that the existence in the human organism of more com of Professor Zoons a Tra accommental Physics," and forecasted especitive than exact scence has investigated in suffiwe have little doubt that his present contribution will, creatly accredited by historical and contemporary testimony condered us. For ourselves, and as the same of our readers, | peal commissions. He repudiates, with all the authority of we venture to assure Mr Mussey of cor grateful apprecia a philosopher and men of sevence, the supposition that the somes abulism to the phenomena results, in his view, in frol on out spirits altogether, on the other hand it contains tors, always advocated. Maritualism, as such, cannot information to the public which is highly important for the

On these grounds alone the expediency of this translation right be sufficiently defended. This is a subject in which we have to proceed step by step with the public, and while the question of fact is still in dispute, Dr. von should we in any circumstances wish to do so) the least Hartmann is virtually our ally, and an ally of the most unnortant influence

Up to this point our agreement with the author will age a, a contine fact that Spiritualism never has lost, nor do only be qualified by a doubt as to the start of his proposed scientific commissions. In his view this proposaresearch as and it is expressly motived by an aim with which, when analyzed, we can partly sympathise, but which we must in part repudiate, not as contrary to our convictions, but as opposed, we believe, to the tree eccentific spirit. We go with him heartily in wishing that the light of a new psychological science should be let in upon these pletton of its publication in " Lie iir " Whon that occurs phenomena, we shall all admit that they have been very we hope pur friends will thoroughly thresh out the matter, imperfectly understood, and that the consequence of this A small edition will be based in book form without ignorance has been a great deal of deplorable felly and alteration of, or addition to the original, except, perhaps, a credebty. We are also quite ready to untertain any exnote by the emment author as a preface to the English planation of the facts, however completely subversive of the whole hypothesis of spirit agency, provided only that And last, but not least, our hearty thanks are due to such explanation does not, like others that have from

time to time been offered, arbitrarily ignore or deny any fact simply because it is not covered by the theory. On has not yet covered the whole ground. I believe that the other hand, we find in the contemptuous denunciation is so. With the largest allowance for the operation of of belief in spirits, as such belief, and not merely on the nerve force and somnationic functions of will and intelliground of agnorant misapplications, a defective guarantee gence, there remains much evidence to which the explanafor a perfectly unprepoliced examination. We see tions in this pamphlet are inadequate. no difference in principle between the a prieri nago. I refer, of course, to well-attested cases in which detion, we well condemned by the author of this toiled and subsequently corroborated information has been pemphlet, of facts, and the & preors negation of by given of deceased individuals of whom neither mes can nor potheres which contain no logical contradiction. If the circle had ever before heard. Suppositions of old impresscientific commussions are to be appointed for the express sions received and retained without external consciousness purpose of eradicating Spiritism, and, as it were, with may be pressed a great deal too far in the interests of a the instruction to eradicate it, they will be spec facto, and theory. Beyond a certain point they become nighty scientifically, disqualified for the research. Negative pre- probable. Nor can ovidence apparently outside the range conceptions are as much to be avoided as positive ones. To of mediumistic phenomena, or of the intervention of a somone probiningry assumption only can we agree. Whatever numberic consciousness, such as apparation s. haunt ngs. see . the causes (as antecedents) of these phenomena, they are be overlooked. natural and explicable, in accordance with lates of nature, | From the standpoint of you Hartmann's philosophy, an assumption which by no means excludes the existence the agency of spirits is an inadmissible hypothesis and perand operation of other intelligent agencies in nature than social immeriality is a delusion. The issue of psychological those directly perceptible by us, as objects of our present | philosophy is now between his school and that of Du Prel senses. The fallney which relegates such agencies to " the and Heller bach. Should the two latter prevail, for the supernatural," rests entirely on the assumption that material "proof palpable" of manuertality, to which "Spiritists nature and its inhabitants are limited in range and const. [appeal, we shall have a proof psychological, which seems tution by the perceptive powers of any given stage of to me far better. Our behef will still be founded on facts, organic development. For an animal with less different and that is the great claim which Modern Spiritians makes trated sense-organs than our own mur of our nature is more to public attention. But they will be facts better underexistent. Has science learnt the leason of evolution so ill stood, related, and generalised. as to commit the series error of considering existence, or nature, and present perceptibility as comerdent?

August 22, 1885. ]

Another point on which we are doubtful is the utility of the proposed communicate oven for the verification of the subjective conditions of their occurrence, given by you phonomena are little likely to be elicited by a mental attitude which, however intelligent and fair, would certainly not be in sympathy with that of the medium. Investe gators have, it is true, succeeded without, or with only the appearance of such sympathy; but then they have not been already known by the median to regard him as a physician regards an insene patient, or as a physiologist regards a living subject of "experiment" in his laboratory. Henof science may obtain, and have often obtained, as good results with mediums as the most emotional "Spiritist but then they have not come with an official commission in their hands to expose the fallacy of the belief which a perhaps at the very root of the manifestations. I even believe that the phenomena I have myself witnessed have been less remarkable since I let it be known that I was had a " message " perporting to be thus derived.

of the pamplilet on the above accounts, (as also, perhaps, on account of the prominence given to the very question imperative that we should appreciate the possibilities, atterances of mediams as that school attaches much. as of the sommambalic consciousness which may actuate it Psychische Studies exchanges with fifty of them, and in Even granting the presence and action of spirits, medium. Germany alone there are five. Most of them are untrition. slap must mean comething, and the problem is what and auperstationally credulous to a really incredible dehow much it means. It is logically essential to exhaust the gree, the worst of all in this respect being the American possibilities of the medium before we bring the spirits on reports, their value being further rendered by the fact that You Hartmann's, and the editor of this journal is doing professional mechanis have reached their circuax. Among sacrifice of space, most fully before his readers.

It may be that we shall find that the emment author

And for many, no doubt, the "proof palpalde" will canily survive this pamphlet. But no one who has not first read and understood the pumphlet has a right to say that the proof has survived. The nuther represents Spirit str facts. It is only necessary to refer to the account of the with and forence to everything but the autorest of the heart " in these phenomena. We in England at least Hartmann hunself, for the suggestion of this doubt. If will prove to him that "the interest of the heart" is comthe conditions are altogother, or mainly, subjective, the patible with a resolution to be sound in the understanding, and with an intellectual approciation of his organicist.

C. C. MARKEY

# SPIRITISM. By EDUARD VON HARTMANN.

I. THE GENERAL STATE OF THE QUESTION.

The word "Spirition" is of French production, the English, and generally the Germans, having retained the term "Spiritualism," but it sooms advisable to confine the latter to the metaphysical position opposed to Materialism, and not confounding it with the explanation of mediamistic henomena by the cooperation of specific to sesignate that explanation by the recent term "Spirition" The proponderating tendency in Spiritism in the American-Eaglish, which does not accept Re meanuation, but mainly not a behaver in the agency of spirits of the dead in the proceeds upon the Christian belief in immeritarity. In France physical numfestations. Certainly since then I have nover the direction given by Allan Kardee prevails, namely, the medination to the Indust belief that the soul has to re-in-But whatever deductions may be made from the value carante itself in new bodies till it has realised its divine aspiration for perfection. In Germany, Hellenbach transcendental individualism has a circle of adherents who able hypothesis of the "implantation" of olgective teach the possibility, but not quite the necessity, of Re-inhalicemations from medium to circle) it contains much that corruntion, and are chiefly distinguished from French we may profitably study for our own education. It is Spiritim by attaching just as little importance to the

as well of physical extra organic agency by the meaning. The number of Spiritist journals is considerable; the stage. Our first duty is to study such a standpoint as it is just to America that the our ing and swindles of well and wisely, in my opinion, in bringing it, at whatever, German Spiritist journals the months Psychische Studien (Leipzig: Oswald Mutze, 1874-1885) occu-

pies an exceptional position, the conductor, Dr Wittig, organic bodies. A small part only of mediumistic representing with energy and critical acumen Cox a twore phenomena is purely physical in its action, and even this of psychic force and the bullucination hypothesis against t a part is connected in its origin with psychical conditions, spirit hypothesis, especially in the last three years. I is with the disposition, confidence, and untroubled comfort of Characteristic of the whole movement that this get upt to the medium. Now it is quite manufacted for men of scence a hearing for the voice of reason, and to raise his journot to a second the lovel can on a second and a south that to the civef of the paper and the majority of the staff, and that ts first result has been the springing up of several competitive papers. For as most of the subscribers to Spiritist journals have no scientific interest whatever in the explaat an of the decreasing only the interest of the heart in the confirmation of the warf in authoritality by means of forms of samity are to be examined, the madhouses where them, the dear stant of the appearant ones the consistion. of their whole interest in the natter

Sparatists must take up the position of a physician of the usani, who obtains from his patients the exactest description possible of their delusions; and he who has no patience to enter and become fair that with the circle of ideas and the are often so dependent on complicated conditions that the typical modes of expression of the mental hereation will investigator cannot answer for anccess in every case; but this moves fac in a to pay hologress enus a.

for an possible personales, the alexa (Variablianger) of his the experiments with it must be just as unsatisfactory as moderness of a psychological necessity over which as a those with a medium who is navell, and if the dampuess of were as us on has no power. That a masked (Inverseler) the atmosphere exceeds a certain degree, experiments with sommunious asserbes the intelligent in infestations of his an electrical friction machine will miscarry just as much as sommun at it consciousness, which his perhuary conscious those with a medium. All this, however, cannot possibly new does not recogniss as his ! w | 1. ( magh, 1.4 m) personified intelligences, is not less psychologically a sersary. Now A further, those activities by which the to him. unconscious intelligence of his masker, smain it is cut sine sines are treat a men of thems, are produced by Here, however, we are remitted of the provinces of mental 1 ross to vin . In onserous impulse of his middle-brish (be said norvens disease, hysteria and somnaubulars, where the it on the muscles of the ambs or vocal argum, or upon a physician and the theorist have likewise to deal with the still unknown nerve-force of memorial party to a subtlest attempts at deception, without their secontific seal and should look on them as to neglect activities of those less plantoses operionages directions which he panetually proceeds to truthly general. And if with these processes is obeys, in the good faith that they are acting through him, postogeted the fitculty which the someone ambule has of pro- and in his waking state awears with a good conscience that during combined ballucuations of several sourcergains in the known nothing of those actions, holding them immethe some of squaltive persons present, the latter will be ducto performances of those figures of his phantary. easily disposed, on account of the "ps publity" of these to marky a country a the someanbure state can play the combined haddeniations of night, boort g, feeling, and act if a spirit and lo timigs of which afterwards, when touch, to tak the of a cignet version yest. And if, finally, awake, he known nothing, and which from the reports of the the agreement of these majorance has a mantons is proved writnesses he must take for assessed at a spirit actions. by several witnesses, the reality of the phenomena seems to them, as to the seminanuale is fluencing them, searcely to patients, without being their daps, knows how fixely and mant of further doubt

pictely normal man to have the notion of conting out as a locality, on applicates, on the distance and position of the mediant. The best qualified would evidently be conjurers, spectators, and in most performances on the preparations but those prefer to carry on their art before a larger errele he has been able to make. He is seldom without conof spectators, while to mediums are allotted the small profits | federates, and he has not to recken with nervous exof a narrow circle. One has heard, indeed, of many haustion from the representation, he is dependent on mediants who have become conjurers, but never of a con-certain conditions, but if these are not disturbed he is jarer who has become a medium. It may therefore, be , as good as sure of success. All this is otherwise with the assumed that no one enters the career of a hier rate who has mecham. not accidentally discovered in himself abnormal properties | The medium comes alone, without assistants and with and forces. Somewhat of these properties and forces out apparatus, into a place weigh is strange and not may indeed belong to everyone, but in so slight a degree accessible to him before the sitting. The Indian fakur apthat nothing special is to he done with them. In England pour naked, with only a ray round his loins, every sensible 3 per cent. , in America, where the air is dryer, even 5 medium-and none others should be experimented withper cont. of people (der Mesuches) are mediums to an willingly allows humself to be searched from head of these abnormal dispositions is more frequent than with , exchange, under inspection, the clothes he has brought on men, with lean, nervous constitutions more frequent than him for others newly provided of particular out and colour with the stout, with young persons more frequent than with Every article he needs is received from the host, so that older ones, before puberty more frequent than afterwards.

astonished by the phenomena as are those about him it spectators and in contact with them, but as he is influenced requires long exercise so far to obtain control over his bytheir illowant feelings, a malevolent, hostile, or frivolous muldle zerve centres as to be able voluntarily to place him - exposition distarbs its psychical activity, and that equally self in the combinen adapted to cheft the phenomena. As whether he is conscious of the reason of this disturbance or this exercise progresses, the phonomena increase in variety not. Since each brings different thoughts, feelings, and and strength, and his notoristy extends; by and bye be re- influences, the disturbing influences are multiplied with the reves invitations to other towns and countries, with numbers of the spectators, medianistic representations in guarantee of compensation. If before he has been stimulated the presence of more than three are untecedently to be any by vanity, now pecuniary interest is added; he neglects has posted, and are usually only successful when among the ordinary calling and becomes a professional medium. It is, spectators are mediums, who unconsciously reinforce the disagreeable to him to accept money for unsuccessful sixtings, principal modium, and thus compensate for the distorbing and yet he must have money to live; he begins to help the influences.

spirits that so his customers may be satisfied.

more sittings, the more money. But every sitting is a tension to the nervous system, and makes the medium more exaggreented. Success is entirely uncertain, and if the nervous, more hysterical, more powerloss. As long as modium is to be kept from all temptation to impose youth's store of force holds out, the thing prospers; then tien, it must before all things be made clear to the exhausted mediumistic force abutes considerably, and im that one is aware of this uncortainty of success, and thenomens are rarer and weaker. But notoricly parages will be in no way disappointed or impatient, though oven hum, and he has more invitations than he can accept; he many sittings should be without result. It is also to be sees before him money which he cannot care. Now is the recommended not to pay mediums for each altting, but to temptation to help the spirits argent. Sourcely any pro- arrange with them a fixed sum per month, or for a series fessional medium is spared this diminishing plane of his of all ness, with free quarters, because with the fee for each mediamahip, and it needs great strength of character again | xit. of there is a powerful motive to deceptions. to take up the abandoned ordinary occupation after long arratic life. Many mediums prefer to become anti-Spiritista, and to entertain the public with the tricks by which they formerly helped the spirits, earning thereby, as a rule, much more than by genuine mediumship. Thereby also darkness. Most mediums must first discover and develop particular mediumente performances, which can be produced | their powers by dark sittings, till they are so far strangthened in larger circles (e.g., thought-reading by contact and by and mured as to be sole to bear a moderate light. Only the involuntary muscular movements of the directive distinguished mediums succeed with full light; certain person) are further carried on, and the anti-Spiritum is only less to as for testance the extention (Emporfregen) of used to conceinte the requisite confidence, the conjuring tor a chain, one the implicatation of haline nations grees on at the mast time a so the public is far more certain y in the speciation, seem under all circumstances to duped by these anti-Spiritusts than by the Spirit at endure only a subdeed light. As certainly as the mediana. Many mediums arrive at length at complete different forms of the electric glimmer can only be derangement of body and mind, become infirm or molan- observed in the dark chamber, so certainly also thoty was end in assenty or smeade. This is the case not the phosphoresomt lights, which are very common only with American mediums, on also with the Indian, attendant phenomena of dark sittings, can only be witnessed although the latter can never make the thing pecamarily in the dark. It is, therefore, impracticable to reject dark profitable, and are far less tempted to exhaust their power sittings altogether. Yet they should be confined to the by too frequent exercise, but the Indian mediums aim at study of these phonomena, and no value should be attributed just that derangement of mind and body which our medicine | to anything else occurring in them. Sleeves, boots, and cap fears, and see in the gradual decay and dying away before of the medium, as perhaps other objects in the room, should death the most desirable goal.

Special Notice: Notice of the phonomena cases undertake a naswer correspondence through the phonomena. The factors of the phonomena cases undertake a naswer correspondence through the phonomena cases and the phono time, would have weight for no one out themselves. The existing materials are decidedly insufficient to pronounce the question ripe for sentence, but they are quite sufficient Man Mai. Thy .- The extreme pressure on our space this week less to pronounce it one demanding encustyation. It is the duty of every Government to arrest needless mental confusion and excitement among its citizens, if that can be obviated by means so simple as the appointment of a general fic companyation.

August 22, 1885.]

Sporttam is at present threatening to become a public er ainty, to which every boverament has to direct its attention, but it is not to be eradicated by probabiting public discussion, as has been attempted in Russia. The superstations belief in spirite is spreading opidemically, and opens to importors new ways and mount for the exploitation of crodulity. All forms of medieval superstition which were believed to be dead are awaking from their graves, and threaten a renowal of their muchef. These proceedings are already exciting anxiety in the guardians of religion; the representatives of a finer morality see their efforts overgrown by the re-inferred transcendent Egonia of a sensuously course form of behef in immertality The champions of enlightenment know not what other position to take towards these aberrations than roundly to deny the facts underlying them, and to declare them to be mere frued and awindling, from which nothing results but that their konesty is oniled in question by the Speritests, and that the belief is screwed up to the point of fanaticism by a priori contradiction. In fact, it is doubtful on which side is to be found must superficially, want of discomment, projudice, credulty, and mospacity for duting griding between observed facts and attendant suppositions, as one a sale of the control of the co whether among the Sparstists, who in every accidental fall. or an university see the maintenance of a spirit land, a far year apon remain and a serictors of cada of a control or among the onlighteness, who declare everything mind in this present life, and disapates morbid dread of the of an umbrella are the maintestation of a spirit hand, to se impossible which does not fit into their narrow pieture of the world. It is high time that an end shound be put to the state of confesion or offices secondic investigation of Cobonits. Four hundred of them come into the town doily of the phenomena in question, so that the nature of from the neighbouring districts. To give these children a intithe forces manifested in them should at length be made intelligible, and come to be conducive to the grossest apperstrtions.

Having never been myself at a sitting, I am not in a position to form a judgment on the reality of the pite nomena; this much only one I say, that were everything reported true, certainly new forces, lutherto uninvestigated, in man must be admitted, but that this notwithstanding there can be no sort of talk of an overthrow of laws of nature, or of an abandonment of the sphere of the natural. If, for example, a medium rices to the oriling in a recumbent attitude, that does not prove for me that the Malthy, 10a, Mr. Stanleps Speer, 10a, Mr. Arthur have of gravity has been supernaturally suspended in him, law of gravity has been supernaturally suspended in him, but that he must be charged with some force whose repulnion to the earth is stronger than the attraction of gravitation; just us this is the case with the small elder-puth figures under the electric bell. He only, therefore, who claims knowledge of the whole range of natural forces, can have the audacity to determine what is possible or impossible, before experience and observation; but such a claim implying a complete misconception of the limitations of our knowledge, these apodictic prodictions only disgrace the judgment of the men of science who allow themselves to be so far carried away.

# MORS JANUA VITÆ\*

# Br "M. A. (Oxox).

In the August number of the Fortunghtly Rariow Mr. Edwin Arnold has a speculative contemplation of the posat le deven prients of the fature as they affect the problem of man's ammortality, and as they are affected by the recent researches of science, which is full of interest to us Surfames, who have given attention to these matter f an a other point of view. It is an open secret that Mr Arnold himself is not unacquainted with the evidence on which we rely, and it is easy, though he never mentions Spiritualism at all, to see how he uses the knowledge that he has gained from it.

"Man is not by any monne yet con mood of his ru mortality," though all the great religious have affirmed it though some few persons " fool quite certain that they will never cross to exist," still, " no entirely accepted voice from the farther world proclaims it"; there is still wanting that "one word from the lips of some elearly accredited herald sent by the departed "which would set at rest the difficulties of humanity and resolve its recurrent doubts.

But is this so? As I read the eloquent plumses as which Mr Arnold clothes his not unfamiliar questionings, I seemed to hear the utterance not less fam har of a higher the more authoritative view. Neither would they be persuaded though one rose from the dead unless, indeed, I may add, they were prepared for it. These things are matters of development. We are passing through a transition epoch. "He that has ours to hear," does hear-

How happy should we all be, Mr. Arnold ruefully on claims, if all this perplexity were done with. How fair a place this would be if we know once and for all that death comes "as a mother lulling her children to sleep, so that they may make ready for play in the fresh morning."

If for "play "we may read "work" there is no objection to that statement. Death or the gate of life of a wider and nobler existence, when each of us finds just that place that he has fitted hunself for the adit to a new phase of development, through which the soul that passes gams an additional training analogous to that which farth introduced it to in this world. Death, as Mr. Arnold says, comes as " the gentlest angel of all the ministers of man, bringing him much more than buth ever brought."

So far, there is nothing new here, but the old them's is illustrated by some considerations drawn from the researches of science which are of importance.

First of all, it is a "great mistake to refuse to believe in the continuity of individual life because of the incomprebensionlity of st." Existence all round us is full of miracies, so called. A few more or less may be thrown in. Look at the meduze, " which is now filling our summer seas with floating bells of orgsts, and amothyst. Born from the glassy goldet of their mother, the young hydroscon becomes first a free gorm retembling a rice grain; next a fixed cup with four lips , then these lips turn to tentacles, and it is a hyaline flower, which splits across the calyx into seminents, and the protean thing has grown into a priceone crawned with a tuft of transparent flaments. The cope changes into a spries of sea-danges threshed on a pearly stalk, and these, one by one, break of and fleat away, each a perfect little moduse with purple bell and trailing tentacles," After that we may well regard incomprehensibility as no bur to truth. "Miracles are cheap enough."

And next, the very fact that these speculations are so rafe in the nir, as we may, is some evidence that they have a rouses offers, "All the other asperations of infancy, youth, and manhood, turn out more or less to be prophecies

The body foresom and provides for its growth by appetito; the mind expands towards knowledge by childish curtosity . . . There is a sign-floance, like the breath of a perpetual whisper from nature, in the way in which the thome of his own immortality tensor and haunts your. Note also that he discusses it least and decides about it most dogustically in those diviner moments when the breath of a high supulse sweeps away work-u-day doubts and selfishnesses. What a blow to the philosophy of negation is the sailor looping from the tailful of his ship into an angry see to save his comrade or perish wit .

But may these instancts not be all wrong? The potton of the sea is paved with relies of countains elaborate ives, seemingly wasted, that had as good a right to immortality from their own point of view as we." Admitted, mays our writer: "If life be not as inextinguishable in every egg of the herring, and in every bird and beaut, as in the sort and the rage, it is extinguishable in angels and archangeh."

It may be so. I should have said, rather, that the potential survival of life as not immortality, and that thus survival in some undividuals does not necessarily, and of consequence, imply its survival in every member of the race. There may conceivably be such a case as temporary survival of the whole intelligence or of a certain portion of it. And equally, there may concernably be cause in which the starved and stunted soul finds itself without a habita tion when the physical body is dead. The tendency of life may be to survive death, and yet there may be exceptions for which Mr. Arnold's argument does not seem sufficiently to provide

But however this may be, the answer to the problem, "What is that varying existence which can survive and take new shapes, when the dog-fish swallows a thousand herring-fry, and when the poet and the sage he silent and cold?" is sound and true. No one knows, "because each stage of existence can only be apprehended and defined by the powers appertaining to it." "The inherent disability "" Donth and atherwards." By Edwin Arnald, C.S.L., Fortugally Series, of terrestrial speech must be kept in view." "We have to thought."

thought at all respecting the phononeus with which ha is those scenes is not at that we are concerned with . our thing may be repaid and repaired." reservehor into those mysteries. Though we cannot aspire going, wo may convey in terms of our own thought, all lindelearned here find there due place and development, that we in last, but each -everywhere-finally attaining." gree by a embryo what we that, be there in growth, to onch state adequately adapted to our environment, thou and now struggling up to perfection. Mr. Edwin Arnaki's argument would be saturded by such a knowledge, leading to such rosults. If we can argue from the netted demonatrated existence of even a single man, after death has done its worst with him, we establish a possibility for the race. And it is not necessary that we should inquire afresh reto the state of al. the sons of men before we are permitted to generalize from a given number of observed cases. Nor is it any more necessary that we should have a accurate chart of that sea that we must cross, nor a f map, in all respects complete, of the land to which we go; tor in it mounteent on us to feel able to template into terms of our thought all the wenders that it contains, before we pormit ourselves to learn about it all that its denisens can tell us. By all means let us bear in constant memory that our tanguage is imperious, that our knowledge is limited, and that there are there, as also here glores that transcend alike conception and description, and then let us set curselyes humbly to work to learn all we can "before we go hence and be no more seen," before "the night cometh when no must care work."

Mr Arnold, though he does not expressly follow this line of thought, yet evidently has it in mind. He sees that even here our faculties are limited, and yet that this limitation does not prevent our making the best use of them in our power. Our organ of vision is not as clear as the sensitised Sim which deplots what we connot see, "buy plide of carbon is aware of actime mys favisible to the fix themselves upon sensor was and act a win bear as med unaus , selenium swells to light which is lost to our organism , the magnetic needle feels and obeys forces to which our most dencate nerves are insensible." It seems, therefore, within the range, and not beyond the rights, "of the imagination to entertain confident and happy dreams of succesare states of real and conscious existence, rising by evolution through succeeding phases of endless life.

Science administrates the possibility, though it may not rise into the sphere of hope. Revelation declares the fact, though it cannot rise out of the domain of faith. It

think in terms of earth-experience, as we have to live by is reserved for Spiritualism to add to the whisper of pensibreathing earth-envelope." We ought to be reassured, builty, and the eigh of hope, and the prayer of faith, the therefore, when we find that no one can depict for us assurance of demonstrated truth. To the age of doubt the coming life, "for it would prove sorely inadequate if comes the avidence which alone it can accept; to the it were at present intelligible. To know that we cannot faithless and perverse generation the sign that it has now know as an immense promuse of coming enaghtenment, valuely sought to the materialistic mind, from which hope We only meditate safely when we realise that space, time, has long ance faded, the scientific demonstration which and the photonoment of sense are provisional forms of will Discounce its cheerless, cold philosophy-the philosophy of a dreamy negation, and a hopeless future-with the This truth is so familiar to the Spiritualist, who has work of Spirit, which are also words of life.

Nothing, says our writer in a concluding passage of familiar, that I need not enforce it. The Heaven of solar conception and elevates diction, except gnormer and orthoge's Christian decringy with its horps, and its crow's, despondency for adsitue occupf that the senses so etherm is all and is golden glories, is but a rather children attempt to and enhanced, and so fit y accepted to the time conbinations translate into the terminology of earthly life the half- of advances entity, would discover without much amazemangined, wholly indescribable perfections of the state in which ment award and friendly societies springing from but prothe communicated spirit finds itself when death release it from portionately mixed above, the old associations; art divine). the prison-house of the body. " Eye hath not seen, nor one elevated, science splendidly expanding, bygone leves and heard," or if they have, it has not outcred into the head of sympathics expining and obtaining their purpose can fully to concerve of this Elyanim of the blessed netivities not free for vaster cosmic service; aboutly d Language, always inadequate for its heat work here, is hopes realised at last; despured-of joys come instance v wholly anable to convey along which it was not framed to within ready reach, regrets and repentances, softened by comprehend. JAMPS MOSTGOMERY Shoffeld, August 10th, 1829.

Evel Spirits, -Spiritsalists my that many manifesting parts exhibit dispositions that are more or less evil , and they have a hypothesis that spirits continue to be awayed by the feedings that ruled them in the body. According to the sume hypothesis spar es, passing in evil into the other world, not having the conditions there for intuitying their impasses, try to fix themselves upon senservers and act a online as the duminant of a new term after themselves as what the agent charge agents the devil work the agent and affectness that they are thologues their very personal account into their mediums. Such a hypothesis is very saddening—that after a wretched life on earth one is to find oneself in the land of souls, moved by the mass wretched disposition, to search about for an ourthly sensitive on whom to fasten and urge to actions for the natisfaction of sweetspale impulses to this or that will, even murder. There are points about this hypothesis of ovil spirits which we should like to be made clearer ... J. S. Lovelano, in the Spiritual Offering,

Is that a death bed where a Christian lies?
Yes but not his—'tis Death stack there does.—Coloridge.

SOME ODD " FADS " AND FANCIES : THEIR give out, at the surface, odic light—the so-called ghosts of BATTONALE AND EXPLANATION

August 29, 1885.]

BY S. EADOR, M.D. HI.

The sources whence OD emanates may be shown in many ways. Open a champagne bottle in the presence of a sensitive in the dark, the bottle will appear all of a glow, as if illuminated with snow, with a light wavering cloud havering over it. Thus is OD from effervesocace. Throw a spoonful of table sait into a glass of water in the dork, stacke it, and the sensitive toes the water full of bright light, and if the glass is taken into the left hand it will feel cold. Thus is OD from a mosple colution. Put a wire of copper or zine in a glass of diluted sulphuric and, the whole ware, to a sensitive, well be all on her, and its upper end will blaze forth like the flame of a candle, only weaker This is OD from dissolvent wetals on node. Dissolve a sods-powder in half a tumbler of water; in another, a powder of tarturic acid pour the contents of the one into portion as the tone was high. From this, it is inferred that of the other, materialy the mixture glows with a bright light, and a large white dame ruses from the surface. This is the development of OD from chemical decomposition. All chemical action developes OD rapidly, but the source exhipats itself as soon as the play of the off it es

Patrefaction in a state of fermentation and all these abstances give out the Othe light. This naturally takes a to the churchyard, and to the glosts, read or unread the wire was next rabbed on a grandstone, the whole length which old women, and many others, from time inmemorial have always affirmed to have been seen, and which are said to be departed souls, wandering in garments of fire about their graves till they have atoued for there are a and obtained otornal root. Such is the superat the out the torch of secures will dispol this illusion. With the idea of putremetion in his mind, Reichenbach, the dark, and to the sensitive each glowed with light and, if took a sensitive, Miss Leopoldine Reichel, into a neighboaring churchyard, and also into the someteries of Vienna, to test these and stories about the fiery ghosts. Over many graves she new fiery apparitions, some as large as men, others like dwarfall sprites, making uniform movements like a row of dancers, or like soldiers exercising. The old graves had no such risitants. As the lady approached them their apparently human forms disappeared and showed themselves material as merely light vapours driven to and fro by the wind. She stepped into one of tuem, it rose to her nick and was broken through by her clothes. She drew a figure on the earth of this grave with her umbrella, and the marks were more visible from the increased vapour which came up from these newly-formed forrows; and this was the cesult with regard to all the vapour-forms which moved over all the newly-made graves. A young man, called Baling, in Holy Orders, was more walking with his friend Pleffe ), the poet, and sudden'y stopped. He was asked why he stopped. Oh nothing; but, he said, he always felt peculiar when in the viellity of human remains. No one knew that a dead body was there. At might be was brought to the same spot and saw vapour dancing up and down, not unlike a human female figure with the hand on the breast. The ground was dug, a body was found, but afterwards removed and the grave filled up. asknown to Billing. Next night Billing was brought to the same spot again but he could see nothing. The old women really saw something which, to them, looked like human figures, but which Reichenbach's experiments now demonstrate to be merely putrefying motters enumating from recent corposes, dancing in the wind, in fact nothing substitutement columns. These banks were twinwed in our more than gas or vapour, composed of carbonate of Comm, being No. 1 of the same series, the fourth American animonia, phosphoretted hydrogen and other known products odition of which has been issued in America, a size expected in of decomposition, which, in their ascent through the earth, a short time

the superstations of all ages. Over old graves, i.e., when decomposition has ceased, these vapours, or unreal ghosts, are a visible to sensitives and non-sensitives alike. Well, then, after all, it was a fact, that old women, who were really natural sansitives, did see moving, flory forms in charelyards, which their imaginations pictured as glosts, but which this modern science has proved to be merely instaral phenomena-the results of putrefaction-the odio lights perceived by these sensitives, telling the tale how rapidly decomposition was going on in the ground beneath

When the bell-glass of an air pump was struck with a key, a light was at once visible with the sound, and the louder the sound the brighter the hight. This expersment was tried with a horsesline spagnet, a mutality haz, and other substances, and with a similar result. When a violin was played upon, the string and sounding board vibrated with fervid light, and a tum der, struck with a lenfe, to the sensitive, in the dark chamber, appeared to put on a garment of light, bright in prothere is OD in nour io

Can OD be developed by the friction of solvin, or by the friction of liquely against solids? In order to test the development of OD by the friction of solule, a corper wire was fastened into a little board, the other end being held by a sensitive, Miss Marie Mais. This bound was now rubbed with another like it, and a sensation of warmth was at once felt by the sensitive. The end of of wire glowed with OD, and from its turned-up and a flatne, ke that of a candle, wrose from this experiment the friction of as it event y produced OD Next it was tried whether the friction of fluids against solids would educe it. Closed bottles containing alcohol, other, seem acid, erecepte, turpentine, and water, were each shaken in the bottle was held in the left hand, there was felt a disagreeable lakewarm consution. If the shaking of the water sets OD in motion though, Rejelienbach, will not this prove to be the solution to all the wonders of the Divining R of in the hands of Montieur Saurelor, the celebrated French water-finder and, indeed, of all other water-hunters and vem discoverers in all ages, and mall parts of the world? The sequel will show

# INDIAN MAGICA

(Aberdged from "Cased's Saturday Journal," Jobs 18th.)

I was traveling aroug. Amon with a jury of German. all antall, except one, who was gigarate. I made their sequainexcepting in one trick-the 'Pharonb's seepont,' so much in уодна вонье усова вдо.

After I thushed, the doors were closed, and only those admitted who paid a small fee, and soon, the apartment be g heled, the magicana began, The audience act on the floor around them, so that the perferences had no way of concesting thomselves or of hiding anything. At their request I minimize myself that they had nothing about them. Then one of the women stepped into the enclosure, the rest remaining behild the speciators. The light was now lestened, such the woman's face became gradually thanined by a ghostly light that extended quickly ver her untire body. She then moved round also round, uttering a low, narrouring sound, gradually quicken; the pass until she whirled about like a top. Then the litime had clung about her soomet to be whirful off and sensited a pillar-like form beside her; they also stopped, turned, and began to mould the light with her hands until it assumed a form, with face and hemigenr. She must called for a light, soul, all the estables being relighted, there stood a stranger, are remountagly ovalved out of cloudinal. He stopped forward and grouped my band, his hand was moint, as if with perspiration. The lights were lessoned, but not no much that we could not

see and in a few monorite the new figure began to Inde, seen passening the appearance of a pillar, or feen of light, and then, attaching itself to the woman, was seemingly absorbed into her form. All this was done before, at least, fifty people, and not to feet from a yard. The warmin appeared exhausted The aga to now next took his place to the ring, and hand ug a salare to me and . In five infrates I with you t

beliesed me. I couper a set he can it had been them many blues so I finally agreed. I the a light a water for on . alout, grew perceptibly smaller, and finally stood before us so gange that I thought I could soo through him. The five minutes post, I look the sabre and struck his nock a light blow, when to my horner, the blood married, and the head fell upon the floor then the bady steerped, probad it up, hold it is the air, and the a placed at upon the shouldons. Full light being restored, there stood the giant grinting.

The blood! That had field away. All the party not stopped toto the ring, and began to chait and move about. In A fow minutes they consed, and we observed that one was muwing though no one nawhim go. A moment after, the whirling was repeated, and mother was found to have disappeared, and so on, are, to difteen minutes only the ginnt was there. More light was new called for, a neme washeard at the door, and on sta being amounted there steed the firm' That ended the performance for the night. I sat up well into the storming, teying to make out low it was all done. The natives said it was magic, and I began to think that was the outlost way out of my difficulty

'The following day another performance was given at and day. The giant, as I call him, esmed the audlence to sit on a grees plat, leaving a circle of about twenty-live feet across, and in this the unwicians took their places, the giant opening proceedings by taking a roll of ribbon, and, by a dexterous toss, he sent it up fifty feet or so, where we saw a hawk dart at it and carry it up higher, until we nearly lost sight of it. It then seemed to other a clone but from the cloud came miling down the ribbon first a log. then a make that wregger off the moment it touched the ground but was captured by the nen , then a larger object came sliding down, and one of the women, leaping forward, received and hold out to the crowd- a laughing pative boly. The ginat had all this time held the end of the ribbon. and, letting it go now, it seemed to disappear in the air, at any rate, wosaw it no more."

Coinci est Due on a selecting to a suggestion by Porty "that witches may have had many dresses of their Subtracts in common," Prochessic Studies for July ideases at their Subtracts in common," Prochessic Studies for July ideases a very striking cose of this from a book of the secretionth century, ontitled 'De Fascinatiane," by Frontisan, a physician of Coburg This case is said by Herr Kiesewetter to be unique in witch lateratore.

# CLASSES ASSMESSMERISM AND CHICAGR VOYANCE.

I had been from a friend, Mr. M., of the nomewhat romark able powers of a claircoyant subject of Mr. W R. Price, of

It occurred to me to commit that buly, Mrs. B., in reference to a momunic subject of my own, Alice M., whem I had just to shoon therity or forty tenut without obtaining any better remaits than those depending upon suggestion, or the exercise of my will. was desirous of developing the churvoyant faculty, and the abject of the interview in question was to have the jum or of Mrs. B. as to the probability of success.

There were present-Mr. Price (acameras) Mrs. B livery to a city in

I had praviously obtained a look of hair from my an open to erve as a clue. Absert as soon as this was placed in her hand Mrs. b sectored hersalf in communication with Alice H., then ver six miles away. Mrs. B. pave-

A description of Alice H., physically and mentally. (Correct.) A description of the mode of operating I had employed and hat its offeets had been. (Correct in enentials.)

Veryte sured a method, showing why I had not succeeded producing the "higher phenomena."

Minute matractions for future guidence, including directions how to make the passes, how frequently to undeen the along, and other particulars based upon the idiosynerseiss of the person to be memorised

The results of the about trial I have been able to give the ethod adruod are sa follows :-

It required fifteen minutes to produce the along, instead of n minute as before.

The natious described herself as in a new condition.

She had no recollection of any provious aloop, although in the former state she could recall the events of each proceding deep if denned.

She was not subject to impromious or to any will.

Of course it would be premature to expect clauroganes at smout, but these facts resifies in show that by Mrs. B.'s instruction I have produced a condition differing from that obtained by my previous method, and which my subject, in the sleep, has stated will meet with secons.

I have left the most striking fact till the last.

In her preliminary diagnosis of the candition of Alice H., Mrs. B. alleded to a weakness in the left eye.

This was at variance with my belief at the time, and was, undeed, the only statement made to which I had comon to take exception. I felt certain that had such been the case I should have been aware of the fact.

With no further "leading" than the question whether her eyes were all right, Alice H. told me that her left eye had been operated upon for an injury in childhood, some eight or nine

but, as no moonvenience had been lekt for some years past, it but she was no longer there, and his pack lay on the ground. had not occurred to her to mention it to me

# "WHAT THE INDIANS BELIEVE .

The following story is taken from Washington Irvarg's Tour on the Progress

I will have sold a little story, which I packed up in the course of my tour through Beatte's country, and which illustrates the superstitions of his Osage kindred. A large party of Canges had been encumped for some time on the bordens of a thu stream, called the Nickmanns. Among them was a young hunter one of the beavent and most graceful of the tribe, who was to be matried to an Chago girl, who, for her beauty, was called the Flower of the Prairies. The young hunter left her for a thee among her relatives in the excampment, and west to St. Louis to dispere of the products of his hunting, and purchase enaments for his bride. After an absonce of some weeks he returned to the banks of the Nickanana, out the energy was no langer there : the bare frames of the souges and the extinguished fires sione marked the place. At a distance he licheld a female scaled, as if weeping, by the aide of the strong It was his affianced brule. He ran to contrace her, but she turned mournfully away. He dreaded test some svil had befallen the europ.

" Where are our people?' aried he.

"They are gone to the banks of the Wagrushka."

" And what set thou doing here slone?"

of Waiting for thee."

" Then let us harton to join our people on the banks of the Wagnishka

# SPIRITISM

Angust 29, 1985.]

BY EDUAND VON HARDKANN (Continued from p. 400.)

I have personal knowledge of only two of those who have rendered service in this department of research, Zollner and Heilenbuch. Zöllner's experiments are excelleatly contrived, give the best conceivable scentity against conjuring, show everywhere the skilled hand of an accomplished experimenter, and are reported with elearnous and precision. It is to be regretted that Zöllner was intent on the conferention of his hypothesis of a fourth dimension of real space, yet this cannot prejudios the value of the actual results obtained. But unfortunately Zollner's reports are buried in such a wilderness of polemic, and the four volumes of his "Scientific Treatises" allow in the flood of ideas so much that borders on confusion, that in his later years he can no longer be esteemed a classical witness.

Baron Helical ach is an incusive and self-possessed man of the work of a schlagfertiger, geodesgapemetrliger, Heliagani who meant well be trusted to see to ough over astate conjuring, one, moreover, who a penet ater with a sense of the characteristic unreliability of usedianas and of the worthseamors of their revelations. On the other hand, his relation to the phenomena and their agraficance is as little indifferent as Zollner's, for as with the latter's fourth dimension, so he seeks in these confirmation for his metaphysical standpoint of the transcendental individuality Not what is worse, he holds it unfair (most file logal) to make more use of his five senses for taking cognizance of the phenomena than the medicus or appositions demand or permit. Now I grant that it is nutur (illayed) to rough y elutch hold of a medium or apparation, because an alarm or wakening from the communicatio state may have in jurious cousequences , but I do not admit that it is utilair to supplement impressions of sight and hearing by judicious contact or by smell. I maintain rather that it is the duty of an investigator not to neglect them additional means when the apparition of a head is four or five mobile a front of his own face. For either the apparition is grasped through, or a definitely constituted body, solid or fluid to the hand, is touched; in some of those other our any harm lumpen to the medium. As Hellenbach does not recognise this duty, he has, in my view, admitted too favourable chances for deception to be accounted a classical witness True, Hellenback's reports of sittings are among the new est and most precise we possess after those of Am ner out if they stood alone I should not feel sustained by them in a demand upon the Government for the appointment of a commission of anvestigation.

demand upon the Government for the appendixment of a commission of investigation.

But nothing is further from the fact their that their reports stand alone. As regards the physical phenoment, they are best supplemented by the reports of Crookes and Cox, of whom the former, is his experiments with 1 me first attempted to province an exact foundation for the whole province and the latter, in his work on psychool force, has furnished the best comprehensive report of the department of physical phenomena. Unfortunately Cox, is his observations and disquisitions, has not observed that degree of critical creamispectors which was to be expected of a second in resultance of the bidden was to be expected of a second in westignton and transfigurations, and the observed that degree of critical creamispectors which was to be expected of a second in the investigator is used to be indicated in the second of the four manded terming of the most instruction of the four manded ment are already the most instructive on the Fascening by grasping the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the Fascening by grasping the point of the four manded ment are already the most instructive on the production.

Fascening by grasping the point of the four manded ment are already the most instructive on the production of the point of the four manded ment are already the most instructive on the production of the point of the poin

subject, and any one wishing to be informed in it cannot de better than begin with the accounts ruferred to." It is to be observed that Cox is against the spirit hypothesis, that Crooker and Züllner have declared neither for nor against st, that have expressly limited themselves to the study of the phenomens, and that Heilenbach at least thinks very slightnight of the spirit rabble which is so foolish as to occupy itself with us.

The circumstance, which gives to the reports of these men a weight trust standing alone they would not possess, is that in the last forty years numberless witnesses have made and published similar and surpassing observations, and that this phenomenal province is as old as the history of markind. In China and India, among the Sibermin Shamana, and the Malayan magicians, among the mystics of the Alexandrian School and in the prunctive history of Christianity, in the tribe for canonication of Cathonic saints and in the history of the witch-trials, among the alchemists and astrologens of the middle ages, and the vagrant thoumstorgists of the last century, everywhere there is a recurrence of definite typical forms of abnorma powers and performances. I According to the ideas of the time and the attaction of the mediums, they were variously sacribed to gods, nature-spirits, elementary spirits, or demons, to the power of the Holy Chast or of the Devil, to amountral sperite, and to a combination of nature spirite and ancested spirits. The present Spiritism is nothing but the re-appearance and revival of a phenomena, region known to all peoples and in all tomes, and which has been authoritato by and vehomently denied in the Aufklarungs period , the spirituatio explanation of the phenomena agrees with that of the Thomse and Indian incessor who are a supply g he notice spirits and disoletie, which are to longer proper

The Aufklärung period had no respect whatever for facts, it put the world on the head (stellte the Velt my den Kopf), that is, from the rationality of the Aufk arring it decided & periors what should and might be, and what not. At present this shallow rationalistic mode of thraking or conflict were the recovery neal regard for reality, from which weak haman reason has first to learn what is possible, The phenome a or was Sport on founds itself have, therefore, a double interest, first, physically and psychoregionly, because they widen and complete our knowledge of what is actual, and therefore also possible, and second historically, because they give us the key to the under ate ang, in the review of culture, of all superstition and benef in mirracle, and of the natural origination of their types a conformity with aw. Up to the proper a lover auxterical research is confirm to by accromaticy, to thight

other traditions of the past as by insoluble enigmas, and the naturalised but pronounces in space a september of the important elucidations of uninvestigated forces of nature has condemned the whole ching a his work. "The box and influences of one mind an another. But everything demental Ideas of Spirit sm and the tratter of the the resulty of spirits.

with abnormal natures and phonomena, and it must be adequate and superficial. recognised that the development and employment of them the injury which may result to individuals. It is, more W and one or Section is 2nd hairon Lapun, In over, to be considered that in professional (bernfenes) hands mediums we he for better taken care of than by dilettantes, upon the reality of unusual phenomena, but I consider the because an understanding of the injurious influence of sit existing testamomes, historical and contemporary taken in tings leads to the humano fortenance and medical control, the reconnection, to be assessed warrant for accepting the which up to this time mediums have not enjoyed. The existing in the union or mains of nore forms and phenomena with powerful mediums would be extraordinarily copacities than exact sesence has hitherto need rated and strongthoned if they could be got to alt, not daily, but only inthemed, and to be an adequately argent a . age to once or twice a week, they would also keep their power science to enter upon the exact research of this phenomenal longer, and their health would be much less prejudiced, per haps not more than a good constitution could repair by nouradment. As on principle I repudiate all public exhibitions of this port as an intelerable musauce (Unfag. so am I equally opposed to the artificial search for mediums by private circles; I consider it sufficient to develop those the material of fact for his conclusions and inductions. In mediums whose conspicuous aptitudes are specifulcously manifested. If the Government directed all authorities, magistrates, elergymen, and physicians, on every local occurrence of ghost's k ask new cases, conguego and stone throwing, forthwith to hunt up the anconscious medium and subject to the infection of his hallucinations. I believe it to send in reports, in a few years then would be sufficient to be psychologically inevitable that judgment should be material of mediums at cusposel.

For a rapid survey of this province, W Schneider's careful aynopsis in his book, "The New Spirit Belief" (Der nozero (icutorghuho" Paderborn Schönung, 1882), may be recommended, although the entirely mediaval demonology of the Catholic author storegards the fact that the mants and holicut sons and daughters of the Church have displayed exactly the same phenomena as the witches, conjucers, and Spiritists who are presumably assisted by Saton. That the Spiritute, on account of their wicked from his study is more likely to be free from the disposition, must be actually even new punished and rected out by the Church, as once the magicians and witches, is the good Catholic, if unexpressed, conclusion of this book of 430 pages. For a more thorough acquaintance with the tires of exact sevence hesitate to undertake research in a subject I recommend the monthly publication, Psychocks particular province of phenomena because they are scared Studies, a repository of everything worth knowing in the by inferences almost universally regarded as unavoidable by Intest phase of Spritism. In it are to be found all the both friends and opponents of the subject, a service to the also Cox's work on Psychic Force, so that, with exception oritic who dupels these obstructive prejudices, and thereby of the first foundation had by Crookes' experiments, thus first opens the path to unemberrassed scientific investigadiscussion of the different hypotheses,

The contribution of German philosophy, pro and con. the soul. Wundt hos published a small suff-spiritist externally repressed, but has not inwardly overcome.

of miracle men, mants, and witches, and by numberless paraphlet which does not at all enter into the discussion of the hope of finding a antiafactory solution of them must of prome as from the stind countef the larker may From hat stacif stimulate zeal for research in this department of of back and bronz Schutze rely is on "The Confession phonoment, even did that not promise besides the most a Materia and on the non-member s, con of second depends on this research being placed in professional hands, (" Die Grandgedanken des Sparitismus und die Kritik and, hefore all things, on its not being left exclusively 1. western Leipzeg, Gunther, was Of as Lore (SMA) a the hands of those who are guard by no sort of scientific only the first treats of modern Spiritism (pp. 3-130), and in interest, but only by an interest of the heart in verifying this again only the seventh section, giving a bare extract from the Cort-sames of a Median, is noticeable, while In dealing with mediums undoubtedly one has to do the critique of Züllner's reports in the eighth section is in-

Among the most circumspectures the deceased discuple of are a groun to their bodily and mental health. Wires the Schoper aner dig assir recensualt or maker upon at Warner's phenomena sufficiently investigated by professional authoric " Segen after Expects of a Supercutura to the Su v ties, this circumstance must be enough to discande from Supra next of the I at Zon 1571 No 41 of My Notice to useless repotitions of such experiments. But us yet this asport , out to class or trees served to 'der vert province has been so sittle examined and elucidated that ments and hipotheses if it can conhia it for menter and and the theoretical advantage of exploring it seems greater than phenomena whose the procuse of Lean " Herr P we want

I am, as I have said, not in a position to promounce province. On the other hand, I hold myse f at any rate competent to offer a conditional judgment on the on fusions to se drawn from these phenome as a rose of their county, for this is peculiarly the office of the philoso pher, while he must leave it to the exact sciences to afford tors or age when certar in not a use us so for he medium to in minist the sumpensable condition of the occurrence of certain phenons a, and the speciators are more or less under the magnetic influence of the meanum, and to some extent prejudiced by frequent participation in mercia madic actings; that for the investigator, subjected by them to the no ver of the messame and their a me to tions, it must be very a direct, but for the measures the processions troposeme, to keep the throng to the point to be drawn from the phenomena andepends t of the falsifying impression of the ballucinations experies or l. . . . that therefore, as regards the eventual consequences of the phenomena in question, a thinker conditionally judging

Philosophy is, on the whole, right to postpone conclusions to I the material of exact fact in before it in a form tolerably free from doubt and uncontested; but when the representamore important accounts by Züliner and Hollenback, as progress of knowledge may be rendered by the philosophical periodical combines all the necessary material of fact with tion. As soon as representatives of exact science are assured that the muches of the enpernatural, which superstation has woren about this province, is for criticism has been hithorto very defective. Besides the already gratuatous projection, nothing will remain to prevent the cited works of Helianbach, are first to be mentioned three examination of it. But with the scientific examination theistic philosophers, now deceased - J. H. Fichts, Ulrici, and and natural explanation of phenomena supporting belief as Frank Hoffmann, who went over with soughand trumpet (wit mirrole and superstition, they must necessarily lose the Sany and Kleny) into the Spiritist camp, to avail them power of nourishing and fortifying such belief and supersolves of the supposed Spiritust proofs of the unmortality of at tion, which the Anyklarung has only violently and SOUDCES.

August 29, 1863.]

## 11

## THE PHYSICAL PRENOMENA

If different persons are tested in respect to the control of their conscious wills over their involuntary muscles, very i ferent results are obtained. No one is able wholly to suppress all lovelentary muscular movements for more than ; voluntary arm or hand movements to the designation of a few minutes together; with normal persons, however, the letters, as by suspending a weight attached to a string these involuntary movements fluctuate about a mean prescribed by the conscious will, not diverging far or long from that. With a minority of persons it is otherwise; the deviations become more considerable with time, leading at length to combined movements, very important in degree and very different in kind. If, for example, a string with weight attached is held with outstretched arm over a scale, n the case of abnormal natures, there will soon be confixed upon. Physiology teaches that such involuntary muscular movements do not proceed from those parts of the cortices of the large brain in which conscious will has its aget, but from anddle parts of the brain, that with normal natures the reflex-prohibiting power of the large brain suffices to restrain such movements within practically lines. nificant limits, but that with abnormal natures the relative independence of the middle brain parts upon the supporter of the conscious will can attorn a considerable degree

Since the activity of these middle brain parts has usually only a preparatory or executive value, and, therefore, as a rule, for the human self-consciousness remains unconscious, we have here to do with a relatively anconscious activity of the brain, the results of which are expressed by involuntary muscular movements. In so far also as memory, intelligence, and desires accode to these middle brain parts, the results of the involuntary muscular activity produced by the latter might very well appear to cmanato from an intelligent and characterised personality, notwithstanding that the waking self-consciousness of the person performing these movements knew nothing of its unconscious brain activity causing the same. Nay, such person need not even be sensible of his involuntary muscular activity, and may thus, with a good conscience, deny luc mental origination and bodily mediation of the phenomena occurring, while yet he is the sole cause of them. This theory of unvoluntary momentar activity and unconscious brain activity was first started and expounded by the English physiologist Carpenter, \* and may now be considered as fairly recognized. Carpenter has only committed the mistake of holding his theory to be an exhaustive explanation of all mediumistic phenomena, and of discreatably (an illogater Weise) attacking the investigators who, like Crookes, dispute this pretension

If several persons sit in the dark, in tense expectation, with bands on a table, frequently one or other of them is an , abnormal nature, in the sense that after some time he developes involuntary mescular action, and moves the table, although he can swear that he has not willed to move it, and has detected no involuntary motion of his arms and has detected no involuntary motion of his arms and the author's references are to Psychiatric Studys by the English router by Erickenship to the original work, "Sense of the Studys and treasured English work, "Sense of the proximate terms and the sense of the division and, which plays to important a part in well account and the sense of the study study of the sense of the se

It would be wearisome to repeat, whenever a phenomenon | hands. To find out who the person is, it is only necessary to is referred to, the reservation that any explanation is only address the table, proposing that it should signify "no " by conditional on the reality of the fact, and that for this one mp," doubtful" by two, and "yes" by three raps. If the reality I norther can nor will in the least vouch. I there- table agrees by three raps, it is next to be asked whether A, fore beg that this protestation, here once for all expressed, or B, or C, is the medium, till instead of the negative one gets may in what follows be throughout remembered. I must the affirmative reply by the raps. It should then further also observe that it would be impossible within the narrow be asked whether the arrangement of the circle is favourbreats of a pumphlet to make the reader exactly acquainted able for phenomena, or should be altered in order to free with the phenomena in question, for which an extensive the medium from disturing influences, or if any one should volume would be requisite. I must, from regard to space, be excluded as a disturbing element. In the answers are confine myself to founding discussion upon some typical reflected the unconscious antipathies and sympathies of the forms of the phenomens, and as for the rest refer to the medium towards the rest of the party, and after obedience to these indications the phenomena will become much more distinct. One can then proceed to get the alphabet rapped of, the numers order of a otter in the alphabet being agained by he number of raps, and thus, by a very detailed process, it is true, carry on conversation with the unconstantly functioning brain of the medium

The conversation is expedited by application of in over an alphabet,\* or of involuntary pressure of the hand upon a pointer revolving upon an alphabetical plate, or upon the latter revolving under a stationary pointer. In each case the unconsciously functioning parts of the medium's brain must be first used to the conditions, many mistaken with the letters, requiring great patience for rectification, being made before this practice is acquired.

Still quicker than with such so-colled " psychographs" siderable involuntary deviations of the weight from the spot or " Spiritoscopes" is the conversation when the medium writes directly with pen or pencil. This involuntary writing is abundantly proved in the case of the mann when it occurs with the mine they are called "writing mer mans They can often only got the involuntary writing with the left hand, and then it is muchly reversed (Specjeleckryf). Many hypometary writers reverse even with the right and. With most the involuntary handwriting differs a character from their ordinary writing, and often resembles that of those from whom the continuenties purports to come. Envoluntary writing often occurs in full consciousness, in the muldis of a cheerful conversation, and apparently as mechanically and heedlessly as an idle play of the fingers. For convertation it is less adapted than rapa or the psychograph, because it prefers to follow its own caprices and drowny courses, and allows the widest facility for intentional deceptions.

With involuntary writing in here to be mentioned involuntary speaking, which however usually occurs in waking anconsciousness, thus in a state of convulsion or ecstacy (tranco). In this way are recited speeches and pooms, learnt by rote, as also independent lectures and surmons, mostly on religious or other ideal subjects of amotional interest. The "speaking with tongues" of the early Christian communities is only to be understood as involuntary speech in a religiously motived ecitacy. Here the muscles of speech, as in writing those of the hand, are innerved by involuntary brain activity of the middle central organs, and as with the change of handwriting, so here the roice takes an altered ring and intenstion, resembling that of a particular person, if the medium has the illusion that this person is speaking through him.

In the case of speaking mediums, it is quite clear that one has to do with a sommanibulic state, t conditioned by psychical excitement, with writing mediums an externally inscript ve trance-condition without waking consciousness can exist iloring the writing, yet the wak og consciousness

auscourse, while the unconscious activity of the middle parts desired which requires considerable practice before it can be of the limin simultaneously effects the involuntary writing, commanded with some confidence at the wish of strangers; Now there are here two possible cases, either the uncon "it also very easily refuses, the sittings being then failures. serous own activity a quest or is an a sociately unconscious, The investigations of Pahmestock have shown that every purely material process, fullowing prison and nice anical one has the latent capacity for voluntary exto-communitypaths, and only presenting a its you to the semillance of , limit by merely psychical means, and that many persons conscions intelligence, in consequence of the incchanical by practice can come to effect this transition at any time paths pursued having been formerly levelled and prescribed with telerable rapidity. They have shown further, that by relatively conscious psychical activity, or with and one can awake from this condition by mere force of will, behalf the waking consciousness there is a somnambulic but also that this waking can be voluntarily accomplished s' setousness accompanying less rechanged mater a ora any th restriction to certain parts of the body (as the head processes and endightering the vowith real of or agrace.

generated an atengent master the first sace of the communicability state. alternative would be sufficient, and as the simpler would be preferable. But as in those productions the government resumes its functions and its conscious will resumes control of a productive planetary and of a regulating intelligent over the awakened parts of the body, but that the parts is, up to a certain degree, unmistakable, the decision must not yet awakened are still withdrawn from that control, he for the co-existence of two consciousnesses in different, and remain exclusively subject to the someonic conparts of the brain. This phonomenon must therefore be accounted, and in the absence of any impulse from the called sommanibulum, but sommanibulism marked, that is sommanibulic parts of the brain appear entaleptic. This ve as and made a recognisable for external observation, by remarkable phonomenon of locally confined, or locally the persistence of the waking imperousiess. This mask of removed, hypnotians is confirmed by the latest French somme on an or to be considered as a transition state researches in sommanbalism. According to Falmestock, hotween the single donin or of the waking co sciousiess, practice at length enables the direct withdrawal of particular through the most different degrees as regards the remares and their subjection to a condition in itself estaleptic, but chearment of the two consciousnesses, these steps leading in fact sensitive and compliant to every innervation and constroly from the first emergence of the nonmambalic language of the commandable consciousness. In this condiconsciousness above the threshold, when the wak up consciousness is still apparently unchanged, through half of the skin in the limb affected, there is no longer any dronny states of output red circumspectors are accountability necord between the innervation-impulses of the nominaulumbe (na in second sight), up to complete extinction of the somebility of the waking consciousness."

What till now, with Carpenter, we have called unronseious coreination, we could thus just as well name the mapulaca. activity of summambule consciousness, and assert that the preprintary it its chair move acuts of moving us, in sector and scionaness, whether this latter, by extruction of the waking to be a condition precedent. Most of the other phe- land upon ica. (Pa. St. III 55.) nomena happen in the condition of a masked sommaninduces deceptions as to the causes of the phenomena, as conditioned by the will, but involuntarily brought about, the medium himself. CONTESTS OF "SPIRITUR", By EDGARD VON HARTMANN,-The General State of the Question 2 The Physical Phenomena The Nature of the communications of Transbearations and Materializations 6. The Spirit Hypothesis

BEAUTIFUL ...

HEALTSGET FAITH OR, PRINCEIVE MIND CORE. By W. F. Evan-Lauren Represented Torner, Sc. Cd. May be obtained of the Parchological Press, 16, Craves-street, Charing Cross, W.C.

Thus work treats of the cure of discoue in corneless and ethers by social and spiritual agencies. The method of curv kern discussed prevails extensively in Roston and e sowhere knierica, and with a success which cannot be galutated resume of some of the practitioners in boston rene of one of the ante-room of a meconful London physican in the number of putients to be seen waiting for their turn; and whatever the true explanation of the facts may be, most of the body, assurents which feels is bein to use cured, and that, too, by people some of whom know as I alle of science or shinosophy as a child, but yet possessing the single-mindedness and implicit trust of the shild, schiere the wonders accorded to faith

And on what theory does the writer of this work, do indeed all the practitioners, proceed? It is that of an all-porvading, allpowerful, all-bonoscent Mand. They have no other explanation the facts to their admit of no other.

Thought, mys the Kahala, is the source of all that in. Tho first expressions of thought are idean, which in their relation to external nature are thus defined by Proclas . " They are the exemplary causes of things which perpetually subsist according uses from another. An idea takes form in the In pariently well in body, he must first form the time idea of into its expression, and through this it passes into the physical himself, much as he ready in in apizit.

self this acts on a cause, and tends to adjust the lower animal corporeal organism. In the chapter entitled, "Executing well and the body in harmony with it. Idees, however, are but Judgment upon Ourselves , or, in Thought Separating Disease imperfectly expressed in the deceptive and illusory world of from the Roal Self." the author describes what we are to do in

This philosophy of idealism is to be applied to the care of dusages as it was by Josus, the Christ. All disease, so far as it has a material or bodily expression, raust have had a pro-existence in us as a fixed mode of thought. This must be expunged if we would care the malady. But how? The author finds the answer in the New Testament doctrino of faith. When power of perceiving spritted real that the above muc beyond the range of the souses, and a confidence to those on the trains and the sublement truth of faith is that in our minera he or we are one with the Divine nature. To discover surrow self and to find it included in the being of the aismfeatest God, the Christ. a the summit of all spiritual knowledge Sor the Chroit of the popular hoology, where the idea shrinks and discretize down to an actuated personauty, but a larger for er, corner Christ an atomal, all pervading, ad-c manning. and an eeron Chrise. In a say howing on a of six home, there is in passe nor seriow. Thus reche is within, and whose wo turn the mind in words upon itself in the direction of our real , is and true being, then all the false things of time are left without the gate, sundered from our real solf,

It is in the animal soul, in what the Apostle Paul denonmentos the prophecul man, which is budly translated the natural man," that the source of distance is to be once to the animal soul lands to a consideration of the nature of man. Man is expetite of living and noting on either of three distinct planes of being. But by the trusty the author means three degrees of our manortal nature for this life there are two others, the external body and the astral body, both of which are descrived by death. The lowest degree of our amorts, outure is ended the annual woul, the psyche of the Naw Tatamet and the acplicals of the Hebrews. To il . regard of he spend bettings spinion, or the reception of the me nely of or mys. Here a so is went we call reason were to the basement story of our immaterial, intellectual nature I be the region it us of the evil and the false, of the said discover and we must negure the power of transferring our consciouscoast is more internal plane of being.

The next degree is where the mine rises above the Jarkness and facilities of the selections thanks and acts of the place of pure interlect. It is no region of spiritual interigence. It has seer call all he encound some blacks more property designation the two ectus, some for remon belongs to the paychical manand nover discovers truth. In the futellectual soul thange are perceived in idea. There man is no longer blinded by the extornal source, but the faculties act independent of organic instruments. This higher story or plane of man's being is the sent of faith, which is the perception of truth lying above the range of

The purcosts, or spirit, is the supreme degree of the mind or the king principle, the angelic and divine man. From this impost depth of His conscious life Jesse, speaking for all men, and, "I and My Father are one", and again, "The Father is in Me, and I am in the Father." It is the Buildhe of the Supers . the meand Christ of Paul , and its development in us, from its satem atate into consciousness, is storial life.

It is an all-amportant point gained towards the attainment of a mental power to cure discuss when we come to a clear perception of the truth that man is already a spirit, and not morely some time to become one. This is the true idea of man, and stendfastly maintained will terrulate itself into an expression upon every plane of man's being

The author refers to Swedenberg to show how a change in our mode of thought reaches the body. In the degrees of life one form is more interior than another, but one exists and sub-All creation is first in idea , and if a man would intellectual soul, and this latter moulds the animal soul organism. It is a deep law of our being that all ideas have an When a test forms a conception of his real and immortal inherent tendency to actualize or externalize themselves in the means. The objects of nature are not truly existing things , they corring cursolves of disease. We are to separate, in thought,

pluring the malacy controls our reacher goand thewing it as no what makes it the "word of power. part of ourselves, but is some him, force, it is Sheaking if a The above is a very imperfect of wether said the of itself. So a disease upon which I six in joe . a man of very wide reading, and of an illustrated mind separate from my conscious inner self, and utterly discretes at which he treats. In the chapter beaded it such, and thus we give it vitality

To maintain with a volitional obstrace this attitude of thought towards a disease will have a marvellous power in curing it. " If we steadfastly hold in mad the true bles of 4. 36 car and form the mid, and to ought me the so that the outward expressions as as certainly as in a stone year, when the chair are dispersed, the nan which where The error, he Russon that I am sick, or in pain, or any discomfort, that my real and inner self in discused or unhappy, is that above which forms a cloud between the and the saved a higher sky, whence all life eraquates, When that voil is removed, the Sau of Rightentianess with toriving light will arise on my interior a crist, with heating on the minge

The treatment of disease is others route or the same princtples as are to be applied for the cure of ourselves. We have to remove from the mand of the patient the morbid idea, and to help to form in at the true. The alsome trues be separated in a tions from the real burns, it must be discovered. To do this we must speak to the patient in thought. One advantage of this is that we are nict by no opposition of will, no tendency to question and raise objections. When we speak to a potient in | words of eternal ite thought and it ailant proper, we touch the hidden opens, if is life if so a in a condition of receptavity. Prayer is the most a tens form of the notice or thurses of our maid a sin another. It expresses the highest activity of the a fa and magnet tion, in an act of bonediation. Discussing the nature and right use of the will, the author mys that the highest conception of an acof the will in that it is not inward. Divine impulse towards a goveand or atta. The will us the mineraport root of our left, and for region of allowing must be among followers. But thought is a Underhill, the eldest of the three "For girls," and comethe faith the inagination are the highest powers of the human mend, they are an activity of the Divine reals of our being Buland every virtues and beneficial exercise of will so defined. there he the life and transport on apotence of the Delty

Every virtuous resolution, says Fichte, influences the Omorpotent Will (or Life), not in comequence of a momentury approval, but of an everlasting law of his Being.

It is to be observed, says the nuther, that the will belongs to the Universal Life-Principle. It is not an active, but a passive or reserving potency. It is included in the acpuriment of the laws or feeling, and in its highest form a the Chokuse or Sophia of the Kalain, which in its correlations or descending degrees becomes the living force of the world. Thought or intelligence a the active or measurbane sectoricy and the will the presive and fenomiae power. Thought speaks and the will respond to The true form of the action in a curative effort a not out forth as a community but non-power or affirmation. It the first chapter of t enems we have a so time exhibition of the competent creative Thought, going forth as Will. It is not as in the common translation, " Lat there be light, and there was light," but God and (or thought) " laght or, and light was." It is only thought formalating sholf in a positive affirmation. It sooms hardly necessary to remark that a strong wil, force makes no more exertion in a expressing itself in an affirmation. Denne alone is powerless; sprittening and many were the remarks of deep appreciation and thought alone is lifelessfand inefficient. In every genuine act of faith there is a muon of thought and amortion for the second to give general act of faith there is a muon of thought and amortion for the second to give general act of faith there is a muon of thought and amortion for the second to give general act of faith there is a muon of thought and amortion for the second to give general act of the second to give ge not of faith there is a union of thought and emotion, or an enterfaction .- Con

our miner solf the unmortal Divine Ess. from the amenic, intellectual conception and a feeling that it is true. This is

The above is a very unperfect outline, in the author's own discuse culcular the author says. If Ith existers has a part of worth, of a most interesting work. The book is an important myself, and cease to take of it as inclined in the contents of contribution to the highest philosophy. There are many the Eyo, it will derive no support from my inner being, and chapters to which no reference has been made, but which are will disappear as cortainly as a branch severed from a tree will full of teaching of the greatest value. The author is evidently ment, from the throun of the Divine spirit in me, or which I and he had a twenty years' experience of the subject part of myself, will be not only like a house built upon the Relation of Jesus to the Christ and be Man," he makes some but I ke a coutle in the nir, a building that has no founds a confession of his own faith in the following striking tion. We make disease a part of ourselves only by thinking process : " In the formula fide, or condensed expresout of faith of Bulchium, which is called Trisharum. the three efects it a sens il take my reloge in Buddhs, Dharnn, and Saugha. By Dharns is mount the dectrines, teachings, and procepts of Gastama. Samples quittes the assemblies and ritualistic observances of the Church. After a cureful study, pursued without projudice, of the system of Buddhism, both in its theoretical and practical aspects, white acknowledging in it much that is divinely true and identical with Christmarty, I am still constrained to say, I take tay refuge to Jenne the Christ. In every age of the world God has much up extraordisary teen, and imported to them a high degree of light from the living Word, Buch were Mosss, Zorusatar, Confucius, Plato, and, above all, Gautauns, the Buddha. There was many a stray beam of the hyang agest of the Logor in an their systems, but it does not come in a form to be easily an "priorically appropriated by the souls of men in general And I Jesus should say to me as He that the twelve solect disciples, when many of His shallow features were heaving 11.5 'Will you also go away?' I should be constrained t say as all the world's great teachers passed in procession to much. Lord, to whom shall I go? Thou hast the

# THE MAGNETISM OF EVIL

the place where it was committed for an indensity period, linked together in a deadly chain of evil into tone, like atteching individuals who may be in a condition to receive is with a desire to repeat the action, or commit some unreasoning into a whirlpool of destruction annilar crime. It is an astral person, given out by : ole, as any Od force or magnetion of an opposite character. succurab to instartal disease, on do noise, or your, in-Highgute Archway is the some of a suicidal epidenic, the spot a phort tune ago.

The perpetration of suicide in a room endows that room with a nort of spell, beneath which fall the morally weak only wills positive in good are proof.

There seems an impelling, irrematible force at work horror stricken into the abyes of its own destruction.

ality for certain mustle. It is this force—which the Gospels in | call "Logion," which promptated the swine into the sea, by command of One in Whom dwelt the God-like power of n gater og a regions of forces or "clamantals," which had att mode etc. an sole a sha stafront scooling, the syman perventions which afforded them a home, and gave to them power, being, substance, of a certain attenuation, that is, substance arrivable to the grower sight.

This a legery as a recessed tion of the manner it which persons of the type of or the Lagged to destruction, when may have been set in motion by even and perverted Wil ,by its error-its sin. Lake the avalanche toppling from the mountain heights, nothing can stay the downward impulse, which gathers in anone an its regoes and deags down very the progressory, or are a hard new with multis me starts -The name, or origination of no evil action hangs about over if in human forms, swayed by some 1 same pass one vast body moved by one monstrous will, which deshes

It is from the contagion of evil magnetisms permenting prevented Will, and in an tangeble, as powerful, and irreas a fulle antenlinght, which frequently assents by secret thought sione, that a certain ovil of life well sometimes averagrend As bodies which have lost the equilibrium of health the social fabric ike a mantle of moral rottenness, aftering the apartal complexion from spiritual fatroos to gents so should more or less many or observed, for to more two material blackness, and transforming the inner man, who acturence of the more, values, whose force last excellent of proportions god-ske, and of heavy negotic raters fied in some particular locality by the perpet at or of into a "devil" of hideous deformity and aginess, whose an exit action. Proofs of this fact are could up y reque a gurn lan baiofgi pomon, and who can only impore diagnat up in society, which is devastated at cortain periods to and notice. When the temebrous illusions of the astrol epidemics of crime, as well as of discuse. At their measured earth-been fog russ from initials in this consistion, and gradually spread from mind to mind on the same 66th suicide setting the year having occurred upon that freel, but moves touch those who live upon the mountain. heights of spiritual wisdom, where the sir is pure, it becomes at length impossible to perceive what is fair and good, the dark and svil become alone possible, and man until, by some happy concutenation of circumstances, the is then manned devil. Good seems to him a fel y, the spell is broken. If a man hard himself from the parapet false dream of fools, and he alone is wise according to nature of a bridge, it is zure to be followed by a series of actions, and her laws, which he perverts, and result the wrong way of the same nort within a short period of each other. It is the Hones he becomes the enemy of God, man, and nature, he some with other crumos, and even fees ovils of life, which proyxupon his kind with the insetlate veracity of a demon, permente the astral light with a contagion against which poisons himself, and at length is overwhelmed in the vortex of destruction

The horrible diseases which afflict the body, and which which those who are already unbelanced, perhaps uncon originate in the artral light,—for material excesses after the sciously so, are unable to withstand. This force, coming at organisation of the natural or sidereal body, and the times with the strength of a personal impetus, frequently physical body suffers, in its turn, from the failures of the takes astral shape to the inser eye , and if the poor victums , soul, let thom be great or small-present in some degree the have ever afterwards the power of describing their sensa | outward auditude of the ravaging horrors which infest tions at the time of the commission of crime, they generally human souls, and which they contract from each other, my "the devil made them do it!" It is indeed that power ! thereby helping to spread the infection of svil. The pentwhich alone deserves the name of " devil "-the "Magnetism up forces which and their way through the earth's crust in of Evil", that blind force which men must learn to conquer the form of explosions, volcame disturbances, and earthif they would liberate themselves from the thralls of ourth quakes, correspond to the moral convulsions which break andt he firsh, for if the Human Will does not learn to detach up society, root and branch , hurling helpless innocent itself from that fatal magnetism, it will become swallowed myriads beneath the emplorat demoniac wills of insome up and absorbed in the current which ends in ruin, and at revolutionists, despotters, and murdorers , leaving the ruins the end of life, when too late, it may be awakened to gaze of fair nomes, and whom stonned and paralysed by fright and horzor These convulsions have their origin in some This Odic, or magnetic current, is formed by a chain of secret evil which is hidden over and concooled, until by perverted Human Wills , it is in fact an "Evil," or the " Evil propagation from mind to mind, it gams an enormous Spirit," and becomes in very truth an objectivated person- | explosive power which it is impossible to control, and which,

One with God, and thus alone becomes entitled to be called one, he is only fit to be cast out. " a spire, " having been before only annual-human, with a ... The Will is the armour of Faith, by which Faith may perhuman, and not, preced sec-

to ve secretion or the the malves the birth of the Spirit, or Lord who fee . A thin is Divise overshadowing, have need. Those who commit crimes are manue, they possess per

to attain to the knowledge of spirituality and truth to handreds, and may be the cause of widespread calamity. untails the daty to tench it, to spread it. No man should There is nothing comparable to the power of the Human hide his light under a bushel, but, setting it on high, suffer Will; by it, forces may be set in motion which would over-It to radiate through the darkness as far as it can reach, wholm the world, and by its exercise in beneficence, the By speeds, by writings, by example, those who possess truth, whose human race may be uplifted into the health and forth, each one, a stream of good magnetism, which must, at length to people the earth, men manpable of evil because sooner or later, find affintised subjects, and thus extend the , desiring and Williams only good. From the lives these would good. A powerfu, chan is thus formed for an Odic current load of co-operation with God in nature's laws for the apposed to the "Magnetism of Evil" It is an endless tight good of the whole, the earth would become a heavenly between the "Angels of Light" and the "Angels of concition of existence; selfishness would be extinguished, Durkness," and the victory is ever to the side which games for each man would live for the good of the whole of manthe greatest number of adherents. All the more needful kind, the astral light would become purified, and clear, then is it for the Sons of Faith, or the Lie greeness to be from the regenerated will-forces brought to bear upon it, carnest in teaching. The greater the number of those who in altered and improved thought, mental impulse, and the soul, and a referred Will which determines to live force in nature would be held in a Divise equilibrium from that best, the greater will become the force of moral suction burners harmony of wir to produce only good over the chadron of the world, who seek only transitory | Such a state of society is not an in-possibility. The enjoyment in sensual pleasures, to whom life is nought but good on the earth already produce it partially , it extends the gratification of deare. A sort of universal education around them so far as the perverted Wills of others will is thus finally not up, -- a certain standard becomes "the permit. It is the percension of Will which liberates fashion," and no man or woman can be considered comme the chaptic, destructive forces, and causes the disorders, il first who does not conform to what then becomes the masarm moral and physical, crime, sufferings, and wretched fiat of good society, in the way of morals, thought, and ness of humanity afe. Society thus becomes its own regenerator, its own its Will to good instead of to seil.

danger alone les in its weakness, its passivity, its outer valuele or casing of flesh smits breath, heat, per-

ere long, harts rum upon ad sides. This is because of the negativity. "He who listens is last", he who vacillates, rottenness of society, which scake enjoyment and only enjoy or heartites when it is a question of right or wrong, he ment, hencath the rotge of the mantiate "Mother of who tampers, or would wear two faces, is also equally lost. Desire "-Lost in its multifactions forms, -for money, for The Will cannot be too strong, too positive in good, it is power, for famo, for appliance, for animal pleasures, &c., &c. the loose, negative, lakewarm, divided Will which permits The only way to overcome the "Magactum of Evil" in the extension of evil, thus forming the rotten link in the by opposing to it the "Magnetian of Good." Since ovil chain by which the current of good is broken, and evil exists from the perversion of man's will, it is necessary that enters in its place. Activity of Will is the one essential his will should no reconstituted and reliabilitated in good. motive-power of human existence; makes it active in good, Then should we see "Salan fall like lightning from and for good alone, and the individual is set on the right I on un, the Heaven of the regenerated, redecard mind, road, and will continue to evolve untold benefits to himself "The Kingdom of Heaven is within you," said the Lord and others so long as the Will continues to be exercised in Jesus nor is Heaven an objective locality, it is the home good. But if he be negative, indifferent, lukewarm, he of each spirit, formed in the purity of its own thought becomes a dolt, a fool, a lamp of manity, and is only fit to world—the outcome of the Divine many suif, which is be spewed out of the mouth. He is just as likely to souk evolved through purifying sufferings, by which is becomes up, like a sponge, filthy water as pure, and if he sacks up the

form miracles. Belief and Will should form one , apart they Each man by making himself pure can help to make accomplish nothing. Peter heathted on the waves, and the world pure , by learning of good, can teach it, and help began to aink , his Moster represented him with a want of to spreng it, and thus sover more and more of the camera faith, because his faith and will week devided from an in Jamily. The Divine once who become " one with God, who Brunty of will, the same infirmity made him deny his

to come out per saps more than ever re the strength and verted Wills, or Wills weakened from mosase and they are in ght of a regenerative Will the fight against some of the ovils powerloss to result the force of ovil. Teach a the a from its of life which are myaging and undered and the heat years infancy to oppose ovil with a determined Wala, and we stitution of auman society. We need troops and armies of shall not find it unk beneath temptation, which is the fate " Sir Calabuda" to set forth in quest of that " Holy Grail" of the weak and vacillating. It Imppens that the Human of a pure life, which can alone prove we retain " God with Will never receives training; it is left to a chance growth, us," and from whose hely fulness may be poured at your and is powerfully or weakly exercised as the individual of saving grace for myrinds of the infected, diseased, and may be of a positive or negative nature. Astrong-willed man shaveling. From such a white-rabed army of the Sons of is usually a stabborn man, is whom the Will becomes too Furth, a powerful current of good magnetism would frequently satisfie, stupidly intent upon what concerns flow with beneficent healing power through the astral self alone, enreasoning, but determined to have its own atmospheres, revering with a supersal strongth souls way. # CLASS F APPARITIONS

The work day wang magnetic own in the low or make a word new ac-Associates sens of a country rector forty so lifty sales area The gentleman is a solicitor in London, and istopened that he paid his first visit to his father's rectory but Easter. He arrived early on the 8th April: dined in the middle if the day had a light support with a glass and a half of clared at this orders. He then proceeds as follows -- Went to but at olevan, autoep at once, goon equifortable, fire laurang in the grate, and one could left alight; doors exceleily shood to a rong to hed, but not fintaned. In the middle of the might work up a nest any apparent cause (I suppose about two clock) and see the figure of a man droued in a black frock cont of ctorical cut, tightly huttoned up, standing muttonless and adent at the foot of the heal, who, after a short passes moved alowly to the door real disappeared. Could not next day remember who the figure was like. Have thought since that it was more like that of Mr. H., some three cante of A., there is anyone a Thought noth ng of it but on acting up its had now that the dece was open, my three inches agar, to got out of bod and closest it age a excelully. Boon after went to | Too glad for exultation, two admin far for tours. sloop again and slept til, 8 s.m., and told them the story at

The account of the night's adventure was written by Mr. W for his mater, within a few days, while the particulars were fresh a his memory. Subsequently, on a second visit about para mantha afterwards, he reognizes has nectured as or t a gentlemma whom he had nover soon at the date of his vision, and who was dustined to succeed his father in the loving In answer to a letter of mine he says "The remainder of the story, as told to you, as quite correct, rize that on a second visit some two months after the first, as I was steelling a the garden abone, I mut and quotantly recognized as an old requirestance my apprecial visitor at Easter, who now about beforeme in his fles I shook his not with him the way on the poor of suying. A nendid we meet hat?" but checked myself in time, as it instantly thished across my mind that it was my spiritual visitor at Easter whether stood before me in the flesh. In the course of convariation I ascertamed that he was coming to denout the rectory. min from my sister I mount his mines, and the position he held with respect to my father vis., her being at present his curate. with the right to presentation by the rectory at the next Yacutey I forget whether in the written statement I made at Easter I mentioned that I did not look upon my vantor as one wh was saving too personally, or kn appeared searedy to notice one whe his regarded the premises with the critical eye d a surv yer -B Webowood, 31, Quoon Anne-struct, W

The second warry I had from he sister an instance of the found to run in families.

The occurrence to which you refer happened as long age as twilve years suck but was so in presson upon my memory. has I am not the y to forget it. We were then owing in an adjoinmy siron to this, it as noting father was view and that time there were one on the lease true by factor and myse I am the as yours. We use all gone to our result at the case, and had gone sleep. I was sublicitly awakened with a distinct amproxima there was someholy present in the most standing by the side of my bed, chee by. Such an sudescribable horter cause over use that I remember shutting my open and overthe, my face, text I should see what I felt was in the room. While I was lying like that is the dark, the much frightened to light a candle, I heard the clock strike three. I don't know how long I remained in this state of terror, but I never moved, and at but fell nalcop. As soon as I went downstairs. I monodiately told sy fathor what a fright I had had at three o'clock. He said, This is very earnings, for I have just been hearing the very same mbg for W. K. (the court warren, it is case by there he had been alarmed to the more way by thinking someone was standing by his bod and how he had awakened his wife, and told her to look at the clock, for he know that they should mean from my actic norms. He dought to cheen to my father that Mr. W. the acre horders and acts a farmer in the parish, had died unexpectedly at 3 a.m.

It will be observed that the departing churchwarden steed in some sort of relation to the daughter of his rector, and o ble fellow churchwarden. -H WEDGWOOD, 31, Queen Annoatment, W.

# THE MUSIC OF THE SPHERES.

I had read in ancient story how the starry worlds on eight Ring like magic golden circlets with eternal harmony, tin't to pure soule and noble God had in mercy given To hoar the rejute glories of those spackling basts of Heaven

Was it a dream ! I know not! But methought I stood one

On some lone mountain, dradeing in a vision of delight til around no, all betreath me, did the heavenly music roll, tand with noft and northing influence cropt doep late my soul

to I listened, lost in rapture, with my innest and laid bure. Floating dowly, lightly, round me rum that music thro' the ar-It so ap quivering to the stars, and from those radiant orts of

drew don't an answering harmony that filled the ident night

I know not love long thee I stood, for listoning to that chines and glad adoring, I lest all note of time, are count, and left my spirit too full of own for fuses

The music of those Heaven spheres I have never heard again, But its echo lives within mo, turning life's discordant pai Into anthone pure and holy, and with forcest, child-like love I bless the great God Father for that music from above.

And if sometimes blos dark passions unite my pulse best fierce and high,

Or my heart grows chill and weary with life a depths of mystery. In my april's despent element sound those bell-like mumbers

And a fresh strongth rises in my soul to strive and to endure. MILITARED REST

1 MATERIALISATION SEASON. We have had at Boston Mrs. Carrie W Sawyer. She has been a guest of Mrs. W S. Butler for some weeks, and the manufestations through her at that lady's house gave great satisfaction. She has now taken the house formerly owned by the late Mary Hardy, one of our best test missions, that departed lady has already put in an bears on, one in of her controls, Big Dick, but also made is press at a town. I was at the meaner but Sunday eve-Sanger so at the cross to construct constructed by the Mexicontinuous and constructed by the method is the method to the method in the meth and wo forms, somet wer firet came out mobace there excee out a man, then a woman, and then another The second wary I said from the stater on instance of the pann, and while all three were out and active, another. Maudie, from nearly with ware thus hability to abnormal experiences is showed benefit the aperture and talked with several in the circle.-From a Note by Joney Wethercer.

# CORRESPONDENCE

September 5, 1885.]

[It is preferable that correspondents should append their names and addresses to communications. In any case, however, these must be supplied to the Edstor as a guarantee of good faith.

# The Unconscious Secondary Self-To the Etitor of " Loour "

Sin, .- Thank you for inserting my last lotter, but I really think your printer's "unconscious self " must have had a hand m it, so many and so cursons were its motakes ' one, at losst I then making my men on, juste as obscure as were any shortened at note ends enucone what was left asund a little disconnect s. I will are uponly sit gentle hint and make this letter abortor, which, indeed, will be easy as I have loss to my

For writing at all, I have had two mot year a not maked to and my motest exthat of othern against the the ryot. any " account well in I time and he say a same attend on large unconsequence or accountary soil," when after all, in but a I ever see so few accounts of personal experiences (is it that there are fow who can give them or that they withhold them I) that it seemed to me almost selfah to my nothing of my own. Nothing will tond so worth to mak can verts to our faith as experiences of the kind. No clark sources." where gutters flux round the room, or tables rise into the sir , and no seasons in the light, where the "materialised forms that o me for a a caused necessive to be followed bank at it or to be investigated in any way, could luve with those anxions to believe in the subject, half the weight of even ampler manifestations, that always court investigation, and where there is no markings been be upone to nothing to conceal If I add that before the experiences to which I have alluded, I was a "acopte of the scoptics," scarcely during to believe in any future life at all, and much less in the possibility of having point of it, and that now I am not lam cortain if a fu up of than I am of this present one, my testimony to the truth of Spiritualism may have more weight than if I had given too ready erodence, as I must think some have dance to everything that has been done in its mane

In the second object I had in writing-the annihilation of that "second" soll, to which is nacrobed so much that we be here can only be explained by "external " or "spirit agency I have keet in reserve my strongest weapon. From my num "notomatic writing" I showed the difficulty of believing in any such explanation, but through Mr. Eglenton's wonderful "slate writing " (as it is called) it sooms to me that "external" and intelligent agency can be absolutely proved; and if so, it will surely be admitted that the "second" sell may ge that the theory that will not cover all the different manifestations of the phenomenon of " automatic writing " ared not by accepted as the explanation of gas of those. I do not say it could not be, if it were not open to other and very serious objections

For some time past I have been anxious to see aemothing of the "slate writing," of which I had heard and read so much to being in Loudon a few weeks ago, I arranged for a adults with Mr Eginton. I was accompanied by a friend, and we intended on the way to provide ourselves with slates, but did not not may and I do not think it could have made the alightest difference, especially as the instance of the writing of which I thought most occurred upon a alata that closed said locked, and a state of this kind it is scarcely likely we should have found. This is the only metapoe of which I will give particulars, as it econocil to us the most autoresting and the most impossible of all. I sat at some distance from Mr. Eglinhad seen some anotherees of writing upon the single sinte (which undeed was generally doubled by another sinte being placed the state that closed and locked, and when I had written the question, that no one but myrolf could possibly have seen, particle impositive sixte a sera; of revisite pened I choose and locked it, and passed it to Mr. Eglinton. He and as frien (who, by the way, I have always considered very "medanatatic") held it together, counciliase upon the table and cometimes just under the edge of it, and an about two minutes we all distinctly heard the writing being done maide the slate, with the three little tape that announce that it is finished. Then

the last stroke of the last word) was a porfectly correct suswer course my of about half-a-dozen words, to the question I has

Now, if this account is correct—and in every particular it is absolutely correct—will anyone auggest where trackery was per aible, and failing trackery as the explanation, must it not be relmitted that intelligence was shown and writing was done without either the conscious or the " unconscious" help of any of those who were reutent? The theory of a "second" self until be given up here, or I think as must give up, and confess that life in too hatel for us! For where night not that "secondary" self of ours be quite at home, and of what might it not be capable if a locked-up plate presents no obstacles other to its presence or its activity?

But to conclude, seesandly. What carnest Sportunist does not believe that members of the Psychical Secrety have only to continue foorloady their researches to be convinced that is Spiritualism they will find a truer solut as or some of the many deficultion that will confront them that its development of Dr. Carpenter's "Unconsessus Corchration." Lam, sir, yours, &c.

August 18th.

Evis Briams. - Spirits are discuboded human beings, and as some of these are bad there must be had stirits the solfish and seeded wake up in the next state as they were; whatever of "ovil" is in them now was developed in them while here. There are many notial inducation to containing in "ovil" while here in the body but I do not see anticements for cont name in it in the other state. There are costs by, forball, a or some spirits, but I aim not one to call there "do . Who

evil " is intrinsteally, I do not know. I know that number in called "gril," and that wholosic murders are consulted on battlefields and senfields without being so called A son in called "cell," a crima but cities, ships, and dwell og a a hum we host being to called, and our Christian ferefathers are the most recease corpored broatstone of human souls, w hout the cong considered and brond - Vote by WARREST

A Direct. - "In your twenty-third munber I read an interesting account of Lord Broughous and the ghost, which remained maof a drown I had a few years ago. I was I ving with a stater and her husband in Wats, and, as he was olderly, he cometuted me has assumenas. I was accostomed to go every day to his study, to write letters, &c. I had a door brother in the Brazile, and one night I dreams that I was with may, and that be put my hand on his boart and fell dead in my arms. This so affected me that I awoke, jumped up, and prayed that it might not be true. After breakfall, when I tried to be cheerful on account of my sister, who was not in good health, my brother-in-law naked me to follow ham to his study. He then said, 'I have had a letter from your brothers in law.' I said, Do not my another word, I know that it tells the death of my gother, and told him my dream. He said, "It is true. This etter in from a friend in Brood and contenue an account of his death from heart-disease. I would not disclose it to your autofearing the result in her present nervous state."-Al A. C., in Camell's Saturday Journal.

# THE PROBLEM OF THE AGE

The greatest and most select problem writing for

otherwise, there are various opinious, many believe, a gadwideal man in the future essential nomortality of the rice, others, a very nor s number, defending eternal life through habel in Class presence of sceptical aciontific dialecticians; all their stocka me; tunny, a large proportion of w' or are men arguments are but reeds broken at the first shock of real women, who, more or less, do sly and sorrowfu for at the country. Our despised sorres of facts will alone break in got to mance of the, whole many lively disheles generally prevalent theory. I avolous sections of the race expound the enigms of man's being and the real are not break to life a the fees. They receive it as exponition shows that besides the transcendent powers man a large properties of the most educated and in many cases, has lad in the millions of reast passed, he yet has within most moral men and women, not only flow it, but dis- him a life varies, politer, and more continuous than the life-

All the creamary appeals from the analogy of Nature fall to carry conviction to the scaptical scientific mind, the apportual records of past ages are, to large sections of the future life, which more or less beset most average minds, are prevailing at pt in not sufficiently powerful to produce a practical, dving, fully some red bales in a conscious future.

The truly transitory untare of terrestrial life and introlong works calmot be more vividly seen than in the study of the imperfect records of the historical post.

With the exception of a few hundreds of men who lived in the typical eras of Moses, Homer, Alexander, Plato, Aristotic, Casar, Christ, Paul, Ptolemy, Coper no. s. and others, all are personally forgotten. Of the majority of those named, only a few tenth or twentieth-hand transcriptions of fragments of their writings have been preserved, more or less accumulely, in newer records that have come nawn to us.

The best known and most generally preserved and reverenced books in the world are perhaps the Old and New Tosaments, and yet not a single scrap or letter of the original with the of either has reached us. All the records of the past are little more than a dream, or vision, and all the great men of past ages are but apparations, shed figures which each man portrays according to last own conception, and some of whom are to any of us either mentaly or adily alike.

The material universe is to us little more time a dream a passing show. We can in thought travel backwards in time for militons of militons of years, we can in thought, be undo to any station master in the country.

# SPIRTTISM.

By Engard von Hartmann. (Continued from p. 421 )

As the basic phenomenou of this department I consider the following. Out of two balls of himewood, of about 7cm diameter, a thin wand of 30cm, length, and a horseheir, Dr R. Friese, of Eccelan, constructed a horizontal torsion balance. If a strong physical modium approaches the tips of the fingers of one hand to one of the two balls, a repulsion, though certainly an excessively slight one, takes place. But if the medium has clasped this ball in his hand a minute before, or only breathed upon it, there is now an attraction between the ball and the hand, much stronger then the previous repulsion, so that the ball can easily be drawn slowly round in a carele. (Pa St. VIII. 381.) That experiment must first be repeated and extended by others, with ospecial observation of the mutual behaviour of two halls of different torsion balances after being held in the have. The agreements on of the experiments can only be, that the meanin's hand is charged with a force repellant of the neutral, i.e., uncharged wooden ball, but it in a far higher degree attractive to the charged ball of the same name. This behaviour is reversely aunlogous to the case of frictional electricity and magnetiam

The relation of the force in question to that of frictional electricity shows itself, among other respects, also in its dependence on the degree of atmospheric moisture, and in the faculty, established by Reichenbach, Fechnor, Zöllner, and many others, which mediums have of violently disturbing the analoged magnetic needle without contact. A magnetizer possesses the faculty of so charging a person that between him and the metal bedstead, from which he is molated by a woollon covering, a strong discharge of sparks takes place on accidental approximation of a part of the body; this I have proved in myself after careful investcation of the magnetiser and his surroundings, † and I leave it undecided whether this is a case of explosive equilibriation of the mediumistic nerve force itself, or of a provious conversion of this force into alectricity. Electrical ereprintion is one of the most ordinary and frequent phenomena at mediamustic sittings. The next investigation must be into the behaviour of the force in question, first to the poles of large, freely-suspended har magnets, secondly to the electroacope, thirdly to freely suspended wires with galvania currents, and fourthly to the strength of galvanic currents in fixed conductors. It is incomprehensible, and of the worst tignificance for the acceptific interests of Spiritists, that no one has yet made even an attempt to approach these

A large number of the mediumistic phenomena are confined to the sliding up of objects to the medium. The repulsion of objects seems also to occur, but is much less It is a very common phenomena at one man are frequent. Cox never saw the one, but very often the other, and has described it very graphically. He compares the nature of the motion with that of steel filings attracted by a magnet on a level surface. "They first rise a little, fall down, move forward, pause, till they are within the influence of the magnetic force, when they loap to the magnot (medium) with a suddon spring." (Ps. St. X., 127,138.) He mw chairs slide up to the medium in this way from a distance of from six to ten feet, armchairs and sofas advance two to three feet; he once saw a heavy aratchair, fourteen feet away, come up to the medium. I The stronger a medium is, the larger is the

sphere of his officacy, but it is always amited, and the diffion treate or evereon and not proportional to the size, but to the weight of the objects. The question here is, how a medium begins to charge a particular object with his force, what course does the force take in transmission, and by what monna is it conducted? Here also experimental results might be obtained (by molating the medium from the floor, interposition of different uniterials between the medium and the object attractor, &c.,

It is clear that there is here no question, either of muscular action, or of named to an act the cold to media con hi materia our is our o vit divise fore produced under psychical excitation by the modium's nervous system. It seems unintel igible, therefore, why Cox should have given to this force the mucading appollation "Psychia" instead of "Nerva" force, since he bimself expressly describes it as physical (thus not payolical), dutinguishing it only from muscular force (Pa. St. X., 213, 314)

An influence surpassing more repulsion and attraction between medium and objects is manifested by nerve force when it changes the dynamical rotation between objects and the cortle. As before the tersion balance, to here the scales have to establish the ground phonomenon, Crookes and most other experimenters having made ass of the spring bal, acc-It is a question whether for free experiments the scale or lever balance should not be preferred, in order first to ascertage four awas degree out I wonder also might vary in weight by being charged with men a se in force. The application, as by Crookes, of a suffre, a way apparatus to the balances is to be recommended in all experiments, because only the permanent mechanical indiention of the apparetus steelf secures from the auspielen that the person reading off the record was under the influence of na hallucination implicated in him by the medium. To exclude involuntary muscular action, Crockes placed two rough of water, one within the other, over the fixed fulerum of the board, which was suspended at the end by a spring balance, and made the medium dip has hand into the water of the upper, fixed vessel. Others have attashed a taulo to the torsion balance, the medium or medisms kneeling on revolving stools, with bands at some distance from the table. Cox thus saw the weight of an 81b, table very between 51b, and 85th, according to a sh that it should be heavy or light. (Ps. St., X. 127) Chambers and Owen saw a table of 1211b, under similar conds tions vary to between 60th and 144th. Of Indae fakirs the following performance is reported, earth is thrown into a flawerpot, and small sticks are set upright n it, on these are thrust perforated sheets of paper, after some minutes the shoots begin slowly and tremulously to rise up and down, the fakir standing several feet off. The objects are neither brought nor toucked by the faker sittings for the table, with everything on it, to rise of itself, or for a char w to semicone on t to a vightly raised, citaer without contact by the face as or wit is a tact or a

muse downs. I precised a tape measure, and book the measure distance between the needless and the challe, as the latter kay upon the floor we is fire feel and the needless and the challe kay upon the floor we is fire feel and the needless again a passe between the table and the pixet or the life from several definite but to alle, and asked that the chall, which is me not told now which to only wheth the me told now which to only wheth the floor within the floor pixet and the pixet move the result of the floor six was attained to be to the whole me and at we had a man pixet floor district the pixet of the pixet was proposed to the floor of the floor of the pixet district the floor of the pixet district the pixet the pixet pixe

as on \* No. in maker the sixt show sometimes a tancons pulse-curves of the medium, as the splayguecummution of their normal weight, sufficing to keep their floating with immersion of but a small part of the body, and the obstinacy with which whole centuries adhered to the water proof of witches suggests that the latter, fading to reflex-hypnotism through fear, squatumes experienced a commution of weight. On this mino reduction of weight in the pestatic condition rosts also the direct proof of weight by the "witer-scales." Lastly, we hear of his way soing raised in the nir, cometance in dark sittings, as if a medium has the power of making those present more when they write semothers on the ceiling, some or less mediums also, that is, of occasioning them meen times also by subdued gradight, (Pa. St. VI., 566.) This typing is also reported of Janublichus, Paust, of various definitely to influence the distribution and application of witches and sames, the testimony being especially strong in the case of Joseph of Copertinus, pronounced a sain two years after his death, who is even mid twice to have cars another in the air with him. (Pa. St. IV., 241 et sop.) to an it has a vitation scenes always to be the comproceedings and a state of the median, but a care s to was most adapted to the transmission of halluc ortions to the spectators, and it is usually after a number of sittings with the same shele, and then at the close of the with ag when those present have become asscoptible to the implicitation of hellicontinue-that this phonomeron necessarities here particularly increasing to confirm its objective

centity by durable proofs. The phenomena in question are only explicable by a polarity of norro force in analogy with frictional electricity Were it a case of repulsion only of charged bodies from do , but as the lynamical relations of bodies charged with serve force to the earth are nometimes conformable and sometimes opposed to gravitation, apparently a double sort of charging, dependent on the somnambulic will of the nording must be admitted. And this reinfeathle book also his repulsion to all noutral bodies must be the mine. The explanation by a polaric force had been already advanced by the old Indians, who asserted that opposite by conversion of the polarity of the body. It may here be remembered that Zishner has attempted to explain universal gravitation from the statical effects of electricity forces. If Zodner's view is granted, and the supposition is made that the nerve force alters the statical-electrical condition of the body on which its gravitation depends, we should in fact have to do with only one force, which not merely neutralises or outweight the action of the force of gravity, but augments, reduces, or negatives the force of gravity itself, without it being permissible on that account to speak of a suspension or breach of the laws of nature.

The belaviour of floating objects is similar, according to Cox, to that of a small air balloon, their weight is never changed suddenly, but gradually, they ascend gently and without jork, cond ; lower a the same way but always with light need along oscillations. No harm have or been done when tables, with lighted petroleum lamps on them. have rises, the quietness of the protion, and the slowness and slightness of the oscillations not occurrency over to be explained, for instance, Hellenbuch's experience of a throw of the lamps. Besides the escillations, the floating objects exh bit tremore, such as may be most clearly see from the actor acid curves. I Crooker is seriments,

† Zikinas's "Erkileting day undersolling Gravitation are day statishing day (indicated of the lattice of t

position are a treatly we acong the supposition of muscular and which are unmutakably connected with the simultagraph would show them. This is the most distinct proof that the force really proceeds from the medium, and from the medium alone. All mediumistic phonomena are, moreover, not constant, but fluctuate continually in arregular waves, in correspondence with the innervation waves streaming from the medium's middle brain rate his organism:

The results usually gain in strength when the medium is not alone, but in a small circle of both sexes. It seems actously to develope nerve force, and that he is further which the general nerve force thus developed. It takes a period of from a few intautes to several quarters-of-an-hour to charge the place and the medium sufficiently for the production of extraordinary effects. These, therefore, happen mostly at the close of sittings, or at least in the latter half of those, and they are more intense the more mediums—that is, persons developing nerve force—there are present, by whose unconscious co-operation the principal medium is supported. For weak mediums, therefore, a "circle" is strictly indispeasable, and only strong mediums can elicit important effects also alone, regard should be and to this in experiments with inexperienced or moderately qualified mediums.

From the commentum of the action of attent on and repulsion with that which alters the weight of objects already result the most manifold phonomens. The floating the cirth in opposition to gravitation, a simple force would objects can advance to and retreat from the aschuse through the air as well as by horizontal motion. The same object (na a small table) can for instance abde along the floor from is medium, rice in the remotest corner of the room, and · in herer down or fall obliquely on the seance table. Water rises unseen from a can standing apart, and descends to the attraction and repulsion of objects by the medium, as in a firstle on the speciators. It happens again and again that bells ring in a house at cortain hours for days or weeks together, and go on ringing, or are torn down, notwithstanding all factoring and muffing, \* or that presumes the force of gravity is suppressed and transformed into its are regularly bombarded with stones, coals, or other things , ag about, without the police or those privately posted for observation being able to discover a trace of the originator of the muchief, Usually there turns out to be a serventand that with all difference of different natural forces they maid, or an hysterical female, or a child in the years of are a identified but derivatives from the mine primitive development, by whose presence in the place the phenomenon is conditioned, and in whose proximity the projection fall. The officials and private people have seldem any suspicion of such connection, and rather believe in ghost pranks than that it is a medium anconsciously perpetrating the amedical.

> Considering that the different objects in the sitting room and the different persons present are in different degrees charged, partly through distribution by the medium of the collective force, partly through active co-operation, it is intelligible that the lighter objects, especially when floating, are subject simultaneously to very different attractions and repulsions, and follow the most tortuous naths. If the medium directs, by repulsion, an object to where the attractive sphere of one of the party predominates, the object glides or floats to that person, and to that part of the body, it may be a hand, which is most charged. Thus is state erections up his body to the hand.

The med unustic nerve force can further variously comhave with involuntary muscular activity, which at sitting chart wat the sale is the in New York by neight depict when he chart wat the wat the sale is a smally the first thing developed, the sale is not believe in the sale is the sale is the sale in the sale is the sale in the sale is the sale is the sale in the sale is the sa

mediamistic nerve force. Especially noticeable is its force generally accepted among the Spiritists that a expansive construction of the cohesion of material particles, medium in the sommambalic state is able, by the penetraexpressed by sudden discharges in the nature of electrical tion of matter, to get free from and to resume every sort reports. When the explosive discharge, which always of fastening. occurs in a closely circumscribed spot, and indeed usually in the interior of bodies, does not overcome the material cohesion, &c., are usually broken, often happens also when the mechani it announces itself to the sense of touch as a tremulous con | is in a closed room, the stones coming from outside, and remion, and is perceptable to hearing by a stronger or being visible first in the room when five or six feet from weaker crackling or rapping sound. When it overcomes the floor. (Pr. St. VIII., 5-13.) Water sprinkling happens, cohesion, there is heardes a tearing to preces or shattering no water having been before in the room, though with of the object. (Zollner's bed-screen and tumbler.) The Zöllner's experiences of this there was a can of water in the rap sounds begin with the faintest crepitations (as with an next room. The "apport" of objects from other rooms or electrical machine), sometimes increasing to appearious din houses, or of flowers which were growing in the open are, and clutter; † they resound sometimes from tables, chairs, nto the seames room, as one of the commencest of medianisatio partitions, walls; sometimes from small utensils, some- phonomena, but the earthly origin of the objects introduced times from massive rocks; 2 and it seems that the louder can always be proved. The stones are dry or wet, warm or can be localised as well by vibrations sensible to touch as cold, according to the weather, and marked stones, after by the car. Observation by the microtelephone from a greet being put out of doors, have often fallen a second time in distance and regularation by the phonograph are always the house. Were these phenomena connected with a fourth to be desired, in order to distinguish possibly transferred dimension of real space, as Zöllner thought, we should hallucinations of hearing and touch from objective expect that material objects not belonging to our three-

Separation . 188

places, with or without the movement of utensils and fur nature, no one in the house or the neighbourhood being in the least able to trace the cause. As with the stonethrowing mentioned above, there is always a medium. mually of the female sax, who is, at first quite encouncionaly, the cause. Should the neighbourhood come to suspect this causal connection, there is generally a combusation of the brutality of the lower police with the narrow and zealons superatition of parsondom and populace to drive the poor nervous patient quite distracted, instead of her being placed almost never wholly fall at attings with powerful modiums under medical treatment, or of her med-unistic apt tudes. They are usually so work as only to be observed in the being systematically utilised for experiment.

We encounter a specially improbable class of phenomery in reports relating to the penetration of matter The Indian It seems still questionable whether the appearance of light reports regard their as indisputable facts, and explain them by the dissepation and re-consensation of the elementary constituents of the material of sect. A wrought icon rung thall get upon the arm of the medium while the latter's hand or finger is grasped by one of the party; Remark and Akeakow have seen the experiment succeed when the hand of the holder was bound to the medium's arm (Pe. St. I., 544 . III., 52-54); and Olcott even asserts that be observed | 1 v wholly held a demonstand in a wholly different way the side of the ring, applied to the medium's arm, dissolve as it were into a vapour, thus permitting penetration of the arm. (Ps. St. III., 56.) Zöllner's observations of similar occurrences are numerous, the passing of come, thate-pencils, &c., through closed boxes and table surfaces, placing a ring round the leg of a table, tying of knots in scaled strings and strips, and so on; I and a great part of these phenomena have been repeated by private mediums. (Pa St. VIL, 190, 191) According to Hare, two balls of pintanum were conveyed into a scoled glass tube. Tren with presupposition of the greatest expertness in untying and retying knots, and in stripping off and on of mouses and fasterings, there remain a mutitude of accounts in which the mode of applying and sea ing the fastern gs, and the inviousbieness of the seats after the processes a spear as excusive of this obvious expansion as is the onel ess of

The mediumstac atone-throwing, by which wandow panes, dusensional world would be introduced, from the contrary Similar sounds constantly occur in the most different it must be concluded that Zöllner's explanation is not the right one, but that the entire course of the physicinens. belongs as much to our three-dimensional world as does the material employed in them. The occasional incalescence, or traces of it, which Zöllher says he observed, likewise possets rather to molecular disturbances of material common than to motions and oscillations beyond three-dimensions. space, which would not occasion molecular t inturbances muchanges of temperature

Also to be noticed are the phenomena of lights, which dark and oven then only by a sensitive sight. Exceptionally, however, they attain greater strength, so that all see them. observed by Zülinge on the wall, and which was broken by the shadows of the feet of the table, really signified a source of light boyond the table, or whether it was not formed direct, analso it remains in the first case don'tful, whether the parallel beams of light really proceeded from as infinitely remote source, or whether these transverse other vibrations in parallel directions were not occasioned than by their nating material (light vibrations of paytoular material particles at a particular place).\* Sensitives and some a obules often see lammous phenomena which appear to them to come from an infinite distance, but the involuntary conclusion of sense, founded on the ordinary originating causes of sther vibrations, need not correspond with the

For the study of these quartions we must decidedly revert to the experiences of Reichenbach, who asserts the odic diaphaneity of many substances which for ordinary rays of light are imponetrable. It sooms that we have here in many cases to do with other vibrations of higher fr aga bility and of another kind, which are first converted into light vibrations in the oyo of the sonsitive (or of one made temporarily sensitive by the medium). This is contirmed by exper ments of the photographer Beatise, who obtained on the plates offerent appearances of lights which were no saible to him and his companions, but the photographic forms of which agreed with the descriptions given by mediums, of lights seen by them at different spots during the exposure. (Ps St. V., 339, VIII., 257) These photographic experiments must be extensively followed up, for the safe distanction between what in these luminous phonemena are implanted hellucination, and what objective

RATIONALE AND EXPLANATION

By S. EADON, M.D.

IU

In mining districts a superstation prevais that some and underground currents of water, and some of even tell-If the meditivistic nerve force can, on the one hand, | g how far from the surface. In Cornwall about one in 

'They cut a hazel twig, just below where it forks. Having stripped the leaves off, they cut each branch to a Little more than a foot in length, leaving the stump three Enn = n P 1, ), 10th bno from bottom, for " physic 1 mehos long, in shape like the letter Y. The bazel is selected for the purpose because it branches more symmetrically than its neighbours." Dr. Mayo then gives the following directions how it is to be used in the cearch of In my perboanary not the transition of the atom. [ water or of metals. "The hazel fork is to be held by uning by his aide, but the elbows being bent at a right angle; severa or eight inches apart , the knuckles down and the divining fork appear between the roots of the thumb and the foredagers." Thus armed the seer walks over the ground he intends to explore and, if he possesses the mystic gift, as spring of water, the lazel fork will at once begin to move. Count de Tristam details its motion thus .- Wines of ground, the fark, which, at starting, as held horizontally, with the point forwards, begins gently to ascents at gradually attains a perpendicular or vertical position, sometimes it passes beyond that, and lowering itself, a th stread with the point downwards. Finally, the rod may

again accord and resume its first position. When the action is very lively the red immediately commences a second revolution, and so it goes on as long as the operator continues to walk over the existing surface of ground." With this lineel fork motalise lodes and currents of water underground have been discovered, and Saucier, the celebrated sier of water, made so many discoveries of this kind as to vein of metal, or a current of water, beneath their feet, as

Although unmerciful contempt has been poured by certain cultivators of science, upon the "Virgula divina," the " baguette" divinatore," the " Baculus divinitorious, or the divining red, yet there are facts impreserable upon record to prove that it is something more than a stere wild fancy, as its indications have led to many useful applica- that there must be many references to the subject which do not tions, its unmistalcable influence on portain persons of asset our eyes.-Ep. of \* Light " exalted sensitiveness shows that it has its origin in Nature; menon can be entrafactorily and scientifically accounted for cannot labour for any hotter object than to make them known

improvement of Ozanam's Mathematical Recreations, the T can once of the mad is for tenth, as the one longing of divining rod" is ridicaled by Dr Hutton in such a style the heart is for love. as to lead to the Doctor's receiving a note of remoustrance from a lady, who informed him that she would come to Woolwich Common (the residence of the Doctor) and ile monstrate to him and his friends, that his remarks were Darmstadt, &c. Well, "Kraft und Stoff" is an able and learned unfounded and in direct opposition to facts. The lady on book of the most altra-Materianna which never could have been her return from the Continent, called and gave her proofs, written had the author known one fact such as we have by Conviction took the place of disbelief, and Dr. Hutton in hundreds in sparitual manufactan mathe next edition of the book, and the candour to acknowkelgo his error, and stated, moreover, that there was clearly winto foundation in Nature for the phonomena renafested. This individual was no other than the the wife of the great Post, Lord Byron

Thousenal, a colebrated physician of France, foll in with a man named Bleton, a discoverer (by trade) of springs, by means of the divining rod. Thouvenal, to see if there was any truth mit, tried this man more than GOV times, and a Copresence of the persons of a crotical a a grades, amongst whom was Jacut, professor of wirstat Nancy. This over, like Lady Malbank, know when water was beneath his feet by the rise of a peculiar saturnal focus about the region of the disphragm which was always coincident with the movements of the hazel-red, the free ga wing more or less strong according to the roleme and depth of the water. Bleton was not a rick sensitive, for, during an illness, the power left him, and it was three months after he got well before the former cond son returned. Whilst this man was walking, trying to discover lodes or seems of metal, or aprings of water, Thousand counted the motions of the divining rod which he held in his hands, and observed that it made from thirty-Ave to eighty revolutions per minute. Another case. Mrs. G. had heard of the practice of donsing for water. She had a servant susceptable to magnetic influence. They had had water on the pressures, and Mr. G. had tried again and and movitable results, we need first and above all, the most again to find a feesh spring, but without success. It was simple, primitive, material manifestations-the solid, hard facts proposed that the servant should be magnetised, and see what she could do. Harriot was operated upon, the divining red put into her hand, and she was allowed to not ever plentiful. A man in a pulpit is professionally walk ever the everythe property because the country of the everythe for about twenty yards, when she suddenly stopped, as if some theory of philosophy or religion. People who run in she had been shot. No one spoke, but all kept their eyes grooves are necessarily and often hapelessly unacientific. The on the divining red, which twisted so far back, as if it mind that can examine and accept a new truth-one which were giving her pain to hold it. She at length cried out, dissipates old opinions, projudicos, professions, is a treasure-"Don't you see the stick! bere it is the water is here, splended, but rare. speak-I like to look at it," and she mark down on the more surprised than delighted-with the music (according to

# THE "INDEPENDENT VOICE."

(From The Spiritual Offering.)

This is the title of a pamphlet of thirty-seven pages, by H. W. Boozer, of Grand Rapids, Mah., whom we have KROWD Each cornect investigator for a quarter of a century. The med in of whom he writer has fived a considerable time at Grand Rapids, where her husband is a prosperous and respected citizen. She has an objection to her same hand made public. She is approaching saiddle age, of used in la lit, rather stout, of a nervo-imagaine temperanex. Until two years ago she was sceptical as to Spritualism. Visiting then some friends, the amusement of table-turning was proposed, when they found they could at an image without her hand being on the table. Sa we anti- it was found that it would more with only er head being pointed at it, then that other objects in mislap, by pulling the strong and ranging the bell, and to the room would move at her only pointing towards them. the war is before lighting up, hands and arms were seen. signifying thereby that he was all right. The pir of the first and became interested, circles met at her house, grave with his healding, some healy books, two or three bottles at a as to be wat on other manufestations occurred, at one, a year and a half ago, a large vase of flowers was carried, w rant that a mosts, to each member of a large circle for

The medium, fatigued with frequent sittings, retired to here den our wash his for he s, at a net at the East for four months. On returning to Grand Rapids is no all a se A atome non new regulary took a minuter house, intentionally, to avoid someon But friends importanted her to meet them at their own houses, and she has been kept exercising her mediumship ever since. The mainfestations have been warred, but the most prominent one now is that of the "Independent Voice.

One of her controls is the spirit of an Abarigina, of whom the writer says, "The Indian seems to come to prepare the way for other spirits to communicate or prepare or fresh or no a may that being done he takes leave of un' I'm t sor a tors continues the author, " seem, by their nata nor a chaothers a morthly de to have necome a, a se of paperty go and force to mer area, who recognise there are no strongthening healing, and helping

The Longenment Voice" is beard in circles of any numbeen a ser the conditions of absence of physical light; someones afty are present, including sceptical inquirers. The medium takes a seat in the centre of the circle, which latter ongages in singing until the roles is heard. This counts in front of one or other of the circle, two or three feet above the level of the floor. Some voices speak whisperingly, some with difficulty, others dutmetly, loadly, and continusl squeetimes for half-in hour. They are generally congruence by the names they use their tones, and by what any say which relates generally to what interested them when in the body; but they answer questions upon all

In this way an only child, a daughter, of Mr. and Mrs. Booser, has frequently communicated with them, which seems to have askled to Mr Booner's general interest in the mediumship of this lady.

He gives instances in his complifet of communications through the "Independent Voice

# RELATIONS BETWEEN SPIRITUALISM AND SCIENCE

MR. A. B. WALLACE AND R. M. N.

Be the Author of "Scientisto Materialism"

From the Joy part of See ner August and September, 1986 ;

An article under thinks advig appeared in the Joseph of Section July, 1885, p. 400), by R.M.N. From many passages I and a lead the envelope or luck that R.M. R. does not, as many ac-called scientists do, ignore the authentic facts of the so-called "Spiritualism seconchasions to which they land are serious, not to my more one Supposing that the Spiritualistic theory be proved, there will be gain, viz., that the deviations from known natural laws witnessed by many thousands of credible persons result from the actions of tosting it. Mr Conklin acquiescing I rase to leave (fearing that of the sparte of persons once exacting in this world of life, and the eletters might think there possibly might be collision between a beginnial and the most most most interesting, the immeriality myself and the medium). Mr Conklin wished meters at the sitters I the most of many to use he will make the next compresbecause form), lagiven, and proves it without the possibility of question. If it be domed that the recorded fasts result from the actions of disembulsed spirits, then it must follow that, besides the phenomenal aspects of Nature, there is behind and within them an occult power tentamount to spiritual interpose tion. This would show that there is a world, beyond the world in which we live, inhabited by bourge capable of suspending and counteracting them laws which we know as the laws of Nature The facts, attested as they are by taillions, cannot be ignored by any thinking mind. A mass of evidence is capable of being produced which is most overwhelsing, and if adduced in any Court of Law, on questions of property or life, would make the Fernici allema ve

R M N pays of Unwelcome as these facts may be to many of to, serious as are the conclusions to which they seem to lead, there is nothing to be gained, and possibly there may be sauch to be lost, by persisting in any prode of bunic sweeten, demal This, it must be admitted, as a fair statement, and it is much a be regretted that the promuent men of science, who assume to analysis of facts, all objection should be waived. The narratives lead public opinion, have not fairly mot the facts presented to are conclud in the buildest form, and presented to show that by their consideration. The treatment experienced by Dr. Slade, no possibility could they be supposed to be mere at the hands of Dr. Lankester and his conductor, was a gross persecution subsequent events show that the sets of spirits (as he assumed) are far exceeded in the particular exemplification enclosed in the envelope being meerred; in the latter

stanom, but this must be attributed rather to the wondermongers than to the mediums, who, in their desire to gratify the wonder-seeking crowd, have endearoused to simulate the real facts in order that they might not go away disappointed. It is patent to frequent visitors of scances that the muschievous in character, and by possibility will subvert every power which usually attends mediums is not only always pro-existing order of things, as he sayssent, or, if present, not always active. Mediums are but human, and it is easily to be understood that when impelled by their

\* Repristed in " Liour " for March 7th, 1886.

copidity they are not always in that frame of question and passivements which is absolutely necessary for the present most of the manifestations. I may say that rarely convicting to a to be related to the manifestations. I may say that rarely convicting to the related to the manifestations are obtained from a mixed class of rave not always. tes days. The may be mud, that any person really desiring proofs to seldost disappointed.

So far as my personal experience is concerned, the few procontinents of which I have been a witness - - - m - o avely to believe that there was an extre-mandant power active and propert. I honitate to my that what I witnessed was the as corclusive as a thousand two I witnessed placed the matter, to my anna, boyond doubt.

First .- A letter lock, of eight letters, which had been purposely desauged, was opened by Mr. Conklin. The person who, after demograp the look, wrate what he conceived to be the we many word, enclosed it in a souled ouvelope, but which proved to so we by or one letter. The sock was given to Mr. Cons. is, "Any theory, hypothesis, philosophy, and, aread, or lastitution that force the compact opening with word appears and ingest transligation openly analysis its own error," subplace Jacabox Rayer force. The compact openly analysis is now a compact opening the compact o The man it is now Mr a maken which is called word, and the territorial and the world the ear of the ear of the ear to effect its purpose. The wis-to-make to-was a character. that it was impossible that there could be any tampering either

> Second. - I secidostally called upon Mr Conklin , whilst with him two gentlemen inquired whether Mr. Conklin would ... in one and ... They were introduced, and stated that they were alrangers in New York and land just arrived , having heard of the Spiritual movement they were (if possible) desirous joining in the request ; I did at. The section was arminged one, the questioner, asked if It was necessary to frame the questions in barkhish, or might he communicate in another language? American the language was a untter of indifference; the anawers would be in English. The tests were knocks and writing. The questions were framed, in manber I think two ve-As they were written they were placed, one at a time, face downward, before Mr. Conklan he, being apparently in a seint-sommolout etate, wrote the answers in English sorietim, as placed before hers. The answers were stated by the questioner to be exact answers, and such as he should have expected in a rief reer convertation. The questions were written in Welsh, and addressed to his wife, who had been dead twenty years, with whom he wished to communicate. He stated his conviction that he had had communication with the spirit of his deceased wife, and that the quostome were upon subjects known only to himself and to her

I must applyging to the adder for presenting such matter for mertion in this journal. Viewed as a philosophy, or as an mend reading-the usual subterfuge of doubters. In the first ouse such an assumption would be ignored, the work case Mr. Coukin was ignorant of Welsh, and it might almost be It must be admitted that charlatenry is present at many said of any other language, his diction when in his ion in state being most irregular. He was almost uneducated, and had been a common sailer, but when under juffuence has language was free, and the works correctly spelt.

R M N appears to think that the "now revelations" are

"Cast on all things surest, brightest, best, Doubt, insecurity, and astonishment

This is far from my idea, for they give an assurance and reality,

much wanted, which is other countestar or could natisfy they . I instances could be multiplied in which most extraordinary afford evidence of other intelligences than those existing in the a si unaccountaine results have been brough about by he world's life, and present almost tangenly those of a world to inversention of one and wine cake tast communica the come, I quite agree with R M. N. that there is much to later subject of their story was con a divion. and probably much to gain, and, further that the scientific of phenomena with the rigid requirements of exact law, but of the more movements of that interior comething which all men person we are ar undervloped, of its how they know noth a. The Chrisman Clouch has existed for nearly two thousand years, and finds the world more ignorant of and mp a mag in appritual macters than it sees on its matitution. beset who were in the extense was everyone. The moch contained all a fewer the continue on your who is rected, would have advanced the human race Spirer is exact on the other band, without idealmation, withour begans presents its array of facts which properly considered would loud to the same out. No, setence and theology are both In arms. Selected resists been so there are no aprice laws of which the mayonaut end be directed a control of The day rejects the friend which would lead to the development of the truther of which it considers itself the patron and protester.

If Spiritualing, or the manifestations so ended, were notated facts, and confined to one family or to one nation, a last might be made, but when America, Europe, and take present the mind contained, it then accorded a common attention

Council Charles to a her work of Monte Laboure was the neal of Masse gives an accounted some anti-festations occurring there. The statement is aridently that of an eye witness, or of one who laid oxing and the ovidences and satisfied himself on to the facts. He mys (Vol. I., p. 164 of refer ) The son of Shork Reclair to one of the best to race the Draw Shorte, and has acquired a store of teature and better as a makes his conversation in every way an armer. He has for some year or ted hutting, singular on it may appear, to the cultivation of hingle, and the stories he relates of his interviews with annatural beings are movel and startling. At tasse he was phone ing between the heads of the section of the s to each other, when, after the recital of certain passages taken monortalizately from the Koran and the Pealors of David, it will more anontoneously round to the automobinest of the and of the room to the other. A New Testament, suspended to a key by a piece of strong, will in the some way turn violently round of itself. On two earthenware juga being placed in appearts german of the room, rate being empty, the other alled with water, the empty per will, on the recital of certain passages. move across the room, the per full of water will rise of chair on the approach of its compenson, and empty its contents into it, the latter returning to its place in the sums manner as it came. An egg wilting its the anucopus will be seen to apring auddency out if the water and on artist to a considerable durantes A deal-te-toaked door will unlook freelf. There cannot be a doubt that an inneur influence of some kind in called auto operation, but of what nature these may conjecture who a kid to a secretate or sun it must be

"But it is in more norbitis cases of disease or longer that has engernaturally-derived powers are called into play. Previously to audertaking a cure he shuts bloself up in a darkened room, and devotes his time to prayer and fasting. Fifteen and some times tharty days are possed in the state of abstinones and self denial. At hist one of the genth, described by him to be much of the same appearance as human beings, will suddenly appear before him and domand his bidding. He then states his position, and requires assistance in the once he is about to undertake The genm replies at once that his request as granted, and encourages him to proceed." A lady who had been for more than two years afflicted with a swelling, which had long been mutaket for prognancy, was cured by the passage of his hand over her person, " and in five minutes also arms perfectly cared. A confirmed lunatio was brought before him : "In two days ha returned to his home perfectly exted."

The Sholk "maintains his intercourse with spirited agenta to be real and effective." "The belief in magic, and in the interposition of an order of inseen creatures in worldly affairs, at the bidding of those who choose to devote themselves population of every raligion and sect.

R M N me not any on some mode of investigation for world has proved itself most unscientific in ignoring presents spiritual facts as for phenomena facts. He was become a ments because they do not accord with the assumptions of the based on late, Spiritualizin on will supposing this to be the second the month. Whether Science and Spiritualism will ever fact, is he in a position to state that this will is not restrained parameter there is much even to doubt. Secondo has its purview by law? Exactly what he clause for phenomenal manipulations the Spiritualists claim for their manifestations. He states that under certain cercunatorices Science can "foretell phenomena," and that wherever the experiment is made " the result comes out the same," and " that under the same conditions the same wentle will follow." We have then a qualification... There are of course numbers of cases in which the causes and conditions of phenomena have not been traced out." Now this is, as I understand it, exactly the Spiritualist's position, they have numberless facts, phenomena if you will, but know of no law or mode for the classification of them, nor has ever the attempt been made to find a law or apply a classification. It has never seem presented as a science, but morely as a success manifestations which appear to evade all scientific rules. Being me, it soems senseely fair, except no far as the oridences of the for a for Senting to demand that the mandestations-which appear to subvert all scientific principles and to obey no scienthe law-should be subjected to an exact formula. It should be remembered that the mainfestations cannot be produced at will, as physical or obscured combinations may be, but are the pends of peculiar conditions. Some of these conditions are widely spread, others but sarely occurring.

A North of the right to demand in that the evidences of he fore are unimposchable, and ought not to be greaterht not be required to be greater—than those which a . . lish a case if presented before a legal tribunal. There should be no mying, after the investigation establishing the fact, that it is napossible because contrary to the so-called existing a dig salex rience

Let war are with the field manifesta constigues them a reasons up no fatical fine he are by which by result. If we was not the control of the area super mine force harmter to be sur as we for our thin, as beat, may be mid-that the manifestations have mover subverted physical phenomena detrimentally, and have never intervened to produce social difficulties, and therefore they would appear more a state of his hidding will process unsaided from one to be amenated to some law of which these who witness the evidences are unconserna-

It is quite futile to talk of will in connection with the munificational. A person in just we for ever a sees the . If me were to accordant and present he could not flow in the air as Mr. House and others have done.

At p. 403 R. M. N cites many manifestations, but does not show that any ovil has followed it therefore follows, whatover be the power manufested, that it is subject to restraint, It will be quite time enough when any of the ovile R. M. N. appears to anticipate occur, to accertain " what are the limits of the powers of these 'spirits,' and under what conditions can they be exerted?"

He says " this question has its word aspect." (Krated had on his panel a different class of manifestations to those termed Spiritual. The evil of witchernft was not its spiritual aspect, but the malevulence and ignorance of uneducated or theologically apperetitions people. Assumptions were made which in no one were verified, and many were the victims to the intolurance of public opinion. There is no cimilarity in the facts, and can be no cridence, moral or otherwise, for or against

Persons of rank and coloration have witnessed manufestations. use move given errogace of the ruth of the facts. Professor tion in America, and Mr. Cos Levin England atmospher the houst delicate tests, and proved (in what night be called the minor physical manifestations) that there was no possible trick in the presentatents they tested. What was the treatment they recorrect? And then, in the lace of such gross scandals, to talk of scientific investigations and other scientific, &c., in the merest

As to the moral aspects of Sparttudists, as far as I have been able to truce the facts, they have had the purest and best results. I witnessed the phenomena in America, on its outbreak there. It is foreign to my purpose to enter into a defence of Spiritualism, carnestly to anoh intercourse, is universal throughout the entire to show the good it has done, and the benefits and blessings # souttered becausest. I could state facts and name names where, of men have changed, and the result has been most beneficial wort deset than the first one evolvel. . . . As the eighth This much I may may I have never known a person who be- and much planets have not yet been recognised as belonging to came fredly impressed by the spiritual idea who was not meat our solar system, there can be no conception of the or wind princilly suproved in moral and social tone. At the same itsue magnitude and distinctor of the sun, as including its extended it is not to be demed that charletenry has entered largely into its atmosphere" (Ih., p. 165). of Swodenhorg is founded on the fact that whilst he could furand descriptions of planets known in his time, such as Jupiter or Saturn, he gives no bent of Cranus and Noptone. Had he done so has canone mould have been completely freed from the state of presence of the unalterable law. If there be law, an debution and importure."

a he would find the even more in the way of spiritual approxing which he proposes would so has set must so has fires become born from "the stain of delimen and imposture,"

Before the ducteus of Evolution was known in America so es to be familiar, I have heard Mr Davis, in a state approaching trance, deliver many loctures on subjects setting forth the same theories and principles as those contained in Mr. Darwin a "Origin of Species." In his normal state Mr Davis was not particularly intellectual, in his trunce state a very different estimate would be given of hun. The matter apropos to R. M. R.'s observation on Swedenborg's delusion was a sparitual communication given through Mr. Davis (March 15th and 64) 1846), which applies to the planet Nerdung, and was appounced several months before its discovery by Professor Gallo, of Berlin. in September 1846. Science, of courne, could know nothing of M Day a presistance "The much planet (or comstary body), by an composed of particles accumulated by the motion of the great sun, observed the mine plane by the main specific force? Nature's Divine Revelations,"p. 103). "The eighth planet (Neptono)" " was next evolved, observing the suchs principles of formation and the same general law of motion, and was situated

From perturbations observed in the metacone of the planet. Date in the management for his property at the control of the planet tray on all liquid and the control of the planet for a tray of the planet of the control of the control

in consequence of witnessing the manifestations, the characters on the orbit of the feature merely because its composition was

Mr. Davis also, in his tenned state, insisted on the identity of materials throughout the solar system. He mays "that all When R. M. N. talks of the harmony of Sciences and matter and elements are fundamentally and executally the some, Springling, and that it will " in the first place be necessary to said . . . a different law cannot govern any particle or decover the limits of the power of the spirits, under what conditions alument in the universe from that Inherent law eteriolis g is excepted, and how it may be combated when and where it established." This view as to identity of material in the sum not given expression to much window. Physical combin ........ He also announced Farachy's discovery of Dis-Magnetiate before and apiritual manifestations have nothing in commun. and it was familiarly known in America (side p. 227 and an interest-16. note by Mr. Fishbough), and communited on its actions can never harmonias. To like question of physical facts, wrought in Cosmic relations. Surely enough him been said to disabilise given is the well-oridonced Inch and the assumption that such. The on an of the accentific and theological world has much of residts have been achieved by some appermandanc agency. The the tons of the cry of the Jaws, Can any good come from

Science in general deals with tangible phonomena, and and only result wire, that there are porcers in the outer world, because the accented in his monophortonic does not fitte a visible of the laws of which menknow nothing , that the manifestations God, therefore the learned and would be all-knowing of these powers are the proofs that the world life is not the only secontific the wists reject the interposition and kies of life of man, that beyond the death of the creature, the woul or at a large area Agnestician and Materialism. Fortunately speritual energy of man has an existence, a power and a life, these observations have not universal application, for there are uses of amones great in achievement and grand in ideas. How men can dive beneath Cosmic real-ties and yet don't the designer In common R. M. N. save. "My estimate of the visious it is difficult to understand, for the approxiation and confession if a set in the existence of God pludges to no theology, not eschains the noceptor in the meshes of dogma.

In he are margation of phonomena there is slavays the mulatutor of that law must be amounted this is a logic If R. M. N. had happened on a work, "Nature's Divino many are not equal to. In phanamona is found a sequence Revelations," by Andrew Jackson Davis, he would never have of effects induced by proceeding enuses, which sequences of gennes the sentence that as he is no more sately above, for in ourses producte design, because from no concentenation of clusions could order and uniformity rounds. It were quite an fossible and in point to deny the oxistence of mind because it cannot be put in a crucible and brought out a thought, on to deny design in Nature. When we look at a steam-origine and see the mighty results compound, -the analong power of the available or the top go to as the segoning of a so skyr to see or o thinks of the mond of me sugaes are the a digence by which the almost living machine is produced, at women which none of the results with eased could have been produced. So as it the theoretical econtist looks on so-called natural phenomena to looks only to results. The designer of he steam a school as a kine. and disquared for he cannot be ignored, and the effects produced by the machine romain but effects. How small, indeed, when doesed in contrast with the operations of Nature 1. It is in seed a poor logic which sees and profits by effects, and then denies the intelligence by which they were produced. Spirituation discloses an occult power. What is its predicate, and where shall it stop?

The one result which the manifestations have produced (whatever more they may have done) is their proof of the existence of an occult world, at present beyond the reach of respectation invocaignation, of which the once denisons of this world are the inhabitants, and who have the power regulated by ourtain conditions) of communication with be again of this life. The all (so I understand it) that Spiritualize abune to touch as the doubless life of the word. Whatever other inferences its professors and betievers places to draw from the manifestations are entirely matters for their own reason and faith. Spiritualism our no more harmonise with actions than scrence can harmonise with religion, for each have separate domains and more in separate directions; the one is (acienco and theology), the other causal (morals and faith).

The count a for a son of a future life were never so pressing as at this present time. Our mediums, of whom we have many excellent once here in San Francisco, inform us that their time is almost wholly occupied with cornest seekers after the truth, and some have more calls than they can attend to, And so the good work is progressing, not only in this city, but we believe throughout the State.—The Gotten Gate.

# " SCIENTIFIC ATTITUDE '-A PARABLE

Miss on Nations is the to a of a "Popular Monthly Journa of Paycheal, Medienl, and Scientific Informa tion," published at Okicago. Its July number, the fifth, ere turns no arte to by A. N. Waterman, in which the position of cortain prominent persons with regard to psychical numbers in prittened. The writer taken the attitude, generally, of the scientific and theological worlds, paye negrap a source after Money text as the text for a parable, of which the following is a free about governo.

"Long ago, in a distant country, where expanses of water were few and far between, there were certain individuals who claimed to be able to float and propel them solves on the springe of water. The possibility of this was de ned by the inhabitants of the dryer parts of the country these demors pointed to the countial difference between water and land, upon which men naturally moved, they innisted upon the well-known fact that the feet sink in water they quoted the established practice of making bridges and boats, which proved that man had always required some thing more solid than water under him, citing, in further proof, recorded cases of drowning in water

" Still, the mmority loudly declared that it was possible for more to float any awant, and addressed, in proof, not a little test as my of mer have groups so.

" To this text conv numerous theologians of the country demorrad; they saked how all the people of the Mr. James Vettch entitled, "Spirituation its Track ourth, save one family, could have been drawned, as it is recorded, if men could have swam; and whether it was destruction of His creatures by drawning when he must have known that they could awim.

"The greater number of the men of science of the country declared, on their part, that the question could only be settled by experiments conducted by tenned scientific ordinary persons are so easily deceived, neither had they the faculty of reporting with exact ness what they saw, nor of distinguishing what they aid see from what they imagined they saw. These men of science went to work by selecting subjects alleged to be able to float and swim , they strapped them in order to assure themselves that they had nothing floatable about their bodies, and, after weshing them in alkaline solution to remove all floating only matters from their skins, threw taken anto a pool. But the subjects rose to the surface. floated, swam to the bank, and contrived to get away from being further experimented upon.

"Then certain juggless came forward, avowing the possibility of the subjects having floated by the aid of fine bladders in their mouths, armpits, and other parts, which hindders they inflated when in the water, and the jugglers suggested that, in the next experiments, the subjects' legs The A must Subsection for Locary pot our to any address and arms should be bound and their mouths gaggett. With which is a few to the state of the subsection of the state of the subsection of -when they were thrown into the pool they did not rise

There is no people, sude or learned, among whom apparitums of the dead are not related and believed. This opinion, which perhaps prevails as for at human nature is diffused, could become universal only by its truth those that never heard of one and not see widel or have agreed or a taus which moting up experience can make gred ble. Thus it is doubted by suggested experience an inace electric. The restricted and some who done it with their torques confess it by their terms

# SPIRITISM

BY HOUARD VOX HARTHARN. (Continued from p. 432.)

The effects of mediumistic nerve force are particularly striking in cases where there is a quick alternation of attraction and repulsion, of stronger and weaker pressure on the object, or of points impressed, as in the motions of a how over the strings of an instrument, or in the alternate degreement of the keys of an secordion or piano, or in the guidance of a writing pencil upon a surface. What first in these phenomena we have at present to shide by, is that frot " they asure a polyocour in a circle when the claim is closed, and the playing of the according as the autorine writing of lon pencil, immediately peaces when and as long as the chain is lepken by detachment of the hand of one of the party From this is to be understood, not only that all the party. being charged with mediamatic narve force, co-operate in the phenomenon, but that they co-operate in it in a way differently regulated by the medium from moment to moment. For the charging of each remains at first onaltered, even if the chara is broken, but the changing inner vation impulses, by which the medium is altering at every moment the distribution of the force, lose by the m terreption of the chain their path of conduction, and thereby their operation. If a closed slate, with a fragment of pencil inside, lies on the table or on the lap of eas of the party, or as hold by two of them, one has to represent to eneself a system of lanes of attractive force, comparable to a radial not of tenne clastic cords (Gummuschniken), which on the one side all converge upon the bit of pencil, and on the other side anduct torough the chant of sittem to the middle her n of the mes upo as its torce central spot, from which alternately now one, now others of those threads are drawn skurper

If individual strong is shown of cit the writing at a retance for their serves mone in order thus to order it strutions from their souman make consciousness for their direction, Lis to be supposed that the different parts of the mesoure a body, has hand holding the slate, but especially the table beneath which the slate is pressed and on which the other hand as laid, supply the place of the chain other wise formed from a number of organisms, and likewise afford sufficient points of aspport for the derivation of a system of concentric knes of force.

Our ordinary writing itself, by muscular movements of the hand, depends on a nimitar system of posts and pull lines of force, with different points of support which are peripherally distributed about the pencil, but here the peak and pull are conveyed by material contact, while in the slate-writing without contact both set from a distance. Even in ordinary writing our consciousness overleaps the feeling of intermediates, and projects its writing-feeling into the point of the pennil; this must also, according to psycho orientanalogies, be the ouse for the feeling of the sommainbut in consciousness in the writing at a distance. The sommand unit consciousness having once accustomed itself to mediate writing by a system of push and pull lines of mediumistic serve force, the course of this innervation ampulse is as easy as the analogous course of the other sort of uncertation impulse in writing by involuntary mutchlar movements, and therefore it is not corprising that the writing at a distance recoveds just as quickly, delivering the like strokes as those of the involuntary sommambular writing with the hand. The kind of a nervation impulse must of course be different in the muscular mon ation of it and m that by medizumstic serve force, but the reytain in the alternation of this impulse must be in both cases the

same. It may, therefore, be miely asserted, that a medium must bring practice in this rhythmical alternation of the writing impulse if he will be proficient in the writing at a distance, that is, only a modium who has learned to write will be able to produce involuntary writing or that at a distance. But even a medium versed in writing must first accustom himself to the kind of innervation impulse requisite for the writing at a distance, and to the command of it, and, therefore, is it that the early attempts are so egable, unsymmetrical, erooked, and away, as would be the case, suppose, with the first attempt to write with the

Alcosely the mediumstac luminous phonomena exhibit definite forms, yet these are rather crystalline or still moreanic forms, as crosses, stars, a bright field with gliamering points of light, more resembling electric dust Scures or Chiadure sound figures than organic forms. In the writing at a distance, on the other hand, must already be admitted a system of push and pull lines, analogous to that which acts on the hand grosping a pencil in writing. Now, if we suppose such a system of push and pull lines of the nerve force acting at a distance to act, not on a hard alate-pencil, but on a stump of soft wax of the same form and aire, this must exhibit the like bendings and improvious as if a human hand had attempted the same writing with a soft wax stylus.

Suppose another arrangement of the mah and pull lines of mediumistic norve force, corresponding to those reintions of pressure produced by the interior of a hand stretched out flat upon an impressionable aubstance, then must the displacement of parts, counting from such a dynamical system, again agree with that produced by the pressure of the hand; that is, must show the impression of an organic form, without an organic form having been materially there producing this impromion. Since the dynamical effects of the medicinatio nerve force, like those of magnetism, penotrate unbindered every cort of matter, no material pleasures of impressionable surfaces could present even a then to be the production of such impressions. This tanks in fact the case, according to Zoi har's experiments with Slade, repeated by others with private mediums. (Pr. St. VII., p. 387, 388.) Zöllner says that he distinctly felt the double slate twice strongly pressed against the upper part of his thigh, on which it was laying, now as impressions. were found on both the interior skies, for the one impression the system of lines of force most have pressed upon the slate , for the other impression, the slate must have been pressed or drawn against the system of lines of force.

Wore it a cuse of netually materialised limbs, invisible to those present, the penetration of the enclosing material, or cover, would indeed be possible according to Spir fixtic views. out would require an incomparably greater development of force than the impression on an open slate, the facility was rapidity with which these impressions were obtained are as much opposed to to a view, as is the fact that the any ression able ad was left intact of the push are pull new acting through it. If materialised limbs penetrated the upper slate, the layer of soot on the inner side of that slate (if not the paper on which it was spread) must have been torn away by the foot-soles penetrating the slate, that this dianot happen, that no impression of the edge of the foot, intercented by the upper slate, was visible in the soot-layer of the latter, and that this soot-layer remained wholly mitact in the process, masure proof that the dynamical actions are limited to the impression of definite surfaces. that the system of force lines in question is directed only to those surface impressions, that thus, in other words, in this case, the dynamical analogue is not that of a foot, but only of a foot-sole, i.a., of a surface without corporeity belind it.

As the question is only of a system of lines of force

facilitate the physical explanation of the phenomena, only adoing to the invisible system of push and pull forces the superbooks hypothesis of a fronce on is by and to supermatter, it has no scientics a stiffer to him, seems to se only the involuntary psychological product of a cleaving to sensible representation.

I wally there remains to be mentioned the influence of the norve force on living organisms. That sensitive plants Mediums, however, have just the contrary interest, opposed car be hypnotised by autguette passes of the hand is suffiejently established if the same is true of animals, decime people, children, and savages, all of whom have no notice of what has been done with them. It is not at all necessary that passes with the hands, or motions with the arms, should be made, these are only side to the transmission of the nerve force, as are, likewise, breathing upon, or fixed gaze none of them being at all (adaponeable to its out-streaming or out ien 2. As little as it is necessary for a mer una to charge by magnetic passes the objects to be moved, so little is this re-u site in the case of a person to be hypnotised strong ouguetises favorate sensitives wit outany mediating action, and by their mere wills place them in a manifest or masked somnambulism which paralyses

the slate is turned to the medium), there is also no reason somnampulic consciousness to the will of the pagnetizer why the empressions obtained should resemble the On the other hand it is not the more will of the magnetiser limbs of the medium, for that which prescribes as such which clients these phenomena in others by a pure the arrangement of the lines of force is simply psychical influence, any more than it is the more will of plantery in the commandatic consciousness of the medium, the medium that, by a pure psychical influence, procures which can deviate at pleasure from the latter's own bodily the physical phenomena referred to in manimate objects; but configurations. So the impressions obtained represent limbs a both cases the immediate action of the will in only to of the most different size and shape; a check impressing of the disengage magnetic or mediumistic nerve force from the meaning own limbs appears whosly excluded, quite apart mercous system, and to radiat a country upon laying or

This I becation and absent ve in cation of a rve force Thus impressions of organic forms, as they cannot, like or a 4 r M regular needs not a ter whether the first writing, have arrived by successive, but only by simultaneous mapules proceeds from the will of the waking consciousness, formation, are among the most striking phenomena of the or from the unconscious will of the somnambule conscious whole province, only surpassed, perhaps, by the instances ness, not a function of those parts of the brain which serve of a penetration of matter, It is the more important massauch as support to the conscious will, but of deeper-lying layers as their derable results, the impressions obtained, like the of the himse which either coincide with these supporting writing obtained, afford radiabitable proof that in these two the sommanibulic consciousness, or are more approximate to

in the sommambule then in the waking state, and that Even those who adopt the view that the pressures are of persons who in the latter have no power of magnetising

As each in y as meeting or a their mass, so or manifest somnamisalism have the disposal of an amount of nerve it be supposed that in the writing at a distance an invisible force, be it self-produced or be it extracted and collected material hand mechanist the forces of push and pull by from the others present, such as no magnetiser in the which the peacel is arged, such a hand also would then be a complete waking state has ever developed, so certainly also must their power, by menus of this surpossing quantity of Since, moreover, such a supposition does not at all force, to place the spectators in a condition of open or marked sammambulism, he greater than that of any magnotines operating in the waking state. It is a common phenomenon at mediumustic sattings for sensitive members of them to fall into ewomes, convulsions, trance, contacy or sypposis, and these phonomena would be much more froquent if the mediums had an interest in them, and therefore sought to motive their unconscious wills to elect them to the occurrence of open somembulum among the spectators, because this has usually a disturbing effect, being often accompanied by convulsions and the like, which divert the attention of the rest from them and their performances, and they may find in the new comnambules competing mediums who may arbitrarily counteract their dispositions of the norve force present in the circle.

On the other hand, medicus may well have an interest in objecting a masked somnatibulism in the party collectively to the degree that they are thus made susceptible to the transference of halfacinations, without becoming at the same tame qualified for active competition with the medium. This anterest and the nature of its motivation need not, of course, occur to the consciousness of mediums. But when it is considered that a someombulic medican has halfuconations which he takes for reality, and has at the same time the lively wish that the spectators should perceive the same supposed reality, that is, have the same (influringtory) representations as himself, oridently we have given in the medium all sufficient psychological conditions to compel him to an unconscious influencing of the spectators,

b I was tald in a private letter of a strolling tinker, of shomeomest aspect, who added to bis caretage by foracing in women the Illuston that their kvittes had holes in them, and pretending to repair them.

to the arising of like representations (i.e., to the infection of hallocinations), which is just the condition of marked som natalba está.

September 12, 1885.]

Now since already, in masked somnanbulam, mediums are actually subject to halluctuations of all sorts, assuily without knowing them as such, since, in open someone busses, they are wholly possessed by thom, since, further, on account of their vocation and from considerations of business, they, in fact, with that the reality recognised by them of such purely subjective phenomena should also be recognised by those present, it would be mexplicable if, with the combination of conditions so favourable, the instatement of marked spaniambalism in the assembled party, with frequent infection of the medium's hallucinations, did not occur

If, in Spiritustic circles, these facts have yet not been at all remarked and regarded, that is because the concern has been only on behalf of the objective reality of all phenomena, so that such an observation from another quarter exemperates, and is rejected as a merilege. From the scientific psychological standpoint, on the other hand, every participator in mediumistic zittings must constantly regard himself as under the influence of a very strong magnetiser, whose unconscious interest it is to place him in marked nonnamination, for infection of hallacinations, and must consider that this influence is the more powerful the oftener he has frequented mediumistic sittings, and the oftener he has est with the same medium. He must say to himself that this state of a marked sommanbulism is announced to his own waking consciousness by no direct symptom, but only by the especity for being infected by the representations, especially the semestrons, and quite particularly the hallocinations of the magneticer (here the medium), and must be the more prepared for implanted hallucinations, the longer be occupied himself practically with the autigott-

We shall see later on how extensively this transference of hallocinations actually takes places at mediumistic sittings; at present we are only establishing the fact, that in a circle of similar composition, throughout a long series of sittings, the most favourable conditions concernable are afforded for electation of a masked communicate over n под-вельдате регьовы

# THE ARTESIAN WELL OF CHICAGO.

Chicago, as as well known, in one of the most go-a head cities in the world. Like Jonah's gourd, it appeared to spring up in a night. Its population rapidly increased, and water soon became a sine que non, both as regards use and luxury. Science was at fault, for geologists had pronounced that there could be no water beneath such a stratem. Too water was all that could be looked for, and presently a water company was formed to supply this mnare kind of hould.

There happened to live, at this time, in Chicago, a person named Abraham James, a simple-minded man of Quaker descent, unedweated, and, in fact, quito an ignorant person. It was discovered by a Mrs. Carolino Jordan that James was a natural clairvoyant, in fact, a medium, and that he had declared, when put into the trance conductan, that both rester and petroleum, in large quantities, would be found, in a certain tract of land, in the neighbourhood of the city. For a long time no attention was paid to his statements. At length two gentlemen from Maine, called Wintehead and Scott, coming to Chicago on business, and bearing what had been said by Abraham James, took him to the land where he said water could be had in immense quantities by boring for it. Bong entranced, James at once pointed out the very spot. He told them that he not only naw the water, but could truce its source from the Rocky Mountains, 2,000 inties away, to the spot on which they stood, and could sketch out, on man, the strata and coverns through which it ran. Negotiations were at once entered into for the purchase of the land, and the work of boring was commenced. This was in February, 1804, and the process went on daily till November, when, having reached a depth of 711 test, water was struck, and flowed up at once at the rate of 800,000 gallons every twenty-four

The berings showed the following kinds of strate passed through by the drill, and this was spiritually seen and described by the chirroyant, as practical proofs to the sensor of other people. First the drill passed through allevium soil, 100 feet, limestone, saturated with oil, thirty-five feet, which would burn as well as any con-Jount marble, 100 feet; conglomerate strata of sand and fint mixed with from pyrite and traces of copper, 125 feet; rock (shale) enturated with petroleum, the sediment coming up like putty, thick and greaty, 156 feet, galena limestone was next reached at a depth of 539 feet, a bed of himestone, containing flint and sulphuret of fron, was next bored through, the depth being 639 feet, and being very hard, the work went on slowly. At this point there appeared a constant commotion, arising from the campe of gas, the water sandorty for ing from the ty to a sty fast, and then, as suddenly rise, to the sarface, earrying with tehippings from the drill, and other matters. The work strivent on when at the depth of 711 feet the arch of the rock was penetrated, and the water suddenly burst forth from a boro ting at the bottom, of a temperature of 58° F, clear as crystal, pure as diamond, and perfectly free from every kind of animal and vegetable matter, and which for drinking purposes and health, is found to be much better adapted then any water yet known, and will turn out to be the poor man's friend for all time to come.

Here then is a large fact for the faithless, a fact brought to hight by dynamic or invisible agency, and which no power of negation can grantsy. Natural science said no water could be found , but psychology said, Faise! for I will point out the spot where it will flow in splendid streams

<sup>&</sup>quot;The few reports which such of the writing of a widdle spirit rants are of no wright as they refer to sark statings, in which the shadows consider of a hand on saft quaisants p por is said to have been cultatinetly scent.—them Dabatentel Lanc.

Debateable Land.

as long as the earth spins on its axis. Since 1864 the Artesian well of Chicago has poured forth water at the rate of a mi tion and a haif gallons duly, and what is economic, to say nothing of Yankee shrewdness, it is flowed into penda or reservoirs, which, in winter, freeze, producing 40,000 tons of see for sale, and which might be quadrupled at any

What wil, sevence say to this car bono matter of fact! What, those super-wise people who, with finger on hp, noon about, and whimper, and cry out, What's the good of the dynamic and the invisible? Is there no good in 6m mg, by spirit agency, a living fountain of pure water for the use of authors of human beings for ever! Is it not a mighty boon for the humanity of that part of the earth? Verily it is , and the source of knowledge was a enguamention from disembodied spirits in spirit life

Lot us now turn more particularly to the man-Abre hem James-bywhom, and through whose mediumship, the discovery was brought about. He was of Quaker origin without schooling, ignorant of any language but his own -English-sample-m nded, apright, truthful, honest, Igo rant as a clodpole. Of drawing he know nothing and as to seignee, he could not tell a triangle from a paramete gram; and so to their properties and relations, he was in profound gnorance. Yet this same man, Abraham James, when in the trance state, can lecture an goology, chamnity medicine, astronomy, the phoceaphy of life, and on any branch of physical and nuttiral science, and that, too, with nucli knowledge and doquenes as few accuss can equal.

Although English is the only tongue he knows, yet is the fram was se system bunch, Italiana, Spanish tion an, and in the a magange, of each of which he Rubber book as in his or turns or nor all condition.

Abra amazor s aever reci. Ha geora por dense a are found to be no so could from his drawings of the former for the strike with of the earth's crist ore marvotious productions. He drew a series of diagrams, which traced the Artenna well at Change from its source to its outlet or fountain head. This picture, when put together, he composed of six sheets of drawing paper twenty-six inches by forty nelies each, and was done in sixty hours-a piece of work which would have taken may ordinary artist sixty weeks, in his ordanary cone I on

It matters not to Abraham James, when at work, whether it is light or dark. He generally uses from one to aix different kinds of pencils, construct using one hand, and sometimes both lands at the same time, the fingers the sometimes to the industrial states to the property of the school of What he sees with sixy high eye, in the little of he er a he a de at on prive with profect accusacy Speaking of the I wrige of Ascalant James, a writer win has seen them says. The floors of some of these coverns were composed of great masses of some of the most beautiful shells which in their shadings and perfections are evaluatly the work of a master hand. The chilorate character of the shot work which runs through all those guological pictures, the millions of accurate pencil strokes and wonder to all who have seen them."

In the trance state, Abraham James drew a full length portrait of the martyred President Lincoln on elects of paper 74 feet long by 44 feet wide. The President is represented life-size, standing upon a rock, the broken chain of African slavery beneath his feet, and in his left hand, the scroll of American Liberty. This picture was completed in the medium state in twenty-four hours, nigl is a remarkable production even amongst the other marvellous efforts of this trance artist. Whence comes this skill? The human spirit acts without the ordinary instruments of the senses, "Same teeth, same over, mose month, some overything," and yet the work goes on in light or in dark with almost lightning speed till the picture is completed.

(To be continued.)

# ON MAGNETIC HEALING

BY BERNARD RAGGAZZI (Pelitor of Le Journal du Magnétisme, Genera).

One might think that those who devoted thenselves to the study of a subject of such importance to humanity would have had encouragement from those who made the healing art their vocation , but no the majority of these lave displayed only hostility towards them. This hostility engendered bitterness and anger. But let magnetism have charity, the love of doing good should alone rule in them, as it did in their Divine Master. They who would perfect themselves will follow His example as closely as they can.

In the application of the human magnetic force to the restoration of health let it be ever kept in mind that "It is the Spirit that giveth life." Premising that I do not ongoetiso unless I am in good health, and that I coase sperating at the first intimation of fatigue, I state my simple method of proceeding. First, I lay my hands calmly. and with carnest prayer to do good, upon the suffering part of my sick brother, I let my heart go forth in sympathy with him. Doing thus I have sometimes had to rejeice at an instantaneous cure -a cure without any further proceeding. But such eases have been exceptional, generally I have to continue. The most influencible ports of the body are the head and the engastrium, from the head I make slow, more or less energetic, passes with my hands, wishout contact, to the epigastrium. After a time, short or longer, the patient may speak of an uneasiness in one or other of these parts, in the head, perhaps, of heat, heaveness, and then sleepssess, in the epigastrium of heat and stifling, then I extend my passes from them downwards to the hands and to the feet, by these equilibrium is established, and the uneasiness disappears. The same result may follow from breathing strongly, and with concentration, upon the part affected, and then making transverse passes from the part and outwardly. In those operations the magnetic fluid is accurrentated upon the principal seat of the maledy, and the surplus is thrown off.

The experience of practised magnetizers may be a guide ax to which of these, or other processes, should be observed, and how long and often they should be continued, but I trust much to my own intentive feeling, the feeling which seems to develope itself in the sensitive by unselfah brotherly love. The brotherly love which our Divine Master taught by word and example will teach as well the mode or process most suitable for treating severe cases."

There are processes of manipulation with the finger points, of rubbing and kneeding with the hands, in cold congestion and chrome pains, which processes aid in reusing vitality and quickening circulation. There are the breathings, insuffictions, already spoken of, the warm in deep-seated local pains, and the cold in hot congestions. Any of these processes may mem sometimes to intensify existing point. This, however, generally denotes aroused necessary to complete them, and the very short time in effort of nature to be calmly sustained, but the patient which they were executed, are matters of great astonishment, should not be left until such intensification has passed off the magnetiser's presonce will sustain him.

You will be sure to read and confer with others upon the subject of your studies and practice, but accept nothing without good scrutary. Man, ignorant of causes, are prope to minuterpret and exaggerate. Of all books I commend those of Dupôtet, no writer has understood the subject

From every individual there radiates an nura, agreeable and salutiferous, or the reverse. The odour of the resc refreshes, that of the poppy stapities. The radiations of some individuals are repellant, may even be injurious. The

Bernard Especial does not profess to be a Spiritualist, but he gives have the personne and inoctings of a beating medium, fig. experience and inertage of a healing medium. Fit.

## HAUNTING

Mr. G. Pedell, West End, High Wycomb, Bucke, favours us with a letter enclosing a long cutting from the Reening Advertuer, published at London, Outorio. It reports with munto details the haunting of a house in Bondstreet, of that town, while Mr P resided there, three years ago. The details were furnished by the family (ex peciots), who finally left the house by reason of being perpetually disturbed and alarmed by nonce as of feet shuffing about , doors overhead claiming, followed by sounds of struggling and heavy falling , then a long continuous and monotonous cound as of the dropping of some heavy liquid on the floor above, on a part where there was a dark stun , at feeling mild winds on their faces while passing along the passage and stars; sounds of and my All those and other phenomena occurred when none but he farmer, who alone occupied the house, were in it. On their leaving, the premises were put under therough repair, and Mr. P. besteves all such disturbances consect.

# SPIRITUALISM, SPIRITUALISTS, AND THE SOCIETY FOR PSYCHICAL RESEARCH

AN OPEN LESTER TO THOSE WHOM IT MAY CONCERN

# BY JOHN B. PARMER

The following letter addressed to use by a prominent working member of the Society for Psychical Research, and my reply, speak sufficiently for themselves to need no further introduction :--

DEAR Ms. FARMER, -- I learn from Mr --- this evening that, from some remarks of mine which have been reported to you, you have informal that I intended to appute possible disbonesty to you in the matter of the W --- manon. Pray let me moure you that no remarks of mine were intended to bear such a construction. I have no ground for supposing you to be less between the investigation than I am conscious if or ng opposiand I have never axis a word that was suggested to throw a doubt their Year fades ades. I am sorry that there should have seen any insulteendahilang.

I did, however, express my regret that you had been present at the W---- agance, and had held an important position at the sames-next to the medium, that is , and I throk it likely that my remarks on the point were mininterpreted. I said that to the outside public the fact of your presence in an important position in the circle would cortainly leasen the oridental value of any phenomena obtained, and for this reason. Outsiders think, as you doubtless know better than I do, that a believer in Spiritualistic phenomena is probably either an accomplice in fraud or an easy dopo-in ofther event, a had witness. Under t whicherer category outsiders scight place you, your presence at the scance would certainly be regarded as a weak point in the evidence, and would probably render an account of the sence of little value for evidential purposes. To put it syllogistically, a aceptic would reason in this way

From the testimony which Mr. F has already given, it is evident that, if he is houset and a trustworthy witness, some of the phonomena called Spiritualistic are true.

Now-seconding to the testimony of universal experiencenone of the phenomena called Spiritualistic are true. Thursfore Mr. F is either dishonest or incompetent.

I hope this explication will actuary you that I cant no stor upon your character in regretting, as I did regret, your presence at the senses in question.

Dran Ma. - As your letter of the 28th ult. refers

words Spiritualism, I will reply through the columns of 102 "Light." I am further induced to do this in the hope that frank speaking, and fuller explanations, may, in some measure, remove the unpleasant impressions now enter tained by many Spiritualists, both inside and outside this

It will suffice for me to deal with your letter mainly on apply to Spiritualists at large, and their capacities for, and methods of investigation. Allow me, without in any way unticipating the report of the W--- Committee (which, however, I now publicly challenge them to publish with full names and particulars), to bracky relate the selient points of the seences in question,

The Haunted House Committee of the Society for Psychical Research received, from apparently trustworthy and independent witnesses, a record of launtings in a cottage some distance from London. There appeared to be a good prime faciacese for Inquiry, who reapon portain members of the Society for Payetimal Research formed themselves into a committee of investigation, and arranged to spoud from Saturday to Monday at the place. For some reason or other it was suggested by them that probably better results would be obtained if they were able to secure the services of a medium. They were successful in so arrange g. and they also courteously asked me to accompany them as a guest, the reason stated being my "long experience in regard to Spritualistic phenomena." Of the eight mon forming the party, six were members or associates of the Society for Payenical Research , the other two-the medium and myse f were not connected with that Society, and were, in the over, well-known and long-avowed Spiritualists. The results exceeded all expectation: the phenomena occurring were rough and violent,-maliciously so to my mine. On each occusion, mainly for reasons obvious to experienced investigators, I occupied a seat next to the medium, two other undividual members of the party also alternately filling the corresponding position. The acances were held in total darkness. This was much against my will and advice. At each seance I protosted strongly against this condition, the medium naturally expressing no opinion. Hands were held all round, and at the close of each scance each member of the circle testified that the chain had been unbroken as far as he was individually concorned. The phenomens were of such a nature that, accepting those statements, and m view of a thorough search of the house previously, they must have been due to some agency outside the eight persons varily present

This is, I think you will admit, a correct though bald account of the erroumstances of the case. Now what are your points? You "regret my presence at the seance," and that I "held an important position-next to the medium, that is." Surely your first point is a matter which concerns the members of the Society for to questions of general interest now exercising the minds of Psychical Research, who originated the circle, more than it many Spiritualists, and as it also touches indirectly on the concerns me. If they wilfully introduced elements, knowing whole attitude of the Society for Psychical Research to that such introductions would, in their minds, vituate results, It is only fair to seate that the writer did not, is the first place intend that they were deplorably lacking in common sense. I, however, better for publishables. Interder's treat it as a private consequence to a present of the effective and to it deputy. I am sure that comparison to apparturally will be absorbed for replying under the same or other equatition. 3-5-Y this. With regard to my sitting next the medium it is branch of occult research. true I did so. Why, however, should I be singled out for For myself, and I think I also express the views of a objection? You admit there are no grounds for supposing large number of Spiritualists, I behave our "one" is to me to be less linnest in this investigation than you are trouble but little about "the outside public." They are not conscious of hong yoursalf. Yet you not only say nothing as yet even ready to accept evidence, much less to judge ending in question the bone fides of the other two men who rightcoxs judgment. also occupred at times a similar position, but actually the whole tener of year letter-

as narrated, it seems to me I have grave cause for logically in sprintum seems to be searnt. doubting the sons fide of all the circle except the medium, in total darkness in spite of my protests.

our basis !- " the outside public," or the man of reject them ! uxparkings, whose verdict, by-the-bye, as to the genuineaum | It is with extreme regret that I have to confost-and

have arrived.

so frequently in the literature of the Society, could never these adustons have, I fear, wrought little service to the truth? Society for Psychical Research, and that in the face of a

who were absent I am, however, open to correction in the work done and results obtained by the Society in one

Do you, however, class yourself among "the outside sheered men ion man and became I am a Spiritimust public "! I hope not, as thereby you would be doing and they are not so avowed? There can viscous on vivi yourself an injustice. Nevertheless, the position you take inference that can be arown, more especially in view of up for the supposititious "sutside public," although thinly veiled, is, I take it, meant to represent your own attitude. If we deal according to the rules last down by you with | If I am right I do not wonder at your finding yourself regard to alleged "suspicious elements" in the conditions, with a barron experience. There is yet the very first lesson

Your syllogistical application of the aceptic's posimassauch as the experiment was, as a matter of fact, here time contains a gross feater. It is not the case that according to an erast sporence none of the phane-This brings me to the general attitude of yourself and mena called Spiritual are true," and your deduction several pronuncit members of the Society for Payotheal therefore falls to the ground. As a matter of fact the Research, but I wish it to be distinctly understood that university of testimony is rather on the other side. If nothing I may say is in the loss thegree mount to be you will point out a nation or an age in which phenomena, personal. You speak of "the outside public per og her similar in kind, if not in degree, to those called Speritaal in the place of critics. In the first estance, a deny the have not been alleged to occur, I will at once abandon my competency of "the on sale public to occupy and a a position. In the meantime I aver that there is a weight of position, and & shall is our even if you maintain the testimony in favour of Spiritual phenomena such as few of out A channel might just as well expect a man even the the so-called exact sciences can produce. It is ignorant of the rudiments of channatry to understand true that there has been " money, in many of the rather fractional analysis. Douglas Jorrold once said, "Pabus and that, therefore, the facts have been more exhaustively opinion is only the average stupidity of mankind." studied and applied to the needs and conditions of life than He was not far wrong. Only those who are competent -- has Spiritual science. That, however, is a represent which S.e., those who have proved themselves lovers of, and seekers will doubtless mund itself in time. As a matter of fact, for truth, who have had the requisite experience, and have many things to scientific research are contrary to the Concern common series in the angle with this experience. "Historial" experience, so-called, of "the outside public," no expense of passing judgment, or giving a vertice, and, moreover, are not supported by collateral evidence We are now shall we then accept, taking these qualifications | eccurring all over the civilized globe-do you therefore

of these facts after due inquiry, has been and a new motes, my opportunities for judging are by no mount few—that It seems to me, therefore, that you and the leaders of the feeling amongst Spentualists at large is that, in spite of the Society for Psychical Research generally put your the fair promus under which the Society started, there is solves in a false position when you attack so much import, little new to be expected of them as for an Spiritualism is ance to west an incompetent tribunal will say and think concerned, that the whole attitude to and treatment of Door not history give the lie to the utility of such four for the subject is lines y calculated to mapire confidence. The one's skin! Do you really imagine that such a course will | cimms of Spirituanuts and Spiritualism are systematically recommund itself with respect even to that outside ignored; the general of the Society has been misrepresented public, which you are so anxious to consider and convert- in the Proceedings, and to crown all a member of the a world which, though alow to receive and apply any new Society for Psychical Research, reputed to be antagonistic truth, is remarkably keen, elect-nighted, and approxistive to the Spiritum theory and who it is doubtful has had the when it is a question of straightforward out-spokerness I requeste aperience for such a task, has accepted an invita-The fact of Spiritualists standing firm and ammorable in tion from the califor of the Encyclopedia Bestannics," to defence of what they know to be a truth, through nearly write an article on Spir too can for that work astead of forty years of ridicule, abuse, and persecution, is bearing standing aside in favour of those who at least have the fruit at last. Would that the labours of those who have requisite knowledge and experience. Verily the outlook berns the burden and heat of the day -men who have alone is not remaining. Mr. Myers, in the last Proceedings, rendered possible a society like the Society for Psychical complains that an appeal for evidence relating to Spiritual Research-were duly acknowledged by those who should be phenomena produced little reply. I regret the fact, amongst the first to appreciate the results at which they but I am hardly surprised. If these who have channels of savestigation which they could throw open Instead of thus their work is largely discounted and to the members of the Somety for Psychical Research passed by, or surely the attempts to prejudice the subject are informed that because their experience has led by the many disparaging allusions to Spiritualism and them to certain conclusions their presence at any mance Spiritualists, and the especity of the latter, together with would be "regretted," and would "probably render an the soundness of the methods they adopted, which crop up account of the stance of little value for evidential purposes" to those who confessedly lack experience in such have found currency Spritualists as a class are not than matters—if they know this, it is scarcely surprising that skinned, their past experience having rendered them proof such an appeal should be made in vain. Is nothing to be against much that would otherwise barn and rankle, but counted in regard to honesty of purpose and merifica for

Complaints are made that evidence is scarce, that there soyal desire to acknowledge and recognise at its full value is a dearth of witnesses. My answer is, first publish boldly

and without comment what is already collected; adopt the same course with Spiritual phenomena of any kind that you have with "Phantasms of the Leving," and I make bold to my that you will require to double the sine of both your magazines. In the case in point, you have considered testimony which is certainly not even of yesterday, or all first hand. If "Light" of the past two years alone is ransacked, a wealth of evidence will be found, which, if duly weighed and considered, will, I venture to may, thatter the extraor dinary amphification of Dr. Carpenter's "unconscious cere bration" theory, new put forward by the Society for Psychical Research in explanation of some of the phenomena. It is all the more strange that this evidence should be nestected in face of the fact that a fair proportion of vice presidents, members of Conneil, and members or associates of the Secrety for Paychical Research are among the witnesses referred to. Dearth of evidence undeed ! Nor is this all. It is, I believe, true that cortain prominent members of the working section of the Society for Psychical Research possess records of acouses kept during many years. If these exact, why are they not dealt with I Surely they are of undoubted value. The only conclusion as that if evidence is wanted there is plenty to hand.

September 19, 1885.]

I am afruid you will regard my letter as a grumble all round. At any rate, it is better for any society to know what is being said of it. At present it occupies a position somewhat analogous to that of a clergyman who in and year out lare down the law without fear of opposition or eriticism. The bulk of the delateable questions connected a th tress topics a gene in the Journal-published "for private care ation andy. It is true permission is given to quist. I repried the but in any case the restriction tends to er on free requiry and discussion, both of which are now by invaluable when dealing with abstrace subjects of Inquiry like Spiritualism and kindred miljecta,

For the rest, I hope and believe a basis of agreement and work will be found possible between Spiritualists and the Society for Psychical Research. The former, I will answer for it, we read by respond to any divise tion on the part of the latter to teest the cal ject of Specima is with that continue offerest in attau. . g su h a position . ### REVIEWS.

MANUAL OF PSYCHOMETRY ! The Dawn of a New Civiliantion By Joseph Rodge Buchman, M.D. Published by the author. Price 84, 6d. English Agency, The Psychological Press, 16, Craven-street, Strand, W.C.

Psychometry (from process, the soul ; and metros, a measure) or the power of measuring by the soul, owes its discovery to Professor Buchanan, who, in the winter of 1842-43, observed certain facts which led him to the conclusion that using and character could be measured, the history of the hidden past revealed; and the interior nature and history of persons and things present or absent, living or dead, truly and critically estimated. By personal investigation and instruction, and also by mount of loctures on the subject he gradually extended a knowledge of its principles, and, by degrees, a most of facts was collected which seemed to allow of no questioning of the general truth of these startling claims. For upwants of forty years Dr. Buchanan has continued his rescorches, and has a given to the world in this large volume the results of his labour There is much in Dr Buchman's work of interest and, what is far more important, of extreme value to the Spiritualist. With out desiring in any way to underrate the value of the excellent results attained by investigators in the position was walked as a undeed !-- it yet seems to us that we Spiritualists of a da a c too little careful of the heritage we have had handed dow ... ne; and that we are somewhat in the position of the servert who, in the ancient fable, had received a talent who are the with hid from night and rendered moless either to make the moless. follow mon. We want above all also careful and original research in regard to the latent powers of spirit, embalied a discussed; for that we must learn to depend upselves and not on others. In this light, therefor a 1 gard Dr. Buckment's Meson wires countly upon an analymetol-

I so once overlaps and merges into the other, and it is deficult to my where one onde columns and not conwhich adde to it. We have have a gir. The other begins One thing, he were the early or, that we here possibly ented a glimpse of an orderly air engangers and graduation of phonomena which have it nome ruspe a secure without concerns, and beyond any but a general classification. Not less important are the indications we also get as to a more entional mothed of dealing with those who are honoutly and tru's souking practical knowledge concerning the nature and enpacity of spirit. We have long falt, by reason of the experience gained while conducting this journal, that come well-conceived system juf study, expable of being placed before those who thus sook, was urgently required. Broadly it appears to us that the course should be an here indicated; the deads of the School we leave for ablar organisons to arrange or anguest. Surely. however, the first step for an inquirer is to ever to and study the capacition and powers of the embedfed apr - n the normal state-to begin at the lowest rong of the ladder and lastly of "Spiritualist fools | post to an instead of half way up, or near the top, as when Spiritualism "No spirits ever returned to the earth after is studied without a provious knowledge of either psychomotry instead of helf way up, or near the top, as when Spiritualism or momerium. In such a case half the difficulties which beset the inquirer would not exist at all, and the many other advantages of such a course of study are sufficiently obvious to need little particularisation.

These who take a similar view cannot do better than peruso and study Dr. Buchanan a "Manual of Psychometry" indeed we will go farther and my that even advanced Spiritualists who have no acquaintance with this subject have missed a very important and indisponsable branch of spiritual knowledge.

Dr Buchanan's discovery was made in this wise. Having for many years made a special study of the nervous system of man, he was informed by Bishop Polk, of the American Episcopal Church, that his sensibility was so scute that if he should, by accident, touch a piece of brass, even in the night, when he could not see what he touched, he unmediately felt the influence through his system, Physical science does not even seriously challenge our faith in touched, he unmediately felt the influence through his system, many transv. It is clearing the ground for a new instant, and and could recognise the offensive metallic taste. The discovery resonant faith in immediately. Rev. J. Newves. (September 19, 1235,

was Bishop Polk led Dr. Buchanan to suppose that it might be rise in his mind, and report his conceptions of the characters of the found apthers. In the he was justified by observation. It soon writers. He did so, and his descriptions surpassed my same pa appeared that the power was quice common , that there were tions. He entered into the spirit of each character as familiarly many year to tella or other to by to orling a piece of detail of oyand by it in their name what the notal was nother recognised a promine authorized process no from a which is a few momentagave on a procedure in the month. This power was not continue in the companies to metallic autotances. We continue in Dr. Buchman's awb worlds -

I-very anostance possessing a decided taste appeared to be expuble of transmitting its influence into the system, and of being recognized by its taste. Sugar, salt, pepper acids, and other substances of a decided tasto, muto so distinct, an improviou that such could be recognised and named by many of those upon whom the experiment was performed. It did not appear that the sense of taste was translated to the fingers, or changed any of its known laws, but is till appear that contact of the sapid substance with the an early date a few practical articles on the subject. paperso of the tought was by no means necessary. The peculiar influence of the substance fouched or held in the hand by sensitive Five Years or Throsoray Mystical, Philosophical, Theosophic persons appeared to affect the hand locally, and thence to be transmitted gradually along the arm, recognised by some peculiar sensa tion as it passed, and producing an other effects until it reached the client or the need. In the head it produced its impression upon the brain and nerves, and, if possessed of ampid qualities, was recognised by their characteristic impression upon the tongue and fatioes. The awaetness of augur, the pungency of popper, and all the peculiarities of other fautes were recognised, as if the same substruces, instead of being bold in the hands, had been gradually. in small executives, introduced into the mouth. It is perhaus necessary for me to state that those experiments were entirely in dependent of any meanieric process, and consisted simply of what I have stated. The public mind has been so accustomed to the proresons diposition in the arms. Find aniene it pessal discipliner a finned. This he supposes the such extending a more made in meshorn it continued also propored by a magnetonic The purpose of encevidence who qualif exercise the neare sensibility and taste which I have described appeared to be variable

In different localities, being greater in warm cituates than in cold In some places and-fourth, or even one-half, of the whole population appeared to be capable of displaying this new power of the norman system. In other places no some has one in ease of floor and display it similarity. Means, all values and refine ment, acute semilarity, actioney of constitution a nerve san gaincous temperament, and a general product sance of the moraand intellectual organs, constitutes, the most favourable conditions

In a cines of 130 students experiments were made in this direction with medicanes of various kinds, the trial being concuered in such a way that any play of the magnetic contains at most detected, and in some matrices the more was wer sink news to all present until the close of the experiment. Forty-three pass here of the class, or about one-third, were succonfin in these

The conclusion arrived at through these and other experi niques was that the nervous system is capable of being affected by subtle infigence organizing from all objects, and it was spon verified by experience that these who possessed this sensibility wore distinctly affected by contact with living beings, and were able to correctly appreciate the influence proceeding from them, even without actual comback. The next steps are tast esen ed -

It seemed probable that if the psychological influence of the brain could be transmitted through a suitable conducting medium. it might also be imported to objects in proximity to it, and retained by them, so as to be subsequently recognised by one of impressible constitution. Without relating the experiments which established this proposition, I would proceed at once to the most wonderful experiment of all. To proceed with my parrative. It was so the laster part of 42 that I made the experiment which I would navate now-not merely to appeal to the reader's faith, but to give him an example for his own experimental inquirim. had otenrily ascertaines in a young gentleman' with whom I had made many experiments the existence of extraordinary neutrons of considerity. In a moment's contact with the bend of any in dividual he would discover his outize character by the sympathetic tenpression. Reasoning, which I need not now repeat, had convinced me that he possessed the power of recognising a mentafallacace in any autograph that he might touch. I was citting with my young friend in an apartment in Astor Rosse, when I resolved to test his powers. I proceeded to my trunk, and took peculiar characters. I placed them successively in his bands, and

as if he had been in contact with the individual, and described not only his intellect and his principles of action, but even his personal appearance and physical constitution. He knew not of whom he was speaking-he did not even know what letters I had placed in his hands-yet I can say, without exaggeration, that his description would not have been more correct if he had described the individuals from familiar personal knowledge.

It is foreign to our present purpose to deal further with the practice and application of psychometry, of which Dr. Buchman gives many examples. It would be impossible within these limits to do anything like justice to the importance of the subject. Sufficient, however, has been mid to andiente the score and practical aim of the book. We also purpose publishing at

cal, Historical, and Scientific Essays aclocial from "The Theosophus." London Reeves and Turner, 7s. 6d. May be obtained by post from the Psychological Press, 16, Cravenstreet, London, W O

As implied by its title this book consists of reprinted articles selected from the Thesephial. They embrace a wide field of study; how far they are of value we are not at present in a position to say. Though those special articles are not, we understand, put forward as authoritative, yet we cannot but remember the attitude adopted by prominent members of the Thomsphical Society, in the controversy arising out of circumstances to which we good not now more particularly allude.

The protest of Spiritualists in connection with this controversy with Throsophy was not directed against any new light which it could possibly throw upon a perplexing subject, but rather against the arrogant "Thus mith the Lord" method of its presentation, against the insufficient evidence upon which Spiritualists were expected to smallow the alleged facts of Thoseophy; and more especially against the wilful and systematic misropresentation of Spiritualism Indulged in by prominent Thoosophists. They habitually, and we confess, it appears to us wilfully, attributed to the Spiritualism of to-day the characteristics of twenty years since, whereas rest strides had been made since thee. As a matter of fact, Thoseophy at its inception, and at the time of which we speak, calmly and coolly cased off as its own exclusive teaching much that was due to the labour and research of Spiritualists, and it had not even the grace to acknowledge the source of its inspiration. And as regard the methods and "facts" of Thomophy has not the logic of events proved the value of the general conclusions arrived at by Spentualete 7

We feel we are only re-schoing the views of the majority of Spiratualists in this country when we welcome criticism on all sides. Feeling that the more we learn of Spiritualism the fee we really know, we are ready to be taught by any man havng knowledge and phility. We feel that, standing midway between the Theosphical Society, as now constituted, on the one hand, and the Society for Psychical Research on the other, we may learn much from both. All we ask is that there may be so maunderstanding of the position we hold, or of the methods we adopt. Let it not be forgetten that while insisting upon the spiritual theory as a legiumate outcome of facts, we do not presume to dony the action of spirit other than that of the mighty dead, that we recognise that man is a spirit here and now, and as such has latent spiritual qualities, that beyond the order of ambodied and disembodied spirit there may be a yest realm filled with the unembodied orders of spiritual bears, this, we conveive, is the present position of most Spiritualists.

It is with regret that we notice the same dogusatic and mreasonable estimate of Spiritualisms perpetuated in the volume before us. We had hoped that it would have been otherwise. For the rest we may my that those who care for speculation devoid of an apparent sound foundation on facts, will and in "Five Years of Thoseophy" a volume to their tastes.

THE JOURNAL OF SCHENCE (In. 6d. monthly, 16s. per manum).

All Spiritualists should read this magazine. It is one of the very few which deals fairly and honourably with Spiritualfour letters written by individuals of strongly marked and um. Hardly a mouth posses but that it contains articles or notes relating to the subjects with which we are specially concerned. In requested him to watch the medial impressions to which they gave | last week's "Leaury" we gave in extenso an article taken from this magazine which could not fail to commend itself to our readers,

and this by no mount exhausted the extracts we felt tempted to make. Editorially, the subject is treated on its merits. For example, in the August number occurs this passage in a review of Laung s "Modern Science and Modern Thought," a book the object of which, in its own words, as "to give a clear and concine view of the principal results of modern statutes and of the revolution which they have effected in modern thought." The author deals incidentally with Spiritualism, and his estimate of it "as another widespread modern deleaten," the Journal of Science regards as " searcely in learmony with the facts of the cont." We now quote the Journal .-

" He Mr. Laing) writes: "In vain median after median is detected, and the machinery by which ghosts are manufactured expaint in painter counts, at the international country has no like so read approaches the point of the contracts to Make he and the world was in the contract of the wheels and here is precisely the difficulty. Manker or and to one on a never so far as we are aware, succeeded in producing under fair test coditions even the simpler forms of 'psychography.' They have accur-though the attention of one of them was especially called to the case-fixed on the wrist of a man an iron ring. Ike that of \ link, too parrow to be passed over the hand. The author we maries on drawns, sompanobelism, and memocrism, however, are worth attention."

In the mose number appeared the first portion of the article we reprinted last week. Curiously enough it was followed by one entitled "Ignoramus of Ignorabimus," intended, we should think, as a kind of apology for the protectioned views expressed in "The Relations between Spiritualism and Science." Rore the are some of the most portment paragraphs :-

"We see that, if any of our present somes were wanting, entire salegories of physosoena would escape us, and that onlire branches al acience as we have them could never have arisen

Such being manifestly the case, is it not justificate to comme that, had we mere assess, incre gateways of knowledge, we should become cognition to determine the same of the same of phonomers which have now forms had at a same of the sam mently our present views.

seems, we must admit that our present insight into nature is most a mossage covering the whole surface of a slate, under the fragmentary. We see like men nating appearant lendscape following conditions: Two slates shaded by humself and fragmentary. We are like men gazing apon a poctarnal landscape upon which full five narrow beares of light from the windows of a nastle, barring broad regions between thom unliluminated. What these dark spaces may contain it is impossible for them to may, of the upper slate. The sound of writing was inpared within the best they will be presented to a state of the state of the contains the state of the state of the contains the state of the they see all which does exist, and that whatever they fail to see is empendible.' Yet this is exactly the position which were of great reputation have not unfrequently taken. Hence true men of exicutes, fully allre to the responsibilities of their position, are now very relucioni to prenonne on "impossibilities."

"These considerations show as how very imperfect and fragmentary is the primary material upon which science has to work Entire enterpries of phenomena escape us. What would be the had before them the complete taxt, and proceeded to expound it accordingly? Misinterpretation, surely, of the wildow character would result. Yet the position of us interpreters of nature is but too epocay analogous. With no few and as we as e untraffed to many, animerical, senses, much fails to reach set understanding Much Pose my in some directions the most important part Surely there are we should take good beed not a talk of in prescription. Remembering that we see only in part, we should and he hardy in rejecting any new light which is offered for our SOURS SANGE

The drift of this is obvious, and we hall with joy the undogmatic attitude here adopted. A fair field and no favour is all that Speritualists sak ; here we shall probably get it.

make the areas of these pater to the correction between note facts as these worth a the faith-healers and those we ried of framy prophets and stants. But partiagn appropriate and a mental terms against themselves. It specialises.

# MATTER AND FORCE.

former affirming that all the phenomena in the universe consist of various aspects and attributes of matter and force, despised phenomena of Modern Spiritualism, which science and the latter that be not nature there is an infinite at present tabous as unworthy of examination, are breaking, power that makes for rightcosaness."

form, even in the form of a future existence for mankind, and specially in the form of a supreme, infinite, and absolutely assessment Ruler of the physical universe, and its innumerable and infinitely varied inhabitants.

In the apinion of Monista, who for the most part are appendative physical scientists, there is no God, and no nascasty for one; no spiritual man, and no future state of commons exister co for man in any form.

The Dual sts, on the other hand a se specially those who have adopted what are termed modern spiritual theories, recognise a Suprema Ruler to whom all nature is subservicut, and they further recognize the existence of maumerable commonwealths of spiritual beings, who have been born upon, and passed their preliminary stages on the myriad worlds of tine infinite Comes.

Mometa accept the theory that matter and force have all the powers and potenties with which we are familiar, and, besides that all the powers and potencies of the universe, of the everwhelming majority of which, the wisest men on earth know absolutely nothing.

Monista further affirm that matter is it finite, etomal. and indestructible, that it always has been and always will los; that its quantity will never vary an atom in weight or physical potency, although they can scarcely affirm that it will not vary in sutellectual potency, and what may be termed its vital power has vastly increased since the earth was a molton mam, although Monute may amert, that the force which was exhibited in heat in the molten earth, is only now being exhibited in another aspect as vital and intellootual force, and that all vitality and all mentality are merely peculiar elicinical or other physical actions. To believe this, they must believe that all vital action and mental manifestation lay potentially in the earth's primordial firemists, and further, that it must have been there eternally

Dualists or Spiritualists, on the other hand, as a body, refroin from the expression of opinions as to the eternity and essential potencies of matter, and recognise the existence of a Supreme Spiritual Power, and spiritual intelligences, who do not come within the range of those conditions to which all matter appears to be subject.

Mometa believe in a material universe, and that only Dualists defend the theory of a dual universe, the two parts | within easy reach by rail.

of which are intimately related to each other, but the laws governing one, although related to, are not analogous to those governing the other.

From the times of Lucrotius, Lucippus, Democratus, Epicurus, Anaxagoras, Aristotle, Socrates, Plato, Descartes, Leibnitz, Newton, Holback, Diderot, and more modern writers and thinkers, the contest between Monists and Dualists has proceeded, and now proceeds with increating vigour, since both sides admit that motion is a A reduction made for a series of merriss and made and the reduction of the

Rest, says Meyer, does not exist. "It is an exquisite dream, a phantom of hope which the world knows not. which is without an instance in Nature. Nature shelf knows no death, but only change; no destruction, but only the passing over into other forms of motion, it is an aternally raging, whirling sea of motion and of change."

Modern Spiritual phenomena have not reached us a day too soon. The intellectual world is drifting into a cheerless. and penamutic Monain, which allows us life without a sentient future, a high intellectual and moral New, to end in blank negation. The theologians of the world are power-Momets and Dualists are now in deadly conflict, the less to meet the needs of the profoundest theorisers. The analogies of nature steelf are far from clear, and the and will continue to break, the links that are fast binding The Montete are to a man against Spiritualism in any the learned world in what appear to be adamenting chains of materialistic faluties.

## SPIRIFISM

September 12, 1885.]

By EDUARD YOU HARTMANN. (Continued from p. 443.)

TIT

THE IDEALITY OF THE MAXIFESTATIONS (Der Varstellungenskalt der Kundydningen).

Having in the previous section discussed the phenomena, which more or less serve as the expression of an ideal content, or under favourable excountances are applicable to the communication of it, we have now to examine the ideal those supporting the sommambule consciousness is easy, content itself, which is communicated to us in these unusual ways. Already in dealing with the involuntary movements, nambular consciousness writes words and sentences, answers of speaking writing do, we saw that the guiding intelligence is to be sought in the sommambulic consciousness of the medium, but as the handwriting remains the same, whether the peacil is guided by involuntary muscular movements of the hand itself, or by the mediamistic nerve force through a system of dynamical push and pull lines, so the content of the writing remains in both cases the same. We have, therefore, no reason whatever to doubt that the mane parts of the brain which give the innervation-impulse the involuntary muscular provoments, serve also for the support of the semmanbule countrousnam.

The ideality of the manufestations of a "speakingmedium" coincides with the temporary ideality of the sor nambulic consciousness, for a speaking medium is only an hato-sommamous with the peculiar y of spontaneously anparting his occasional ideas connectedly. The ideality of a writing-medium is however, not essentially different from dependent of the mode of writing, whether by rapping out the alphabet, or by pointing out letters, or by involuntary bandwrating, or by writing at a distance. Whoseof the or annamed third porson, makes no difference in this conception, for we know that in the somnambulic comphenomenon of quite common occurrence.

Since the medium is either without waking comerousness, or if in masked somnambeliam his percenting waking consciousness has ordinarily no knowledge of what passes be unaware that it is himself-his pomnambula conscious ness who has in humself, and opects from himself, this ideal consciousness is councious, may, however, be afforded by none of the party knew the contents."

tilly, as is the content of the medium's somnambule con- belong as little as possible to the waking consciousness of smoumers. There is no longer much dispute about that

person of the medium. It is thus really the ignorance or inaufficient knowledge of somnambulian which causes Spiritists to misapprehend the obvious exclusive origin of the communications.

The marked sommambalic consciousness compasses the simultaneously existing waking omisciousness, without being itself compassed by the latter, as the waking consciousness of the past is fathorned by the consciousness of open summambulism, but not the converse. In other words the conduction of ideas and wishes from the parts of the beals supporting the waking consciousness into out the reverse is difficult. Therefore it is, that the soil, questions, and takes account of withes, dictated and proposed by the waking consciousness, other before the coloprenorment of the masked communbulism or during its continuance. On the other hand, however, the sommanon a consciousness is also able to answer each questions and to here such wis sea as have second a sown to it (a.g., by thought reading, though not to the waking consciousness

The content of the sommanbule conneconsness is distinguished from that of waking consciousness partly by its for the radiation and distribution of the nerve force, as for form, partly by its derivation. The form is generally more perceptional (assekauhehen) of greater sensuous palpability neares to symbo song and personallogations, but is thus entity confused, obscure, and anigmatical in comparison with the abstract reflections of waking consciousness. The derivation is partly the simultaneous waking consciousness, partly the hyperesthetic memory of the parts of the brain supporting somnanibulism, partly direct Thought transference, and finally, in part, true charvoyance. Whothat of a speaking-medium, and that of the former is in over rightly knows the range of those different sources will scarcely be tempted to look beyond them for explanation of the ideal content of the mediumette munifestations. But unfortunately the facts of the hypermathesia of memory, medium speaks with changed voice, writes with changed transference of conscious and unconscious impressions, and handwriting, or speaks or writes in the character of a named churvoyance are, to the great majority of Spirituits, as unknown as to their opponents. So far, however, as they are known, they are deliberately threat saids and underscionances a conversion of the Ego anto another person is a estimated, because they threaten destruction to the wishes of the heart.

Hypermthetic memory of the somunitability consciousness yields often the most astonishing material, the dorivation of which seems wholly mexpucable, because the in the sommambalic cornectourness, the medium also must simultaneous waking consciousness of the medium has not only no momory of this material, but often fallaciously believes stacif able to conclude from accessory or cumstances content, i.e., he writes in his waking especity uncon- that such impressions could never have been experienced serously. The experimental proof that this writing is only by it. As the sommambulic speaking is able to repeat the relatively unconscious, but for the masked somnambular sound of words or sentences in foreign, not understood, languages, which have been heard long ago without attenthe medium placing himself in open somnambulism, and tion, so can the somnambulic writing repeat the written or then remembering the former unconscious writing and printed characters of words and sentences. In languages not giving an account of it by word of mouth. This happened understood, which have been once regardlessly seen, or with Stade, for example, according to Zöllner's report, in oven spell such out from unintelligent memory of wordrespect of a writing at a distance effected in a closed slate sounds in languages not quite unknown. If, besides, in the previous day, which had not yet been opened, so that such proceeding the symbolising and personifying tendency of the semnambulic consciousness induces it to put these The writing or other mechanical means can give infor- communications in the month of an absent person, its matten of everything comprehended in the mediam's dramatic metamorphosising talent must at the same sommanbulic consciousness, but of nothing which this does time, succeed in dressing out the communication not fathom. The electty of the manifestations is just so with all sorts of small external traits appropriate instructed or ignorant, cultured or uncultured, serious or to the person represented. In this way communications can sportive, thoughtful or foolish, witty or duli, intellectual or be brought about, which in form and content appear to

terotumens. There is no longer much dispute about that, but there are still individuals who are unable to keep distinguished the nonnembulic and waking contents of the articles of another of the medium's consciousness, and refer the deviations of the medium's consciousness, and refer the deviations of the former from the latter to a source upart from the entire always by his holders on the instance which are presentation, as former from the latter to a source upart from the entire always by his holders on the instance of the presentation of the second state of the former from the latter to a source upart from the entire always by his holders on the instance of the presentation and the presentation and the former from the latter to a source upart from the entire always by his holders on the instance of the presentation and the presentation of the former from the latter to a source upart from the entire always by his holders on the instance of the presentation and the presentation of the present t

roller many viction to the storesch one Kn adjetning getter somnamby and genele), and from the latter afterwards first recognized by the waking consciousness. We restrict carnelyes rather to the cases in which such sort of mediation is undoubtedly excluded by the experimental arrangements. We have, then, to duringulah (1) willed perception with willed in to implant . (3) not willed percention with wid to implant . (4) not willed perception without will in the other to implant. The will to implant on the side of the person tennemitting I and the will to apprehend on that of the recipions, are powerful furthammen to thought-transference and, rudged, the will to implant seems to have on incomperceive: a power so great, that with persons in sympathetic rapport through love, friendship, or magnetic relations, it others' thoughts can also act favourably, but not in the some degree as the will to implant, because perception by the weeking the communities in generally impossible, and the communicately subject to the possecious will, more operative than the latter is the ardent it imparts theif to and intensities the somnambuke will

The will to implant operator likewise, at least in proxihing, only through an excitation of the somnambulic parts of the bream , but this not ye, and in few seconds concentrated, excitation is more early dies too than is the powers to perception, since to a brief persipient excitation there may be no servesponding energetic thought whatever in the other. The will to pupling may also be on unconrespont and the strength of the sympathetic rapport mutake ! between the two. The result seems easier, when the receptent is an dreaming or half-awake condition, in one, could transferable appear to be feelings, dispositions, and that is, in which the waking consciousness is more or less distinct sensations of the lower sense organs. Transference anppressed.

Success seems most sure when two persons agree upon a definite minute in which to direct their thoughts upon each other, both placing themselves in open or masked somnambulism, the stronger willing of the two undertaking the netive, the more sensitive the possive part. If two

at down and thereupon impacts the answer

made to questions without previous knowledge by the the adoption of the latter view, wasing consciousest, But it can also be inferred with a proximet series a y from the fact a at second other the open or masked thoughts of those present, for it is his frequently give information concerning the past of the interest to educe amonishing manifestations, and nothing questioner, contradicting the present recollections of his can be more astonishing for "sound common-sense was ng consciousness, that the statement is nevertheless ("generales Menacles versiond") than exhibitions of a person of and that educa his momery, sharpened by more know edge which the persons present behere to be confined e-remnatantial additions, at once recognises his own error exe us valy to themselves, or which is even withdrawn or bong subsequently seculentally led into the right track from their own waking contenuation. The will to perceive confirms the sommanbule's assertion. I Such cases are must therefore be supposed continually present in the usually treatistione a recyance, but it seems more propagate meature. But if the others, on their side bicourse, have that there is a masked sommanbulic aremory in the a reely interest in the occurrence of striking phonomens, questioner, which, exerted by the question, by means of that must develope in them the will to appear the medican its hypersetties a seal set truer rece ections than the according to their own powers, and to lighten his difficulties. dudar memory of waking consecousnesss. Further, some And then the unconsecous will be excited to thoughtone present, whose interest is excised to a part on ar transference. Moreover in circles the hands are in contact, direction, may have in his masker, wannamount conscious see that all conditions are as favourable as possible for nots recollections of formerly heard or sees sentences in thought-transference. And when the other person is a foreign languages, these impressions may, by the medium, massed somnarabile like Zöllner, it is scarcely still. be divined by thought-reading and be involuntarily written surprising that results at such sittings should exceed the (or rapped out), without the waking consciousness of the average. other recognising the result thus presented to him as his pwh recollections.

persons, in whom the masked semmambulic consciousness children game of oracular questioning, and systematic lying below the threshold has a certain vivacity, nothing is experimentation must take its plant. These trials must opposed to the presumption that the phenomenon is question at first relate to impressions of single senses, and gradually only occurs in sommambules in connection with such persons rise to more abstract representations; the distance of the having marked sommorbu to consciousness.

Given the case of the som: ambulic and waking consciousof different characters to the sommambule, according to the (mile-wide) distances, a second medium must be introforegoing it is not surprising that the saors hallucinatory impression of the sommumbulic consciousness is easier porcoived than the more electract thoughts of the waking distance, the medium having always been the only active consciousness, so that under these suppositions the phenomenon also is explained without clairvoyance.

Slade, for example, saw the figures which were on the three come contained in the pleatered-up occes, and Zöllner

had put the coins in the boxes a long time previously, and no Yot more surprising are the results if recourse be had to longer exactly remembered of what description they were \$\frac{\pi}{2}\$ the table, for rapping, or to the psychograph, requiring, it Just in this case it seems to me doubtless, though subsequent is true, longer practice than the div." ng red. Involuntary | confirmation by correction of Zöllner's memory is wanting. writing with the manti leaves too much room for interchange that there was here no clairvoyance, but thought-reading of with vocuntury with no one for the suspicion of a tentional commandatic impressions. For that Zöllner was a marked decention, for it to be suitable for demonstrative experi somnambale, who, without knowing it, co-operated with ments; but In the writing at a distance of medium, Slade, is highly probable from the whole character of the excluding the change into voluntary writing, there is the phenomena manifested in those sittings, and just as purest possible experimental material, which then, as probable soit that Zother, in putting up the coins, had acmild a re expression of are masked sommanbule con-curately cheered them. These two suppositions suffice, sciousness, affords also, in fact, the most autorishing proofs however, for the data, first, that Zollney's sommanbulge of thought roads g. If, for instance, questions are written memory had taken in the numbers of the command according in a closewhile state, on the second runer side of which the that with the tension of mental occupation with the object. nediam then writes at a distance the answers (Ps. St. IV the hyperesthetic summanibulic memory realised these 388, XI, 497), t no explanation more readily suggests steed numbers, while the memory of the waking consciousness I am that the someonibu a consciousness of the medium underwoured in vain to recall even the descriptions of the perceives the question from the thought of the person writing ones. Under such electrostances, Slade's communicality consciousness could perceive the numbers by thought-Thought-reading in yet more involved and removed from transference, and all that is striking in the case is that this detection, in that not only thoughts of the waking conscious perception was no Bredy as to pass as visionary sight into ness, but even those of the masked seminants is the waking consciousness and into expression there, unless sonscionspose of the persons present, can make entry to of the opinion is preferred, that at that moment Slade's waking the sommanhalic consequences of the medium. This could consciousness had sunk below the threshold, and the most only be completely proved by experimenting with two f ambulic had possessed itself of the organs of speech. State medium, one to guess the naswers which the other had being also a speaking medium, there is nothing to prevent

(September 19, 1882)

A modum has always a lively interest in divining

For experiments in intentional thought-transference, there can be no subjects better adapted than mediums As these restances are not namerous, and as on the with the faculty of writing at a distance, only there must other hand there are a not inconsiderable percentage of be an end to minusing the medium a nerve force by the transferor from the medium must also be gradually increased, and the percentage of successor as depending nesses of the questioner presenting their respective impressions on distance be ascertained. For the effects at greater duced, and the influence of distance, if any, and of what kind, must be determined. Hitherto spiritistic sittings afford no material for thought-transference at great party instead of being reduced, as in such experiments as necessary to a passive relation to another medium at a distant place.

SOME ODD " FADS" AND FANCIES: THEIR the devices, and the uncertain theologies of men-will, with one accord, and with singleness of heart and purity of purpose, worship the Great and Supreme Intelligence beneath the starry dome of millions of suns and systems, mingling their songs with the music of the spheros, in one grand harmonious chorus.--

> " For ever singing, as they asine, " The hand that makes no is Divine."

A German mineralogist, by means of the davining red, spirit-life are mushle to produce! Genius is but another discovered many very valuable mines, thus proving its use in a practical and commorcial sense. Nor has it been with out advantage in furthering the ends of justice. A man and science and of literature have ever felt these inspirutional his wife, for the sake of their money, had been murdered in a cellar, A man named Jacques Aymar, a wealthy peasant, and a sensitive, was taken to this spot. Guided by the red, he followed the track of the murderers into hotels, told the glasses from which they had drank, teacked them by land and over rivers; recognised the bods upon which they had slept, the very pots they had touched, tall he was conducted, by this hazel fork, to the gates of a prison, where he felt sure one or more of the wrotches would he found. Four male prisoners were placed before hun, when the red turned violently towards a man with a hump-back, who had been admitted, only half-an-hour before, for some petty largeny. The peasant said the man with the hamp was one of the namedna. The fellow at first denied it, but at length confessed, and he correborated, in every particular, the truth of the truck taken by the sonsitive over forty-five Prench leagues. This case is remarkable, and is well authenticated. From these examples, it is highly probable when veins of motal break, and goologists and minoralogues are at a loss to point out the corresponding soom, if a sensitive were called in, be might be able to indicate where the broken wein begins. In these cases, sensitives, cataleptics, lunatics of a certain order, and sommanhulists may, some time, be quite in request for commercial purposes; and instead of being a burden, might really preve benefactors to their several localities, doing, in fact, what selence had failed to accomplish. The discovery of OD, seems quite adequate to explain the phenomena of which the hazel-fork is the outward symbol. It is something more than a more sort of hooms-posses, or legordomain, to satisfy the vulgar mind, which is never contented unless a veritable some thing impanges upon the senses, and sooms adequate, in their eyes, to account for the effects observed. The openion of Dr. Horbert Mayo, Tardy do Montravel, Ritter, Thousand and others, is " that there is strong avidence to show that, in competent and honest hands, the divining And the great want of the age is a universe kend of red really does what is pretended of it"; i.e., in the hands of sensitives whose Odic force seems naturally to linve some kind of occult relationship with lodes of metals, scams of coal, and the flowing of unbterraneous water (To be continued.)

A MATERIALISATION SEANCE with the medium Mott, Kansus City, is reported by T J. Haughey, in the Sprifted Offering. # MISS ELIZABETH STUART PHELPS

# SOCIETY FOR PSYCHICAL RESEARCH By "M. A. (Oxox)"

The current number of the North American Review contains an article by Miss E. S. Phelps on "The Great, Psychical Opportunity," which she " is tempted to call the Opportunity of the Century." Giving a substantial approvid to the principles on which the Society was founded he England, and subsequently in America, Mass Pholos wante to know what is being done. Darwin, we are res unded, " was twenty-two years in collecting and control. send."

the material for 'The Origin of Species' and 'The Descent of Man.' He had in the laghest degree the two things necessary to the discovery of a great propower to attend, and the power to infer. We might add people, quite as capable of judging evidence as there were, a third, the power to imagine. He observed and recorded is no other man of our day has done his power of inferexce proved equal to his observing and recording power; " Ine pretence, who believe that the so-called dead have and as a result we have the dectrine of evolution.

methods, Miss Pitelps recognises, "with a keen some of their wisdam," the appeal of the officers of the Society ranks, but is countantly receiving accession from those who for Psychocal Research to the public for co-operation in have examined for themselves, and find the Sputtualistic collecting and investigating allaged facts that he hid in the hypothesis the only due as a covere the facts a special f recesses of human experience. It is "to the help of the the opposition with which actoneo meets i are I may substruct that the lourned have appealed." " Do we succe tay, in spite of the tentative and often passive efforts which or smile? If we are wise we shall do neither. These tomo notable sessatific for have made from time to take to se a knew what they are about, and why they are about explain, or to explain away, that which they have not first it . . . The greater the weight the more the strends taken the paint to understand. in the cable that housts it. Nothing is too small for as I agree with Miss Pholps in her desire for Darw nonhugo a work as that which would lift the load of mystery, patience, as I also do when she defines the scientific basis obler than the Witch of Ender, terrified at her trick of thought and action as requiring two paramount quali-[where does the "trick " come in, Mun Phelps I] which fications-"equipment and candour the presence of had summoned what we should now find it faumonable to equivalent ability and the absence of nullifying precall a "telepathic impression"-a load as new as the last judice." We Spiritualists have lad too much reason poor creature, in fresh mourning, paying two-dollars a sitting to complain that adequate intellectual equipment in our to a fifth story medium, to get 'communications' from her critics has not always co-existed with adequate patience in shoul child. He who means to win in a charge on this the study of our facts; nor have these qualifications been mountain of mystery and misery can condescend must always illuminated by that candons and imparticulty which condescend to the infinite drudgery of discovery."

and cautious tone. The work as enormous, surrounded the laboratory and the library is quite as rebust as the with difficulties, environed with prejudice on every side, bugotry of the alter and the creed. . . We hear a The records available are in some cases emotionally reinted, great deal about the value of scientific evidence. We have and of no value as exact narratives. And even those which a ngo' to ask a great deal from the scientific attitude. do reinte, with some approach to scientific accuracy, facts
that are really important, are not in themselves such as

the Society has hitherto decried most sortable for 15 purposes. Most Pholys makes some calculations as to the contract of the contra "Here, let us my, to take the most modest figures, are two willions of our people, intolligent enough to conduct the affairs, and obey the laws, and bear the responsibilities of average civilised assisty" who testify respecting these facts. "Hinnereds of people," she says in another place, whose word of honour is as good incellectual coin as that have testified to the conveyance of thought, without visible, of and sie, or tangible media, from embodied mind to embedded mused; to the tragic or trivial incidents of mesurerum, to the enteridence of dreams; to the prophecy of mental convictions, to the visual appearance of the distant living , to the right or sign of what is thought to be the more distant dead." "Bay what we may (and we ought to may it) of the nonsense, of the fund, of the agglery, the hysteria, the blasphony mixed to a maid with the whole matter, the eignificant fact remains that here is a whole class, not of the lowest or most illiterate, while not yet, to any marked extent, of the wheet or highest, who believe thouselves, in our highly illuminated times, to have found some means of nocess to the consulonment of the

Or, perhaps with a passing word of warming not to be maty in owner - fraud and hysteria too conventently, it a would be better to may that there is a compact inher of with level heads and clear ininds, and with a block of experience to reason from to which these critics can make syst matically communicated with them. To this it may Desiderating the employment of the same patient pertinent vite a nest that this compact body of thusbing and a soring people is not troubled with deserters from its

in hong "willing to see a thing turn out either way." We to in idea which it is to the last degree desirable to avoid, are not one to four from candid, imparted, and exhaustive as a gram on, my a from inadequate theorising for ( which the time has not yet come,

"It is not time yot" (says Mass Phelps) "for any weeking hypothesis.' It is ten early to have assurances to me too general or another cannot be. We shall never best have the truth by inventing ft, but by discovering ft charges which here been or aght against a carried be empty. . . I say, without hesitation, that no investigator is qualified to pass judgment on psychient phonomena who in not equally ready to admit-if admit he must-in the and that he is dealing with the physiological action of cells. in the frontal loves of the brain, or with the presence of a busing soul dismuladied by death."

Loudnally Miss Pholps comes to apply her general state ments to a critical examination of the methods of the English Society for Psychical Research. The passage formulates what, it must be admitted, is in the mouths of men expressed even more imputiontly

"In the work of the Eighth Society, a close observer may already detect the danger of a mistake in the precise direction where the Society most depresains mutakes in its conflators. It seems to us that a hypothesis is put to very hard may, if not to work, in the bamb of the commetters most interested in the telepateic theory that the telepathic theory might explain an immerie to portion (I do not my all) of what are called the super natural facts of Spiritualism, whether it does so we have not yet 'necomplated and reflected' arough to may "

That is temperately put, and true as far as it goes. We e amot any yet how far exactly the hypothesis will reach, Im we can say that it does not reach so far as it is sought to stretch it. And, while amountantimly agreeing, as I do. in the methods of the Society for Psychical Research, it is upon to me to say that it summs both illegical and wasteful of effort and of time to permit in applying a hypothesis to facts which it namittedly will not wholly cover. It is not necessary to urge the adaption of the Spiritualistic by nothests, though it claims by right a hospitable reception but it is open to us to point out that it is no new thing in the world, that it does cover all the ground, and that it ahourd not be evaded through antagonistic prepossession, an attitude which I am thankful to find that some of the leaders of action in the Society for Psychical Research categorically disnyow Such distinct dunyowal as Mr. F. W H. Myers, for instance, has more than once given in most unequivocal terms must be accepted an animo if any friendly or courteous controversy u to be maintained. I fear, however, from a perusal of the open letter of Mr Farmer in last week's "Light," that there is in some quarters, which I do not seek to define, a feeling wards Spiritualists, as a matter of ordinary self-respect, must resent and disavow as noworthy and even moulting

It will be very necessary to clear the air of these thunder-clouds before any candid and impartial investiga- unscientific to start a theory based upon a few out of a certain

Want should at be? That which George Eliot would call too of subjects about which Spiritualists certainly know one of 'massive receptiveness.' What must it be! That more than most people, can be hoped for. I have not diswhich will stand the test of its own primer and grammar, serned for myself all that antagonium to Spatiumliam which . . . An unperceptible jar of human prejudice may spot. I know many between to exist on the part of the chief the finest web of attention and inference that over the leaders of thought and action in the Society for Psychical animal mind has wrought. . . . What is it, indeed, Research. I have had much sympathy with the course of to be caudid but to be unliney to see a thing turn out either action pursued, though I have thought it slow sometimes. I rong? What is the secentific spirit but the honest spirit? have, indeed, regretted that facts lying at our thresholds should seem to be neglected, while the Society went for That seems to me to be a much-needed protest on behalf afield only to return empty. I have seen difficulties in of an elementary qualification for dealing with these the way of investigating Spiritualistic phenomena by commysteries, which may be commended alike to the high muttees, and also of the afting of evidence in the way that priests of exact science, to the Paychical Researchers, and the Society has hitherto employed. I was quite content to to the Spectanlists, which latter body, having what they wast, but I am compelled to say, with pain and deep regret, confidently believe to be truth on their side, can, while that this unfortunate letter of Mr. Farmer's correspondent be many may candour to their critics, offerd to exercise with the most unfortunate language, comes just at a time n est in same of the same virtue which consists when it will give colour in the minds of susceptible people

[Septomber 26, 168.

# "PSYCHICAL RESEARCH"

The mothed of investigation pursued by the baders of the Scenety for Psychical Research has before now called forth protests from Spiritudists and others, both optside the the women to but it is pretty oralent that the much longer, and that they will have to be my an areas of fairly. The most recent adverse exiticion from a member of the Society in that of Mr G. D. Haughton, which appears in the August numbered the Journal, and to which additional interest will arrack through the strikingly inadequate reply of Mr. Producio W. H. Myon.

No one will deny that the Society has done some very metal and important work, and that to some extent it has been clearing the ground. It stands soldway between the Spiritualists and the outer world, or profession endows, It is able, no doubt, to constant a certain amount of attention from mon who require,

regard to occult matters, to be treated gontly and tendorly, and r whom the phenomena and teachings of Spiritualism proper are what Chemistry or Greek would be to a boor, It has collected a number of facts-most of them, it is true, of accordary value, and has appointed various committees for " investigation," and even for experiment, which, by the way, appear to be chiefly remarkable for the non-protentation of reports—but for all that, the criticions which have been made are nother upcalled for or unjust, and no embiased person who has studied the Society a Journal and its general method of procedure will be disposed to think that Mr. Haughton exeggerates when he says that the members have become wearied by " negative and abor tive results," and that the energy of the Society has been one directed by the digging up of " shodowy renumerences of what occurred many years ago," when there are plenty of at- ar shonomena occurring at the present time to be inquired at-

It would probably not be mapt to compare the Somety's method of study and of collecting facts to those adopted by the older and less scientific of the Alchemests, though the word merhod" is, perhaps, hardly an appropriate one, for there is but little, if any, method in either case worthy of the name "scientific." The most serious and dangerous error of which those who are responsible for the Society's guidance have been guilty, is the invention of theories. Theorising from insulicient data is the curse of every ecience. The making of a certain class of theor ea in far more easy that the making of experiments and the planning of savestigations, and the theory-tooker accordingly crops up in every direction. He finds, or it may be invente, a big word or plarase wherewith to label his theory, and in nine cases out of tan becomes so firmly woulded to it that he will strutch it to the utmost limits that his mind out give to it, which is saying a good deal , and that he will ignore generally unconsciously--any facts, however important, which militate against it. To this highly valuable class of hypothetical producsons, the Society seems to attach the very greatest importance. "Teleputhy" and the "unconscious secondary self" are both before an admiring world, the accord, however, being merely a new label for Dr. Carpenter's threadbure "unconscious cerebration" theory, with which that great man for ever settled all the thenomena of Smritualism.

It must be admitted that it is in the leghest degree

altogother subvert the theory, and to proceed as if they had no intuitity which are the first necessities for the man who would eratence. There is a distinct petetes principle in the manner in such and to with true which the word telepathy has been used it the endeavour to secrent for such phenomena as the "douth wrath," as well as in many other maiances , and sa to the "unconstants ascendary self" it is pretty generally known that that most monstrous hypothesis was revived and republished in the face of large pumbers of phenomena in themselves sufficient to render the theory untenable, and alleged by the most competent of witnesses to be true. Did the resuscriators of "ancouscious combination." pause and proceed to investigate those phonomera, which, it was admitted, if they existed, were sufficient to modify are exthesis to a si The homeway published straight army to remote and a tear artist may do a to future investigation and one t a see any which car but he considered as other than an existing assent to

However, with the close of the paraxyon, though a little delectors, intellectoral expedd tital returned to her. Mile sometimes called for pen, ink, and paper and set to work writing secred venes and hymns, not without feligicy and policy, such as she would by no means have been ableto compose a her usual condition. Some imps, to the general Ampsoment, she would extemporise a sermen, very elequent, either in har native tengine or in other languages which before had been unknown to her. Hebrew Greek, Latin, French, and which, after the percuryant, the know no longer,"

Marguerito il., gioren years of age, of disposition a little violent, but having pions and Christian sentiments, was seizes on the 19th of January, 1820, without primes mines are ganyubiles attacks, which lasted for a couple of years, with on a few, and those short or maps as as one service faster are too true maps one more, we may be the more may a more than the part one here arms through all sorts of and astic inevenients. On the " st a vace was heard several times by toose around her, which earl, "You are being prayed for Industrially she came to herself, weary exhausted, knowing bothing of what had happened, saying only that she had been dremning. On the 22nd another low voice, quite elistract from the first, began to be heard also. This voice spake almost without eccention as long as the crists lasted thalf-as hour Specialed Offerroy. to an lour or more), being occasionally interrupted by the first, w arth always repeated 'You are being prayes for.' The voice asidatly a taked to be taken for turn at a personality other than an element of the larges are a self-or any are to self-or any and to seek give a specie of the source than a self-or any are the source than the source of the source than the source of the of alone, togeth method of replying to all uncelious, even a tone of succeed in referring doing.

that he asting assume mark of these discontines was their moral. or wither immoral, tone. They expressed pride, arrogance, millery harred against God, Christ, and Truth. "I am the San of God, the Saviour of the world bow down and worship Me," were the first words, often repeated spoken by the voice. Then followed jests on holy things, Cod, Christ, the Bible, violent indignation fury, a mge altogether indescribable, apon seeing anyone praying, or even chaping the bands. All this might have been considered as point no one externa influence, if the voice had not of itself services the original to be any constraint of the most the transnotice it one must read in the Messiah the description of the devil the account of the Tomas of the Country Age, September, 1885.

On January 28th, at 11 a.m., the very boar, so she said, in which an angel had announced to her that her deliverance would come, "all these phenomena ceased. The last thing heard was a voice

On January Met, the same condition reproduced itself with the or the character of discourse. Each represented the voice of a tibelinet person, and was announced to such to the potiont by the first voice, so often bennil. The violence of wrath, the cames, thurphenies, and represches of these volces reached the highest witch in this stage of the disease ; and the lack intervals, is which, by the way, the girl preserved no recollection of what had passed in the paroxysio, but used to read and pury fervently, were abortor and more rare. The 0th of February, which again had been as nounced to her as the day of her deliverance, put un end to this mirerable condition. As before, it was at 11 a.m., after the voice had repeatedly announced its departure, that the following words were heard proceeding from the mouth of the patient. " Begone, unclean spirit; leave the child; thy kingdom is at an end for even." The girl then came to herself and has since had no relapse. (Kerner, Geschichten, Bereneuer. Stuttgard, 2834.)

## A Plea-To the Edstor of " Lanur."

Sir. Now that Source his arm or gaze upon imigs psychical, so long left by her unexamined, and has a conregard them if only through a reversed telescope, it may be not suffitting to utter a special word of protest

The investigation ought not to be accompanied by viviseeraces of the minimum that historical

It is one which, being undertaken, pro-contnently requires to be conducted with humanity The victims, when there are any, our weaker brothren,

species of the transfer of the second terms. rich and the second of the second and a second state of the second to the second to the not the beautiful to could be the total to when The sales show on a sware of what has a col a star same. He should be treated as the subject of a lithetrity once was, whose feelings of property and of rankly were equally gratified by the present of a protty glass marble, while the extracted phosphatic debre, perhaps representative of lexis waite, was finally thrown away, and only referred to in dry analytical tables.

A properly advented Spiritualist or Occultust, of course, can front every investigation with fearless confidence. It is mausme onough to witness an encounter between the procluded argulated and a Sparitualist of the first water. Your is it to try to cut a diamond with stool, to preven anal-proof with a barbor's infinitely just and amoning that was "

But of there are retailers of experiences who are judpalily deceived (and I confess to have occasion of an it . not among the properly educated), and if the: 4 300 F quite possibly, a medium (all mediums are not Eghntons) who may mingle fraud with his manifestations, it is sufficient for Seignon generally to bear in mind those negative discoveries, and and expecition of the positive. It is not necessary for her to descend from her estate, high above temporalities, to muite or to slay any of the erring fugitive race of mortals.

At least this is the fugitive opinion of, sir, your ebothent

# "A Few Words on Spiritualism," from "Lily." To the Editor of " Light "

Six,-I have been reading with deep interest the admirable letter in your imme of the 12th met., by the author of " Secontific Materialism," entitled "Relations between Sparitualism and Science," and as one whose experience of Spiritualism (for sloven years) has been in the etrictost privacy of private life, poslupe you may consider a few words from me on this subpost not irrelayant

I have always studiously road and pondered over whatever has come in my way-scientific or otherwise-on the "Why and the Wherefore" of Spiritual phonomens, every phase of which, except the parafits moulding, I have witzened over and over again, and almost always in the privacy of my own or a dear from a apartus : 4

But none of the manifold arguments or would be explanations I have read, have ever moved me from the sample, commonsome explanation of the phenomena that I formed after due investigation (and which time and experience have only corred to strengthen to the atterment), viz., that they are the work of human beings, every hit as harnes as we are outselves-like ourselves, men, women, and children—the only difference being that they are freed from the outer garment of fiesh, which we still wear, and which renders us visible to the eye of flesh, or they were, so long so they more of, and which they still are, when circumstances allow of their resuming it temporally for our

Why will mon surround God's choicest gifts-as religion and Sparitanham are-with difficulties, and dogmas, and mysticisms, that do not belong to them, and that only dealer and drown their grand and simple beenty and purity?

For the grandest truths are always the elegrost and simplest, and most emphataeally prove themselves to be such, to all who

will watch their workings with reasoning and patient earnest-

As the whole of rengion is comprised in those few sublime yet simple words, "Love God with all your heart and soul, and your neighbour as yourself," so is the whole subline truth of Spantaslima compensed in equally for and sample words, "God's love to us, in sending His measurgers (our fellow men) nace more to earth, to teach and raise de spiritually, by a close and personal intercourse with us.

Forming to treapass too much on your valuable space. I we confined myself to the barest outline of this most gracious ordinance of the Father, for the splitting of Big being children, for ware I to attempt to therefore, a conences, a large volume would not author

I will, therefore, only say, as the result of those manifold experiences, that if the Spiritual Bourgs who now come to us are not men, wenness and children, on ther are tre, for they are materparts of up in all the casential characteristics of our of new win obstorate such matrices and f. futched arguments in their endeavours to prove the contrary would only sook for themselves the same experiences I have had for many years past (and which all may do) they must most

# SPHARA ALISM IN ACCORD WITH TRUE St. o.No.E.

Spanding is a single matager state to arise some co. but simply to the opinions and projudices of those who from their labours in particular fields of adentific research, have attained recognised positions in scientific men, to which they are no doubt entitled. But a truly scientific man bas no prejudice; he is a philosopher, and nover determines for or against a thing until he has tested it thoroughly, observing a comparing its mainfestations by his highest r son, and t savig his own observations, when practicable, sy the experiments of others in the same field. This we know by experience that the securific men of the day do not do. Breause psychical phonomena enter occasionally anto the domain of physics and produce effects which their provious experience leads them to manne are the necessary result of physical causes, they take up an antagonistic position, deciding upon a priors grounds that the asserted causes of the proposessint are fletstroughed that consequently those who make the assertion are either frueds or fools

There might be some excuse for them in the early years of Modern Spiritualism, when but few of their own class ind turned their attention to the phanomena, and the records of experiment were fragmentary and defective, but case at Newcastle-on Type, where she has lectured to large in the present day, after the recorder experiments of a song and meen claim of compent man of recognised see take already, extenning over three decades, commen my with the go at Lees s, on Soptombor 29th, this being his last meeting in A region channel Prof son Tonert Her and oil is an the present with the well-known to man astronomer Friedrich Zöllner, their position is particularly unphalosophical, and nothing but the fact of popular projudices being in harmony with their own, saves them from appearing ra realous in the eyes of the community

Sir David Browster, whon curtain phenomena facts were forced ion and suc he would give in to my oring but Spiritualism" as a means of accounting for the man And so it is with the majority of our pseudo-scientists of the present day, they have committed thumselves by The interment took place or be (2th an augmentate selection denvine in toto the spectual origin of the phenomena, and are too proud to retreat from their position by the straight road, to find some tortuous side line to get out of it, hence we have the pacamena of thought-reading and clairvey. ance accepted by them under the name of Telepathy, and measurerie-healing accepted by the doctors under the title of "Massage"! We have never seen the position of close of the becture, Specituation with regard to science more tersely put than arilles. It proposes to occupy itself with all questions relating In the following extract from a recent article by Mr. Alfred, to Spiritual science. It defines Spirituan and Spiritualism as Russel Wallaco :--

and comparison of facts in a domain of nature which has been Note (The Rock), Ostend.

intherto little explored, and it is a contradiction in terms to my that such an investigation is opposed to science. Equally abound to the allegation that some of the phenomena of Spiritualizacontradict the laws of nature,' since there is no law of nature yet known to us but may be apparently contravened by the action of atore recipieds, new or forces. Show in six observe facts and record experiments, and then conserve hypotheses which will best explain and on-ordinate the facts, and in as doing they are purssing a truly scientific course."-Slightly abridged from " Markeoper of Light"

# DR. E. VON HARTMANN ON "SPIRITISM."

The translation of this pemphiet, which is now appearing in our columns, will be completed in the issue of "Laure" for October 10th. We shall then be prepared to receive letters discussing and criticining Dr. Hartmann's views. Without in ony way seeking to anticipate the lines of argument likely to be advanced in authining or refuting the position taken by the author of "The Philosophy of the Unconscious" with regard to the parenomena and theories of Spiritualism, it is at least open to us to point out that there are many facts, if not of common, of frequent occurrence, which will have a direct corned on any reply Spariturdade and others may make Additional interest is lent to the publication of this work English reneers by the tack roat live Harrisanna theory has a direct bearing on the "telepaths and " amonuscious secondary nelf" theories recontly put forward by the Society for Paychical Research.

As it will be a clear advantage to have the case presented in a compact and handy form for reference, a small edition of the pamphlet will be much immediately (on or about October 14th) after the completion of the translation in "Limit." Between forty and fifty copies have already been ordered, and those who wish to possess the work in book form will please not delay in making known their with. The price will be three shillings, and we are now open to receive orders for 200 copies.

Mr. W. Entryrox has, we hear, been obtaining very ancousfor results at his nearest since his return to touch.

# CLASS M .- KNOCKINGS HORS DE SEANCE

Upon the evening of September 19th, 1883, Mr and Mrs. Farmer Mr. Eglinton, together with Mesura Louised, Cased, 219 Downing were seated ongaged in convenation, when knick is as a themselves heard, sunctaines apparent y up let the table, and sometimes upon the walls of the non upon the deam, furniture, and on the food, not away the table. My Downers, who was in oil opposite to Mr. Egonton, can apeak a beam in the a apparent voins cohis chair, and to feeling a certain accompanying vibration neter, and raried in their quickness of succession, gradual y forced thousandon upon the attention of all W next process joined, questions were put to the invisible prescues, and it was found that the sounds had special reference to Mr Farmer, but that the nature of the communication to be made was not be be revealed until the next evening. Mr. Farmer was shortly after soited with a strong improsmen as to what would then occur, and having written thu improviou down he enclosed the paper in an envelope, which was immediately scaled and given into the custody of Mr Leonard, signed upon the outside by every person present. In spite of the fact that the communication was only to be suide the next evening, the knockings continued, and surveys were given to some unimportant questions, as well as in number as requested. It may here be mentioned that as soon at the questioning began, nearly all present were more or loss strongly influenced, and the party was adjudged by the protonce itself to be emoptionally mediametic at its constitution.

held at the four corners by Moura. E., C., L., and D. above the controversion of the day. I feel it my duty to bear test many the centre of the table, an full light. Under those circumstances tiny raps, such as might be made by the head of a pin keep silent dotted against the paper, were heard by Mosses. E., L., and C., apparently proceeding from its surface. Next a match was threst through one corner, the match hold m the forgers of Mr E., and the paper thus suspended in full light over the centre of the table. The and D In each of these experiments the raps were given in number as requested. Upon the paper being afterwards held no reunt followed

Some grower having been wought in by way of another experiment. Mr. E. avoid upon these and in this his automated consisten the dale thirdding knockings still cort and He next stood upon a soft cannon doubted set in the bands.

\* A special commonscation was made to Mr. Estrace on the following chap-ton: This old hot cyfer to the impression here spoken of it was so impled, however, that the communication was successful, and would be received as another consummer.—En.

placed on the floor, of Messes, L., C., and D. successively Knockings were heard, apparently from the floor, directly beneath him. To Mr. C. these were accompanied by a vibration [In this column will be given from time to time such accounts full as procuoding from the floor beneath his hands. To Messes. L and D the accompanying vibration accord rather to come Beyond the general classification indicated, no attempt at takelation from above, as if through the compressed cushon. Mr. L. will at present be made ; that work will follow in due course. In further states that at the moment of the sound a tremor was furtherance of this object we shall be pleased to receive from our felt by him, in his own hands, subjective in character, and soon by him in the feet of Mr. E. The tremer was not felt by Mr. E., but was considered by him to be of interest, and to be worth recording. Mr. D. perceived a tremot in Mr. E.'s feet only, not in his own hands. Mr. C. perceived neither. The experiment was varied by Mr E. placing his hands beneath the custom, and Mr C. standing upon it. The sounds, upon this occasion, were not so loud and higher. In all there eases the raps given were in number as requested. Finally Mr D. placed, not his feet, but his hands upon the top of the numbers, and requested raps to be given in number not es asked aloud, but as thoughs of by him. In two cases out of four the answer was correct, and Mr. D. was unabled to recognise a very faint elbration agreers through the cushion.

It has only to be finally said that this account has been written by one of the party, and has been subjected to the arcticum of, and endorsed by, all therein named.

# CLASS F .- APPARITIONS

In John, Lord Campbell's lafe of Erskine (bern January 10th 1750, dies. November 17th, 1823), in his "Lives of the Lotal Chancellors of England" (Murray, 1847), appears an account of a appernatural occurrence, which as part of his own experience, seems to have much impressed the great advocate.

The viceous a round of ghost eteries in a large compact if the leaderboard cordor is whet a count has but Erakino, then an ex-Chanceller, he spoke to follows "I also believe in " second aight," because I have been its subject When I was a very young man, I had been for some time absent from home. On the morning of my arrival on Econburgh, as I was descending the stops of a "close" on coming of fire a bookseller's shop, I nest our old family botter. He worker, The knockings, which in some of a dult thucking clear. I study changed—pate, wan, and shadowy, as a glass. I have unickness of adult thucking clear. I study changed—pate, wan, and shadowy, as a glass. I have unickness of adversaries, arminal a cit boy." I add, "what brings you have?" He replied, "? most your honour, and solicit your interference with my lard to tion of any k 1 the right not be a turned flown min hands, receive a sum due to me, which the stoward, at our last souther news is out pay." Strock by his look and minuter, I bade on for we me to the brokenller's, and into whose shop I stepped took but when I turned round to him he had vanished.

" "I remembered that his wife entried on some little trade at the Old Town , I remembered even the "fat" the occupied, which I had often visited in my boyhood. Having made it out, I found the old woman in widow's mourning. Hor hasband had been dead for some months, and had told her my his deadshed that my father's stoward had wronged him of some money, but that "when Mester Tom returned, he would see her righted This I promised to do, and I shortly after fulfilled my promise. The unpression was indelible; and I am extremely cautious how I deny the possibility of such "supernatured" visitings as those which your grace has just mateuced in your own family

J H Fie vr. he Gorman philosophor, wrote, when in his An experiment was now tried. A square piece of paper was 83rd year. "Notwithstanding my ago, and my exemption from to the great fact of Spiritualism. No one who knows it should

A Tyrnological Season.-At a meeting of the Psychological gical Society of Paris some one spoke of the "Definations twelve words" related by Engine Nus, in his " Things of the Other World," and at was saked of the spirit, who had just been dustating a communication, would help in an experiment of that same tany raps were this time heard by Messra. E. L. C. kind. Amont was given, through the table provided, that the questions could be answered within ten words. A questit then and "In aix words thou, what is Socialism ?" The table feet was by Mr. D. in the same manner, he having Mr Eglinton's hand, at once moved decidedly at different letters as the alphabet was called, but they meaned to convey no sense. By the same re-case the direction was given to " read backwards." The assect-tion read was " The union of beings in solidarry ther questions followed, one was " In serent words, what is love ! Amore, in the same inverse order of letters. " Union of souts Austreet, in the mann inverse order of letters, "Union of south tather than of bodoe." Another, "In three words, who is women to the question could not be given in so for words. La

# OCCULTISM IN INDIA

(From " Occult Science in India," by Louis Jacotziar, the Beigian Traveller)

During my stay in Benerca I was the guest of Peishwa, a ! ar pr Comorin, the southernmost point of Hindusten. a neh Midalian of the merchant caste.

awining, was a foundain. On this terrace Covinciasancy and reported to perform, and I ventured to ask I un whether he their performance. He replied that he was only an matrunucestral spirits, and it was they who exhibited thus their every Fider whom I have attentioned on this occult subject,

Covindinginy commenced by extending his bands towards a large bronze vase full of water, into which the received upon the base, moved towards him in regular aftermate of motions , as it tumb hearer I heard sounds emitted t med by the second hand of my waters. On the table of crisis : . . the room belond was a musical box, so much liked by the whether the time was quick or slow

that gaved such a most 1 That is the question.

In all the rockings and movings of the vaso I was astomsked not to see any spilling of the water it contained

# SPIRITISM.

September 26 1883,

BY EDUARD VON HARRMANK. ! Continued from p. 456. )

Du Prol goes still further, concerving that though, Mahrutta prince, who had a passee, sike other rajals and reading extends not only to representations actually present princes, in the "hory city" While there a religious in sommanbulic consciousness, but even to latent memory recipiont of Peishwa's hospitality was introduced to me, a (Gedankenlesen, p. 22) As proof, he addisces the faculty Fakir named Covindasamy, he came from Trivanderam, of different individuals (of whom some are "possessed" persons, some Church dignitaries, some ordinary persons, Thes has not a respect was to bring to Benares the remains of like Zachowke) of seeing perceptibly before them the crises of another's life on first right of him or hearing his The apartment in which I received him opened upon a voice. Du Pret here proceeds on the supposition that termed overlooking the sacred River Ganges. In the centre the netual seminambular consciousness is at the same time of the torrace, protected from the min's rays by a thick the latent memory of the waking consciousness, and has thus only to meet the difficulty, how from the same as I sat together, I spake of the marvels which he was medicy of all asportant and no my would achieve the summanbulic consciousness, the more important should experienced any particular sensation within houself during be read out in orderly succession.\* As I exceibe to the someombule, as to the waking consciousness, only ment in their production; that he invoked his piers, particular actual representations, and besides, a latent material of memory in molecular predispositions of the power. I may here say that this was the answer given by pacts of the brain supporting the consciousness, I must suppose a clairyoyant transference of molecular brain predispositions, unless there remains the expedient that the thought-reader, by his unconscious will to perception of fonotion played. In five minutes the vase, after gently character and fate, magnetically constrains the someonically consciousness of the other to tree ent a of the erises of and are proved as these thus actualised in memory ? from it, as if it were being strack by a steel rod. At my they view at my opinion, always preferable, that the auggestion and request, the vase moved atchwards, forwards, seer is excited by the repport of sense established with or shoot still, and the motable sounds were coutted with the other person, clairveyantly to restore out of houself slowness or quickness, and with measured exactness as the control that person's life, with the scence of some

The despress between clarroyance and thought-Handus . I had it would up and started to play by my rows \_ is that in the latter only present thoughts of servent, and I asked the Faker tart the me . Some a war to be unit, or so combine a personance perceived, by mucht keep time with the tane, and it is a accuracy done a centur resonance of the part ports were made another consideration with the form the order to be of The value in question was so large and heavy that, and her come consensus, but real elective phenomens as such if empty, it would have required a couple of men to carry are perceived without normal mediation of the instruments It was one of those used by Hi dus for their mor we of same. The exclusion of perception by the normal five adultions, and was kept tilled for that purpose by the water senses by no means excludes every sort of influence upon of the terrace founds in in mg into it. Went was the force mens, but this influence note neither on night, hearing smell, taste, nor touch, but on the sensitive feeling, whose The Fakir, to enable me to be certain, concented to my perceptions are then first changed by the semisumbalic witnessing a repetition of all the experiments, and they consciousness into representations of sight, or hearing, or were repeated with exactness. All this time be had been thought. Most easily explanable is the sensitive feeling of seated, but now he stood up and placed the tips of his the personal emanations of men or animals, perception of fingers on the edge of the vase. It soon began to rock from unobserved cuts, designation among several glasses of water left to right in regular time, gradually que seems, to leve of the one in which a finger has been dipped (Pr. St., X., making no sound upon the beasslisted floor as it rocked. 1 5, 1, 1, 25, 25, a too tast here there need be no change nto the perceptional form of one of the five senses, the it maintained its level with the rim of the vase, and idea observe y present of trell. The explanation occount during the rocking the vase rose seven or eight inches clear more il then t when a assumantiale, by feeling, correctly off the floor, each time coming down without any shock. names the time shows by a watch not at random and placed Of all the experiments, repeated for accuracy, as I have in a box, the somman are approved the object to the sace of the arm, and to a securing absold as it were to see III, 532), or when he reads the mottes, enclosed in note shortly before bought, and known to none of the party (IN 299). Still more comparated is the case when the magnetiser places a finger on a chance naknown word in a newspaper, and the word is given by the someonibule \$

The conference was some another lake table of the absolute spirit comprehends amplicate of the factors. The conference was some another lake table of the factors of the factors, the rest and the part was on another lake table of the factors of the factors, and the part was on another lake table of the factors of the factors of the factors, and the factors of the factors.

\*There can be half-greatened be barrier as of sight of the factors of th

here, to escape true clairvoyance, it has to be supposed that the city will be chosen for the suicedal shot, or that this How can the knowledge of any number of people's thoughts Nearest against the true of a reast and are the cases a which help to prevision, in the place or neighbourhood of their

Confronted with such facts, either one concedes to the hand the individual soul to its essential root in the abso-On the other and, sense-mediation vanishes to an un- late spirit; in both once no external and no interneassignable in imum when instead of he in vo perception danto assutance is any longer wanted least of all by by for any an interest of the will takes over the esta and aparits of the departed, who also are still only ladividual

In the first case, the mounds or individuals are divided distance of great natural events in a remote country (fires, from their absolute ground, from which they yet necessarily carthunkes, war) might still, so far as simultaneous, be must have sprouted, and a property is ascribed to them referred to thought-reading in the consciousness of persons which only attaches to and bescens the absolute, the other present at them, and explanation of vision into futurity case suggests the inseverable navel-string connecting every mught be cought in unconscious inference from present creature with its ad-mother nature, and the reflection that circumstances known by thought-reading, since present also in this naveletring spiritual saps must eleculate, of encountances contain as well the germ of the future as which consciousness has only no usual apprehension. If al. the deposit of the past. But this interpretation is very individuals of higher or lower order are rooted in the difficult with regard to events not within the single course. Absolute, retrogressively in this they have a second course. of one train of causes, but urising through unexpected tion among themselves, and there is requisite only a quecklosed between two individuals in the Alsolute, by an A corposeer, that is to my, one who dreaming or intenso interest of the will, to bring about the unconscious

from this opinicelo-monistic standpoint it is intel of de the former that the atrong interest of the individual soul-will suffices consciousness of others is prepared

being apporting the waking consciousness are not at a I, but the sensetive someone-latte parts of the brain are claimed by Spiritism percentibly influenced by thoughts of others, that the strength of the influence rapidly diminishes with distance and a disturbed by light, soon to establish the presumption really the reason of the occurrence of a similar complex of vibrations in an adjacent brain.

The decision is more doubtful in the case of thought transference from a for dutance, Du Prel and Hellenbuch here likewise supposing a mediction by other vibrations. 1 believe, on the contrary, that this case comes under the kama explanation as cinirvoyance. This points to a radical communication between adividuals by repport or telephonic correspondence in the Absolute. I infer this from the fact that a transference at a far distance no difference appears to exist between greater and lesser distances, who read thought transference in close proximity diminished reportly with remoteness (presumably in proportion to the xquare of the distance), thus men reaching a limit where the in Busines, oven with greater intensity of an individual will, ceases. It is true we see light at remote distances, yet only with an organised some-apparatus adapted to it, and even only then if no untransparent body intervenes; glowing balls of gignitic dimensions appearing as unextended points of faint light. If also gravitation and magnetists net through untrausparent bodies, yet with dian aut on of force in quadratic proportion to distance, very powerful forces and correspondingly large masses are requisite for a corsa stable effect at proofe po is. The netwer force of vibrations, corresponding to an isolated thought, of limited parts of the bruin, is quite incommensurately small as arrived at the development of thought-transference into against the light and gravitation of the heavenly bodies. If, a kind of telegraphy, implies the absence among them for example, the sommambable consciousness were suffielently sens two to ic a belief across the ocean, or more recording through a good part of the glove y the adue top spheres of sangle betar less brains restricted. A an

by means of an intense interest of the will draw areon-individual so sensitive would contamally stream in such a sciously from the unconscious knowledge of the absolute multitude of thousandfold stronger impressions, that conspirit as well the details of future events as particulars of sciousness itself would be overpowered by their mass and the present state of the world at distant points. In so far, relative force, and life would be simply impossible. Thereas the absolutely unconscious sayebiest functions of different fore, I think that thought-transference at hand am, at a andividua, souls are in the last resort on y functions of the distance require quite different principles of explanation, same absolute subject with relation to different organisms, the latter having more affinity to true clairroyance than to

"Syntember 26, 1883.

Accordingly it seems to me apossive to explain to set free, trrespectively of distance, functions in the thought-transference at a for distance and true charveyance a solute sugget which are directed upon the organism of by physical mediation, and that recourse to a metaphysical, another individual, and so far seem to be integra ng con-super-sensuous explanation is unavoidable. But this superstituents or functions of the individual soul pertaining to sensons explanation introduces no new hypothesis, as, for that organism. With the exerting or inspiring action open mixtoner, that by spirits does, but resta merely on the rooting the semmanifulic parts of the brain of the functions thus (Urstand) of natural individuals in the Absolute: a princiset free, the transfer of he lucivations" to the sommandance ple to which only Materialism can object. This explanation transcends, it is true, the mere natural sphere, but This explanation of both citirvoyance and transference only in so far as reaching back it lays hold on the super of hid notination from far distance some to me the only matural root of the given natural, without which the latter possible one, while for thought-transference in immediate would have neither essence nor existence, but it is not proximity I hold Barrett's explanation to be true. According permatural in the sense that it appeals to a sphere of ing to him every heath vibration corresponding to a mental as stones bayond the natural, a hulden world of superreprese tation, produced a sphere of induction-vibrations natural to evidence been a bound the given. It only do-the other by which a cour vibrations are induced in the externation the usual abstraction of the natural from other branes. The first half of the supposition, according to supernatural basis, rather coundering it in its concrete to our present physical conceptions, is almost unavoidable, us ty with the latter, immanent in it as being and sucand it can only be consisted whether the induction-sphere is stones. It is just in the phenomena of true charregance strong enough for perceptible influence upon or ier bruns, eg., corpsessoning) that no one has ever supposed and whother the mode of this influence is such as to induce the cause to lie outside the individual hunself, that similar representations. The facts that the parts of the in to my, the single phenomenal province which mere natural or aletract natural causes will not explain is not

Wyreover true clairveys see seems not to occur wit. professional memories for the soile reason, that they are that the supposed laduction-sphere of other-vibrations is amonly in so relations of intransport deep aye pathy with the rest of the party so that the interest of the will in estableding the radical connection fails. For the thoughttransference in which mediums have an interest, induction of brain vibrations suffices, there being thus no need at all for the restoration of a telephonic-connection in the buckground ; but there is nothing to excite so deep an interest in the past and future fates of the circle and their relatives rup, friends, as would compel the unconscious will to draw from the absolute knowledge of its absolute basis. What the Spiritua en a carroyance in their medianor is not that ; true clairvoyance, the tenderest, though morbed blessom of ma a unconscious spirit life, the Spiritists tell now know nothing of from their mediums, because the latter curry on their business far too much as a trade. For the development of genuine clairvoyance be mediumisted circles the conditions are far more favourable wises private mediums mt with their families, with lovers, and intimate friends , if it occurs here, it may elicit the most startling revolutions without driving us to any other source than those in the mer and muself, and in his ratheal connection with his nomediate laters.

In concluding this section, I cannot warn too emphatically against extending the theoretical interest, which these phenomena excite, to a practical one, or replacing the former by the latter. That the Tibetan monks have of a natural postal and telegraphic system. We who are in possession of such have no interest at all in accustoming ourselves to psychical actions at a distance, which yet in their haliucmatory form admit only of a very incomplete, inadequate, and uncertain mode of transmitting intelligence. Still more irrational, however, is it to cultivate the gift of chirrovance. For if anything whatever is adapted to make life endurable, it is ignorance of the future, leaving room for hope and effort.

acquaintances is a mirror allowing the calamities and suffer is explicable that certain figures are of stereotyped repreance of the fature to cast their shadows upon the present, duction with quite different mediums, as Harlequin, Pierrot, his best success will be to keep his visious to hunself, and Columbane, &c., in the Karlegornade, they call themselves to blent and harden houself against the joylessness of his John King, Katie King, &c., and are supplemented by morbid capabilities. Since it is only important events that the turbaned Oriental, the port little girl under different so far excite interest as to elicit prevision, but of the more names, and others. With these types the plantasy of important events of human life by far the greater part are of mediums has become so familiar that they at once a sad and poinful nature, it follows that provision must present themselves as figures for the self-displacement of anticipate far more sufferings than joys, but so these the Ego. Already in masked somnambulism they play sufferings are not to be averted, the prophetic gift their part when the communications, themselves maintaines in defiance of the truth that inavitable grief can ing more or less the character of these types, announce never be late enough learnt. Only in quite mre as them as the authors of the intelligence conveyed. This ceptional cases does prevision relate to natural events (ship- persistent tradition, of course, does not provent plantasy wrecks, fall of houses, and the like), which threaten man of different mediums conceiving figures possible to them with destruction if he does not withdraw himself , but such selves, of which in the sommambulic state they are de hosts for avoidance of impending dangers are perhaps avered, the sommambalic Ego-consciousness flowing over more ware than the graceome irony with which prevision ato them, no matter whether along with it an unapproitself too often drives man into calamity in his attempt to printing consciousness of the persistence of the abandoned escape at. Tracer on as full of such mosta new of the more. Ego asserts itself or not. recent I will only mention that of the engine-driver. who by moonlight new the body of his father, so it really lay upon the rails, but angrily drove over it because on about in the external approximen of the sommanbule, the the two preceding nights at the same spot he had stopped size of the figure can apparently increase or decrease, voice the train in front of her hallucination for nothing. Who and utterance he quite different, and even the turgescence over possesses the unknown gift of clauroyance will do un- of the akin and the lastre (Feuch game of the ye we conditionally well to ignore it as much as possible and in thus be changed. Even with accomplished in new, smaller no way to strengthen it by exercise, but rather to lead a changes in a degree astonahing to ordinary people are port of life not favourable to its development.

# TRANSPICCULATIONS AND MATERIALISATIONS.

If a somnambule is ordered by her magnetiser to be someone car, she is the command with the automater the will respect this with the har accountery a parenty a slight our she transforms berself into the figure and charnoter of another, like an extemporising actress, expresses deepened as to allow of this. The autopuston-like will exness of somnambulium cannot be more sharply characterized, off her whole persons to and adopts another diametrically words. opposed, perhaps, to her age, sox, character, religious balled, and political opinions. Even the luman quality is given up, and exchanged for that of an animal designated by the intracle of Circe naturally, supposing her magnetic force to have been strong enough to hypnotico the companions of Odymeus, and to make them see themselves and each other

What is possible in provoked somnambulary is so also in auto-somnambusism, whether the letter occurs involun- the available costume is not mated to the part, the medium tarily or is spontaneously elicited. As there are instance will take care to keep schand the cartain, and to show only persons who take themselves for animals and so behave, such those parts of the body which correspond to the figure of income hallucinations having in former times spread spade the phantasy. mically (were wolves), so also in spontaneous somnambalism of mediums can there be a self-displacement of the Ego, an appear in the mimetic transfiguration, so as to fulfil the inner transfiguration of the personality, manifested by expectation of the circle, he will involuntarily seek to corresponding demeanour, genture, and speech. The pre- remove the obstructions to the satisfaction of this ampulse, condition is, that the medium at passing into common bulism thus to loosen knots and atrip off fastenings which the fills the place of the directing magnetiser, i.e., gives by the spectators have attached to him for security still waking will the directive for the automaton-like hallucinations. What the persons are into whom the in his transformation, e.e., feels himself another person, medium, as somnambule, believes intoself transfigured, will there can be no talk of intentional deception if he presents in such cases depend on the forms most engaging his phantary, to the appearance of which, as he knows, the expectation of the spectators is directed. As mediums which in the spectator is directed. As mediums which in the spectator is directed. As mediums which make the only aperture except the day better which we are with learn to know the tradition of Spiritat circles before they referred and found quite interface the spectator and found quite interface.

One who has the pusiortane to foresee the deaths of his get beyond physical manifestations and thought-reading, it

It is striking, how great a change of features, deportment, guit, &c., the somembalic transfiguration can bring phecrypble, but the sommambalic transfiguration, by the vivacety and involuntary character of the hallocination, make the true personality in the part to be played to a degree which even the greatest dramatic genius, with all its other superiorities, cannot attain, because it still always. remains conscious of its transfiguration. The deviation of the roses from the normal can go to involuntary ventralesummer with a cotomously possesses, with other pocularities, which belong only to the somnambulic consciousness. With that of a together severying the oar as to the place where the core originates. With some mediums, already in marked sommembulism different voices speak confusedly together opinions, sympathies, antiputhies, and wishes conformable which announce themselves as proceeding from present to the character, and supports her talk by corresponding but in as respect," and such mediums will also support named much and gestures, if her sommambalism is so their galatical transfigurations by sprightly "speaking with tongues." Other mediums, who are not strictly " speaking mediums," contino the melves to nomical transfiguration withthen by the readiness with which the somnambulo thigs out support by speech or with sparse addition of detached

It is a matter of course tent a medium, who is somnambulism has dramatised the Ego into a figure of the plantasy, will involuntarily desire to be attered for the part to be magnetiver the experiences of sommambulism explain the played in conformity with the character assumed, so far as the means are at hand. In this irresponsible state, for matance, an otherwise modest young garl will not feer prevented from taking off her clother and going about in shirt or chemise, or if the hallucination is an Oriental, linen will be tird round the head for a turban. So far, however, as

If the medium has the indefinite, but urgent, impulse to

In so far as the comnombule medium himself believes

a mil in placetical data the worm instructionalist." does not been definite their detailed in placetime into a secsion day of a cross lateralism with the form of section of terms of the distant adjustment in terms of section. The distant adjustment is assumed to the distant of the distant adjustment in terms fact. The

inu quintili superilite is inimite fact. Th.

) This hypothesis is carried into stone detail, and defended by Frot. Dr. O. Skoney in his discontailer. On Spiritistic manifestations from the electric stampout. "I die spiritistic landestations you manarelessesschaffichen Spandpunkt": Victus, Hartiston, 1881.

himself to the spectators as this other person; and in case the looks of hair, it is to be observed that bair at different he magines the "ether person" as one deceased but parts of the head varies not inconsiderably in shade and surviving in the other world, he acts completely bond fide occour. not for a moment to be disputed.

Accord g to the best Spiritust authorities, it may be going about with and in the apparation. taken that in 95 per cent, of all so-called spirit-appartitions, the mediant himself figures as the apparition, patting frauditient instations quite out of sight. It is quite vain so hope, by harding the medians to a particular place, to be secure that any apparation away from this place is not too median, partly because sommunicales are estonology mediums by enveloping them in game carried round the next and sealed, or by eaging thum, for if the someonibalic medium can pointrate substances, he out produce himself . Smot sitting, but themawiole gets up whenever a form appears (often also without such appearance), is proved by the outland by what he chose to term one and testing the words, of the char from second to second which neither he nor the authores were then able ? testing the weight of the chair from second to second, a toraigh those observations are not to be universally record month?

by material confinement of the measure. Regard has not scoptical like himself, but are now amongst the ranks of the been had to this, even in the statement that 95 per cent of the apparation are substantially the medium itimself, so that the 5 per cent results may still be much reduced.

Whenever the assertion of non-dentity reason no other and the assertion of non-dentity reason no other and the assertion of non-dentity reason no other and the assertion of non-dentity reason no other assertion of non-dentity reason no other as a first that others whom he decan authorized on to be rejected as attenty upproven, overything done by the apparation is in such that are not to be conceived as the act of the assertion of the act o apparation is in such cases to be conceived as the set of the most of most one of the most of most of and extract of the most of most of the most of t because they dispose of the question of the elective, which bursted a processor of the energy is not be an exact a processor of the energy of afattack. First, the philosophy weren out be apply a second apparition and modum on the ground of the fastening or secondly the even need a second of the latter. In America, where mediums for it has present divestigation in an extract but not work? in families or course no traces whatever "work" in families or gangs, as it were, no value whatever would a meet in require at least to us in y is to be attached to the reports generally, since here door and a most three days and egan and gate are opened not only to sommanibulis confederacy, there exigh or firm manne to the set of the way to the find also to plant from. That hetherte all objects, flowers, the immediate results were most of city there can be not complex of rangent, locks of hair, &c., delivered by such doubt that, with cornect thinking minds the acts nort to as apparations are of earthly origin, the apparations themselves exceeds in the 5th many andered he members and yield their own must creatually assert their own influence and yield their own price of the material for a eter quite accurate since as to

if an comes forward in the chosen costume and manetic. It is asserted by some Spiritiate that the apparation is an disgume as the apparition of a spirit from the or or world in rule spatially divided from the medium, and that the latter If the spectators do not understand the source of the state first, when the apparition is seized, effects a junction with it whether they believe in the real ty of a special party by sudden ponetration of the restraining material, because to on the other hand by houl of the "spen and we atherwise death would result. It seems more key that the medium, the latter is in either case just as come of the apparition, by dissipating their under the harms of the made responsible. The medium is here just as atterney a sorrer, and penetration of the material, should hasten back ta deceiver, but an irresponsible actessionnamentale, to be to the medium, than the reverse, but if the medium can so protected from fright. That there are also fraudulent audienly ponetrate the restraining material, as to remate representations without sommanou is in in at the same time, with the apparation in the moment of danger, one does not soo why he should not rather prevent this danger, by quetly

## THE SOCIETY FOR PSYCHICAL RESEARCH ITS THEORIES AND METRODS.

## A REPLY TO MR. MIERS."

I have an extreme dislike to "answering again." I would reductive a name fair norms of attack than produce a controversy. Int this materios I find Mr. Myora reply so vulnerable, and his language so evasive, that I cannot resist the temptation.

I thank Mr Myers for calling my attention to a passage which I now read for the first time, for it had quite escaped me, to condomn him the more doubly. and to which he makes a meet important revolution, but thereby only condomin bluncil and his colleague. The whole passage is so algorificant that I now reproduce it. He may :-

"In a separt written by Mr. Gurney and myself, Proceedings YL, p. 184, those words will be found: "We have found (" the existence of spirits; I believe in flesh and blood, and a discussing cortain oridonce) no need to postulate the units for many intelligences areces where and a result man assess, not in hell or Heaven, but on earth as we know them. But, wouldn't be a star on the the agent a to the agent a form after these eminent philosophers of old, thehe my there is no do in fact and of many was an in. on the foods not a rearrection-noither angel nor spirit." floobt, our talepathic experiments, a set colles of caser of apparitions, interpreted as we interpret them, do suggest he astrony if arming light, and I find it in the following analogies of influence, modes of operation, which (it is hardly pregnant discovery " it is only in some form of nicetons that too much to my) would throw a quite most light over the long this controversy out find a close." I had end the same thing in controversy between Science and Falth. It is only in some form other words . "You cannot compal assent by shoor force of

point, but in their minds an assured cortainty and a positive which do appear." The prince lett he less had on to the are is belief. But it now appears they were only groping for an in here a Spiritual or Unicen Universe or and " It is all two meed to postulate, So., So. . . But neverthaluss, of, sharps what a otherwise dexpercially &c., &c. . . it would throw a quite novel light," &c., &c

their telepathic experimence and collected cases of a quartions is orise hey have found in need to possulace the existence of spirits In other words, the conveys see of the to pathic injust over vast appliances sever oceans and continue is settle on the and an free from injutery, that there is no need to contain easily that took and blood had such marvellous endowments.

I affirm, on the contrary that magnetic influence between

very narrow limits. I may expt be ween persons re roun, or, my, the muse building when they are within eye is shot or explicit of each other-hat not far beyond this small were amount. But whom it comes to long distances, then, if · · telepathy be admitted, it is absolutely necessary to postulate other and supernatural existences

Mr Myon admits the organcy of my argument that minute that telepathy is much more credible, less mysterious, and more conceivable in the case of a spirit to administer the on eact, that of a green mortal. It is certainly so, for a squrit is not pure Thought, se Will, or Emotion, but all those in a rehide or continent-in one word, in a body. This was what puzzlad Lucrotius. He could not concoles Soul existing nakedly. Therefore, he really said that at death

" The opint flue out, and dies I'th air "

For, as he could upo nothing, he concluded there could be nothing, and this was the end of Man.

Mr. Myore firmly bulisves in telepathy, but he rejects what he admits to be the center explanation and the more exactle supposition, in order to embrace the meru difficult and the less conceivable. He is not in a happy plight, thus halting between two querons. I sold truly that his own adiabations only serve

I have now fairly got Mr. Myon' "head in chancery," and he cannot wriggle out of it, if he would not be beaten out of while and thus, and he no longer able to come to the secutor, unless by making the end confession . "But I do not bollove in 41 mg clee." Very good. If the case be so, then I would ren me of a slight alteration in the title of the Secrety- he we . . be called "The Anti-Psychical or Sulducecan Society.

31: Myers a evidently still in a fog, but through the said I of education that this contrasting our find a class," The italies evidence. The mind must first accept principles and be guided by these. The principle in my case is, that this visible universe This passage took use quite aback. I was under the imposent is an universe of effects, and that beyond it, and to account delenton that with Mr. Myers and his collectron the immor- for it there must be a universe of access. Or, as it is well tality of man, or at least his survival of the torsb, was no most expressed, "the things which are seen were not made of things

manuscret on this point, and hitherto only groping in vam attempt processes sychical resourch except on this founda-The darkness still continues, for they my " we have found no 1000. It the exequive another hight on here phenomena and ex-

In its pass to another point to Barkin case. Mr. Myeri I regret to find that this at present more hypothesis of a myst of the atedium, " There stomes all her present more hypothesis of a myst of the atedium, " There atomics all her present Hereafter would be to them "a quite novel light," and change but unfortunately the gross want of comprehension as die all the conditions of the controversy. I should think so, subjects inquired about, and the palpable blunders which the replies contain, soom to no to proclude as from regarding the Now let us view this passage in the gri, of telepathy. In case as affording evidence of the guidance of a scientific

Thus is a paipable blunder on the writer's part, and a monstrous essumption. He sammes that a spirit must be Unwroughly and profoundly scientific What proof, or even to stal basics as no clearly possible one so easily unders and prescumption, is there that a spirit must necessarily be scientific, and be able to give accurate answers ! The question is, whether finer powers or existences. The thing is eculently so practic the answers can be believed to be made by an ignorant woman, table the to suppose more than morta-powerts jute superfaces. Hever known to have targed has attention to such subjects . Now has I call the very ' contact of manness. I was not aware whether one wholly ignorant of the redmonts and even the terms of music could attempt to answer deep musical questions, and to enswer them, moreover, instantly and rapidly? That is mortals cannot safely or probably be inagined to exist howard the question. Let Mr Myers propound the same questions to "the correspondence between Mr. G. R. Haughton and Mr. F. W. H. Myers | down answers. I can easily guess the answer he would get.

Walkouth Amountation of S are hold overy Sunday at seven a part of the common terms of

# "FACTS AND THEORIES."

Mr. Haughton and your correspondent, "Thymol," ham on "facts first and theories afterwards." In this inductive age that sounds plausible, but I should like to point out the extreme difficulty of getting facts accepted at all not to say properly interpreted-without the accompanional of at least toutative provisional hypotheses. Speritualists themselves bave not, as a rale, accepted their phenomena without a theory, which was

nem both credible and explanatory, from their first contact with the facts-a ready-made theory inhanted from the world's old trudition. But, so a matter of plain experience, people will not accept avidence, other than personal and palpable, to facts which are to them utterly unintologible. A contary and a half of " unlightenment " has made the sperit thoury, if not me explanatory, at lumit, at Professor de Morgan said, "penderonaly

The result is that, in the absence of an intelligible ar var y pottestin, an annually impossible degree of evidence is actuated at. We only ask, it is said, for " sejentatis" orniones. Now, amentific avidence supposes a knowledge of the conditions I a phenomenon, and the power to reproduce and exhib-We can only offer testimony to the phonomena as they will. may spontaneously occur under such very general conditions as we know. True, it is testimony which would suffee for may court of justice in the world, if there were no antecedent presumption against the facts testimony which, according to all human experience, could not be forthcoming for what was not a fact. The "dispersionate critic" thinks by is expressing a amontific Judgment. In detecting adverse possib . possibilition—in theater t or a constant

testimony at its ordinary value-he is unconsciously the mere mental slave of the Zert-Gent. Because he cannot say "I know," he will not my "I believe," He cannot help it, for really he does not believe. But give him a theory he can understand, and he will soon find the evidence quite actisfactory.

ow, the foregoing remarks may be formulated into a law of human progress the exact reverse of the rule recommended by your correspondent. Theories livit, facts afterwards, in other words, which will not seem so paradoxical but narount to just present in the ensteady of Sparitualists, for the most part, with If a expected to tell us positively whether the chartheory. They want other people to accept these naived of all hypothesia, if are reservage were a suit the service of a segment. In very 1 he months contraction the first in more expression and v ... , that evidence must been pro-

# CLASS E .- PRESCIENT DREAMS.

I friend of mine, Miss D., has on several occasions had drongs foreshalowing with more or less axactitude occurrences that have shortly afterwards befallen her-

In the summer of 1675, when ledging in a street near Eatenequare, she dressed that Mr. W , an acquaratance of hom whom she did not often see, called on her and told her that a friend of his was at a house in the street, the number of which he did not know, and washed to find not. Upon thus Man D. looked out of name, she had forgotten it, but it was the name of an abit a window on the account floor, and saw on the walled the equante Friend who had been lest yours ago in the "Royal

Then came the cotters "r n." I said, "He means Are any difficulty ?" Approving raps followed. I replied are a second at the contract of the contract o that that was the house where his friend was. In the morning should also send for one of your old storks?" An unidance also told har mater the had had a most ridiculous dream which she proposeded to relate to hor. A few days afterwards Mr. W. Larged, but objected to, I said, "Can you tell lier !" Yes actually called at the house, and said that a friend of his of the Thost, letter by letter, was rapped out "Consult Goorge W." same of Waiworth had died at a house in that street, and he (My tistar sent for this gentleman and found, what she was wished to accordant the house at which the death had taken not quite sure of before, that he was her husband's agent.) She place. Mas D., whose maid had mentioned to her having soon a mad form him Then I said there was a letter of condelence collis carried that morning into some house in the street, went on the table behind, from a Freematonn' Lodge, could be upstarrs to inquire the mumber, and looking out of the same road it! "You." We all distinctly heard the rustle of the window from which she had looked out in her dream she saw that the blinds (of a dail pollow) were all drawn down in No. 33 mesite, and she told Mr. W that that was sloubtless the house where he freed had died. The angular fulfilment of the droun, however, did not even then occur to her until it was pointed out to her by her sister. They subsequently moved into No. 33, where Miss D. told mothe storr in March, 1876. In the presence of her easter, pointing out to me the yellow blinds and white curtains of the drawing-room, She afterwards revised my account. She knew an one of the name of Walworth, and had not heard that a family of that name was in the street.

Some years previous to the above, when returning to England, Miss D. foll asloop in the train between Lyons and Paris, and dreamt that she book up the Times and read among the deaths, "On the 29th June, at Boulogue, of gastric fovor, Mary, daughter of the late Colonel D. " She was not feeling at all ill at the time, only rather tired, and said nothing of the dream to her sister. They want on to Boulogne, intending to cross at once, but there she felt as ill they had to call in a doctor. She true at once from his face that it was semothing actions, stul he pronounced it to be gastric fever, which subsequently turned to typhoid, in which she was frequently delirious. In the intervals, as it approached the end of Juno, she puzzled her enter by asking repeatedly what the day of the month was About that date, however, she took a turn for the better, and recovered after three months' illusts, instead of completely varifying the dream by dying.

# CLASS K .- SPIRIT IDENTITY

[The following narration, received from a lady who has . a my not to be published, in full of most interesting [In this column will be given from time to time such accounts facts. A critical mind might possibly here and there find food for observation. Let it add the sames of its mature experience.

Two years ago I was on a visit to a friend who know nothing addresses of those emerged, not necessarily for publication, her and waited to see for herself, so m the events we are way we spend them a set o case and a partient actor a careful my friend, a lady who is has companion and a sean less than ten minutes the table begun to tilt . I found they were both mediums, and they have sat often since am not a medium, yet at that first trud when I took off my hand the table was still. It has not been so street. Several names of Moss The rolatives were apost out, I naked, " Is any one also here?" Yes No. I so is my diseasy when the words of Old a month were to a "Who is that?" and Man T. was to the and the same of the same of the same such a name, but I me of a same a a torque a ne biscuts when I was ill.' he was a second Gringuffin" was a name which I had given more than therty years before to her father. I had forgotten it, and I am sure the had never heard it or the other lady either. Then the words, "I forgive," were spelt out. Three yours ago my theor's treaband died audienty. I came up as soon as I kie w Letters should be addressed to the best of of the laster of my certain knowledge of our door lost once prosence still, and she wished to have a shape. Accordingly we drow round a little table, my sister and her daughter, I and H. For nearly an hour there was nothing, then my daughter's hand began to rap on the table, and she all at once exclaimed, "Why that a the tune and was showing as how to mp out with the pencil last week." Immediately the table began to tilt, his name was rapped not. Then I asked, "Who did you are to refer to The answer came, "Montague," My sister the was her little boy of that name, who doed when an infant, but another word followed, " Pitcher." My sister burst fate tours . she was convinced. None of us at the table had ever heard the

> . Mr. W A. wants to know to whom sho is to refer about your books, No" was rapped. Then two names of friends were mon paper

Ever since that time when my brother sound at our scancer he annunnees has presented by playing that although cometimes by the hand of the medium, nonotunes by the log of the table, and once by a piece of loves paper which shoot is out on the Eablu.

My daughters, who were the best mediums, E, and H., are gone to the Cape. My servant, who was a medium, has left, and for months I only have a sitting when I get the chance; but lately I have discovered that a servant I have is a good medium. She is a very good, quiet girl. A fortnight ago my sister was on a visit to me, and we had a citting, Lizzie (my servant) being the medium. My sister has the extreme power of developing modiumship in others, though she is not a modium. It was it never allowed to sit at the table. This ovening, as usual, she was told to sit back, and then the table jugged away with Lazzae serous the room, jorky little at the care of a se hand by lightly on the table, and the left all the while played the well-known attle tune. I am quite sure also nover could have heard anything about it, for the line not been with us very long, and we have not spoken about it

Two years ago on E.'s birthday M made a wreath for his grave, and sout it up to H. In the evening, as we sat at our stance, the table began to rap out this ture, and we found that he had some to thank M. for the wreath.

One evening the table suddenly took a different motion, and I saked, "Is any one clao here !" "Yes." " Who !"

"Lettie." The last letter had just been rapped when we heard the front door aponed and a wall-known robe cried " Arybody at home?" It was my son who had evan unexpectedly from London and who was accompanied by his musin. A fortught before this cousin had lost a little girl whose raise was " Lettie "

The first message we had when Lizzie and I sat together, shout a month ago, was to her from her mother. It was, "I

think of from my Capa letters, in tale are a corner to the which I have written to the Cape to verify, but I know it is tensur certainly go

The fact of Lord Erskine's belief in the apparition of his lather's better, related in "Let 117 of September 20th, 15 authenticated by a purage in the Diary of Sir Walter Scott, for April, 1829," quested in the Quanterly Hariare, October, 1882 p. 334. Sir Walter says : "Tom Brakino was positively mad. 1 have heard him tell a nock-and-a-bull story of having som the ghost of his father's servent, John Bornett, with as much gravity as if he believed every word he was saying," which no doubt he

# A PHYSICAL INTIMATION OF DEATH AT A DISTANCE.

(Popularche Studies for Septoniber.)

A correspondent, Carl Alexander Schulz, of Loyeig, relates which has a very similar at a v the following experiences of his own. Resulting in a suburb of Her grandfather had often expressed a wish that the mendi-terminant years ago he was in the habit of walking about contribute should sing at his fourest. Her brother seconds as a relation of the speciment of his work -printing to have been use of these buys, and when the grandfather was make the in the stem of or got the margins. On the well of the room hung three fra are per a c two of deceased friends, one, the largest (unity inches long, and of corresponds tog broadth hof a living friend, the head of a society in Droaden, i which the narraber was an active moraber. "One evening, after work, it was cloven a clock, when in the course of my usual promonads, I stopped before the pictures, and addressed some friendly words of laving remembrance to the friends who had gone before. Soldanly the larger picture, which hang in improved. And us the book best considerably up, the things the money, was reited so far from the wall that it must our tanky are been site off the book and tool sees he dily some dent our mother came in having, as we learnt afterwards, just power unpower outly me. After emenong the senvery shock with the back sister is made at him, the wall with a load sound. I was anxietees, on set a neather see I spoke again to the three perizwits, saking if there were any communication to be made, but there was nothing further Now, was the above a sign of him who was still alive, or a manifestation from those who were departed ! The next day brought the solution. I undressed and west to bed, but was kept long awake by my reflections.

"Having on the following afternoon to go into the inner town upon business, I mot in the suburb, in the middle of Tanchaerstreet, an acquaintance who came towards me walking on the other side. He was at that time serving brother of a Free manon Lodge of this place. Recognizing me, he called out across the street, 'Have you heard! Have you heard?' I, replied that I know nothing, and begged him to come across. He did so, and told me as follows 'The Chairman died anddoaly yesterday oroning at elevan o'clock.' The Worshipful Master had hald a lodge-conference at the Golden Apple at Dreaden. When the husiness was over he stepped down from

laughter, and the answer was "Ne, me, signer " "Were you the data to speak with the brothers, as was usual. Who com-

Psychical Research is urging the explanation of phenomena by

"We have here, quite evidently," e.g. Here Wittig," 1 the action were lim, it was intentional in, of course, not ascertainable. But, unintentionally and unconsciously, the sudden excitoment of his heath squastion was so exulted that the fast transported through the medium of the nerve electricity on a manwith the originals of the pictures, so that in him, and through through the already established thought orpport of the dye .. audden streke, forwith converted itself into a counternery supraise ( ber privated, which are excess a species or sensibly for him, as described, . . . . It is with two or more persons in sensitive rapport as will two or more sensected telephones. One telephone receiving words from another, repents the sound. The nerve-impulse of the shock at the sudden doubt of their charman transmitted itself to the recipient plroady in thought connection, and received through him a consciously, the right directors to the surresponding picture on the wall. A similar mystion, but acquible relation occurred between Goothe and Repoleon I, during the Leipzig Languit.

"Apperling to all former experience, womant supprese that the picture was raised by the nervo-fluid of the narrator, wheever may have been the inester. The parreter was thus at this mannent of his month's contemplation himself the medium. We may suppose that his memory of the tree decessed may have conterbuted to raise his psychion condition to the studium of physical mediannesis perception and manifestation of a distant death scene." Herr Wittig proceeds to refer to a former experiones winted by the late wife of the same correspondent,

dying the boy's uniform hat and clock were hanging on a neg in a room where the family were collected in experiation of the donth the children sitting crying on their hed, "Buddeny, without any perceptible occasion, my brother's uniform clothes were raised from the hock and fixing to the ground with such a lond noise that we all cried out in the late we will not showed that both the book and the attachment loops of the clother and list were in the best condition and nothing was most have been lifted. Some minutes after this atrange incl for a board the noise, and, said with tones in her eyes, 'Children your grandfather in just gono (dead)." Horr Wittig goes on to explain this case, as the last, by thought-transferring onetting physics, mediumahip, the identification being produced and directed by the nerve force thus derived from the recipient of onyclucal impression.

increase. To such an extent has this been the case that, among , and more enlarged views of spiritual truth and human destiny, the better class of Speritualists thomselves, strongens offerts are said not to the signs and wonders nor even to a personal combeing put forth that the avil may be checked and removed. managetion with departed level ones, that such Sparitualists But, while thus admitting the general claim of Sparitualism, give the strength of their efforts. To this class, Spiritualism is it should also be admitted that there is within its range a wide that the natural outgrowth of the past religious, especially of

that mught by Jesus of Narareth, the great Spiritualist and reformer of his own age. Between his teachings, rightly anderstood, and a rational view of Madera Spiritualism, it is believed that there is no antagonism, but a unteral harmony like that between the ascending scale of samical notes. Spiritualists of this closs are watchful against anything like mirrowness in the growth of the movement, many of them not wishing to see it combined into any sect or party whatever. They rather on comago a quiet diffusion of the faith among all classes, through methods peculiarly its own. For this now power works not naturally in the old machinery, but with a quiet, irresistable force in ways heretofore but little known. The ultimate result must be a gradual breaking up of old errors and ords, and the establishment among men of the higher ways of the masters

"In conclusion, let me affirm that the progress of this tioders Squares has been at ery authore and Nive before in the world's history has there been a faith of so mp: growth. Within a space of loss than forty years, the number of believers in our own land has come to be reckoned by will are while, in the world at large, it is only by tons of manage and an adequate estimate our be approximated. There is we civilised country to be found in which there are no and numbers of intelligent believers. Innumerable books and perfolerals in defence and elucidation of the faith are also to be met with in all quarters. Surely, a growth like this, amid the intelligence of the nineteenth century, indicates something prove than shallow protence or self-deception. To thoughtful and revorant same, it must be apparent that some decidy aigni-Scant reality turks behird what has power so widely and deeply to move the human mind and heart, and that, whatever may be the earlier mistakes and credities of the meroment, the ultimate result must be nouse important good to the mon."

# A PERSONAL EXPLANATION By ' M A. (Oxon)"

It now wants but a bare month of a full year since an unfor torute accident wholly dashled up during some six months from attending in any way to my work, and has since seriously on tailed my power of accomplishing when I at the first and have just returned to London after a playment and you. . . . . bounday, so far restored as to be auxious to resulte my - w-s The accomulation of correspondence suring my illness I - a never hope to deal antisfactorily with. I must begall whom I h ecrees to neglect to believe that no discarriesy was intended. lint I was absolutely unable to roply to many communications. Amongst those with which I could not deal are, I

own, a number of letters from various Spiritualist Septeted whether parts of the world, which came to hand at a time when I was most seriously ill. These were repressed a letter which, a the matance of the London Sportunited Alliance, I addressed many accieties and journals representing Spiritualism to " te countries. The Alliance wished to enter into confederation with foreign sociation of a like mature for mutual honelit a to my letter contain many valuable suggestions which I propose to by before the Alumies at the first opportunity, in as public a manuor of passible. But I am mexicus to apologue at once to my many correspondents for the unavoidable delay in dealing with their courteous and kardly communications, and to explain the reason for my long silence. The fortheaning service of the Alliance will give me an opportunity of laying before English Sprittenlists what they will find a very interesting and ited tive account of the state of Spiritualism throughout the world, as it bears on this projected confederation assets as a

I am desirous also of stating, in roply to the wishes of many randers of "Limits," that I propose to recommence the suries of "Notes by the Way" in January next. It is only predent to refrain from plodging myself to regular wookly work until I snow whether my restored strength is equal to the effort. Three months of winter will above too how cold affects me, and I hape confidently to find raysolf justified in resonating my Notes in the first number of the next volume of 1 1 .

Meantains I have placed at the disposal [of the Eds. continuation and, no far or the oridones is concerned. The plotten of my "Phases of Materialisation," which will because more space than I like to contemplate, but which deals contain honorogy and, I large, completely with a very complex subject This chapter of recearch will, when it has appeared in " Lacity, be added to those other chapters which appeared none ; -since in the new defunct pargazine. Reman Nature, and -a relume which I hope to publish next year

I am also collecting, for publication in a valuate, for a of my Notes that have appeared during the past four years in journal. They have doubt week by week (up to November last) with various anticeds, some of which seem to possess a more than transitory interest and I believe I shall do well to place at the service of the public such of thom as I may select no of some permanent interest. This volume, if all goes well, should be ready for issue in the coming spring.

# SPIRITISM

BY EDUARD FOR HARTMANN (Continued from p. 470.)

There is, however, in fact, a province of phenomena, excluded, and this province encroaches upon that of trans. at table-nittings in the light, individuals present have seen where the possibility that the apparition is the medium is latter shows changes in size, form, complexion, beard, and siderable distance from the medium, whose hands by visible figurations of the medium, in so far as the apparition of the dress, atterly unattainable by means at the service of the medium in the cabinet. When before the sitting the medium | whatever of this. Evidently, in such cases there is a is closely searched, has even exchanged his own clothes for others of easily recognizable out and seleur, the locality being under strict control, it is not to be seen whence the party, for we have seen already how tavourable to ballucian medium should get the means of diagraise, how he should provide himself with white gauzy raiment, stout material with heavy draperies, boards, turbans, masks, buskins, do If, nevertheless, the spectators see him appear as figures of different age, sex, slee, clothing, nationality, &c., other causes of this phenomenon prest be sought for

What may help us on the right road, is first the circomstance, that such uncommon and apparently inexplicable phonomena soldom or never appear to speciators present for the first time at a mediamistic sitting, and that oven frequenters must with a new medium go through many settings where only physical phenomena occur, until the medium's own semmambulio senseroussess amounces that the time is come for attempting transfigurations. It is an universal experience that phenomena are more plentiful and extraordinary, the more sittings the medium has held a distance, and produce in the latter, by the respect thus with the same circle, and that every newly introduced member interrupts or quite arrests progress. It follows that close reppert between medium and participators must be established, before transfigurations and materialisations can succeed, and that depends, not on more human, friendly, relations between their waking counciousnesses, but only on a relation between their somnambulic consciousnemes, i.e., on a magnetic rapport.

The physical phenomena progress in proportion as the participators are trained to be unconscious auxiliary modrams, as they learn, that is, to give off more and more perve force, and to make over this to the disposal of the meet unt. the pleasity of the manufestations is the more actomshing, the more they expise therefores to the including will to thought vacing suffer to be planted in them the unconscious we to thought-transference to the mer run, and let themselves be at mulated by the medium to the development of a masked someamballe consciousness of the hypersesthetic somnambule memory. When their latent mediumship has been thus in some degree awakened, and the magnetic power of the unconscious will of the medium over their marked somnambalic conscionsnees is sufficiently established, the modium, whose somesmbulle consciousness is very sensible of this concurrence of auxiliary mediums, can pass on to phenomena which presuppose a certain power over the souls of the spectators.

With different members of a small circle, the power obtained by the medium in the course of preceding sittings will be different; consequently the amount of phenomena confirmed by different spectators must be different. This giving his own report, without consultation with the rest, of (Pz. St. III., 536, 537), and so on. What with the help of fact is mildom enough regarded, instead of each spectator every sitting, the party agree upon a common account, in speech a magnetizer awake can do with a purfect stranger which the subjective diversity of the phenomena disappears. in open sommenbulism is possible without speech to a Whereas it is easy to agree upon the physical phenomena (except lights), with transfigurations and materialisations it is see? S. It is not, for a very violent case of the The sename as a often quite otherwise, especially on their first appearance, afterwards, when all the party have fallen sufficiently trades the power of the medium, in this province also the testimonies will be again more consentent.

At first the medium quantly only puts out for a few moments before the curtain single parts of the body, hands, in the party of the body, hands, in the party is given the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the curtain single parts of the body, hands, in the party is given before the party is giv

arms, head, gradually showing the whole upper body or quite emerging. Then at once it appears that some of the spectators think they recognise the medium without a doubt, and see nothing else whatever than his form, while others, with a port of mutual agreement, declare the apparation to have been essentially different from the medium. Similarly different shaped hands some from under the table, as a con to all upon the table, while the others have seen nothing bransfer of the medium's halluctriations into the sommanibullo consciousnesses of the sufficiently sensitive of the tion-transference the relations in such a situation are.

With us Wosterns, conscionally or unconsciously-willow hallucination-transference to a recipient in waking consciousness, who has not the will to be hallquinated, and does not at all suspent that the figure perceived by the of the transferred hallucination of a third person, is something extremely uncommon. But the kintery of religious excituments affords a number of examples of whole assemblies of centation infected as much by halludnations as by convulsome and Vitus-dance, when, it is true, speech powerfully assests or giving definite direction to the phantasies of the receptents. Examples of this kind are, moreover, to be found in all those cases where living or dying waking or dreaming persons transport themselves with ardent lenging and lullucinatory vividuese into the proximity of another at restored, a corresponding halluclustion of their personal presence. (Ps. St. VI., 294, 344, VII., 47, et seq.) Here it is to be remarked, first, that the success of the experiment with sufficiently sensitive recipients seems not dependent upon knowledge of their locasity for the time being, so that thought can be directed to it, and second that if generally the environment of the recepient is represented re both consciousnesses, its perspective still appears difforcat in each, according to the actual or supposed position In it of the cost. Transference in Europe seems seigion to have extended to other hallucinations than the personal apparitions of the transferor, only in "second-sigh " or true cleary cynics infection of influeinations by the true ever to predimoned companions appears to occur.

On the other hand, cases of hallucination-transference are more frequently reported of Indian faking and Turkish dervishes. One is made, for instance, to see a coil of poisonous snakes bosenth a mused cloth, where immediately afterwards nothing in visible (Pr. St. IV., 200), or in a closed room is eeen at one time a flock of wild geese flying at another a number of anakes curling about, at another the walls drawing togother as if they were about to crush oue. (1X., 469, 470.1)

Recently magnetisers have produced the phenomenon of transference of hallucinations even in public representations, but have first placed the recipients in the hypnotic state, and, moreover, made use of the word of command in order to educe the hallucanation. They have thus caused a substance with a nasty tuste to be exten for one with a pleasant taste, a staff to be seen as a snake, and excited the belief that the unguetisor was floating about in the air someta o at a magnetiser with a masked sometambaro who is

<sup>\*</sup> See Psychiake Studies, June, 1833, p. 200, "The Vampire belief not wholly

With fraud of speculative photograms r Pr vi II as an stigh describing of the form from the inclinar (as or or are much open to the suspicion of having been decep-Cro . a observational half actuation-transferon and twent manufactured by too acalous Spiritiate for the condently faci stated by the medium mining forward; when version of trabe lavers,? the deviations are great, haducration may be easier to Dedinarily, detection of a possible deception of our sense cuplant than illusion

several observers is sufficient guera of star per very. This is quite enough, when the question is of particular exceptionally favourable to hallucination-transfer are. For of actual hallucinations, a.e., transferences from the rote although here also identity of the transcendent cause mus, nambelic into the waking consciousness, for here the be concluded from agreement of the effect, yet this klew cal ; number of the senses sharing the hallscenation rices with cause is not here a material thing (in itself) in real objective the vivacity of the latter. The weakest degree of hallucispace, affecting the senses of those present, but the subject nation concerns only a single sense, either that of touch tive inclusivation of the medium aftering the commandate alone (contacts by invisible hands), or of hearing alone consciousnesses by notice on of same research positions. In (storm-balls, fire-balls, music of the spheres, war-alarums, these cases, therefore, we have to look for other marks of human voices), or of smell alone (characteristic accut of a distinction between perception and halluctantup.

the hand passes through without renstance, the probability one sense evokes the feelings and perceptions naturally that there is here a bare vision, or hallucination of night, associated with it of the other senses, when the accessory will doubtless be very great, but this is no cortainty, for feeling elicited may enter consciousness even before the there are wellly forms of matter a sac con a convol aggress prote palls the man to should the drive of a course of the garma that a on surfaces retreat, glit, but a vinot perce, is whole hallucination so require it. For instance, one first by a truch. It see who is a since test of the or or relievely of for us, know a to be a freed from the meaning of the magnetic terms of the magnetic part o

In fact, all photographic experiments hitherto attempted narrower sense, and illusions, understanding by the former with forms which were seen by the speciators tell against a product of the phenomena, for in all cases hitherto perception, by the actor plantastic transformations of sense | reporter there were no results except when the measure perceptions. So that it is an hallucination if a coiled houself was admitted into the photograph. In the latter up smake is seen lying on a plate, but an illusion if a cases the pictures are not distinct enough for it to be decided stack or rope is taken for a snake, an hallucination, worker, besides the form of the medium, the illusion dis-I lusion, if the medium himself is soon as the apparition of a tree other words, whether the photograph obtained s to Moreover, the boundary is flust, influentation and resembles the phanton, and not morely the souligns I sain passing late one another, for apart from conditions subscort in it. The photograph taken by Crockes, on th which sense-perception is closel, every halfacountion which is to be seen the medium simultaneously with the must dispossors a segment of some-perception, and intro- phantom, is exposed to the strong suspicion that material of duentself among the momentary collective sense-perceptions, the supposed phantom the medium, and instead of the gold on the other hand there are I luminum in which teams supposed medium the dress of the medium, stuffed with formation of the completely contrary some-perception at a cushion in a half-concealed position, have been phototheir foundation seem to be more difficult their would be graphed. Since material restraint of the medium affirms no a original construction on a neutral ground. Thus the security, a consistences staking of medium and phantous sie s and hadrenerious pass into one another when it one would have to be shown, before objectivity could be concaded on securious himself is regarded as a wholly different to apparations perceived merely by the night of the specime figure, at another on apportion very like the medium in tors. All photographs intherto produced, which are to

steps in the hall, then the room door open, and then first action. es are vison, whose in loss to id cases the accompanying and preceding hallocanation of hearing is absent, and the | observations of others, yet it receives some support from room door seems to open without sound, if the form does various instances, weakly attested it is true, which are not enter through the closed door. The vision new soul to have spontaneously occurred outside medium-stic approaching the observer, if the latter recognises in it an | sittings. acquaintance, the ballucination of the small of scent commouly used by the nequantaneo may very easily associate atself, and finally, the figure may lay a hand upon his shoulder, the halluctuation of touch being then associated. These combined hallacinations of four senses will, howe to afford the least guarantee for the objectivity of the appear on the enter a travel four and presumption that being thereupon found in the ship's book in a strange

of these different feelings of sense is hallucinatory, and on as foundation for on any once that to y are not so, and originate from a common hall comatory source.

Applying trose per enjer to accommistic physomona. from the weaf a sed press space of the harner cory e attitution of visible phantoms, we have to derive the anxpicion that feelings of touch also, associated with these y so of or a proper and them, are more calling datings, It is true we must here be on our guard against overcas y generally don, as as alloway shown by the case and some that e he to me a partition of nearing to life seem to have been observed at mediumates sittings, the value loss being rather the sound durindly frightly votes of the medium. Only if it is true that see wal a car oppear to come from offeren parts of the root not only to said afternation of admerrors also in the whet some of the word into an are speech simultaneously. my then would is be necessary to speak of mechanistic he a trations of bearing.

As to he are at one of tone on particular, the posiby commerciant felt pressure of that it or a siculary hands, feet, don. is also derived from a system of dynamical prair-and-pull lines, presenting the analogy of the process of a durfaces without corporaty below? them not be presoned to not may be acoposed to arise We of the the parties of each or is a common of total once of many who herve force or only a trav ferrehalfneination, is not to be determined from the simultaneous a salty or case caty of one supposed be in for as a cream an emete a study the su to do set so perceptions, so also may the vision of a hand be fused for consciousness water a real is perceived from pressure to the at his by the the anny of an apparent ougest of perception, gut as you as hallucinations of sight and rouch of the hand might be fused for the unity of an apparent object of perception. This fusion for the unity of an apparent object belongs. even to the content of the hallneination to be transferred, a so far as the medium's own semantibulic consciousness line already accomplished this fusion; and ladeed it is then quite indifferent, whether the medium has fused the visual hall quination of the hand with the phantary image of the tactile hallocination to be produced, or with the phantasy

mediginistic nervo force. Should the part of the observer's body which is supposed to be pressed be undoubtedly outside the medium's range of action, it is certain that one has only to do with combined hallacinations of night and touch; in other cases there remains a doubt, which can only be decided in favour of a combination of visual hal evination with real impressions of taedigmustic nerve force, if the same supposed hand or foot, without interruption of its visibility, immediately afterwards effects a permanent impremion on a switable material. This experiment, so far as I am aware, has never been made, I know of only one isolated report, that in a materialisation sitting an impression of a simultaneously visible (but not palpable) child's foot was produced (Ps. St. VII., \$97), and this when the curtain, behind which the medium sat, was

rouge of the tactile perception to be produced by his

hears the outer door unlocked, opened, and closed, then | raised, thus undoubtedly within the medium's range of

This report requires, first, confirmation by similar

Someone, for example, is reminded of a person by seeing in a half-sommunbulatic state, a hand near him write the name of the person in question; or a ship is caused to alter its course, and to save a wrocked vessel by the sleersman seeing in the cabin the captain of a stronge ship sitting and writing, the words " steer to the west' writing. Should the view not be preferred, that the writing was produced anconsciously, and without subse quent recollection, by the hands of observers themselves in the sommonibulic state, there remains only the assumption that they were spontaneous writing mountins, with the espanity for writing at a distance, and that in this way, thus themselves writing at a distance, they brought to con scionsness ideas transferred to them from a distance, or resulting from their clairvoyance, while at the same true they lad the vision of a strange hand or person writing Is would not be surprising, if in the case of writing at a distance by mediums also, t it should thereupon be reported that the strange writing hand had been seen by the abservors, which up to the present has not happened, so far as I am aware, at least not at sittings in the light, but that would not a tors the ways ground for seeking in such warble hand anything obserthan a transferred halfaconation

The case is acmillar, when seen forms, as to which there is a cortainty that they are pure ballucinations and not mero illusions, raise material objects, carry them about, hand them to a spectator, take them back, and restore them to their places. All this may form part of the transferred hall accountions, as well as the approximation of the wans of the room in the example above mentioned, but it can be proved by the changed positions of particular objects after the sitting that there has been actually an objective displacement of material things. When these movements nove happened within the range of action of the medium's arres force and do not exceed the mode and strength of performances by means of the force, there is no reason for referring them to any other came. The sommambalic medium has then fused has indiscination of the presented forms with the figuration by phantasy of the displacements of objects, has unconsciously effected the latter by his meens assess nerve force, having blumolf the honest belief that the forms of his phantasy have effected these displacements by their own power, by transference of his hallucina tion to the spectators he has then also at the same time transferred to them the involuntary conviction that the seen asplacements of things are effected by the haducinated

Forther, I know no report of such movements of material things by phantons, from which it appears that the reporters had been aware of the necessity and difficulty of distinguishing between halfucientions and illusions, al. reports of this sort up to the present suggest the supposition that the supposed exhibitions of the force by the forms were simply muscular performances by the mediums, who som rendent in (dematecken) the plantom

When an apporition tears off its veil proces which dissolve like cobwebs between the fingers of the spectator, and when it thereupon repairs the holes in the reil by shak ing it out, it is clear that this is a case of combined halfacinations of sight and touck. When, on the other hand, the figure sets the speciator cut of pieces from its garment,

<sup>&</sup>quot;. Bisinumorphers. The waction "here reterved to in that of the medicardial creforce. There is no stages than of ordinary physical action. —Th.]

[ [Le., at scance.—Th.]

which feel stout, like cartilly uniterial, a doubt arises | matter, and thereout constructs a form of materiality which whether there is here hallucination of touch, or an apport of gradually increases in deasity, still would not only the a real o ject. If the samples, likewise, afterwards dissolve, or are not to be found after the sitting, their halinesuntory character is to be considered proved; if they after wards exist, and can no priced per piece, their reality, and and the dynamical effects possibly developed by it from the at the same time their cartidy derivation are indubitable When a figure standing within the range of the medium's action, wours a piece of earthly numbered, there remains the possibility that the medium, by his nerve force, keeps this substances of his organism at its disposal. Even in this material suspended and approaches it to the spectator, and case no protext would be given for recourse to another by the same force applies seissom for the cutting, all in cause than the medium, as has been comprehensively and halacinatory projection upon the vincinary form, which co a county shown by Janisel. Meanwhile, until quite need not for all that have, itself, the least reality. More different proof is addited than hitherto, the term obviously suggested, cortainly, is the suspicion that a form wearing earthly material and cutting places from it with sensors is no balancination, but an illusion superinduced upon the medium, who is the agent. Just because this form of 1 lesory, that is, bears in itself a number of hallucinatory elements, our it also wear halluchastery attire (red, &c.), which for touch appears as dissolving cobwob, or impaliable

It will, be for future materialisation-attings, above adto distriguish, first, whether the forms seen are illusions or hallurmations secondly, whether in the latter case their supported nations leave behind durable effects which can be exhibited, and, thirdly, whother such effects have been necomplained within or external to the range of action of the medium's nerve force. That a form is a pure haducination, and not an illumon, is only to be established by he test, that either the hand groups through it, or its origination or disappearance is observed (Pa. St. VI 292 IX 146, 147), or it is seen at the same time with the gommunouls medium, when confederacy is unquestionably excluded (VIII 435 , IX., 157 , Hellenbach's "Gebust and Tod," 114). These proofs failing, there is always only to be admitted an illusion which includes the median because this case is the common one, and the pure ballachation of detached plantous is the eare exception. At all evants, it is ease more to be remembered that thus proximate apposition is not excluded when the medium is bound or confined in a cage.

Existing reports from Spiritual circles up to now seem to be for me to contain no statements whatever which could necessitate our going beyond the proximate explanation by I aline ust on tra-sference in combination with the action at a distance of mediumentic nerve force. Nothing has over been reported of durable mechanical effects by pure plantons, detached, that is, from the medium, beyond the range of the latter's nerve force. So long as this is not the case, it seems to me scientifically unwarranted to attribute . objective reality to the alleged subjective apparitions, and forest to devise hypotheses for the explanation of them as objectively real apparitions. Experiments for determining alteration of weight of the medium during the appearance of the apparations, and the weight of the apparitions themof the apparations, and the weight of the apparations them, seem well the substitution of the apparations of a weighing machine, seem well the substitution of the authorized an apparatus the possibility was excluded of halfa constructions of during the sitting, but against this is successful to a meaning of during the sitting, but against this is successful to a meaning of during the sitting of the apparatus with the construction of the apparatus of the apparatus with the construction of the apparatus of the ap the circumstance, that in consequence of charging with means ostic nerve force, the medium aimself, even without giving off matter to the apparition, may considerably e in rosh his weight, and may in the same way dynamically weight the machine while the apparition appears to be upon it also we bout the apparition itself possessing reality and we glit. Thus, by this means nothing can be established. with certainty \*

Further even supposing the Spiritists to be hight a assume g that the meaning gives off part of his organic

In its single case knows to me where an appearation was weighed its weight survey with their of the medium. For 30 VIII 50, from with a to be concluded that it was the medium likeweigh who stapped upon the scale.

whole matter of this objectively real apparition thus he derived from the bodily organism of the medium, but also its form from the somnambulic phantasy of the medium, nervo force of the medium; it would be, do, and effect nothing than what the somnambalic phantasy of the medium prescribed to it and realised by means of the forces and "materialization" must be decidedly rejected as madeading an I unwarranted ; the phantons of so-called materialisation attings are, after all which can be said of them up to the present, really only phantoms, i.e., subjective phonomena without objective reality, but phenomena, the relative agreement of which in the spectators is explained by their origin in the sommanibalic medium's ballsconation, transferred to the spectators.

(To be concluded next week.)

A CHAPTER OF RESEARCH

ODJECTIVE PHENOMENA OF SPIRITUALISM

By " M. A. (Oxox.)"

Before I take up once more the course of my argument, which tilnow and other cancer have an often interrupted, and which my late accident and its untercard consequences broke radely off in November last, it may be convenient to put before my readers some account of what less been done and what reactins yet for one to do. The ambject, I need not now say, is ne of minite complexity, the evidence a bulky and unmanage able mass. Moreover, every week adds to its size, and makes it tempostible to deal with any but a comparatorely small propertion of it. It has long been plain to me that I entired hope to de prove then introduce some unlarly system into what is most a chaotic men of oridence of very unequal value. The time is not yet come for any perfectly estasfactory treatment of this you publish that he made them in a sense by no means relicat-

between January 1st and November 1st, 1884, I had dealt with

# Where Are We Dritting? To the Belitor of " Launt

Sin - We are often told that the educated classes are rapidl drifting into a peanmistic materialism, and the following extract Tons way to make men and wetson better is not to tell them from a letter written by a brother in Australians to a sister in Eng. land, strongly confirmation is ertion. I fail to ducover any mothous of morting the doubts and difficulties contained at the following extract, and which obtain in the numbs of hundreds of thousands Pulpit pintitudes and old-world theories are valueless in the face

for us, then and Mulame In Duchesse de Gramment, "weeken are very happy to rank for nothing in revolutions. When I say for nothing I do not mean to say that we do not meddle a little, but our sex is exempt," . 'Your sex, ladies, will not more you this time, you had better moddle with nothing, for you will be treated as men, without the most difference. But what do You mean, Monageur Countly? Y a see presching to un the and of the world." "I know nothing about that, but what I to know is not you, Madagio to Dacheme, will be taken to the sculfuld you and many other indies with you, in the executhough part with your hands thed behind your back." I hope in that case I shall, at locat, have a carriage hear with Oxo, madamo, ladios of higher rank than yourself wil like you, go in a onet with their hands bound heating "Of higher mark? What ' princeston of the blood?" "Of still lugher made" At this the company began to be aginted, and the brow of the host grow stark and lower ag M. hogan to feel that the joke grow seriose. In order to dispel the cloud Madamo de Granucost, festeral of noticing this repreand on a lively tone, "You see he will not oron set me have a No, madame, nother a min way to less a have one. The last of the condemned who will have on an special favour, will be and he heatated, "Woh, who were happy mortal who will onjoy this proregative ?" It to the last that will rough to him-it will be the King of France, The master of the home largedly areas, and all was confusion Approaching M. Camtte, he said to him improvively " My done Monuscur Cazotte, we have had anough of this mountain fares. You carry it too far, and will not only co-promise governell but the whole company. Counts unde no roply, but professed to depart, when blottone de Grammont, who was always marry, turned towards him and said "Sir Prophet, you have told us all our good for new but you have wild attents of you was the interest for some him wat his yes a same was harmone been a good the Stewn of Lambach in the cortainly, who has not I that I a as sugar a we tend it. "Woll, andmost, during the so were doubling in a sail and load value. " Was to Jerusalem."

no less wonderful, for you will then be a Christian.

siego there was a most who, he seven days and nights, walked the comparts incommitty, in the night of besieged and be Who to myself "" at which moment an unormous stone end by the enumber accolumn struck him and estudied him to doubt. On say ng this Countto bowed and retired.

These presisteens were weatherfully fulfilled, La Harpe from being a supporter of Robespierre, became disgusted with the revolution ram adopted religious ylevs. Burdy was executed in their mainl savage style by the Jacobins, November 11th. 1793. His profound scientific and historic writings, and his em sent services as Mayor of Paris and so President of the National Amonthly inspired to mercy. the series. The secreted and exemplary Maleshorbes was arrested in Decomber, 1763, and executed April 22au, 1794. Thus both mot their fate within the six yours allowed by Cazotte. Of Chamfort, the brudings wit and furious revolutional, Chambers Cyclopecha says that he deed in 1784 (within the six years of Casotto). He had begg once arrested for his reckloss expressions, and being threatened with a second arrest, he attempted enterto with pistol and potgrand, and shockingly backed and shattored. dictated to these who came to agree him he we' kunwn dockspitton "I, Schottina Roch Nicholas Chamfort, loctare that I would scener suffer death as a freeman tion be combicted as a slave to prison." He did not die namediately, but largered awhile in the charge of a gendermy. Recolor was put to death tagest 710 ... ". Capatha was eved on September 25th, 4797 and Vioyal Vaye dies J. 19 20th, 17%,

Professor Gregory says When or the text time I read has set a sound process and I mought that I was only a fiction. A serious by teaching this, he is he, of a misson new of the deplot the althorishment which would have seezed parameters of the allerthic electrical and replaced and repl have nutocod me to change my opinion. M. le Comte A, de | spiritual existence."

# Automatic Writing. To the Ed-for of " Livery

Stn.-A simple account of my experience in developm: ... power of automatic writing may be of our in encouraging others. who, like sayself, have had long to wait for what they carnestly 10 per 12 C a n w fifteen months amos I because convinced of the truth of Spiritualism by an-use of the phanomerion of elete writing. At my first above I was informed to we to a to at I was highly mediturdatic, and, when I unjured in what way, I was told, busides other phases which I need not mention, that of "writing." I accordingly sat regularly with a psychograph, (otherwise known as Mrs. Especiesce), said to be impired by which I procured in the Rope than the power would aboutly be developed, but works and months presed by without say has been done have been seen as a See and Crough sign of it, and had I not in the meantime developed another his at shetom of extra as menomin on to over 100. If he and phase of mediumship, I should have been very discouraged. I had not for the months in this way, always alone, when I began 'I consider he case curious and interesting, and I am not necessionally to get marks with the joychograph, but never any thing that could possibly be countraed into a word or even a went of one or revenue of he subjects improved about, and the letter, and I think I should have given it up in despuir, had I not always been encouraged by the guides of Mr. Egiinton, with whom I had occusional senses for direct writing, to persovere. On one occasion was written, "You are developing, but we cannot tell when results will come." I have recently been spending six works in Swsteerland, and it was during the fourth week of my stay there that the "I desire very briefly to reply to the uncatentionally unfair, power of automotic writing first came to me, quite unexpectedly, and thartens much after I began to set for

at. I was reading a German book one morning in my own morn, and had a pencil in my hand to mark any words I might after wards with to look out in the dictionary, when a slight and peculiar sensation sectoral to run down toy fingers and the percel began to more. I allowed it to run over the book in what fought volume is just received, was originated by Mr. White appeared to be attempts at letters, and afterwards gut a sheet of paper, over which the pencil is tay hand traced all sorts of hieroglyphics, the only readable word of which was "try " 1 was moving about for some days after this, and it was only about a week later—on September lat—when I had settled down again.

October 10, 1885.]

that I got my first actual communication in logible writing. I aly got a few words at a time, and then the intimation to "leave off," nometimes finishing with "God blue you," and always signed with the initial of the friend from whom I have received many letters (generally written on noto-jupus) through Mr. Reductor's mediumalup. On returning to England I was advised, while the power continued so weak, only to set twice a week for writing, and my guide never allows me to cit longer than half-an hour at a time, the writing sometimes not commenetor for a quarter of an bour, at other times after a minute or two. One incident connected with those communications. may to a next an as to her Law Sorom who driver I have there I had be noted that whatever of the electric of my correspondent) that it would be estudactory to have some undentable proof. I therefore saked a question, to ouplain which I must refer to a lotter I received control writing on paper, through Mr. Egimton's medamahip. In this letter my friend referred to a place in Gremany with a very singular name, which I then recalled he had told me some years before he had once stayed at The remembrance of the convergation, when was of no or set tance, had quite passed from my mind the 1 result for the the place written, which I remaindered distinctly (rom its singularity. I have never heard it before or since. I therefore asked him on Sanday if he remembered this meldent and whether, if the power were strong enough, he could tell me where this place was. When the pencil began to write, to my prestructorulment the word written was "Droaden," and when I asked if he mount the place was now Dronden, "You" was written. I now begun to remember disaly that he had said something to that effect in the convenation to which I allude, though, as I said before, it had person so completely from my memory that I had never out his Christian and surpasse in full. The word I had expected to be written was that of some country, such as Ameteis or Bohamm, and this best was the more enturactory to use, not so much so a proof of identity, as showing that the writing did not preced th any way from my own mind, boing indeed directly contexts to what I anticipated. I subjout my name and address sol for publication, though they are strongly well-known to you. I only wish to my that for the feture I intend, unlead of using the signature of M. B. (my notical justicals) which I have appended to several short articles appearing in " Lacury," to make use of that of " V," for the reason I mentioned when I last use you.-

# CLASS L. FORM MANIFESTATIONS

(The for wing account of a form annihulation with the title his de fairs view as an orbit ascall finish in an id dievice are ownerly this remarkable phenomenon. By far the most own po to account of what occurs at such times was published in Lienz, Fa February 25f, and when the light allowed for observation was good. There present the arms Mr. W., gas set, who is somewhat a charge conceptant, who and do to see the e arey. Fortunately the other witnesses were not an affect of and help tentimony is very valuable as corroborative of the point soud experience of about fifty other witnesses to this

On the "had September, I, Hemselgh Wedgwood, had a sisting for materialisation with Mr. Eglinton, in company with Mins Symons, Mrs. Lowis, and Mins Nam Chemer. The cultimet was an empty drossing-room adjusting the room in what we and It was thoroughly searched before we are I we and the door opening on the stairs secured by guinted paper initiated by the babes. Thus was found intast after the conclasses of the sixtice.

We sat in a row faring the entrance into the calquet. Mr. Relinton turned down the gas to a low light, and shortly afte wards began to walk up and down, when I observed, nover having acon anything title it before, a light, not building phosphorescent, but of the brightness of flame, which appeared for clothes. Miss Symons, who less very good eyes, saw it much more frequently than I did, and compared it to an electric light very bright electric-like light enauating from his left side. This light came and west for some time, occasionally increasing and following from a lady who remains anonymous, u a typical Begrenning in untensity." After a while Mr Eglinton went into the case. If there is a flaw, it is not perceptible to the naked eye.] calmost, and almost immoduately a white, closely figure began to who cance a warre and extend of they been place groups of fine

hand, of his solidity and hving namely. by comparing the colour of her face with that of the lady In one remark the writing begin, and gave an answer to the quesnow perceived, had a turbun and a bushy besed, which he made. Christian name, and signed with the pet name of my husband to brush against my face. The febraic, was caused to be Dow both I need not say, quite unknown to the medium, to whom but my sight being very imperfect in a low light I could "Eliza. I think these good tests, Mr. Eghnton being quite but are him in his black clothen, though I know where he was , suknown to as both. There is not the least doubt the writing

and presently I may dually a low white mass, which grow into a white figure as tall as himself, sticking close to him and moving with him about the room. I could not at first tall (In this column will be given from time to time such accounts whether it was a living figure or usurely a mass of white drapery, but at one time I observed them apparently three or four fact apart, when I saw that they were united by something and suggested to me the idea of a long caupty sleeve. When they cause apposite to tas the figure beckened to use to come forwards and took my hand. I then saw them side by side, Eglinton taking my other hand, so as to leave no possible doubt of their dutinet existence. They then began to retreat towards the calamet, facing me, and I followed, still holding the figure's hand, which he only widnesse at the entrance to the calculat, whom he waved me away. For our sy there were better eyes than mine observing all thu most interesting part of the score of which Mass Symona gives a much clearer necessat than I could I must premise that also had novor either soon or hear I of the very full account of a marilar materialisation pasts indeed in "Liour" of the 28th Pebruary last says. " Just at this time the medium grouned levelbly, then staggered out of the cabinet, and came towards us, paoing up and down in front of us, as he had done at the commence ment of the stance. Again we saw the bright light, which are countly died away, and then we all saw a bit of white drapery hanging from the medium a left aido, as though one corner of it were attack into his watch-pocket. We supposed that the Arab had really out off a piece of his drapory, as we had requested, and had given it to the medium hatend of to us , but what was our automisturent as we looked to see this bit of cloudy gauge expand itself gradually until a sloud seemed to rise out of the medican same on son to the floor. Gradually it seemed to take form, until it looked like a little child in height and was then slowly it became tailer, until it stend at least two inches taller than the medium, and once more we distinguished the furn of our Arab Iziand. The materialist con took has well as foot in front of us, and several feet from the decreas. The apprix and modium were throughout connected by a drupory which seemed to grow out of Mr. Eglinton's side and to connect itself with the dropery of the spirit. Mr. Wedgwood stood up, and hold both spirits and medium's bands in his. The opportion then turned to the phone and thumped, loudly and that a ly Home, Sweet Home, after which Mr. Eglint as in ver the curtame ande, and both he and the spirit disappeared total the

# SPIRITISM.

October 10, 1882.1

BY EDUARD YOU HARTMANN. ( Continued from p. 482. )

# THE SPIRIT HYPOTHESIS.

We lave now run through the whole province of phenomena beretofore observed in mediumistic sittings, and numediately involved in difficulties if the medium was and can very easily understand how by these in part highly autonishing phenomena the belief in spirits as their bulle consciousness. causes can be excited in those who, without comprehensicarrey and careful criticion, give themselves up to the manediate impression of their experiences. Add belief in the existence of bodiless sporits and in the possibility of the remarkstation, further, the yearning for restoration of the atterer arms at the order for aleans, a fin section is as in and friends, and that they fall at length a ner the farmat ing influence of medicina, and of the hallucinations transferred from the latter to themselves, and it would be really psychologically inexplicable if they occuped referring part of the phenomena to supernatural causes beyond the mediums. On the other hand, we have seen that, for un prejudiced critical judgment in the province teaverned, with exception of true clarroyance, there is not the slightest occasion to overstop natural explanations, and that the appearance of the contrary rests upon a psychologically explicable, but scientifically indefentible, decontion. The untensistity of the Sparitance explanation will be still better apparent if we trace its gradual spiritualisation in the course of time from the grossest sensuousness, by which bowever, it has also more and more cut the ground from under its feet, to the small foot-breadth whereon it now a trails balances steelf, without being able from this unstable position to contribute any real explanation

The simple, sentatous, mave, popular belief is that the deceased survive in their old forms, but with a chadowy, penetrable, kapondecable, invisible body, and wander endly about for a long time in their wonted localities before resolving on a thorough departure from this earth, and ascent to heavenly or descent into informal regions, from which they can then only exceptionally and transforily return. These sparits it by who, attracted in some inexplic able way by the proximity of a medium, manifest their presence by rappings, pushing about ferniture, table movements, writing without contact, voices, and so on, and at length by borrowing vital force (blood) from the medium can become visible in their proper forms. When an explanation of something is wented, a spirit must have to this its historical and psychological foundation

room, and makes a disturbance with the other spirits that bent medium's body there rose over the upper part thanpper

are present. Here then already is a division of labour between the spirits and the spirit of the medium, but the way in which the medium's own spirit performs its part is still the same crassly sensuous one, as that in which the ancestor-spirits also act, namely, by contact of the limbs of their invalide extral body, to the exclusion of all mechanical action at a distance. So the explanation oy spirits appeared still always as the proximate one, that through the vagnant spirit of the medium as one derivative, not in exteleptic hypnosis but in waking or masked somman

The idea once cancaived, that some of the phenomena procood from the medium houself, now demands its rights for the case also of his continuing conscious, and the demonstration of mediumistic nerve-force and its effects at a certadistance subverts the paive conception. The med amistic nerve-force was designated by the misleading term "psychic force," and its sent was therefore sought in the soul instead of in the norvens system of the medium. The explanation of the phenomena by the psychic force of the medium was now all at once accepted as the proximate one, and the assistance of the psychic force of aptrits as derivative. For a very abglit critical orreumspection until lead to the perception, that spirits having invisible, impulpable astra limbs, penetrative of all matter, and without muscles and bones, could also not by hold and calco, but must accoun plials there dynamical effects in a spiritual way, for which the "psychical force" of the medium seemed to offer the closest and only analogy

With the attninment of this reversed position, it followed that the trial must meet be made, how far explanation of the phenomena by referring them to the medium milled, eccourse to that by aparts bring their first allowable, if the former explanation should appear for any reason defective. Already at this point, probably would the spirit hypothesis have collapsed, if only the physical phenomena had had to be dealt with , but so long as the co-operation of spirits appeared stall indispensable, at any rate, for the ideality of the manifestations and for the supposed materalisations, there was no hesitation in admitting the co-operation of the re-affirmed spirate also in the physical phenomena. But already in this phase it began to be confessed that most of the phonomena were to be referred to the medium as their pingle cause. Davis (" Present Age," pp. 197, 161, 131) had already admitted that of 60 per cent, of the phenomena. and the later German Spiritists, like Hellowoods, carry this admission gruch further still

Just for closer occupation with the materialization phenodone it, how the spirit has brought the phenomenon about mean was it reserved yet further to undersome the spirit is his officer, a spirit must be able to do everything, just hypothesis Asim , speoplesceromyolved in the maive belief because he is a spirit. This belief, common to all the old to apprets managed all the rappings and table movements nations and in the main also still to the lower populace of with their own hands, and spoke without making use of to-day, has received its systematic development among the common normal of speech, the co-operation of the medium Indians, who suppose that besides the Pitris (ancestor in materialisations remained limited to suffering the subspirits) living persons also leave their bodies, and with their stances of his body to be drawn off by the spirits, who used ammortal astral body or plantom our transport thomselves them to make their forms wandering investby among us, to distant places to appear to others. A psychology which visible and palpable. The external ordering of sittings was is not yet better acquainted with the province of hallocine guided bythis idea, and no Spiritua at Brit thought that the tions must necessarily grasp at such an hypothesis, we medium could be activaly participant in the affair. This naïve however, may be constent to estimate the latter according conception was shattered by numerous "exposures," in which the captured plantom was annusked as the medium has This naive belief in spirits received a appreciation to self. Now first began the distinction between termstiruramediamentic phenomena its first blow from the onseres tions and materialisations, and finally the abutance of the tion, that the medium in that case is also a spirit, and that produced phantom with the medium had to be recognised if in the sommambulic state he has freed hunself from the as the rule, and its detachment as the exception Moreover. limitations of the ordinary body, he must also be able to do the dotachment remained usually incomplete, sometimes all that spirits of the deceased could do. It could thus be only limbs or heads, or more trunk with stumps (Pr. St. conceived that the sperit of the medium has gone out with VIII 53, IX., 146-147) were visible at some distance from his astral body from his entranced body, moves about in the the medium, sometimes from the lower part of the recumorigination and disappearance, it appeared that it streamed and dumbering in the medium's organism. The whole out wholly and outsrely from the medium, and streamed external side of the phenomena has now its origin in the back into hos, and that not as a propared form gradually madium, and only the inner side, the ideal content of the but as a formiess cloud, first gradually acquiring shape, and of sparse indepensable, and that because it is presupposed n, is liminglying into almpelessness

was the unconscious producer of the plantons, as well of and in the waking state has no other than the wax , on tuosa descend as of those andetached, that in the medium sciouniess where is unparturpent in them. critical reflection to see that spirits, whether thought of as Either he is sunk in complete appearances, or the ether body or meta organism, must in any case belong to a uncertation impulse requisite to the occurrence of the first be completely reproduced, and to tent the spirit as such to the passer and a. d.e., the pleasity of the manifestations. would no innequal, and must require the substance of a corresponds to a psychology which by the human spirit han mak, and can only gestionate through a

spirits retire to the position of more intellectual authors of of the subjective phenomena of the spectators. the phonomous. Since, however, they take possession of New If the participation of the normanicalic conthe will rest and consciousless medium, the psychient side a massiess, together with the action of the parts of the brain resign to the med um. The spirit of the median and in longer be thought of as a purely passive proceeding, on its governance over the body, and its place is assumed by with the medium's spirit estant to conceived as a concur invocantary muscular movements arise in the mediants over those parts and forces of the organism, which the modulin produces manuscript or writing at a distance. Just supporting it, and the agency of the controlling spirit

part of a plantom. When, however, a complete detachment so is tit is spirit, whose phantasy broods over the form to ensued, and the phonton was observed in the process of its we mater set, and which effectuates the forces land up filling teelf with and again emptying abself of substance, manifestations, is it now, which seems to make co-operation that the medium in the consciousless sleep-state has no It thence undoubtedly followed that the medium knowly conger intell gence for the disposition of which is a large

was to be sought, not only the passive source of substance. The hypothesis of mediate sparit agency may at this giving also the form-giving and formative course of the his true consciousness has lost dominion over his organism, apportions, of the objective reality of which no don't the medium is possessed by the controlling spirits. In ... first nesse in the Specified comp. It then needed very a proceeding the specified the medium is entirely thrown off free from body astogether or clothed with an astral body, remnant of paraisting consciousness no longer commands the wholy different order of things, and that in no case did phenomena, has even no direct knowledge of the use which t my go acoust among an invisibly with a form of the same, the controlling spirit makes of his organism and its spatial dimensions as the organisms they laid aside at forces, but just like the spectators is first aware of the death, least of all clothed with spiritual garmonts, like phonomena when they have occurred, and have become per those worm in de, so that there could be no talk of a more contain to seems. This hypothesis of possession is, of making vaible of the already present form. If a spirit course, a great advance upon the simple spirit-belief, because would be immedest to spectitors, it is easy to concurre to a fa takes into account observed facts, at least in relation to he would choose for this purpose the form and clething the external aide of the phenomena, but is a antenalic, known to them from his former ide, but thus form must because it still does not take them into account in relation

form-giving production of the medium of the spirit the contents of its normal, walting wishes to an afest to us, the countling for it but to at consequences, and has still no suspecion of relatively or the net may not a to the substances and forces of the intter absolutely unconscious desires, feelings, and ideas. It is then to mos nous f recognizable, sike one who is stuck, atterly confuted by the single fact of sommandulum. that there is a condition in which people give experience to the Thus Spiritism arrived at regarding a present edges content of these consciousness by words and acts while and all materialisation phenomena as products of the their waking consciousness a quite suppressed or debilatated, medium, and at considering the spirits only as a mast a mad in which the (subsequent or simultaneous) waking masters, whose will and intellige a reason as in the consciousness knows nothing of the contents of the some inmeshage by the relation to man feet, and not your, in both consciousness, while the latter is nevertheless aware powers hidden in the organism. The spirits according to of the former. If a medium in sommandable consciousness to a view have consed anterchately and personally to bring can by word of mouth accurately disclose the purport of a a sout effects in the realis of earthly nature, but remain previously produced writing at a distance, of which his the transcendent causes of the phononeum which the waking consciousness knew nothing, this affords eigent measure produces without will and consciousness. A proof that the somusiabelic consciousness of the medium is critical solution of the confusion of "mediminatic nerve- not thrown off or everlenged in his mediamistic results, but force "with "psychon force" must accessitate the abundon is somehow participant in them. This is proved by the ment of the sample sense belief in spirits, for whatever fact that all manifestations show a content corresponding to one spirits may have in thouselves, a nervous system by | the mechan's intellectual level and sileas, that they are all means of which they could produce discharges of acres coloured by the local and personal tone, so to speak, of the force (as reaches electrical discharges), they have as little as mer and Adva . ; from a companion of transmission a inducidar system, by means of which they would lift and I be a constant prevenue of the asime have an tail efforcement from the a hand to us by more a se-Thus the hypothesis of the derect agency of spirits is transference, hallucitation is the preserves on a new rerethick to that of spirit agency excusively mediated by the consciousness (in consists, with the constraint of the medium, the latter is now the only executive, and the thus attended increased deportance as the recess.

of the production is still reserved to them, and it is for supporting it, must undemably be admitted, it follows that the present only the bodily side which they have had to the passage of the controlling spirit's ideas and relitions can 18 thereby, so far as necessary, temporarily dispessessed of the other hand the co-operation of the controlling spirit the "controling spatit." It is therefore the will of the reace in the control over the organism, such as actually rote not spirit which so directs and guides the inherent exists between the somulatabular and waking consciousness tion on mise proceeding from the medium's beam that in masked somnambulists, Rather must the single dominion studes or mediumistic nerve-force is developed, it is the mediumistic phenomeon bring into play, be concoded to strange spirit in person who through the corpse of the the sommandulic consciousness and the parts of the brain

ness of the medium those deares, feelings, and ideas, intellectual source, but it demolishes the spirit hypothesis. which are requisite for the spirit manifestation. Then For H the spirits have, or from the position of things are away goes atterly the conception of possession, for it is able to reveal, nothing better than what we ourselves concerted tota the heterogeneous conception of inspiration, already know, away goes the single motive which can be the hypothesis of possession has become refined throughout assigned for their disposition to manifest, the wish to make into the hypotheric of eneptraters.

part acres or or a a array of a hypothesis above all superfinors, a fifth wheel to the cart. 1. Let (4 o but west of the and were the hovers At the stage of the possession hypothesis spirit-co-operation the historical information of the reader

possible from a sperit to a man, as it is possible a ween generally no ideal content thinkable, which would be In a more Management there are still deficulties in this naturally mentable of derivation from them supposition which are not to be under ented. The spirit of a doctaged porson has no brain, whose vibrations could thought-transference from one man, to others, and of clair induce mindar vibrations in a human broin in proximity mechanical modiation by other vibrations, as we can suppose litter f, for what the Lapuring spirit knews, it can only, them in the age of the abetween persons in manediate failing organs of some perception, have learnt by chief proximity without contact, thus fails for spirits who would voyance or thought-reading, and what the medium's tenneference without material mediation, which seems to only be received by implication, that is by thought suppose on the ground of her, name communications chirrycyant) and impring spirit between the thoughtthe latimacy of the rapport between turns being thereby of the difficulty aborent in the problem of thoughtprejudiced. The misfortune here only is that at the reading or elairvoyance, aggravated by the contract of porting sommembules consecousness, but spirits have no direct or indirect boddy contact. beauts, neither the parts supporting waking, nor those somesmbalic consciousness of a man are more favourable from which Spiritism thought to have drawn them down than for that from the sommandalic consciousness of another | There are some general methodological axioms which experiences, not transferable at a distance.

athers at relating to the purport of the communications the existence of which is a see price for the first time by This purport is usually be in the fitt accusal over of the this principle of private privates men qua and these present, and at the highest comes up to Now wher the with the exist of cause we should if but is more above it. The fact is just enterligade of allow the second also to a re. Sparition thust five our

most be confined to eliciting in the somnambalic conscious, the somnambalic consciousness of the medium in the solo as wiser and better than we etherwise are.

Apart from these equisiderations of form and substance, and the unit of the inspiration-. top at free on the site of the supposition the a toring an start or o may thought a to as also are igence at his disposal besides form the controlling spirit conveys from its conscionmess . . . ber suppressed or displaced) waking conscionmess, At anto the sommandatic consciounces of the medium. Now the stage of the representation-hypothesis, this supposition no first is the intellectual authorship of spirits reduced to its longer existing, it must first be inferred from the particular true and finer source, because demanding as its correlate not import of the communications that the medium a source samply a temporarily lifeless organism but the unity of balle consciousness was not able to produce it. As long as body and soul of the executive person. First at this turn nothing is known of the hypercethesis of someonbule the sperit-hypothems enters a stage which enables psycho nursory thought-reading, and charveyence, all those t. as the cases becomingly to deal with theriously communications pass for revolutions of impring spirits, the same the same is to seeve only for this is want of content faceign to the waking consciousnow of the medium, or ovidently so by way of his sense Thought-transference is a conception throuly current porception. As soon, however, as those three sources of with us if there is spirits" it could well be supposed knowledge have a sonse-perception are conceded, there is

Spiratum, however, cannot dispute the possibility of w yance, without cutting away the possibility of impiration transmit, and there only remains the other kind of thought- sommands lie consciousness receives from this spirit, can be mated to an a la to so la er Sport transference. The interpolation of the thought-reading for (Langestrayen) that the controlling spirit may be at any reading (or chieveyant) medium, and the kleal purport distance whatever from the nor costing medium, without to be perceived a thus not a solution, but only a doubl ng distances, according to our experiences, no thoughts that for the reasons pointed out, thought-reading from the or words whatever can be transferred, but only somible macrons event a sex suspens a much more deficult for and most lively hallucinations, such as seem exclusively the most on the hart four or thoughts of another man, able to be developed in the parts of the beam sup-especially one sitting by him and connected with him by

Thus has the whole spirit hypothesis resolved itself into supporting sommanicalic consciousness, and their thoughts a pure nothing, when first the direct physical force performnus, therefore, hardly be conscious with that lively halluon ances, then the production of materialization phenomena, atory sensuousness, rendered possible only by the somessi- and lastly that of the ideality of the manufactations have bulle parts of the beam, which are proximate to the seaso been shifted from the supposed spirits to the medium apparatus. There is no nort of pretext for admitting that Whether there are spirits or not we have not here to inquire; the conditions of thought-terreference from a spirit to the at all events, they are relegated, if they exist, to that beyond,

man, there is nothing apparent which could compensate are not to be transgressed with suspunity. First, principles for the difficulty suggested, so that one has to fall back on are not to be multiplied without pecessity, thus a second the naive popular belief that a spirit must be able sort of causes are not to be supposed, as long as a single to do everything just because he is a spirit. Just that, nort will suffice. Secondly, we should as long as possible for instance, which is characteristic of the effective abide by causes whose existence is guaranteed by experi representation of the spirit, while that with which one should aslong as pass settly to o with natural cars and hot could soonest credit the spirit, the wordless ideal substance | touch supernatural once without argent access ty America of scatenoes to be written, is again, according to our these three as one Spectus or Siemes. The second as you given, natural sort of cause which we possess a the To these formal difficulties of transference are added; becomes a recog sessenties out along a the last the supa secure not copy as a given, when a a sor of cause

boundary one, beyond which the explanatory power of the first sort of cause ceases, and to show with the most careful crita, no why its sufficiency ceases beyond this line. So long as this dofin tion of boundary and this proof are not forthcoming, the burden of proof lying an the assorter of the second sort of cause is not discharged, but Spiritism has not me yet made the least attempt to acquit itself of thes obligation. So long as that remains unfu filled the spirithypothesis backs any glummer of scientific foundation and warment, and all philosophers who have adopted the spirithypothesis of Spiritism have shown thereby a serious deficiency of critical encumispection.

### The Society for Psychical Research and Madame Slavalsky. To the Budes of a T

Sin. Several months are the man of S. Psychical Research hold a month, as a N. H. o. agreepering he sublication of a report then promused on the reads of his chit to the headquarters of the Theoraphien Society at Madras, made certain statements. He declared that by the opinion, Madamo Blavetsky had been guilty of perparenting random femals on the credibity of Theorephiata and there are nells, had actually written the lutters impacted to besy tha Chembers Office Magazine, had maployed the so-called shoute as a conjurer a last, and had been the actual winter ampted by confederates of the latters I have received for several years, believing them to come from a Mahatma

A the time, it appeared to me that the orlience Mr. Hodg non-had collected in I man, no far as this was foreshadowed in his specule, was worthbors, his marked of suppry second to have and the second of the second

nave less hain into nemy acronic proteket, his conclusions or coming the plant or take Asyst to be meanpatible with facts wit in my we knowle and his theory concerning the letters I of received, very low of which compared the whole n e n published or som by Mr. Hodgaon,

the state to the last one makes the we might be brought forward could be evolved from the ago metarists, and by a comment derivable to wait for M 1 a report, so that the whole ruse might be dualt Miles of the Arms of the Arms

presentations made to Mr. Hodgmer by Thomsphists since the report, as containing matter which would justify as a that might not have been adequately accounted for by the expenumbana pat forward at the name:

art the extension and as said have elapsed since the ment and that report has not yet appeared. It seems to that the among which the nathernhound the Society for Psychical Research luces their personal is open to grave objection. A series of ch-

Imposing misconduct of the blockest dye to Malanie Blaval -men made public on the manaption that they would altemutury by apported by testimony. If this buttoning was not ready for hamodate production the automospets of M It should redelation night equally to have been delayed. By the arrangement schooled Madama Blavalsky's reputation is doubly imprograd, and her friends are parayiest in regard to the for which Psychical Researchers have anidously developed as great incomes they would desire to take for her defence. For these a respect—can be made to accept " testative and providenal measures can only have to do with an appeal to the reason of hypotheses of the most orief kind, provided they are only petrone interested in the controversy of which she is the centre However street, leasty, and unfounded are the attacks made upon her, a tofence which involves the recognition of paychic plan nomena ant nover be urged with success in courts of postice,tribunate which are not yet sufficiently familiar with the occub side of Nature to entertain the manufality of occurrences true scouting the experience of daily life. But to deal at length with Mr. Hodgenia forecast if his conclusions before having his report available for analysis would be to court the objection the se re seng an investigation with the results of which we are unacquanted. To remain affect, as the other hand, is to ancourage the preferrally accommon benefitled we who by reason of our interest in Theorethy scrutinise the facts concurring Madamo Blavnicky with attention, are overwholmed by a conviction of her guilt.

For the annuant, therefore, I can only mrn to "Litter" as the principal organ of payoble discussion in this country, and nak you to make Indice my protest against the course that has per the proceeding out a trace of the course that has per the proceeding out a trace of the course that has per the proceeding out a proceeding out to be a correct of the course that has per the proceeding out to be a correct of the course that has per the proceeding out to be a correct of the course that has per the proceeding out to be a correct of the course that has per the course that has been a correct of the course of the course that has been a correct of the course that has been a correct of the course that has been a correct of the course of t boots pursued by the Society for Psychical Rusesvell, and to " and to the the facts afterwards", and that further on a allow use, while postpoung a fuller criticism of Mr. Hodgeon's conclusions till the much-talked-of report is essect, to make a feet prolimentry observations,

to this day has Madama Bheataky bean allowed to see the and yet Mr. Horigans sound to have had those letters in his no "antocodent protumption against the facts," It mannet be

promession while still at Madras and in frequent intercourse with all persons at the hondinarters of the Theosophical Society I am enable to reconcile this tocumprehensible neglect of wirenda seem to have been the first step he one towards setting at the trith about the letters," u. a sate that he conducted his inquery with an open mind. M. this, it appoors to me that until the letters are shown M Blacubday, smil y H o may be, are fairly were the total may draw from the result of inquiries concerning the lettern

carned on behind Madana Blaversky a lack myself to sift the matter to the bettem I applied to he Society for Psychiant Research about two months ago, "permutation to take such of the lotters as have been brought his country to Madanio Blaratsky myself, with the view of or axidamations about them. But my request was a the ground that the present containing of the letters

y, having during the past few weeks speak considerthe time with Madane Blaratsky, and having minutely dissussed with her all the circumstances of darkest apprecion on earning her, I have returned from these interviews entirely material in my own mand of her annocence of the offences in poted to her by Mr. Bodgeon. But pending the unfairly delayed publication of the promised report, it would be premature for me to go into details so to the groupen on which I regard the outragouss attack that has been made upon her as the result of Idandering all long the line

### CLASS OF PSYCHOCRAPHY

pince, for the purpose of conducting experiments v exclus written with the white curyon that had been placed on the , we've with Mr. W Eglinton. The senten communical at to 1 state, were the world, " We will try a.m., and tomainate at 12 55 a.m.

that, as far as he was concerned, we should conduct our experiments in the care manner. I but not previously mentsoned my proposed coarse of set of they are

was to came psychography in four different colours is a relation anknown to the medium, the particular works to by chosen at mardous from a book unknown to all present,

The employ of a page in the book from which I wished certain wheels an air in on an in he as transcribed on the slate by psychography I chose in the following manner. I took a piece of asomy at random from my packet out of fourteen come written in the respective colours. than in my posteriou. The last two figures of the data I — The slates upon which Mr Koulemans and myself had written wrote down on a sixte, secretly to Mr Eghuton and Mr. Koules the directions were now, for the first time, turned up. The

mans. A similar result is a the dat figure of the date in another or to, who let show a secretary as not the or to space those in the 1830 of he so aboy of the same. If not to each time the having as we transcripted. I assumente down secret i tiere un bem, pareneg the state of which I had written, and is wowards in the cable

I then asked Mr. Kenlemans to select a took his distanfrom a bankesso of the visit of one only appears of 100 volumes. I requested him not to look at the title or in acy way to seek to discover its contents, or to so place it, when selected, as to reveal its nature either to Mr. Eglinton or tay-For his and note it. One melt, in the Column, \$2.5s. Page, \$5 to be a made for a section of insertions, and note its united by the made for a section of insertions at may be addressed to the life in factor, "it, fixwee-street, Charing Cross, \$5.00 to be a made for a made in a made in the made in his made in the street, and to the experiment did either of those windly present the and of the experiment did either of those windly present the made in the made in

At I desired to Jason four water of pairs graphy in as many different column I then requested Mr. Keulemans . decide this point and to write down socretly on a slate the names of the four edougs chosen as the order in which he without them used. This was done, and the abite upon which he had written these details placed face downwards on the table. Nither Mr. Eginton nor myself touched this alste until the of the seatter

M. and private ing make respice Mr. Ken enametal leaster who are the words I had chosen should be cometed forwards or on awards, e.e., from the beginning of the line or from the end. This he did, electing that they should be counted from the communications. It should be noted

"That it is not in character of the book chosen at retailors the services girely protected

(2) Mr. Kenlomans selected the four colours from a number lying on the table.

(3) The noder in which these were to be used was known only to Mr. Kanlemann

(4) The numbers of the page and has closest to chance from which I desired four particular words temperated, and the area sens of the particular words, were known only to sayard

(b) Mr Egliaton knew nothing (a) of the title or character my on a more by a a with allow many one " to of the book, (b) of the opior of the colours, (c) of the number d pagest (d) of the annalog of the line, and (c) of the annalogs

(6) Not any of these details were decided to on note turn distrely proceding the experiment

These proliminaries completed, Mr. Eglat on took are ther though we should naturally a serio be a finet variable of slate, which was cleaned and annealed by Mr. Keulemann or a Impacts. It was destable of which or make only a fer al-Ligar the upper face of this slate were placed the four crown as Upon those, and completely envering them from riew, was put the book. So arranged, the slate was then hold by Mr. Eglin ton a right hand just under the edge of the table, his left head so gott in the firms a spect of my left, and both Mr Kuthanana' handa basag placed to are regat for at all elemely per timued what took place. At is time was the wate pesting Tong see S. A resognate the notice in . We higher a skiness, nor was there any support for a shife

I then impaired of Mr. Egonesia a new ble co-workers, treannually present, whether the experiment was satisfactory to themselves , also whether we were likely to be successful. Mr Koulemans desired aloud that the reply should be written in Letters should be andressed to the bour of 1.10 r. 10. white, that being one of the four colours then on the slate. We abortly beard the sound of writing, the completion of the groups as a milicated by the customary three raps with the person or the state

On enquirement we found the book and the four craywas pany with Mr. J. C. Koulemans, attended at 6. Not that as we had placed them, but on the slate under the book,

A softer state with the bank and erayons similarly arranged, In reference to an impairy, Mr. Eginton conductly agreed was returned and tell of its senter green only stated. After the lapse of some minutes writing was again heard, ubimetely followed by three bues.

On examination we found written on the top surface of the state (and of course under the book) the words :-

Crisia sumb	MINUS CHO	-,	
. 1	Enforces	110	Whi
(2)	Thus	111	Blue
(1)	Here		Red
(4)	Marke	151	Green

The chall as in each case vester at the and if he wire

The slates upon which Mr Keulemans and myacif had written

was found in be- lst, white, 2nd, blue; 3rd, red, and 4th, were heard on the table, these soon became stronger, and grey The number of the page written down by myself was the sixty-first, and the particular words chosen for tennacription by means of the alphabet in the name way. I say " with some from the fourth line were the sixth, the fifth, the first and the difficulty "because after every two or three letters were indicated thurd word respectively

October 17, 1865.]

werk -which turned out to be Crookes "Researches" -it me as follows :--

"Here I must bring this enforced rindication to a close." The sixth, the fifth, the first, and the third weeds of which are as written on the slate. The experiment had been perfectly successful.

Another experiment was then tried. Mr Konlemans took another slate, and drow upon it a parallalogram. This he divided into two equal squares. In one he drew on owle heat, and requested that the sketch should be septed in the blank square. A piece of grey crayen was put on the slate, which was held under the talde in the usual way, and m a fear accorde, on being withdrawn, this had been accomplished, with the addition of the words "I am not an artist, as you see. Good live to d bloss you." The sinner than intumsted.

JOHN S. PARKER 16, Craven-street, Strand. The above account of this most recentful source is perfectly

J. G. KEULDIANI. 34, Matilda atroot, Baryabury.

P.S. Although I had requested to have the colours used in a certain rotation, I had, at the moment Mr Egilintus held the slates, quite forgotten here they were to follow, except that while was to come first. J. G. K.

(Apropos of this truly remarkable senses it may be interestare and instructive to our readers if they will compare the various theories which may be broushed to explain it and its contiguipation.

1. A quantization spirit was able to perceive, eather in the number of charrogantly upon the alutes of the experimenters, the one as met a sy waich the particular words were to be the scale. You make the person is a many control that words medium, whereby to we will be read-

2. The complex method is a water was convexed as the to the anotherious until of the modern by thought? an foreign. The unconscious to a data the constraint of the man stores of latent memory or by classroyance, was able to a re-ethe particular words required, and it was able by using the force of the medium to write the words

The difference between these two theories is to lattic me for as one argument as encertard, that if one he true the other tests

3. The complex method was conveyed by thought transference to the entections trimed of the medium. He then was a series of divisio dexterity" managed to processes all olutacies, and to write binnelf he works to prove

I has use however the arcet statem ats if Mr. Farmer as to he was in who the slad with he being and senence as a was lieus emently by ander puts not go her out if court in a theory of fried on the part of the medium

4. There was no thought-transference and no paychography Mr. Farmer and Mr. Koulemans, both well-known to our readers as most where only crime in that they are Sparittudists, have deliberately commonted this account after, perhaps, going through the mockery of an experiment,

Either 1 and 2, that is, psychography, must be true, or 4 must be true , and the writers of this account must be charged with fraud. We cannot permit the acceptac to go bulting off with lame excesses to neak a rise neaties in (3).

Let us narrow the issue, turn the tubles, and bring the inrestigators to book.]

### CLASS M .- KNOCKINGS AND RAPPINGS.

Allow me to contribute the following abort account of a scance held on Sunday evening, September 20th, as an addtion, under heading "M.," to your "Records of Psychical Phenomena

The man festations which occurred were not startling is character but are 1 th sk worth of nonce for the reliablicanew and simplicity. We were set ug could be to be a touth two "happy" improbes of the local "tabelon" appeared on the but the ground floor, below which no mean means exist. We accuse, and they consented to pray for the contour of the supposed kept a coulde burning the whole time, and everyone's hands evil and from the unhappy girl. Their attempted exercisin, best attempted by joined to however, proved of my avail, for on Menday the girl alleged that

order of the colours chosen and written down by Mr. Roulemans | those of their neighbours. After a few parentes, faint knocks succeeded, with some difficulty. In spoiling out a short message a pause occurred as if the power to produce knocks was for the On turning to the fourth fine of the sixty-first page of the line expended. The knocks were produced on the table, on the floor in various parts of the room, and once on the top of the plane, which was momentately behind my chair, and quite out of reach of anyone; they were of varying emphasis, and alway occurred in answer to questions associated two or elif wace.

After the message was completed, a pause, longer than mud, occurred, daring which the person through whose medianally the manifestations were taking place said he folthat "the influence" had changed. This was confirmed, on the question being asked, by very load raps on the floor. The power being new sooningly stronger, we got a piece of string, and passed it through a shoot of note-paper near the edge, the strung was held "taut" by two persons at opposite sides of the table, and the suspended paper was placed midway between them. In this position, in shower to a request that each should be, tapa were made on the paper and board by me, the tapa were of such a nature that, to the best of my knewledge and behof they could not have been caused by any ordinary movement of the paper or string. The mumber of tops on the paper corresponded in every case with the number soled for I as uniterating, in this impures also, the intelligence of the operator I was not myself able to count the number of lags such time, but the three people nearest the paper agreed that they always has corresponded. After this all indications of occult power

### THE MOTHER THE WOMEN CLOSUED WITH THE SUN !

This rolunie, which may be chosen as a well-narrhod specimen. of its class, exceeds in its pretonnous all that have hitherto appeared—and these are not for-in the same line. Such historica of medianiship are likely to mudeal these who take thum literally, and as they are so taken by many readers they are worth examination, always supposing them to be written in good furth. As they book shows namy of the features of a true development of mediamake, we must express it genuine, although doubts may arise as to whether the source of the inspareties is a good one, for the expering lady who calls bornell The 3bether" channe to be not only, like St. Catherine of Sieuna, or her knabler rival Journa Southeott, the Sprane of Christ, but a superhusian ber the Divino Mother, the come bull of the beane lead. The author's name is no ren, but the book is written by a gentleman who call The Recorder," and who tells how, in the year 1877 and

necomposition by two younger once, cause to his ............. to find hours reduced in circumstaness and lot starthoents, we must suppose the three were lodgers. He had been in the habiattending seasees, but the apritual gifts made known through that which had yet come a saything which had yet come a series of a different and series for higher elementary. It is in the series and the series are series of a different to the series of not have had any other opportunity of ment of a mediumalny from its commentate have seen this will perceive that the ease in not an aucous in to except insumuch as the teaching law been manaparehetaled The automatic stratus and drawing, and the cert of ayed used to Montrate the messages are just like what most old Spiritualists will recognize as among their earliest and simplest experiences. They are for the most part inferior to the work of for both drawing and writing we are referred to the Bible for confirmation of what is well-known, that lath were force in which revolutions from the higher world were formerly made. After these panifestations had gone on for some time in

The septemy is now serviced to us through your modurates -2

of your Divine Nature, only to be organized by your letting it symbol in which overy truth is conveyed 

through any narrature of a progressive development of medium will enable us to discover where the work of the true and hely So, some time before the first unreiling. To spirits, known as obsession and possession, begins To learn thus we must lave, first, a complete understanding W & T and how in which also is told that Franchis a same a case of the manufacture of the development of mediu. and recording, in account, the descending of accompanion of account of the state of gial tidage of The Free-in-One.

These pretensions are like those of many other mapper porsons, who take the symbol for the spiritual truth, and much able to the expension of spirits of the swith-tending class. take expressions which apply to that truth as having been we the got for a set to the So Catherine, who was a privile 1 as a Model a soul programme to come a land boost married in before. But it as in the sense that they all there that reception of the Spirit which was shown to John in the vision of the New Jerusalem or the Bride. And this symbol embedies an energy of truth, referring, not to asparato individuals, but to the effect of the anguard special described by Christ as His assent coasing, and indicating a higher condition of the race

There are abundant signs of this outpouring at present beings the special message moded at this time, and for which the tene is ready; namely, that throughout every degree I he a me female, being essentially one, are equal, and he exist starout and complementary elements are in a m tweet to their when a xistorion. They are out of place him relatively to each other, but the coming fiveless will restily sho dulocation

A women to a mar plo to fraught with weighty meaning and the state of t a half recignise its reality Want PL - Parguer - Inc. it is were more stoom and acknowledged, that taughed count, the

woman quanton," will be untied, with many other metal problems which now ment to defy explanation. In the mean tense every kind of mintales must ares. Those to whom the trath is spiritually estructed (is snything given not spiritually ?) cannot receive it is all its breadth, for they are human, and their lescore of recultion and transmission are limited. But each the who can recover and transmit at all, i.e., who is what is a called a medium, loss his or her portion of the meaning " and none can pass it on quele intact, for it agent by limited, more or less, by the kerman pursonality

We have had many hooks containing amnouncements like that of the one under consideration, and we shall have many more, all varying in outward form and expression with the dispositions and expection of the transmitters. One of these, "The Two-m-One," by T L. Harris, tauches on the mystery of the Howeverly Marriage in a different way from "The Mother." " Sympostants," so far as I understand it, where it me more truth,† and a writer, signed "C. A. P. " in ..... \ Independent, your further into details then any of the others. Each writer probably has something to convey which is wanting to the rest, but such and all seem to think it due to their high calling to disclaim all connection with "so-called Sparitualism and Speritualists. If Speritualists, us a hody, had over laid down any conditions of bollef or non-belief to which they required meent, there might be some reason for this disclasser As at is we are reminded of the Plantiness, who prided themselves on their belief in angula, spirits, and the resurrection of the dead, yet were farce in their descendation of those who could extest the reality of experiences which would confirm the possibility of such facts, and make them letter understood.

All that Spiritualism unplies is a conviction of the reality of a corean class of phenomena diabelieved in by most educated

" The Hebrew Prophets called it a barrisch.

1 This may in a minister. There are many things " hard to escapeshed by " firm prophets."

The following meanings at delivered to "The Queen" on the persons, and generally ignored by the scientific world. Must of us, having this conviction, hope that the comprehension of these facts will lead to a higher knowledge than has as yet been attained. And one branch of this knowledge will be that of Free days will there come over your spirit the mighty radies the nature and limitations of augustion, and the value of the

Another direction is which intelligence may be expected to come with appritual light into the world will be a dearer per-The signatures (three astorida) are declared to be "the popular of the nature and causes of mannity. Many of our a st calightened recipionts of the Sparit have hald that hunney Many of on, I believe, know the algorification of references as generally, if not aways, accompanied by presention and a to Egypt in spartial communications. We have but to look careful observation of the character of different mediumships. " find "The Piece of Egypt in Universal (Sparitual) authorice, known as inspiration, course, and that of the lower

of the functions of the brust, and their manifestation - rector, medican a individual aburnotor. Thirdly, the conditions of brain, either from disease or disproportion of marti, which are favour

As far as a large soon there is a real as on new convermount implicantition and cases of meanity, indeed, they have been known to show so many features in common that the peasession of one has more than once been made a protect for an impattation of the other. The symptoms most usually taken hold of when it is wished to prove a quadiuminite person liseaue are the seeing and talking with spirits, and the attenuate writing and drawing. But we know that these circumstances do not prove a man or women mad. Persons having the best-induped minds, and the highest and percet moral natures, have often the " of mechaniship in all material degree , no, for example, ... the leaders of the Covennon, and many hard-working, a are a mid women, whene whole two laves been under hely you are. We shall find, I believe, flotterory statety of small our deposits on, and is determined by the character a a receipent, as imposted by the limits. Thus, if the stameton for duty and greatness is much stronger than that is a histories a wotu an individual, the clusterer of his mechaniship will to replicand hely for it was he used by the good spirits who are appliestion of a second all modiumships we find an include variety, ranging apwards to the a dy mint or martyy, and downwards through a long series of peorly-organized beings to the sensitive, whose prime, cracity, or no milimu makes thus or has the ready recipient of will, earth-tending influences. Accordmy to the channel through which it center the message will be either a true and trustworthy one, received with Joy and transmitted mtact, or it will be a false statement of partialy matters, a a vitiated various of a quiritual message

There soons to be some analogy between the poor lumities fascion himself a King or on harpered and he medium who us "clothed with the arm." But the creek are in a me respecta different. The madman believes himself to be a King, and crosses to provious acts adversion, to his idea of it. But the ambitions lady, " before whom Angels and Archangels bow," has metaken the meaning of less message, and identified horself with the truth she has to convey In one cause, perhaps, the afforence is one of degree but the question of "how much " is an exceedingly difficult and complicated one, and the purmit of it would lead ins further than I would follow. The samplest cases. both of madicanchap and humally, are often found among the mustor of a lumitic mylum, and a careful study of those might holp us to discover the point at which real brant disease begins. and whother, and here far, it is accompanied in each case by medaniship or by population.

And the Science of the future, which we may hope will deal more with the internal or real, and less with the external or phenomenal, than the Science of to-day, will find all these questions complicated and difficult in the degree that their solutions will onlighten and ennoble the race S. E. Dr M

To Cornerospense, -A number of communications stand our for lature mates. We will not a price or choicest an early date. Several replies to Hart arms have also come to hand Those will be used in rotation

<sup>\*</sup> I meet not say that this understanding counse be gained by viviceting.

a very instructive experience which throws light on the an adjacent from and the whereabouts of los very experience met not comployed in materialization, and is suitably introsuces! when I am own go with simultaneous appearance of a most a ter form. The partative sufficiently exprime test It is extracted from an " Notes by the chese different manufes around I have quoted, i.e., of the double, Was. The follow to account to a document the person a bolong to the same entegery, and have also remove to surround is onethat was familiar to me ten years ago. I have seen inv self, and others have related to me the mine experience " John King's" well known face, minus his board desired over Mr Williams head. It was palpably his don sehave seen under the drapery that covered the kand as a rin that carried the well-known "sparit-lamp,"-the selfluminous cake, as it appeared the duplication of the black contalence and white cuff of the medium; and that, when there was no question of his being securely held, and accounted for

The first letter which I quote is from Mr. J G Kenlemana 34, Matilda-street, Barnslary, and bears date July 13th. He is writing respecting the duplication of the body of the medants, and he gives these cases

of I. Our medium, Mr. Hunk, was around at the table, hands ne ne must be march. Towards the close of the manon-after. a to a liking to the contact a tremendomory percental light, illuminating the outers room, suddenly appeared ver our hands, every one present being visible. I saw the double t the predium standing creet and holding this qualit light in his outstrotched right land. Yet, at the more mesticat, I mw the medium model to his usual place? There was no one present where I could possibly here metaken for the figure representing the tacdium. It was Mr Husk without any doubt, and the person aiting behital this figure was also save at all. Mr Hank

in power, was ever them to or case or that of a close phosporescent glow on the partly meanwared fore-arm of the form holding it. But by this time the form was droped, and it scale in the familiar voice of ' Irresutable' (the schor spine of the predium or his double nothing could now be discovered.

\* 2. On last Sunday, July 6th, a somewhat smiler manifelation took phot. As on the previous occured, "John King had left, bearing this time, the power to a familiar openit smooth as ' Ebeneter

" The latter showed hisuelf at a best, moving in front of the moduum. A strange progularity in the attengement of the drapery disclosed an interspace of black material between the lumid and abouilder

As the black material had all the appearance of a cost alogoe I regrecated " Ebenomet' to exhibit his area. This he did by stretching it out full length, showing the unmutakable cont-store and a separate piece of courser drapery concooling the hand. Not wing altogether astinfied, I again requested to have also the loss, acce of rapery allowant, on my object being, not be pay as sea atte day to his particular part, but to try and discover new constraints of he in a man I was contain he would a nearly held by his nearest aitters, one of whom kappened to he a hely fracted of mine, far from being convinced as yet

When be arm reversary to he is as my of papers was approaching no law to larger us sprighted were the coat sleeve also, I managed to peop undernouth it, and I saw to modeum in his mosal place at the table.

I must remark here that the business shite, used by the forms to exhibit themselves, was exceedingly powerful that evening, on account of having, during these present long days, been exposed to the light from early morning. Also, that on the previous occusion when the double was seen, an extraordinarily powerful light was present.

" 3. I find in Dr Nicholn' Biography of the Davenports' that a hand was seen in the calends, partly covered by a contalcore and a wristband- just as those worn by the mediums

4 On another occasion, s.e., with Eglanton at medium,

some only, took out the pins and threw the papers on to the I noticed a similar strange incident. A full form appeared, there was second and N was he entro was noted which was described (by Josey) as being a negro king. The arrange has been a really and the second which was described (by Josey) as being a negro king. The arrange has been white, and the second secon e there we were known as a market as a factor and There is a regression place to appeal an account of after the scarce. Unfortunate or place to appeal an account of after the scarce. was then actually wearing the identical such and links of which we saw the counterpart on the form. I have no doubt that has have called the to be few arought to it also. It may be true that a strong light will provent the autorializations altogether yet it may be possible for some more "advanced spirits to obtain and exhibit the senter operands of those form productions in a minimal light-1 mount a tolerably good aghta the more glimmer (altan onited 'full light'), which merely shows the darkness it is semi-mounted

SATURDAY, OCTOBER 24rd, 1885.

### AN APPEAL.

Our conders will have noticed that we have lately been extracting the space beretofore given by us to records of psychical phenomena. This extension, we are glad to say, has een received with approval. The fact is, while we shall continue to consult the tastes of these of man readers, "for contemplation formed, we have a strong desire to put forth from week to week, and eventually to publish in book form, a body of evidence for each and every prise of the psychical manifestations.

Now the rais fast becoming an organ of no mean circulation, and must be read by usary more than actually buy it. We may very safely estimate that on the average each of our readers less had one psychical or spiritual experience, and knows a friend who less had one there. It is enough. We ought to be mundated with evidence

Thus is far from being the case. We shall not stop to consider any reasons wherefore, which might be alleged, but which would seem derogatory, as lukewarmness, distike of trouble, complacent enjoyment of privileges, and the like We prefer to think well of everybody and we really believe these have little inflaence over the minds of our readers. We put our finger, undoulstedly, on the sere spot, when we say that this deficiency of evidence is due to the dishke of private individuals to see their most intimate experiences blazed abroad to the public. But this is, if we may be allowed to say so, a sort of hysterical sore spot. It is the effect of a too sensitive imagination. The idea of publicity is to delicate persons like a horrible nightmare. They seem to see themselves revealed in herer, glit to the gaze of the whole nation. The greedy British quidawae will gobbie up their story with his hurried breakfast, digest it in the train, and talk and laugh over it in every place of public resort. It will be such a entastrophe as almost to change their place in nature. The boys will run after them in the streets. Crowds will assemble round the house.

But with these debrious visions compare the facts. The story appears in our columns. It is read with only half an eye by many But it I mgs, perhaps, conviction home to the breast of a few into breast inquirers, and is observed very attentively by those wao are quite worthy to observe it, and who are capable of drawing most useful conclusions from it. It is pointed out also by the writer's self to friends who have already heard it, and who are pleased to be able to read it. The world in general shows no signs of being acquainted with it. The busy hum goes on, neither

broken by any pause of wonderment nor growing any louder. The horrid next door neighbour gives his usual cival "Don't want to know you " salutations, without apparently being informed of the extraordinary revolution which has been made In short, it becomes just a little provoking. It is an agreeable disappointment.

But if such is the case when name and address are appended in full to the reported experience, the omessen to send it when name and address are not obligatory, becomes, if our severity may be excused, palpahly a dereliction of

For, in brief, what is the too wel.-known condition of the present time? Philosophy has long been agnostic Mysticism cannot rose its head. Religion is perishing Only the grant form of Science is seen, darkening all faiths with its shadow

"Whither is fled the visionary glosin? Where is it now, the glory and the dream?

All is grey, grey with the greyness of the inner cerebrum. Ignorance is bliss. And the more knowledge a man has the more, too often, now, he seems disposed to seek refuge from thought in the excesses of a deplorable sensuality.

But from the very lay ast of Science is evolved a Hand to save us. Already in the pages of Bacon the forefinger Throughout his work are scattered was seen emerging references to psychical facts, with constant declarations that the method of setence should be applied to their investigation and proper understanding. These hints have been overlooked by anrrower intellects addicted exclusively to physics. But now they are bearing fruit. He among the rest are touched by that Hand. And ought not us to have a better opportunity of knowing the facts than any others? But, alas! our renders who are in possession of the facts do not us. Would that they were all moved by the spirit of a correspondent, whose arties elequence we so much prefer to anything we could my that we here insert an extenct from a letter of his to us! It should have more effect by its example than any persuasion of ours could produce.

I thought what is there loft for me to do! Why have I been preserved so wonderfully? Why have I had to undergo so many trials and experienced so many sufferings to spirit? Now I think I see a glimmer of truth. New I think I see the rhy and the wherefore. Now I know why I asways desired to be a missionery and preacher, and was proverted

You will acknowledge with me that three escapes from drowning in electrons, two serious falls, dislocating my arm each time, one-half of the calf of my log taken off, and an excape from fa ing down a precapice, walle seeing a companion in Switzerland, and yet to be well and hearty through all, is enough to make a thinking man ask, Why fand say, "Show me my work, Recry day the concection gains strength upon me that that nearly is the apread of Spiritual teaching; spread of the limited of specit communion; spread of the truth of the Fatherhood of God and brotherhood of man, "to teach men to study their Creator in all things, and in the uselves in particular. To study Him and His creations—for there is nothing more To rouse their numbwood, that they shall look up to their Creator and know they must stand or fall on their own merits. That they are gods and goddeness in surbryo. That man is the commencement, the end of the ray of light proceeding from the All light. That he is not the poor remnant of a anful fall, but the beginning, the possibility, of all excellence. Such I rest to be the call. To it I respond with my whole

Yes! in the hands of men and women like our renders is the future. Let them, therefore, no longer hide their faces, shining with the rays of revelation, from a world in

darkness.

"Thousand knights to do Han honour Hath the Holy Gheat enrolled, To fulfil His sicred purpose

Made their bearts with counge bold."

Let our readers add .-

"And ourselves are just such soldiers, Chosen of the Holy Chost."

# RECORDS OF PSYCHICAL PHENOMENA

(Continued from page 501)

[In this column will be given from time to time such accounts of psychical phenomena as seem to be worthy of permanent record. Beyond the general classification indicated, no attempt at tabulation will at present be made ; that work will follow in due course. In furtherance of this object we shall be pleased to receive from our readers briof reports of phenomena subject to two conditions (1) That a colourless statement of facts without comment is given ; and (2, that contractions are necompanied by the names and andresses of those concerned, not necessarily for publication, though we should naturally prefer to be at a berty to publish them. Amongst the phenomena referred to may be mentioned I -Materialised Spirit Forms
M. Rappings, knockings, and
Stone Throwings
Y. The Spirit Voice.

### CLASS C .- CLAIRVOYANCE.

[We thank our correspondent for this fine case of clairvoy nuce. It will be observed the vision may have pessed from the conclusion mind to the lady's. How for in this "may" always present in clarrogance? We should be glad if any of our roadors can send us examples in which is other I what mind but that of the subject can be cone, ved as taking part ]

In the early part of the year 1868, by carrage reporting painting, I gave directions to thy coach can to take it to the conca bridder's, distant about twenty wiles, for that purpose Accordingly he started off early next morning. The main being most trustworthy, bosidos having boon many years in my service I felt perfect confidence in his safe conduct and thought no more about the matter. After breakfast I went out as usual to occupy mysesf with my favourite paramet of gardening, and while so employed I distinctly sew a vision in and air and soomingly at a distance; my carriage appeared being run away with by the horse, which was plunging and kicking vidently and taking his way by cross roads ontirely free from all control, the conclaims nowhere to be seen. Very much shocked, I can into the drawing-room where my two daughters were sitting and related to them the terrible vision I had just soun. They only laughed at what they considered my very unnecessary approbensions, and both added: "You know what a careful man he is, and how very unlikely snything of the kind should I tried to feel reassured, but found it impossible to happen." forget what I had soun. Next morning the coach as a presente I houself in the deepest distress, and she was ig tears at related what had happened. When half the arrivey had been got through he stopped at a waysale inn to but his horse, and foodsaly took the bridle off, some sucher noise under the carriage startled the horse, a very spirited annual, which quickly mining its head started off at a gallop; the poor man pursued, but soon distanced, lost sight of both horse and carringe. On the herse went at a furious pace, and after a male or two, forsaking the main road, in consequence of an attempt to stop him by some people upon the road, dashed down a farm road, where he was driven rate a ditch by labourers who rushed out of a field, frightening the horse so much that he attempted to jump the fence and was upoot, and the carriage greatly injured October 3rd, 1885.

## CLASS O. -PSYCHOGRAPHY WITH SLADE.

I Inside two slates hold above the table.

II. Upon a state not being teached by the medium

While on a visit to America last month I took the opportunity of paying Slade a visit. Having made an appointment with him, I purchased a couple of slates in the town and went to his house (223, Shawmut Av., Boston) at two p.m., Sentember 12th, as appointed. The main thing I wanted to do was to will hart Edic. Then she made rapid passes up over her face,

musiy myself that the writing was done by some invisible intelligent force and not by any form of conjuring. I obtained no proof of identity, and I think that the signature give a was probably forgod by the power that wrote it, as nothing was given in the messages which really showed any signs of the presence of the person concerned. But I did not feel much concerned about the nature of the messages; all I wanted then was to got writing on my slates under conditions that would thoroughly satisfy me. I will here only describe the best attempts, which I think would have convinced almost anybody

It was broad daylight, and Slade and I sat alone close to a window on a bright waservaftermoon. Afterwarious exhibitions on Mr Sin less sates, I took one, which had not been out of my sight, and which I had prevately marked. I held thou firmly together or themy left have ( exemy prevensly put a bit of poned inside) right up in the air close to my car. Sinde held the other end of them with his right hand, and then we joined our other two hands. I watched with the greatest care for any attempt at fraud but there, as I hold the slates in my hand and scrutmused them all over, I heard writing going on a side at a great pace moshing up with raps. On spennig the sea easing was covered with a aressage is ricortang to be from a triped of anno. I had asked a question, but did it it lot Slade see it, and this in score had ovidently been seen by the supposed sport in partic slate that was written on a side, and took the other one alore I may montion here that the table appeared to be a common deal one, and I was allowed to 1 onything I liked to it and sit well back and lock under it all the trace. We kept all our legs turned tway from the table and sat at a corner. This time I held this one state wither the corner of the table, and tight against the under side, with one hand; Slade held my other hand with both of his, and I carefully watched all his limbs. We soon got a meaninge with the same segunture, being an answer to a remark I made to Shale about the previous message. Thus time Slade did not rough the slate at all, and I took good care that nothing case is idled with it. I took the slates nway and have then with. When I put the same it more than table alone first, so nothing me my pulled it of those of his hard another or the same see etter a give my log a very firm ger i at the knee, which startled me considerably. The writing uself is interesting. the pencil wrote on one slate only when two were used, not marking the other at all; the t's are all crossed, and the i's dotted, the dots and crosses being quite incluted, to that the pencil must have been lifted, not morely drugged away and the pace at which it was written was very surprising. Altogether, I think I obtained the writing in as satisfactory a way as I was able to devise where in a c-lin and matter of fact humbar, and was commissed that Sale help at produce the writing. I experienced rather strange screen as, especially when I held the chites alone.

SPIRITISM VERSUS OTHER THEORIES.

October 21 - 55

and an answer? Messey viol Hartmann Myers and Carne

for T & rack " - 'z Nokl

Much as I admire the ingenvity with which subtle minds invent theories for the purpose of evading the rulgar conclusion that gendue payche manifestations are what they profess to he, I same still hold that conclusion more exodible than we those theories themselves. But then the idea of personal comportality is not so rederently improbable to me that I feel called upon to execute all these amazing feats of montal gynmatic-to accomplish these portentous achierements of entellectual legarilaments—only in under to avoid it, I do not feet bound to exhaust all possible hypotheses before acquieses that which is must obviously suggested by the circumstances of the case. Nor can I erem indulge the genuine philosophic sector --- doubtless appropriate to students enanceared of abstractions as a some majority of us, years for more as the contact of the which forth, and whatever difficulties, already grasps, the survival of our beloved, and the permanence of human love. I do think, however, that the paralatons accreticism, and fortility as evasual displayed by some I have often had messages orthor written or through the table of the most distinguished of those who admit the facts, ought to which could not larve seen known to the medium or the sitters teach Syrritate not in he too confident that the " new Beats" of For manner, four times the largest of groundale reveat the Cape, their cherished lighter as all-authorant foundation and quite were odd no with a n few days after they occurred, and the mangable of disturbance. But on, on the whole, I than this correct date given and the last one it was said "will be called belief with them and take their view of the phononena, I after you. The clift, was called after me, and I got the news a degre to my something here on the most recent alternative wastern and the second of the country the facts, smally, the hypotheses of "telepathy" and "the unconscious

iften wouldrif these sugments writers have ever senously naked themselves what they mess by the term "solf," what the and a man A welf" surely implies a connectous aunitification—or a potential conscious blentafication—of many where we have a community of the word dogs not make an couries, them about the time that I recurves the same tide, what does at signify? It denotes a clausing-or a perceived no. I am not a follower of Locke, but I do think afterwards verifies, in onch case I had seen a generance of the tide reduct common-sounce of that thinker has entablished exact time expected, did not known three month or not works. In this much in the many on "Personal Identity." Locks a definition requires to be widowed in order to include polthat as well as netted connectous sulf-alentification, but, no widened. I guillot concure how . .vertal. One individual or solf, is a given self-identifying unity of experience, and, by the very sature of the seacception, excludes the experience of enother as belonging to him; though, no a be sympathy the first may conceive and share that of the Now if this be so, are not these writers either impaintly changing the questial, such commonly accepted connotation of the word "self," or also and rectuntly describing the thing number in a solf-contradictory amover, when they examined their thousan of a multiple, or secondary self? And if they have a manning of their own for the word, let there my

suit in the circle do, or our flority the phantons appearing a appaking, or writing in chood slatus, with thomselves ? They curtainly do, and can do, no such thing. Indeed, if they could, and this theory of a " secondary" solf would not apply, From the Bentur we have to the most little of species and externity of his work to de to personal contract to the state of the state speech or writing. What is alleged, thets, is that this "self," or personality, which appears to the medium (at the man moment in his ordinary waking state) to be different from the contract of the contrac musee his questions, or smother's questions often as a year of han, not an interest if it should prove out? I denote that the median by a state of the median b with a harden to the same of t mentify with his own ordinary self, which professes to be some-

The transfer of the property o

one else, and which acts as if it were not he warm ; " a

here we have one, and not two individuals? If there he two strange, however, that subtle and learned thinkers like contemporaneous currents of consciousment that will not mingle, and which, so far from identifying, we are bound to distinguis? which, moreover, as far from being able to identify themselves as belonging to one conncious unity or self our only acclude such other is belonging each respectively to a different conscious using or self, what is the justification for, what is the possible setteenth of, alloging that they do not after all belong to two distanct, but

he midividual or estacions unity the very supposition bein that they do belong to two, and not to one? I ment own that an a closed state, which, presumably, the medium known to me, who lack the sublety of these writers, anything more, nothing of, and to which in any case he does not, and counst absolutely self-contradictory-and I was going to add abroad-

cannot possibly be invented or conceived.

Even if it were true, which, however, if is not, that in information is over given in this way which has noter been in the knowledge of the medium or of the circle (take Lord Easking a ghost story in Lord Campbell's biography), this would a to we have a wlutton of the difficulty I here urgo against so, an acces a most count may be said, what these we are the first of a new conscious, but a second of would on this subject venture to refer my readers to my essay m. May be also a Van Louis of Private V of the Unconscious." To me it is quite inconcervable that intelligence can be unconscious; that somes to me a contradiction in terror , and them, since effects must be proportionate to magnests a scatterous agency, and yet we are to assume one untheir cause, how can we refer intelligible effects to uncommissions, as . elligent cames? But here we have intelligible effectswe have precisely similar effects, moreover, to those we attribute, in other cases, to conscious intelligence. Counciousness we know by experience as an actuality, as a core cause. Sulfconsciousness assures us of it, and when we percure the same, a vis a manufacture of all popular we at once attribute h was a first to be anything at the performance and the same and the s and when we hour other budies speaking 5 W III express thoughts, because they are intelligible to us, or delay

acts which seem the possilt of thought, essection, will, like our own, -aspecially if they comprehend, and respond to us in an appeal to number.—we do not be state to attribute these bodily phononena. to conscious minds similar to our own, we do not heritale teamong that these are other persons like nurselyes; and we get o very well upon that assumption. Now in (gentine) payebre phenomena we observe promoty similar effects, effects apjewently the result of quantum intelligence, because exactly like the results of it where we know estudyen to be concerned a the production of such affects, and exactly like the results of s we were the heat of our belief, other intelligent persons are and seed, or a remaility, altegether, and not from the concerned in them. Yet we, some of m, houtste now so much again. to draw this conclusion, that we prefer to attribute the phenoment in such materices to a came which is not a core cases at myself through the muscles of my hand, with elaborate argumily, all, but an unverided hypothesis merely—one, moreover, to them of m at least, per so inconcerrable, if not self-contra dictory. The difference is no doubt that, in the case of other (se-called) living persons addressing us, we percure, not only the manifestation of conscious intelligence apparently other than our own, but also the same sort of solid bodies and organs as for my many meet, my commonsumess. What, there is we consolves possess. But doos it not argue, lot us say at least, this unconscious sestmore defect of imagination to conclude that, if those are absort, alien intelligence cannot be present, though all other evidenote tend to prove that it is ! At all events, the question is whether the other hypothesis is more probable than this. Of to accept, for he knows that "matter," "body," as simply a how this percept, or concept rames with the senses and knowing faculties of the subject, or porson knowing, "Matter" is a very Protous, and expelle of assuming myriad forms, solid, fluid, caseout, othereal, and the very same matter which is perceptibly green now, may be imperceptibly subtle a moment after, though elearly demonstrating its presented in other ways. Only a few ores of the solar mys are polyable to us as colourwas a rely beyond the scupe of our present source.

for a fact of a Three to have been self bounded or was The end of A aline-widing admice in the last number of A Licence, by Messes. I this and Ecolorismus, escales apportunely to regardle the very possibility of devicency gones of the physicismon, to either af the persons product to the first physicismon, to either af the persons product

quite smother individual? In what arms can it be true that readers of "Lacure" by usual g in one of the who fully admit the infinite possible variety of organism, rightly regarding it as only the objective expression, and, as it were, point of objective communication (according to capacity) with the outer world of some individual spirit, or soul (see his owny on" Sympogenests ") should appear to prefer this ourious and onwe also hypothesis to the more obvious and verified hypothesia of Sperition

Here is an agent writing, let us may, an anawer to a question know the answer. Sometimes information may be given of which robody present knows anything. But even if this were otherwise, sayely the position taken by Mr. Myers (see Nonefreedle Conforg) that an argenious anagram was written automatieally by a "necondary unconscious seaf" in noswer to a question put by the normal and conscious sulf, is a somewhat gratistous and extravagant one. Think what it involves. The question put by one division of myself le understood by the other division or it could not be survered, and it is answered in a most round at we at first not even intelligible to the conscious division of myself, only understood by me after a time. But how was this question understood by the second division of myself with the day of the state of the sta ameror consected equally without contrionment? All one. 5 conscious, even though that would prominably be hapotent to produce this intelligible answer, so manifestly the effect of an agent intelligently responding to our own conscious question." It a prown maxor, we are fold, to our own question, but the a so r of ear " unconscious secondary soif " But now, in what senso, is at the same self, since I am not conscious that the enswer proceeded from myself at all? How is this unconscious ever to a price a word or case on solf, which, if it be anything at only reduced f. But an automorphis solf could not possibly be then identified with a conscious. It must always rounds allow, and man of the properties of the first of the most being to die some self at all. It is to be a new of the other of appothetion unity, a " secondary self, for a court of another sphere of being, or individual ty altogether. The conscious cannot identify taclf with the connetous, nor The n w pourt to un to come not from cornelve- n. from some other stell it must ever so appear, therefore, f personal identity consists in potential self-adoutification, there s in question here of an identical salf at all, and the a water must proceed, on it seems to do, from another agent.

met et moder the greterqueness of the notion! I an aof what I did not know, and yet I did know-only without conresources. My correspondence is informed through my hand on unienting an intelligent and intellige do mercage to my an at the my sources sight touch, houring on O it es a from . but it really comes from myself, though not

It must follow that I may be utterly evesponsible for what my mouth speaks, or my hand does, and yet it may be I who speak and do it, though uncontaining. The confusing and confrom , a ro of such a theory need secreely be pointed out, towns at idealist cannot be state for a moment which alternative for the case in d in low him as in a in, and the formation of the state for a moment which alternative for the case in d in low him as in a in, and the large and the other a foot and perception or omorphism of the knowing and perceiving solf or yet in a more on an image of each because out off from the jets, of some individual thanker, while he is well sware also ; all othercourse with and influence from the other. Now, can ver an one part of un, and not the rost? Really this is too grotesque a notion to be seriously maintained or discussed, and possibly it is only meant as a clover sket, as a subtly-rested reductioned abnorrhem of a quant " scientific" hypothesis. Again. way should those secondary solves invariably pretend to be somebody class systematically personate another malicanal? profuse to be what they are not? Thus, surely, is quite mexphesisin. Why gratuatously, and always autradical t Or do they never knute who they are themselves any more than we The matter to the a Louis limit is an in totally cofferend know that they are ourselves? Do they not know that they are ourselves my more than we know it! Perhaps after all the simplest solution though a very commonplace ene-is that they ere no such thing. # ON THE DOMINANT CULTURE.

BEING THE TRANSLATOR'S PREFACE TO DE. HARTMANN'S \*\* Springerson.

The author of this pamphlet needs no introduction to the already large and mercasing number of English readers who interest themselves in photosophy and its problems. He has almost certainly the widest is flue ice on speculative thought in Germany of any contemporary writer. In this courty it a great work—though it has laid later developments. but become accessible to a larger circle of readers through the result transaction by Mr. Compland, of its with china extensive acquaintance with the principles and restate of products science, which Dr was Hartmann contines with high plane. sophical capacity, must impart to his equinous sat tion if enterest and authority. In this respect he is comparable to our own connect philosopher, Mr. Herbert Spencer.

But however distinguished the author to make it will seem that the subject of his present intellectual a ertax of requires some apology. It is really in this very care a statue that the justification is to be found. The disregard of facts which on y ignorence is any onger nones by leav, and which whitever their transign to the land should in experient reason to very deep problems, is hardly less than sent labour to the thought and server of the cy. However long this may have been felt and sain it was still soon presumptions for any made bad ima into ice, by such may to pronounce such a judgment. Inc. the authority has recently become so supposing as indeed almost to remove the represent stack. In this country, the Society for Psychical Research, an embodiment of the continuout referred to." has, within the last three years drawn to its make, and within its everying soily, while of the most eniment reprosortatives f service a so play, and literature. The marker of its incidence and resociates has been stood a more soing. similar want? at are even now in everse of formation, under the best haders up in other countries, and less organised atten is a tac se to meeter are engaging the metgies of competent investigators in many quarters. From the partie Press, representing the older and stal document culture of the "Aufklacang, with its virtual leney of everything which could not be at once explained, or its shallow attended to refer every phenoric oil a extery to credulity and fruid, there has been both or no encoracement. Everything, on the controls which could discredit a subject pocularly exposed to discredit has been engerly seized upon winde the weighty evidence, which only ntuder but f the subject knew they were seldous allower to bring forward except to books which were scarcely over reviewed, and toczef re whom see unknown and unroud by the public Journals on becreating a trees, were received to collection and discussion of the evalence as it more, but these, again, were not allowed far play. The great firm, for matanea, which has the monopoly of the sale of literature to the travelling public, has never allowed any paper or book dealers with this subject to be exhibited on its stale, nor will it even supply them to sider. Papers numeters ig to the vulgarent frivolity of the populace are dis-played, but such a journal as "LIGHT," for which the following translation was expressly prepared by authority of one of the most in operated thankers of the age, is not respectable enough for the fastalious vendors of Bare Bits, Tit Bits, and Bird o' Freedom, t In short, there has been a general consent that "Spiritualism" should be hustled out of sight, or be referred to only in terms of contompt, or for display of journalistic wit and experiority to "superstation." Nor has this opposition been at all conclusted by attempts to discriminate facts from their aparatist contemporation

It is hardly a serious imputation on porrad sta toat they are subject to the providing intellectual authences. Greater responsibility falls on those whose profession it is to welcome every foundation of fact for the discovery or recognition of bruth. It will be an instorical repreach to the Royal Society that it refused a hearing to Mr. Grookes' paper "On the Experimental Investigation of a New Force," and to the British Association for the Advancement of Science that the admission of Professor Barrett's paper "On some Phenomena associated with Abnormal Conditions of Mind," actually led to a revision

THE INFLUENCE OF PSYCHICAL RESEARCH of the rules, with the object of preventing the Association from being similarly "compromised" in future.

In Germany, the projudice was exasperated a few years ago by the public stion, by the late Professor Zollner, of the report of his systematic investigation with the medium, Henry Slade \* great scientific attainments and capacity, Zollner united a very sensitive a specifion, and it seems probable that the literary and private persecution which ensued conduced to his premature death. Intellectually and morally opposed to more than one of the prevado g tendencies of thought and practice, he turned on his assurants with a polemic which was not from from since v. " inin which the different topics of controversy, corrected in Zollmers view by a composition of the permit one of thences he was contest of were mived to with the westined assertance. This circumstance, it was beseen or considered by Dr. von Hartmann somewhat to crack from Zollner's value as a witness. That is, or I sai it, a very unnecessary concession to an 45 invest of the energy Zöllner was mad !a report which was spread after his de. ! with no better justification than the unpossibility of otherwise requiring the common of his avidence for the phenomena of

Spirition." It is emphatically desired and conclusively disproved by the testimony of well-known men who were in no inate correspondence with Zollner up to the time of his death. I refer to the report in this place, as well because Hartman as remark angle be thanks to give some possible colour to it as and became it was stated as a fact by a for room physiologist in the Cotimporary here is a year or two ign. It is absolutely lambers

Li some of his nivealizations with Shale between the by the live, to the occurrences which drove Slade from this country, and with which Zollner was fully and exactly acquainted), Zollner was associated with the distanguished usen of science, Wilbeln Weber and begine who also ether testimony to his. The first profession I conjurer in serie by, Saranel Bellachim, after progenges, makest tion with Saule, also declared, by formal ath avit the facts he had witnessed to be merpheable by the resonance of los art.

It was about thus time that the public exhibitions of the magnet ser. House, frew fresh attention to the long dormant ar bject of measurement to Germany, France, and England, some men of science reverted to the old experiments of Braid, and whose at II detaying the specific militaries of incomers a ackie wheliged, as emplotely proved and exempt from charlateary, the extraordinary offects producible by suggestion in the state classification. The important development of this branch of psycoology by Dr. Ed acitisk in the Unical States of America-who gave the apt term, "Statuvelence"-is adverted to by Hartmann in the text.

The next fact experimentally established was "thoughttransference," without physical contact, and, therefore, without the possible to of ture of there is therefor an gestions of to reso the of the Sogisty for Psychonal Resource in they country being core farmed by the independent investigations of M. Riclet. in Paris

Meanwhile the say hogg of the above modern is reterring general "sommandatio" was bore, at mose over some softers. The recently published work "Die Philosophie der Mystik," by Dr. Carl du Prel, of Munich, has the merit, quite apart from the author's theory of individual transcendental subjectivity, of showing the psychological continuity of the various states of meeting consess onces, from ordinary drown to the wonderful fac acties revealed by spooch and setton in the deepest somming bulic trance, as also the connection of these subjective phenomena with some occasionally observed in delation and meanity. The discovery of this continuity and connection makes entirely credible, and even a priori probable, the statements of many medical observers of sommambulic patients, t which have long been agnored or rejected as incredible, by one side, while by another they have been accepted as demonstrating a  $n \neq q + 1$ spirite. Profoundly interesting is an Prela exposition of this second consciousness in man fairthar to all in its weakest degree as common dream, but rising in clearness, coherence, and intensity in exact proportion as the organ of waking consciousness is numbed, and its functions are suppressed.

Another writer of philosophical repute in Germany, noted for his investigations of mediumistic phonomena, is Baron Lazar B. Hellenbach. His experience and conclusions are embodied in a work published at about the same time as du Prel's,

<sup>&</sup>quot;I do not by this mean to imply that this Society is already committed to the so-called Spiritualistic phenomena. That is not the case.

t I hope I have not done in quives to these publications. I confers I have not studied them, but the titles are empresive, and they are to be found as Merses. Smith and Co.'s bookstalls.

See my translation, "Transcendental Physics," which can be obtained at the Psychological fire a Association, 16, Cravon atrock, Charling Cross. ; Selections of this crossers will be found in du Prel's work of which I have nearly completed a translation, to be published, I hope before long.

### SOME NOTES ON THE DEVELOPMENT OF A TRANCE MEDIUM

While taking part in a private Sprittag stic circle I some transcaled my of the tall the received one germ is in their r teranges? And the are they attendices from the spiritual world? or at least are they the merensemen are majory -

with we are not some easily learns off!

With a not I was obliged to come to the conclusion they were germ in some they would lecture on congratiquet proposed on the spir of the moment, and deliver, in most cases, a really re narkable lecture dealing with all points of the subject.

Or iers I did not think well of

I does done with an informing the circle, that if I could be developed I would permit myself to be so. I am not yet able to speak, nor have I entered the successions trance, but the fault hes with myself since I would not person myself to fall into unconsciousness, as I was desirous of carefully observing what would imppen. It is now five months since my decision to try this experiment.

To are the development appears flow; others of more expensions say to be repaid.

For an entraoth og resulted. This I now understand was t is result of ever consisty on my part to holice the state.

My observations confirm the statement that mesmeric affactice cannot be received (by a person who has never been meamermed) when the will of the patient refuses to have it, or, on the other hand, is ever-unxious to a duce the state.

Fine, ug to the agreement at the end of the month I subsided a ints perfect posserty. I said to myself, "If there be anything it can corre, if not, I cannot help it

At the second sitting, in the passive state, I felt a distinct magnotic current pass with wave-like motions over my body. This was preceded (and almost always was until very lately) by a feeling of a hand placed on my ferehead and back of my head This feeling was very distinct, but as the sittings are mostly in the light it was no visible operator. I make this remark because

although our circle is a genuine one, yet it is necessary to give a stranger every proof that there is no fraud. The feeling of the hands was distinct. They were also described by a friend present who is clairvoyant, who sometimes saw hands only, sometimes the operator as well. The operators often change I has discrete media as, when going under control, convolsed, speed. This I sometimes thought was "put on." I found the some thing occur with myself, and that the shocks and accompraying starts of the body I could neither help myself nor

The wagging of the head I took much notice of when it started with me. I found that as the root or merewed in swiftseas, myrands of ators appeared and conscious ess would soon depart. This, thun, appears to be the easies... but roughest, method of bringing the pertent into the ancessmone trance. N will find that when there is no " winging," and the unconscious state is approaching, a great aglit appears which increases in receivity as the emiscionistical departs.

While in the condition of "conscious trance. I have Ind. : my stem and flow of language, which I have a ver ween forth, because I wish it all to be done without any conscious aid in ray part. Once this has resulted in my "conscious trusico," and as corremates on as surgular, I will here solutinly declars that, I sough I was perfectly casesons (trucks) the worse were attered from my organism, but without any aid from myself When I entered the room I was strongly improved to leave at thes I threw the feeling off. When I went into the trimee state (consecous) I was still more impressed that I must leave and that the attrig should cease

I was then ry her on all y used. So the only I was bruced upshoulders well back be divery creek, id gitly thrown back. My tor me was compressed against the neck; the back part of the tase e of my throat was also forced back, all this gently but very turnly. I was powerless. My toront new felt very dear and open, and the we not can a clear as a bell. " Got out of seco-

Now I did not speak thus, norther did I have any idea what was contag, and my own feeling was one of wonder and bewilderment at the way in which it came for, I dul not do it.

The reason why we were ordered out I understood afterwards. We obeyed the order. A lady lad been in the room that day who was almost, if not quite, a lunatic. As Aman luaves traces of this margnet sin be raid by means of which the dog acousts been, so this unhappy lady had left traces, or parts, of hor in meter and surroundings, which would have proved bimolul to a medium of sensitive was was as the "open" conditionsthat ev I mig it be averted. Hence the warring I will answer any questions you like to put I hours finishfully,

A Vision and Cone,—"Pasquier, aged nixty, ex-game-keeper," the Counte de Tarragon writer to us, "had for a consuctable time gone about, by the help of at class suffering from painful and extensive alcors of the legs, which the doctors failed to care. Before going to the hospital, which he dreaded, he came to me, asking if I thought the spirits could not do him some good. I said that they often did if their aid were invoked, and I exherted him to do so; but that if he could come to me next day, he might consult some good doctors, who were coming to my house. I saw no more of him for eight days, when I met him, without his sticks, after the service at church. He said that he told his wife of my exhortation, and that at night they prayed together that good a first would aid him. During the night, he said, he had a dream of seeing some one in the room, who quieted his first fear by making signs of friendship. Then the stranger took some of the herbs which were in the place for medicine, and put them into the jar containing the greate which hokeptforapplication, and signed for them to be made into an ont-ment, waved his hand, and disappeared. 'I told my dream,' said he, 'to my wife, when she said she had had exactly the same dream. We prepared the outment, and kept applying it until, in eight days, my legs are quite sound and well.' He showed them to me, and I saw only the scars of large ulcers."— Le Spiritum.

" Quant mulls fleri non posse, prinsiquam facta sint, fedicanius,"

II.—DEDUCTIONS AND REPLECTIONS.

(Continued from p. 508.)

The logical deductions which we must draw from the facts here narrated are partly of a physical, partly of a philosophical kind. With regard to the first, almost every thing is still voiled in obscurity; one thing only is clear, that is, that these state writings, which are impossible necording to the laws which govern our phenomenal world, must be ascribed to a transcendental origin, and these occurrences which take place in our world of sense must either be accounted for by Zullner's theory of another variety of space, or be ascribed to the passage of matter through matter (Durchdringung der Mate. v.).

If we first analyse these events in their separate parts we shall find by

1. That the hypothesis of prepared slates as made assible, since the questions are put at the last moment, or written without the medium's knowledge, and then answered correctly.

2. The place on which the writing is found, is quite inaccessible to the hands of the medium. In some cases the dark room, in which case the medium himself sits among double slate is securely locked, leaving only room inside for the truy morsel of slate pencil.

3 That the writing is being actually done at the time, can be beard.

4. That the medium is not writing as to be seen.

of slate or lend pencil. The scrutching sound upon the slate this figure illumines his face with the air-exhausted glass is distinctly audible to the whole circle, and the sound tube filled with quicksilver, lying on the table—the light always corresponds to the side of the slate written upon, produced by slatking which not impeding the phenomenaand the bit of pencil used. On one occasion, when a so that I can see it distinctly, then the collective evidence scaptic placed a morsel of red chalk in the slate, the writing of the facts I have narrated proves to me the necessary of was done with the red chalk; besides which, the bit of the existence of a transcendental being, even if thereby all pencil is found to be wern down after the writing is done, the conclusions I have come to during twenty years of and its identity can be ascertained by its having previously

respect to the philosophical, we add the following

answers are exactly pertinent to the questions.

7. This being can read, write, and understand the language of human beings, frequently such as is unknown so-called unconsciousness has brought me to recognise a to the medium.

nature, or species, as regards the intellectual side. It is no be out of place here to mention, this subject must be conuse whatever to fight against this proposition; it is not for this sidered as capable of development, whereby the principle of person or that to draw what logical conclusion he pleases "conservation of energy" and of Darwinism in its meta-

from facts; and this is a very good thing, otherwise humanity

Prendo Sybils
Antiquated Tymonical Lines
Antiquated Tymonical Lines
Records of Psychical Physical Phys a spirit tecording to Kant, as a being snoply of thought, is an unjustifiable one, because he had to experience on the subject; the fact that they are inv sable does not prove that they have no materiality, or four for every scientist knows that there are combinations of matter which are imperceptible to our senses

It is only because I do not wish to be accused of having formed too lasty an opinion, that I proceed to give further particulars which lie at the root of these experiences, without committing myself here to any further assertious, before doing which I desire to have still more experience.

9. It these beings speak, they do so in human language.

10. If they are asked who they are, they answer that they are beings who have left this world. (Perstorbens Wenschen )

11 When these beings become partly visible, perhaps only their hands, the medium sitting in a dark cabinet, the room in which are the members of the circle being only dimly lighted-when I was present two candles were burning—the hands seen are of human form. I need scarcely may that I should not advance this as evidence, had not every precaution been taken against imposture, the medium's cont being sown down the front and the sleeves sown together behind his back, the stitches being cut after the sensee was over; and had not one of the party, while the proceedings took place, stood behind the medium in the cabinet, holding his lands.

12. When these beings become entirely visible in the the chous formed by the circle, they show the human form and countenance. It is very easily said that in this case it is the medium himself who is masquerading. But when the medium speaks from his seat; when his neighbours on either side declare that they have hold of his hands, and at 5. The writing must be actually done with the morsel the same time I see a figure standing close to me; when work and study should be thrown overboard. Since, however, on the contrary my views (as set forth in my So much with regard to the physical point of view. With "Philosophy of Mysticism") have taken quite another course, and are only further justified by these experiences, 6. The writing is done by an intelligent being, since the I find as little subjective grounds for combating these facts as objective ones.

In the "Philosophy of Mysticism," the analysis of our transcendental power of perception, into the different 8. It strongly resembles a human being, as well in the ramifications of which I afterwards inquired. Some agent degree of its intelligence as in the mistakes sometimes made. must also necessarily be at the bottom of this power, a These beings are therefore, although invisible, of human transcendental subject. Now, from reasons, which it would physical department is led up to. The fact is, therefore, net a clare sea ruf

state-we true, and I would therefore advise everyone to see for a street by this mothed. Here the whole process takes name before the eyes of the spectators in full light. the medium is almost entirely possive in the proceeding in does not require to know the question asked and often operates solely by his more presence, though more powerfe ly when his hands touch the states—because there is no know very little of our solar system, compared with a force in nature, which is not weakened by the effect of distance, in short, the whole proceeding is so simple, that it were sufficient for him to reconstruct the system in his may be likewed to "look ug for knots in rushes" to scent lown mand. From few effects he arrived at the right cause, clin in Allegania

the folding slates should be locked, so that the surface of the slates in the earliests. According to this logic, the land genius. On the other nide there are, without doubt, existence of the fixed stars may be denied, on account of doubters who after witnessing with their own eyes the in appropriate elegantations that they are only seen by night, which evides thy points to a great American humbing There are browns sceptter who auggest that the medium us to with his foot, and I have no doubt that some journalists wil amore that they know at a distance both of judgment, and that instead of becoming enlarged by this to in any space what took place at a wall-lighted table in V onno, far better that I did who was atting at that to do I am not going to address myself to such clover persons for it is well known that the most postinately blind acthose who are determined not to see, and those who are not open to reason extract be convinced, even by the most well proved facts. To fight against facts with the ways, w ever, as though a pot of earthenware should strike one of rea . the hopes of shattering it.

On the contrary, if a person of sound and clear understamping, that is, one who has not a pro-conceived theory and indeed consider it beneath their dignity to examine which he is determined to save at any cast, will attend one into them, deny them. It is pretty evident on which side senace for sinte-writing only, he will have to give in to the the truth should be found facts. I will relate an instance of this in the case of a Vienneso professor. When we attempted in his presence we experiments with a photographer-which, however, urnorant are those who think that whatever as beyond sed to no resusts-(real conjuvers have no unauccessful scances) we concluded by asking the question if we inglit comprehension, is also against reason. These persons may, the name "No" was written, the sound of the writing forth, by questioning in me the "capitie dimension" or, in being distinctly heard. And these two letters were quite other words, denying me the use of my senses. As, sufficient to convince the professor

Now, why was thus no? Simply because as mind was unbiassed, and, like a finely-balanced pair of scales, was able to give the right weight to the facts that came before him. Other beams resemble rough, heavy scales, which cannot even with a cart-load of facts be brought to a just understanding of them. Considered in themselves, two letters of the alphabet seem but on insignificant fact, but they are all sufficient if the mental balance is a fine one. According to infant child of parents living at Hillado-road, Stanford Hill, Kant and Schopenhauer, the essential function of the brain N., was second with convalsions, which resulted in apparent is to truce effects to causes. Now, in the case of these slate, neath. The body was prepared for burial, and on Saturday the writings, it is manifest that the cause of them cannot be informent took place at Abour Park Cometery. While the coffin within the phenomenal world, and therefore must be of a was being lowered a child's cry was heard, and as soon as the transcendental nature. If anyone who is an eve-witness of these occurrences is not able to see this, it is a proof that the little one was alive. The child was taken house and is now the causal function of his intellect is imperfect.

The child was taken house and is now the causal function of his intellect is imperfect.

The mass function of the late est reads classes a finding that eartify Darwinson would not be possible, were not the reason of some apparent contradiction of the pass of nature. This faculty must oridently precede a correct capacity On the other side, I now have the empirical experience of adjust that a present the domain with the trong of the existence of such transcendenta, beings, which I am seed in which the especial cause of the phenomenon must lie. can well of by the cyclence of my senses of aight, hearing. This shate-writing especially imposes upon the reason the task and feeling, as well as by their own intelligent communical of determining whether the cause lies within the domain of Tipler these circumstances, being led by two mechanical law, or is of transcendental origin. If, therefore, tuet toda of unquery to the self-same goal, I must indeed be the cause is sought in an inverted direction, or in accorabandoned of the gods of I did not recognise the fact of the diagon with the dipriori assumption that it cannot be a non-thity-or rather let us say, since the proofs do non-in the domain in which it really does he, this is a proof of a to the rest of the ent reference must function of the intellect. And if it is There is foreible proof for this conclusion in the analysis, redeed a logical error of judgment to deduce a false cause of the occurrences, given in Nos. I and S, by from the right domain, the error is still greater if the an a looked for in the wrong department. Thus is, powever the same warn the cause of slate-writing is sought in the minute of the party was to the as we have after proved leads to a logical supers in ty

A rightly balanced intellect makes good use of the means of the command. Such a trun on Kast, for example, in site of any ones or but those few data which he persented Voother was knew perhaps even more than our astrono-There are indeed scopics who consider it a matter of a real to the arrive at a correct conclusion. Kant prosuppreprie that the medium should touch the sintes, and that, exceed after the prime per of making the most of the smallest indications of power, which is only done by nature phenomenon of slate-writing, still remain aceptical. They and to believe it is only a case of greater powers of decepa since they are on the look-out for unporture; but the fact only proves that their minds are not capable of correct means they become still narrower. The rightly belanced intellect must, in withouring such slate-writings, he opened to the fact, that from the impossibility of their being executed by normal means, an interference of the transcendental world with our normal world is hore accomplished, which, even because the theory of development is true, draws each world little by little to one another. Not to spenk of such acepties as these, the same thing Imppens here as in other departments; those who have seen and observed the facts, confirm them , those who have not seen

Those aceptics who are deficient in powers of observation may be divided into certain classes. Among the most human comprehension, particularly their own individual upe for more success later in the day, in the folding slate therefore, give an explanation of the views I have here set however, in the future, I do not intend by any means to restrict myself in my writings to the subject of so-called "Spiritualism," I kope to force upon them the strange hypothesis that I am only mad on that one subject, Naturally, I shall not answer such opponents.

# PHASES OF MATERIALIZATION

October 29, 1882.

A CHAPTER OF RESEARCH to THE

OBJECTIVE PHENOMENA OF SPIRITUALISM Br "M. A. (Oxox.)

(Continued from page 500.)

It is now a common occurrence for Mr. Eginton to be brought out from the inner ruon, which meves him as a cabinot. into that in which the observers are sitting while the paychic form as visible to all I may refer to marratives recording that crucial piece of evidence which have appeared in " Lique," and especially to that remarkable record published on February 28th 1885, which, for exactness of description, as well as for the facilities for observation granted to festition, people, is of high raine as a piece of evidence; and I may quote, as controutly germans to my argument, a marsters of a very process and remarkable character contributed by Florence Marrent.

"I wish to call the attention of the renders of 'LIGHT' an account of two agamesa, at which I have just the pleasure of amisting lately, given under the mediamship of Mr. Walter E, outon, at 12, Old Quebec-street, W. The first scanes tool place on Friday graning, September 5th, on which occasion the circle consusted of Mr. and Mrs. Strart, Colonel and Mrs. Wynon, Mr and Mrs. R. H. Russell-Davies, Colonel and Mrs. Loth. Mr C., and Mr Morgan. We get in the front drawing time or a semi-arelo, with one gus-bursor alight, and the a - rs has to seen properly occured against may introden, Mr Egonton timb is a position in the back drawing-turns, who divided by a pair of curtains from the front. He had not left me e couple of minutes before a man stopped out from the portier and walked into the midst of us. He was a large, atom man, and very dark, and must of the sitters noticed that he had a very peculiar small. No one recognised him, and after appearing two or three times he left, and was immediately accooded by a women, not unlike him in appearance, who was also aneccognized by any present. These two spirits, before retiring, came out together, and seemed to examine the circle

"After a short interval, a much mailer and slighter macome forward, and darted in a pocular slouching attained room the circle. He had also a dark face, but with very refined and handsome fentures. Colonel Louis saked him to shake hands He replied by seizing his hand, and searly pulling how it has agest on to the floor. He then darted across the room son av a similar proof of his mescular power to Mrs. Stuart lim when I saked him to notice me, he took my hand and aqueened it firmly between both his own. Colonel Latt asked him if he could disappear through the floor. He responded by mounting through the seiling. His figure elongated until the head reached the calling, at which time the drapery touched the floor and her he assembled, little by little, till all that was refe of a man a piece of drapsty no larger than a pocket handkerchief, which he dapped for a minute or so hefere he drew it after him. He had scarcely disappeared before Abdulali, with his one arm, and his six feet of height, stood before us, and salaamed all round. Thou came my daughter Florence, girl of nineteen years old, very slight and functains in appearance. She advanced once or twice, near exough to touch are with her hand, but sommingly fearful to venture farther, retreated again. But the next moment she re-appeared, dragging Mr. Egliaton after ber. He was in doop trance, brustling with difficulty, but Floreson held him by the band and brought him up to my side, when he detached my hands from those of the artters either side of me, and making me stand up, took my daughter and placed her in my arms. As I stood onfolded in her embreco, she whapewod a few words to me relative to a subject known to we one but myself, and she placed both tay hands upon her heart and bosons that I might feel she was a biving woman. Colonel Loan saked her to go to him. She tried and fusion, but after having retired for a minute behind the curtain to gather excencts, also appeared again with Mr. Eginters, and, calling Colonel Loan to her, embraced him. This is one of the most perfect instances on record of a medium being distinctly seen by tun witnesses south the spirit, under gas. The next nesterialization that appeared was for Mr. Stourt. Thus conflemen is newly arrived from Australia, and a stronger to " Loony," October 13th, 4664.

Mr. Eglinten. As soon as he saw the lady who called him to the porters to speak to hor, her exclamation of genuise surprise and conviction, mingled with awe, was numutakable. He sam, 'My God ' Pauline.' The spirit then whispered to him, and putting her arms round his nock, affectionately kessed him. He turned after a while and addressed his wife, telling her that the spirit boro the very features and expression of their moco.

Pauline, whom they had lost the year before. Mrs. Stuart power had been exhausted in producing an exact materialization. so perfectly recognisable on the first occasion of its returearth. Mr. Stuart expressed himself as outirely satisfied of the tuentity of his nicce, and said she looked just as she dul before she was taken ill. I must not omit to my that the medium airappeared with this figure, making the third time of show a launcif in one evening with the spirit-form. The next appear ance was of a little child, apparently about two years old, wie supported itself in walking by changing to a clear. The attention of the carele was diverted from this sight by seeing Abdulah, six feet high, dart from behind the curtains at the same moment, and stand with the child in our view, whilst Mr. Eglinten appoared between the two forms, making a "tria juncts to an Thus ended the first of the senuous I wash to bring before your notice. The second took piace on Saturday, September 27th, and under very similar circumstances. The sieds this time consisted of Mrs. Wheeler, Mr. Woods, Mass. N & P. Mrs. Victor Stovens, Mr Frank Marryat, Colonel and Mrs. Lean, Mr Morgan, and the Hon, O. S., and we sat in the same order as select many current the single case to use the Egylighton appeared on this evening to find some difficulty in passing under control, and he came out into the sircle so many times to gather inagriculum, that I ground we were about to enjoy some assumily good manifestations. The volce of Jeey, too, requested us, under no circumstances ichalacer, to loose hands, as they were going to try semathing very difficult, and we might or me their effects at the very moment of victory. When the nodium was at but under control in the back drawing-room, a tall man with an uncovered head of dark hair, and a large board, appeared and walked up to Mrs. P. She was very much affected by the recognition of the spirit, who was her brothe She called him by name, and kinsed him, and enformed us that his face was just as it had been in earth-life. Her emotion was so great, we were afraid size would faint, but after a while also compo calm again. Then a lady came forward, the mother of May Some gave her many solvino resistivo to her private affairs. We are the arrived of a series of I was aware the Mr. Woods (also a stronger, until a few days since, to Mr. Eghanor, had lost a brother under peculiar etroumstances (all of which and been detailed actual netwerity to him by alate-writing through Mr. Eglinton), and that he had been promised and expected to see his brother this avening. It was the first time, however that I had ever soon Mr Woods, and yet (so remarkable was the senore between the brothers) that when a spirit new appeared with a clarionet in its hand, I could not help knowing at once who it was, and saying so to my next neighbour. The spirit advanced to Mr. Woods and grasped his hand. As they appeared thus, with their profiles turned to one another, they were strakants similar in fonture and expression. This spirit's head was note have an incommon one one are one god with thick linir. He appeared twice, and said distinctly, "God bless you, more than once. Mrs. Wheeler, who had only seen the spirit once in earth-life, was startled by the tone of the voice. which she recognised at once, and Mr. Morgan, who intrinsicity knew the decorated gontleman in Australia, confirmed the recog nition by saying it was a perfect likeness of the spirit. My daughter Florence then came out, but only a lettle way, not for enough to reach us. I was disappointed at her want of boldnose, which Joey explained by enying the was work to night as they wanted to reserve the strength for a manifestation by and-bye. He then said, "Here comes a Measure friend for Mr S.,' and a man wearing the Missome bodge and scarf appeared, and made the tour of the circle, giving the Mosonie gray to the Freemanna present. He was a very good-looking venng ban, and mid he had met some of those present in America, one is one seemed to recognise him. He was succeeded by the same male spirit who ascended through the colony in the 5th Septembor. As he appeared through the curtams, a female form, boaring a very bright hight, appeared with him as if to show the way. She did not some beyond the portière, but everyone in the room saw her distinctly. Un account of the dress and conTHE SPIRITUAL OUTLOOK. NIA

### CORRESPONDENCE

October "I Tree"

names and addresses to communications. In any case, however, these must be supplied to the Editor as a guarantee of good famb.]

The Landon Spiritualist Alliance. To the Edder of " LAGEY"

Six,-The Leadun Spiritualist Alliance lust new held a considerable number of sorreis at St. James's Hall, admission to which has been freely accorded to friends of members, and presence." to these who have sought introduction. The number of persons who, by their presence, may he presented to have an interest in our work, it very considerable. These secrets are a rety large iteas in our expenditure, and we are not dispused to make the outlay which they have involved.

But we are of equation that these whose interest in our proceedings in sufficiently active to load them to desire attend our meetings so regularly may fairly be invited to qualify themselves for future attendance by becoming members of the Allamen. The expense incurred is so trivial that it is within the reach of all but a very small minority.

It should be borne in mind that our resources are limited, and that the work before us is used. We want funds, and we can utilise any amount of money that is likely to be entrusted to us, they operations are curtailed by want of the mount that ought, we think, to be at our disposal, in view of the with a dear friend (a private lady and constant companion of term of another

We do not propose, therefore, to some industrianinately, as we have done, invitations to our meetings. We are desthat any one who is interested in our work should have opporlunity of attending one or more of our meetings, and any momber will at more be farmed od with a tacket for the admirate of such an unquirer on application to insuell or to the See his no trust that these whose countries and we an our house a manifested by a flattering attendance on our procookings will go a step further, and support us by adding their names to our list of members

I hope I may be pardoned if I sak that the qual pro you may not be too rigidly issisted on. Instead of the off-reported question, "What am I to get out of membership in the L.S.A.T a specy which, if it were of universal application, would paratype all effort except that which was expected to be of merely solfish application-I would have that we might rather ask ourselves, "How can I best within any power to a re-who I recognise to be a set and useful work 1" The subscription to the J.S.A. as been pleased at an low a rate as to bring it within the reach of all. May I megget to these mornbers to whom a guiness treet or tens in a small sector that they may believe the real service by movement of the between the minimum subscription, and the larger sun which generously may

I may add for the information of your readers that I shall have the honour to submit at our next meeting mone very m resting facts relating to the state of Spintualism in various countries, together with a plan of home work which I hope may he the commencement of a paried of activity within the Alliance in the way of practical research and investigation, as well as of the development of the more phenomena in carefully organized

Any friends, not members of the Alliance, will secure sdmission by agent one their wish to me or to the Hon. See -I am, Sir, faithfully yours,

W. STAINTON MONEY, M.A. President of the London Spiritualist Affaince 1 Craves street Characa Cross & W. October 90th 1885

> Corrections. To the Editor of " Launer."

Src. - My preface to the translation of Hartmann contains two passeges which I have altered for the reptint, and One of the young sten fell in the war. The young lady me reed. I should like the siterations to appear also in "Lieux," as they Long after the incident of the bracelet, which had face on concurn a material point for discussion. Speaking of Kan's pler mind, she awoke and night to see before her the young striking prediction of the press of a world of sparity, I, too, I friend who fell in the war. "I have come," he seemed to say, positively stated the physical condition of such proof to be "x partial solution of the cellular timues encanng the subtler always regretted it. My sister has it, I handed it to her at once organism which relates us to supersensions things and beings. being, purhaps, a purhal solution of the cellular organism sixter, told her the story, and she gladly handed it to her. - The masking one for subtler impressions."

A little lower down I say——" who read it can almost always be shown that medicans and sommanbules are either persons in [It is preferable that correspondents abould append their whom some constitutional lesson has taken place, or in whom there is some failure of equilibrium in the organic forces." Please to read instead "Whereas it seems probable that in the absornal possum called medium and sommenbules some constitutional lesion has been either inherited or meneral, or there is some disturbance of nervous equilibrium."

experience, an alsonee of all study of, or respect for, the source is set do not accept a source part, to experience of others, a defective no guara and a language good sectory in this outer solution and she con notary faculty for guarating phastasy in hea of it, coupled with thereous, from guit to be a late of our come one were it. the confusion of security. It is not needful that she should "officence" she takes even a trader actives a suppose be consciously an impostor. It may be admitted that, we will hope, by companion for and desire to a secure occasionally, sike the Pseudo Sybas occanitered on the the special worldly trials and temptations to which handed houth by the Thans of Glamus, she gives us at exposes them. Where the activities of the unclul \* carnest contient, on toth out this is not and benovoicht work of the age are most about often, and whom she has this moratum of what is useful to we may searcely hope to find the Pseudo Sybal she belongs, impart to us, it is so munthered in superincumbent ogether she would say, to the centre and not to the cross ference, and se folclusion, as to be searcely identifiable for what it and her "mession" she would chure to a to a vice and und really by Nevertheless, the consessuores of this possibility is Darme leatre on work rather than to do it. Indeed, "not propures the more experienced Spiritua of with a common to do it" is very generally the essential aim of her some tenderups in decling with the Pseudo Sybil , and the forms because there has at the root of them, -in so far an of forbearance is encouraged by the conviction that they can, by a form of speech, be said to have any root, -expansation or argument would be addressed to her in vars - no spirit of useful work whatever. She, however, clothes own puratosics, a lengthy process, and sooner or later pain and it is agreeable to her and is some nort needful to her ful, but probably the only possible method of illuminating a "musion," to play "Lady Bountiful," in the comedy of her nature which, even where admitted y ionest, is so absolutely life. She does it very fairly well to indiscriminating co were in, being frequently endowed with our oderable But, unfortunately there is another case of scalar entitled astrona powers. These are favoured by her often ady whom we must class with the sums sinterbood, whom The Pseudo Sybil, full-blown- for she passes through it was found impossible by any arguments or explanations human nature so manifold, that it is needless, and would The Pseudo Sybil possesses usually a small independence be often nigust to attribute her extravagances to conscious but she condescends fromy to accept the gafts of the Initiful . imposture and the deliberate desire to descree. But, as we "for her charatres." These investments will be repaid with have said, she requires to be steadfastly and earnestly with interest in Heaven! Like Moss Phite, in Duckens' romance, atood, lest she delude others as well as herself, and this, and she will confer estates at the Day of Judgment! Also not the smallest desire to give personal pain is the serious

### ANTIQUATED TYRANNICAL LAWS

October 31, 1855.]

An antiquated and rapidly-expiring form of Christian theology may fairly be credited with our present coercive and almost effete laws in relation to Sabhath observance, necromancy &c.

The one ancient blot on our statute books with which we are more particularly concerned is that which, under the furtherance of this object we shall be pleased to receive from our guise of Palmetry, leads itself to the suppression of the readers brief reports of phenomena subject to two conditions occult phenomena which are exhibited in what are termed (!) That a colouriess statement of facts without comment is given Spiritual seances, and the remarkable fact is that as use a not arged by doguatio theologians, but by more dog- though we should naturally prefer to be at liberty to publish them make scientists, who fancy in their ignorance that they Among- the denominate error to may be mentioned tohave sounded the infinite depths of natural laws, and have accordanced what can, and what cannot, by legitimate natural means, be accomplished.

The question for solution is, Da or do not the phenomens. occur? a conveyer a door out y improbable their occur once may appear, it is the duty of all to investigate the right more ness or non-genuineness. The theory by which they are accounted for is quite another matter, and will vary with the intellectual standpoints of the investigators, but the facts are patent to all who fully lavest gote

Prejudice, however, is doing its perfect work. Magistrates refuse to accept the textimosses of the most credible and well known wrammer, and attenuing an exhaustive knowledge of the laws of nature, after that is ept by thek the alleged phenomena are nupossible, and, evidence or no evidence to the contrary, the psychia prisoner charged we a pretention to the postersion of occult powers is condemned,

Psychien conscious of their innocence are naturally not disposed to face the orders of a projusteed judge, a partial bur, or an mexpersenced jury, by whom supposed crimmatory evidence is greedily accepted, and penulue evidence is rejected.

Within the range of our own experience we know powerful private psychicaln whose presence, and under the mosters conditions, all the higher phenomena of Modern Spiritealism have occurred. To the senness of these psychies acceptable internal collequies of Lather, Banyan, and many one visitors were feer y a limited, and hand who many become convinced of the reasty of the phesomena through ther

Now, however, that scientific men have resolved to crusk the occult powers by resorting to antiquated laws, and magistrates on the banch have affirmed that no amount of quick-sites breaking into deferent sized globales. It may of evalence would convince them of their genuineness, these powerful psychics either decline to sit for the development from spirit without. And the same is probably true of the of the phenomena, or sit only with their families, domestics, and the voice that it may be in this sense of they subjective or and intamate personal friends.

This legal terrorism, exercised over the sensitive and the innocent, has rendered admission to manifestations of occult power almost impossible, and the phenomena that a few years ago were placed before any carnest inquirers, are now to be seen only to the previous of demestic life.

Possibly the public until is not yet ripe for the abelition of these abourd and old-world lows, but the coming elections would afford many opportunities for educating the public, if liberal and catholic-minded men would catechine Parammentary candidates, and thus ventilate more liberal views on this rexed question.

Our readers would do well to suggest a series of appropriate questions to be publicly saked of candidates for Parliamentary honours during the coming elections. Possibly "C. C. M." would furnish as with a list of suitable

The Social Strife is the title of an Independent paper, published at Muskegon, of which the 43rd number has been forwarded to us. It contains a liberal selection from Spiritualist

BARON HELLENBICH.-Psychoche Studien for October states that Baron Hellenback has merely removed from Vision for an indefincte time on private affairs. It adds Mr. Eglinton has, up to date, published to explication of Licent of tens case from his point of view ( con se new Se in p. ant).

SPIRITISM VERSUS OTHER THEORIES.

[October 31, 188a

BY THE HOX. RODEN NORT.

Will it be attempted to assimilate these phonomena to the subjective "halluctuations" of madmen, delizions patients, dreamers, and the "delictions" of sensitives induced by meanterium ?\* I wish a me competent person would take in hand this matter of " halfacientums," not from the physics ... The case in the laytime is suite scient. You might call it cal point of view, in his been done very ably by Mr. E Ga co., a votes impression, There are several such voices. The (in Most), but from the philosophical. Personally I inches difficulty as to decide which is the "true" voice. In most cases - think that hallucinations, and dreams are the effect of an I can decide. If I estimot decide, than I do not follow a exclusive, particular experience involving aparitial action from When I have followed it, it has seen right. I had a man without upon the individual, no the subjective impressions, or Research Committee find that telepathic influence to ward, but it got as importante I and "Well, I will soo what him s were of a of class are. But we need not discuss that when bull through my dinner a foreigner, whom I have now I he very differentia of "hallucinations" and drawns I could give you other instances. I never ask for men that the forms soon and touched, the conversations held, are position to the hall accorded, or dressing person, are second give you where incurred. I devertue for many of spiritue of the agency the express teach age of spiritue with limit by the bystanders, or companions, where are that where it is necessary it will be given upon the content of the circle at a Spiritual memory person, are a content with limit by the bystanders, or companions, where are that where it is necessary it will be given upon the circle at a Spiritual memory person, are a content to the hall memory, or companions, where it is necessary to the hall memory, or companions, are a content to the hall memory, or companions, are a content to the hall memory, or companions, are a content to the hall memory, or companions, are a content to the hall memory, or companions, are a companions. or sumestion with the same external agent, and the medican equally, if he be not entranced. Incomesh that You Hartmann has to resort to the extraordinary supplementary hypothesis

> I call this hypothesis "extraordinary," because I think its of second of in only to be accounted for by the fact around by You Had name that he has never personally attended a source Last a a see in, I suppose it would have been pure assessed

to have put forward this notion. That a lot of different people, of diverse tomperaments, who are, so often as not, [19] one of a service and a meeting bear of the discussing the but new play, or talking and joking about some pic enturely foreign to the experience in question, should be. Take 1 or a man one one who has over been present I had been much disappointed in my investigation of a manner with the manner. And, therefore, Specification, that although I had had men transcrible evidence to question and the product of the manner was discussed from the contract of the manner was discussed in the product of the p mention got the new contents on the first part in the new y people! How do they bold convertations with these people, an are then information! Do the people you seem to meet in a dream, do the people a madence, or delerious serious serious the course is if an issue may do never met the I for the accordanguest of external objective reality will be sometimes of which may be berions. our case of any che and in the fact that the consequences of which may be beginned. the second state of the second he we have an another either the second of t both alternatives), these personages and their courses the notion of a division of the one self into several distinct series. For consider that, in a dream, we always identify our se as not greated from the point special to some to so

thering medical control of the church and congregation, but I provide to the magnitudes, and said "Not faith, but works, love to the magnitudes."

What office and of that dream, which is anything to no with me.

That is the end of that dream, which I dream but week and to a magnitude of the said of the sa

or we witness their action, but they are always objective or with our thought, emotion, and volition and which a second of external to us, just us the people we meet waking sue-we are to the asternal world, or system we be a more a test of never behand, or within their subjectivity, never identify our harmony with that world, or system-auton on a new or selves with them , on the contrary, they surprise us with more acts upon us-forming, saleed, in it and with it, a great solidary pected deeds or speeches. But even if they are all our own organism. Of many actions, however, we are sub-conscious, a.c., creation, they mover act externally, objectively, so as to be per-musentarily and superficially aware of those, though the main copuble to others. It is true we may imagine ourselves to be stress of attention is directed chewhere, and such experience we So also may a southented, or a madman, imagine humself what secretheless, at the time, the same self-stant-fying consciousness took and where others do not believe him to be. But, though Vot to an other law to be presented of one wif. The Hartmann arges thus, it is really so appost to his theory at all physicises of "double-consciousness," again, lend no support In those cases we have simply a subjective experience, what- to these theories, because on the vive visiting of be supposed that they will have any fators opportunity more e et a consequence consist when a second war and an Invotable than this for correction of their presumed matrix. I believe, be attributed to one self.

Her one memorized subject (see "Stages of Hypnotists," And I maintain this, although 1 juits feel the necessity of

felt an "if he had two selves, one watching the other." N w et each me a sigh me counte harmoniane to down not mean that we literally counist of a myraul mountains buten to the " I normations," but which the automations want cable conspartments, incommunicable, since, though the experience assuredly (as (tappears to me) be quite incapable of (utility - - -Passes sectring, so terribly and vitally true, of the two course my extent that may be so, but I believe me one or a become manufact of the man, Thus " Ecotoric Buddhava has lost life and flexibility. Truth is Protons, and will not be holden in any one definite form. The Occultist doctrine of " abel's, " again, some to me a prose-travesty of the view which we swe, I think, to the very distinguished young Braham thinker. Mr. Mokial Chatterja, that hauntings of houses by the rections of a muester (which appears no strongs and unjust) may be they are not so absolutely !

Again, a great dramatist undoubtedly passes into, and lives in his characters. Shakespears in Hamlot, the gravedegger Falstaff, and Desdomona. But though the transitions of his multiform experience are swift, as he all those simultaneously ? He espetentially ; yet not literally, actually all these in one Yet is but not also presented, inspired by vertable personages known by us. be once. Note the first of me united to the first of me united to the first of me united to the title whose his own many in certain for all are assumed to be on time and the base and an appropriately. With whose his own many in certain for all are assumed to be on time. he has met, and so to speak, lived through, as well as with 1 her m not their influence a part of their very being f And still he is

reflex motions are not, cortainly. They are either the inherited dramatist must study these four plays. A Missa oner Night's nature, or the habit-suggained movements of the organism, Droun," "Hamlet," "Macboth," and "The Tempest"

rems with us, or not undependently of us. We have them talk, which is intimately associated with ourselves, and co-operates what and where we are said by others not to be what mid nomly forget; it is somewhat apt to be officed by the more milent and ever the explanation of it may be. We have no conferencement and difficult to explain without calling in a question subjective experience of an opposite frind belonging to 3 another elien, or more than one to make a second a the same person. It is one continuous experience, not are continuous, or successive in time, not contemporaries us. One two of opposite kinds, musually exclusive of such other person may either gradually, or suddenly change in the nature of The shorter, or andress does not suppose himself to be his experience, even character, the past, or a portion of it, two people at the same moment, at least I never heard of such se sonny a blank in memory, and the siterating periods a case. Even if he did, that would still be a college of the search of these changes (as in certain discusses) may For his own one self-adentifying conscioussest would still include ultimately be embraced in one professible and water conscious these different personalities, whereas here there are two per nos. the phenomian of hypnotism give remarkable facts of this constition, each obstinutely refusing to identify humself with the kind (but here we here the external intelligent agency one is inether, and ne common Ego, or self, to reconcile them in one claned to portuinte in auch instances) so we may entreally connectorarous. And servely if two connectorarouses stand face to that encounting from may alternately be gethered up into the face, and dony that they belong to the same Ego, it can hardly money a on solf. But contemporancess, though mutually

by Mr. E. Gurany, Proceedings, S.P.R., January, 1984) and a recognising an absolute transcendent self-or rather and the worst of philosophers is that they was much on scalinging I since no otherwise can I comprehend the origin, ground, and Torse peeds no do tank or a to be literal prote of the substantial apontaneous activity ("froe-will") of the imperfectly analytic, degen-mating faculty. Of course, in a sone, we developed, and successive personalities, of which we are now our are not two, but a myrad people- and of an energy of as self-conscious. As I have explained in my (Ametersy) and present induction that go to shape us, so that now easy on You Hartman's philosophy, this about would seem one character, or most is appearatest, tour another-but that capable of faltilling all the important functions which he atter of one may occationally slip oute another, it does not any the more a transposition; consciousness there must be ever and above the got recognised as ours, so that the compartments over remain in- time-connciousness, to supplement, explain, and give it the communicable. That is the proce, and falsehood version of this requisite support, while truly this is largely cut off and remystery of life, not to be squeezed into any propositions, that moved from our experience of the passing around. Hence, dunot need to be instantly set against their opposites. Thus my own conception may be thought chargeable with some of he Cambridge in the understanding's false and prote version of Sr difficulties I charge upon the hypothesis I here con at To temp

Of course the sommandatie, before it enters into temporal resome to me a very clever, but untrue, because prossie, version perisace, may be said to be transcendent, but that is true of ne man I be design of venerable Hindu gettitle. Truth equally of the normal, every-day experience, and yet the cast men a mass or a intellect in true too honger, because it latter in not therefore, taken for the experience of a stranger Why, then, should the former be so mistaken, when that enters, we not soft services yourse! You Hartmann easys the same regarding his ' madale-trans connectances, got near insubjectively pensitrated, only objectively approbanded, then of we have a not ours, whatever part of the bram, or no-bram . may come from. Then is it truly a guide, or contract or unterdue to the thoughts of the victim reverting to the place, not to my ligence external to the medium, as it cleans to well may so whole, perpetual presence there. And may we not hope that the using the medium's brein, or nerverforce, or muchos, or a name in true even of spirits we made " earth-bound " size I that | organs or even his whole body,(see "M.A. (Oxon)" and Walkee a Materialisations) "traininguring" that, but it is not Bospott.

believe in such things as, however wonderful they may be, the contrary, such a purification will prove that better and are of such everyday occurrence that the unpression made more correct views brong a better condition of social life in apon their minds is an ordinary one, such, for instance, as | hear train, while the blessems of our materialism will the power of attraction of the magnet. These confound, were then selves in riot, dynamite explosions, crashes on the therefore, the subjective light of the mind with objective Stock Exchange and heavy to proof. They are stupified by being accustomed to the. There is therefore, no doubt about this : our men of . . . of everday things, and take no heed of metaphysical learning will be obliged to recken with facts, whether they marvels imprening around them. Therefore they lack the will or no. And if they will not give in to professional very groundwork of philosophy, and are incapable of mediums, upon whom it is so easy to cast suspicion, they to age . . . . that the most everyday events are at the must be convinced by private mediums, of whom there are note at an ascomprehensible as asystical ones; that the fall already many in every class of society, and who will of a stone is really as great a middle as the above-mentioned 1 at ways remain hidden as they are now. In tan of towar og What is a may map so the world, whether years' time professional mediums will onjoy a very different it occurs out y or my in sign as three there is no there is social position to what they do no the present, they will be in the comprehension of the two tores.

These, as a rule, are specialists. Permented with a firm casuredly become convinced, if he, like myself, and seen and se ent or con action, they deny everything which is contrain board for the space of an hour, physical phenomena in full to the They are a presents just because they have a light with a private medium of high second position of scientific conviction; a man must redeed be very witnessed, as I did with a private medium, who was a bearned to be able to be an a priorist. This would be member of the Academy, a Latin question of the or the in favour of such a disposition of mind. In the case onling, while the medium was in a state of trance. The of other learned persons, their antagonism is on moral supplies hypothesis in the latter case is that of the writing grounds. They are sceptics because a single fact of being done by a materialised hand, to which, however, the such weight as slate-writing uponts their whole theories, corresponding organism must have been present. If, howfounded upon the labour of years, to teach which is their ever, it be asserted that such writings, the first lastorical calling. They do not possess the elasticity of mind to be example of which is the "Mene Tekel" of Belshazzar, are able, or the moral force to be willing to unlearn and to executed in inaccreatile places through the magic power of confess their previous errors. Others, again, would not the medians humself, such a hypothesis is, at least, open to themselves be disinclined to enter upon the research into discussion. But this theory, advanced by Se-adder and mystic phenomena; but they shrink before the existing Perty, suggests in itself the acknowledgment of a transprejudices, they fear to draw upon themselves the ridicule condental being outside of ourselves, because a being which is attached to those who have the courage to confess farmished with magic powers and not fettered to the body what they have seen with their own eyes of a mystic of slay cannot be looked upon as mortal. It was, therefore, nature. In this case the ground of acepticism is likewise quite within the bounds of logic that Perty littleth, when a moral one, that of vanity. Such people should, however, urged by further experience, atendoned this theory and remember that is ten years' time all this probably will be recognised the intervention of transcendental beings. changed. Facts are stubborn things, they may be ignored. As I said before, we cannot call these beings spirits everyone, this scepticism of vanity will eventually be com- account that we must give up the dualistic theory demned, and indeed very soon.

Other learned people four the consequences which will be used to see which will be used to see which will be dealt to see one of the fourth of they have always held in conjunction with science, with the exception of during the last 190 yours, the belief in immortality Only so-called calightenment, and not true science, can suffer by the recognition of facts. Nothing was the place record that men will be radically cared of there may errors in. for that is a cortainty. The material also t use, so long an nuschromain, which a Vogt, a Büchner and a Conserted have dared to put before the German public in ever now campa and pumphists will no more be Others again will doubt, because they are only able to seen. ### A BENEFICENT WORK

of the little child Pochs, coming to have after a figure six started a home for little cripples, with the object of feet high had just disappeared. She was very active, carring them, who appeared to be back. He saturded hunself by careful quidance. A lady, Mrs. Dancan, who is cammation that she was "a child, with how legs, and baby feet, and child's face." She got on to his back and was founders, performs in a true Christian spirit the necessary industrations. We paid a visit to the Homo (7, Semerattterrace, Carlton-road, Marda Valo), on Friday, October A very exhaustive series of experiments were conducted 30th, and were conducted over it by Mrs. Duncus, and by by Dr Wolfe, to whose book I have referred before, with Mrs. Marshall, the matron. A very interesting case was first Mrs. Hollis. He built a calanet in his own house, and shown us, that of a middle-aged woman, at the Home under exmode claborate preparations for his experiments. Mrs coptional circumstances. She had been a patient in the wards Holks was staying in his house, and many results obtained, if if So her was a Hospita, for a long period, suffering from accumulaty recorded, were extremely remarkable. The accumulation of the legs. Attempts had been following is an example, selected from max some times to the selection of heavy weights, which, while to a certain extent successful, had Mrs. Holler (Wolfe, p. 449). On the 24th March, 1873. unfortunately the ulterior effect of still further weakening then "I waited twenty minutes after the medium had entered the This particular affection was no doubt but one of month, when the north panel was thrown open and little it as several disorders of which the patient was the Hancook came to the front so as to be plainly seen from her victim, and she was finally reported as a hopeless wasse up. She was beautifully dressed in colours. A few case. Singularly enough, thereupon the assistance of Mrs. seconds after appearance, and while she still receasined, another Duncau was cought, who attended continuously in the apprit stood up behind her, looking over her bead. The face wards, and gave her heat offerin to improve the patient's sendition. Much progress was made, in space of some was more matured, but still child-like—a girl of twalve or fouryear away.

Her have was blonde, while Anna a was a difficulties, when it was promaturely decided that the same very use a way of great and an an a way of great and a way of gre no he best of nourishment which she receives, much have ners so show in he morita of her gradual recovery. We had on an aportunity of observing the process of rubbing Mas-Director passon this tips of her fine, in I along I was the otherwise manaher, and occusionally process it softly with the outs and d nor hand. The patient immediately fools a warm tan, here segention, and in a brief time begins to move the limb and easily. One of us saked that he might himself experience the influence, and extending his hand was struck with the genial warmth which seemed to enter it. Mrs. Duncan's listed has always this goodal warmth. He was much surprised, however, to learn that Mrs. Duncan horself folt a healing influence from are hand, and he had the unexpected felicity of curing her arm of a slight rhaumatic affection by a fow downward passes of his fingers

We next ascended the stairs, and as we did so were greated from an upper chamber with a babble of infantine votces, and upon enturing beheld a group of about sine children, boys and girls, some standing, bearing on their crutches, some sitting on low chairs, and some on the floor, all engaged in a kind of services happy conversation. We were introduced to the little elders and, taking them upon our knees, learnt the troublens histories which, while not oclipsing, had softened the morry rivacity of their children faces with something of the patient sevenity of age. Imperiest nourishment, regulting in rickety and otherwise diseased bonce, seemed in most of them to be the cause of their minfortune. One was a little foundling, taken from a workhouse, with a week hip-joint; mother, a boy with the large head of rickets and with limbs which had been the cosper of the surgious, but now so improved as to startle the most atherex another, a little girl whose log had been out of come on a male part proces of hone stall keep working to the surface, but rationantion and collection of matter scan to be procented by the magnetic stroking. It must be mentioned that if any serious symptoms manifest thurselves medical assistance is always sought, nor is the sid of medicine, in the daily reutine, slaugether dispensed with. It is not sought to rival the Poculiar People by any fanatica, exclusive adheseen to one ules. A fourth child was a little girl who owns her affection primarily to a fall. She has a curved spine and protruding clear. She is robued, but assistance in also sought from a close String arthur meket. The bright intelligent shad a wever says y preferred the first to the second method of treatment. The description of these few cases will be sufficient to enable our readers to understand the beauticent work that is being done. It

### "Symphonicals."

### To the Englor of " Laune."

Sat,--I rend "C. C. M.'s papers on "Symphounists which appeared in three of your August numbers, with very , cut interest and admiration, but the very extent of my sympathy with them makes me the more descrets to have one particular point elected up. The point occurs at the very quiting of the first paper (pp. 369-70). Starting with a pringry axion of ampibility—that it "implies a mode excitence which must be concerved both objectively as count do, ad subjectively as sensitive "-" C. C. BL" seriess, by a short passings of exposition, at the conductor that an individual, in p wovey "apartual" a condition, our only affect the conscious pose of other ind viduals through an "organism - a means of expression. I rigree completely with "C. C. M . triumcy axiom, at any rate or regards any developed state if · resemblation, and I agree our pletaly with his final conclusion My difficulty lies in the connection that he makes between the two. It seems to me that there is on idea as don if on relations which are really fundamentally different is in most unfortunately, they oqually admit of being representis to relation of model to matter, and as exhibiting the one as a other aspect of the other. They are .-

(A) The relace of my perception-ray, of the lamp-to a corresponding change to that which makes others aware paratively recently discovered, a relation for we which has the same existence for you as for me and which for you (in Clifford's phrase) is a relation of eject to

B) The relation of my perception of the harp, 48d wise, the lamp as perceived-the relation of me determined to that which determines me, a relation, involved in the minimints set of porception ; which exists for me only , and which is a relation of antigeet to object.

To the second of these two relations the antithesis of seasetire and resultle applies as a matter of logical accounty. I had first it does not so apply , for the mere fact and I as sense on does not in itself imply that a roce as an its of making it with aware of my existence. Phus, which is me car at also existence must be conceived both objectively as sensible and subjectively as sensitive, its objective aspect a the lawy for me, not my arganess for per. If "C C.M." had spoken of a mode of existence which must be concaved objectively as sonsible, and excitedy (by others) as sensitive, I should, of course, sureo that in such a mode of existence lies our only classes of finding starselves in a universe peopled by followcreatures. Finding myself in such a universe, I accept "C.C.M. a" amount of my relation to it, but that I so find muself is an emperical fact, not a motophysical or logical toccurity As my visual perceptions do not business my own syus as objects for me, nother do they amply them as objects for others, and (I can enterior as I can be many osnesse myself and enterior produces in the sine one of the strength an organisms, his is a single by the season of the control of the

a extremely paraful to think of such a work coming to an end, in my existence as a member of a somety, but is not involved as de- les pour woman, and these expeles being thrown imper us the fact that I tayself, an ambject, am sensitive to a sensible

to clearly. A few people unsupported causes continue way-or, as he would my, in another sepect-on " the mode of

Now I do not so much complain of the application of the newtor part of which comes from the pure of one lady, and ten against to me meet in a magnitude of any the Cripples House, may be able to lead the committee maist. But the identity of word must not surely be taken to imply ansu, that we write this account. Parcels of cluthes, &c., any necessary or logical correspondence or connection between should be adarrased to Mrs. Marshall at the andress already "organizar" in this new source and the "means of expression"given, and permissive contributions to Mrs. Duncan, 17, Upper to cet with the same where the same Regions. as a "mode of receptivity," the "organism" exacts solely for the subject of relation B, whom we can conceive to be alone in the aniverso-or alone in his universe, and it implies no body, or matter, or phetamagnal aspect of any sort, belonging to him. It is preferable that correspondents should append their Industitles, as far as I know him, he equicus mental. I emborate of potentialities in the way of thought-transference, muraly mentally, by the way, that his believe the phenomenality must marks on the short the tree was recognised in his to see is that this phonomenality of the subject is in the least implied in the adjustedly necessary phenomenality of objects to the subject. If "C.C.M." replies that the subject a perception of objects in spatial relations implies his perception hunself as forolly placed, I shall agree—but locally placed only as a mathematical point. His mode of recognizinty or his a tenta total and districts go may supplies phonoususulantion of the ideal point for centra I local relativities) as an "organism, an object among other jects, any more than his organisation of a set of sounds as to tone implies that he hours blesself humming another k mode of receptivity, or relation to phenomena a not a phenomenon, however "organically" constituted. Was

M. been a have done is to derive a new (and as I think of a state of a so-thesis from the fact that the many of case be tatelligibly applied to the solged of relation B, as well as to the object of relation A. But sorording natural use of language, the organism can only outer

to the loss an organism Aparamolyce 6-statementate a the one are seen, a properly and in the other as quely as above not forte-

M many however, take exception to those remarks on R . He may may that, when I am contemplating of my existence, manely, my organism a relation of the lamp, the objective aspect of my mode of existence is method the hump for me, nor my organism for you or for as to lamp's organism for me, the lamp's "beant of expression." the manifestation or obverse of nome psychical existence behind what I call the lamp. This would be to edopt Classified's thoory, and to endow the lamp or a stone, or a curtain amount of embryonic cane for ne con it to a winter And on this view, of source, ' t M might com the conceivabusty of my finding myself alone at any rate in a suible universe (personally, I could make myself happy in an audible one) , since the phenomena which entered into my states of consciousness would imply the joint existence with me of a multitude of psychical outities or species and not the more existence a potentiality of a multitude of objects, having no psychical existence except on the arena of a developed mind. My modusty sofull such that I connet think my being there would make any difference to these ejects. I cannot feel that their existence mepless in me an objective organism, that because I am sensitive to their objective side, their ojective side is therefore sensitive to me -in short, that the lamp which I look at really finds me phonomenal. Still, purhaps & politely, though unconsciously, trives to do so. But at this rate, "C.C M." should suraly bese on view of the necessary phenomenality of the organism directly no the mind-staff hypothesis, which may be defended by certain complex arguments of the own; and not on the simple and nereserve correlation of authors and object, which certainly does not quality in some as your habitations. In this case I show our time but my deflexage from his was morely part of the of advant conversy. For instance I was a pipert

receptivity" with the same term, by poisson; or ant the who has but recently passed ever, and with whose same our receptivity appears to be at its minimum where the expression medium was unnequalisted. No one in our household, I is at its maximum. The receptivity of what we call inorganic might michy add, nor any one person shewhere, could have Nature must be almost self, the little names of its atoms have we as all the various styles of writing found on this one not developed even the beginning of a consciousness as C died sheet of aper, nor could the greetings be found "in current express t and ed. SATURDAY, NOVEMBER 772, 1885.

### THE EMPHACAL METHOD

Acknowledged facts settle all disputes respecting the possi do and the inspectible. All affirmations respecting the impossibility of cortain phonomena are shuttered by the presentation of the phonomena themselves. The possi mity of amorysing the constituents of the sun and stars, of stir openisty con in gosigns as ion we of thought t wough the unfathemed waster of the Atlantic Ocean, the power of reproducing sounds by magnetic currents at the exames of his I the dismeter of the earth, are facts of dudy accurrence, and yet not more than half a century ago, they would have been plasted among events absolutely imроналова.

Scientific Limitations have, during the present century been so often shattered, that sanguine and open minds a liable to suppose deginitie & priori limitations things of the

Little experience in the promulgation of new truths is rochesto to prove that conservative immebility is firmly fixed in the minds of the majority of men, and notwith standing the numerous experiences of the present century in extending the recognised bounds of the possible, there are those who think it becoming apart from experiments, to doguntuse respecting phenomenal innitations.

The fact is undoubted that some alleged phenomena appear more probable town do others, but it is equally certain, in view of accomplished facts, that it is unbecoming absorptely to reject without examination, alleged facts, no newter how antecedently improbable, that are vouched for by hundreds of competent and credible witnesses, who have devoted years to their careful investigation, and who, notwithstanding adverse preposessions, aftirm their reality and

The majority of scientific men who have entered upon the investigation of the phenomena of Modern Spiritualism anvedone so for the purpose of ordenvouring to prove them illusions, and without a solitary exception, all who have fully extrained them have acknowledged their ganumeness. There have been diversities of opinion as to the lows by which they are produced, but an absolute consensus of opposed as to the facts themselves. If this affirmation be there where is the justification on the part of scientific henfor refusing to examine them? A priori, denial of the aleged phonomena, in view of the cumulative evidence of well-accredited witnesses for nearly half a century, is childishly absurd, and indicates a bigotry, a prejudice, or terror that ill becomes men claiming to be scientific

In all most questions except this, men of science recommend and adopt the corpirical method where experiments are practicable, but singular to relate, in this exceptional case they persistently refuse to examine, and go And the state of t Huxley by protoplasmic researches, Typdall by exhaustave experiments on sterilised fluids, Dallinger by his specimaking in extrant one into the lives of monads, Pasteur by his numerous biological experiments, and Hacckel by the close scrutary of cubryological forms experiments every where and always except on this most momentous of all researches -viz, the penetration of what appear to be extra mundane laws and forces into the mundane sphere. These occult, and apparently abnormal phenomena, are amenable to the same laws of observation on are those which kave come under the examination of the secentaria just enomerated, they appeal to the same live senses, they lend themselves to similar conditions, and the main aspect in which they differ is that the agents appear to be independent intelligences, having a control of matter which we do not yet possess, and whose actions may be studed, but cannot with our present knowledge be equalled.

Purely physical mundano phonomena may be repeated adefinitely and abidiately, but psychological phenomenahave within themselves the elements of independent volties . and may be observed, but not successfully commanded

We may, for example, endeavour to induce Professor Typidall to continue or re-exhibit his experiments, but we cumot command him, or, at least, he may refuse to obey So it is in those occult phenomena in the production of which independent intelligence is manifested, we may request but certainly cannot command.

The agents, whoever or whatever they are, are amenable to the ordinary laws of courtery, and if courteonaly requested cancenlly comply, of course within their limitations, as rey, like purselves, can only give that information and perform those nets that are within the range of their knowledge and power Some scrolists appear to believe that if the gents are spirits they know everything and can do any thing, but that children superstition is speedily overthrown, and they are found to be under the limitations that enclose every harre creature.

The sound of the blow Estatem, and of entering a to rose natural sorded relations shoulder. Instantly afterwards all present heard the sound as with him as necessary, as to ey has heard to be adamment of of a violent blow on Mr. Eginton's heard has all the sound as good results generally at the adamment of of a violent blow on Mr. Eginton's heard, and there of the adamment of Mr. Laneaud. Serveral members of the party were just then m goal results generally at his settings [ T ree sit ogs were left a heavy body, apparently between Mr. T. and Major H. This ter a on he ca, to if the of 7th of June, and the upon the hight of the 7th-8f. June. Of a monorita scalaring of new sinness the investigators confine themselves a dirty or as

The house is small, containing on the ground floor a drawing room and a dinung-room to the right and left of the hall respectively. On the same floor at the back of the house are two kitchens, scullery, &c. On the left and connected by a door from the second hitchen, is a large supty bare. Beneath the house are specious cellars. On the first floor are three budrooms and a dressing-room, on the second floor are three bedrooms. Phentous are reported to have been seen, or asysterious noises haard, in every room in the house

For convenience mile it was determined to hold the first sitting in the drawing-room. The house was parefully examined, and the doors of the bedrooms, as well as the front. and back doors, were locked. About midnight on Saturday (June dil) a circle was formed round the table. A shine candle attack was placed in the middle of the table and the light blown ont. The room was then in complete darkness. The sitters joined hands, and about an hour was spent in conversation, varied commentally by a song from one or other of the sitters.

During this time the positions of the eiters were, by way of experiment, changed three or four times as Mr. Eglinson suggested, [and others also, myself among the number. - J.S.F.] the final positions being those indicated in Diagram 1

DIRECTOR I

19th, 1985 "On each operation, mainly for reasons obvious to took the positions round the table as shown in Diagram 2, experienced investigators, I compand a cent next to the medium, {Note by Mr. Eduction.—The rape mover at any time arranged

two other members of the party also alternately filling the corresponding position." [Note by Mr. Farmer -It was obviously a very necessary promution, as we were all about to auter a ferra incognite, that I, as the must experienced of thu party, should be now Mr Eghnton in order to be able to take On the evening of June 9th, 1886, a party of night gentle- prompt action in any untoward emergency. As far as I could men, including Mr. W. Eglinton, the medium, and Mr. J. S. pudge all present recognized those "obvious reasons," and Theor agreed in my (somewhat unwillingly, by the way) yielding to the best source, of the fast itself, it is unnecessary to introduce the discussion into this report

About 12.45 Major J felt a slight blow upon his foet. Shortly afterwards there was a slight tap, apparently on some had not moved he said nothing at the time. Very little notice

was taken of citize of these occurrences.

About 1, 15 a.m. Mr. Eghntest said he felt a presence behind him whose influence was of the most disagreeable nature, and which he deemed to be a spirit of a very maligurant type. Very shortly afterwards Mr. L. stated that he had received a blow upon the crown of his head. The blow was heard by several of those persons. Almost immediately afterwards Mr. In the nephods of Speriteshine, Mr. Farmer was also asked Eghaton, in a voice of some suffering, complained that he also was audible to all present, and Mr Eglinton seemed to become of the sideboard, which mused so lively a sense of semething worse impending that a light was immediately streek.

Upon examination, the cardioattek, which had been in the contro of the table when the light was extenguished, was found among the glamos on the aideboard, several of which were broken apparently by the force of the consumier. A stout cak walking stick which, at the commencement of the sitting, had book learing in the corner of the room (A), was found on the floor (B), on the other side of the table.

Each member of the circle more testified that throughout he had firmly hold outh of his neighbours by the hand. It may be here and that the incidente just recounted, from the tone Mr-L. was struck un the head until a light was procured, did not

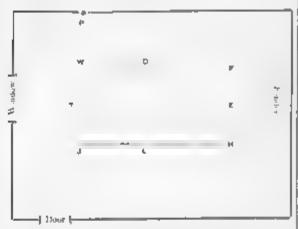

altogether eccupy more than three minutes.

After an examination of the damage done, the setting was ommed ; a lighted sandle being placed (at Mr Farmer a unggestion) in the hall, and the door being left ajar, so that the som was annly lighted. Mr. Eglinton showed signs of great percentage and depression Raps were then heard on the floor near anna. These professed to proceed from the meadum a spare guide," " Jooy." In answer to questions put by Mr Parmer the raps declared that the house was haunted by a man and also by a woman. Slight sounds which appeared to proceed from the bedroom everhead were now heard. It must be stated that the witness throughout the house rattled conaiduranty These sounds, nevertheless, were and by those whi more particularly noticed them to be uninto the mitting of windows. Mr Eglatton exhibited signs of mercased depression, and the sitting was adjourned (about 1.45 a.m.).

The dhung-room upon the opposite side of the passage, a room more haraly finished, was now, by general consent, cleared of the few things it contained except chairs, sofa, table and the fendor, which, from its weight (2631b.) was considered a fixture Within ten minutes after resuming the sitting (about 2.45 a. a. ). which was hold in total darkness, raps were heard on the floor near Mr Eglinton, Those indicated that "Josy," one of Mr-Eglinton's "opirit-guidos," was again present. [Note by Mr. Parmer. We sat me the dark again much against my will and advice. After our first experience in the drawing-room, I, at this used the subsequent serious, spoke strongly against the condition of darkness. Mr. Eglinton expressed no opinion but the others present thinking the phonomens night be more marked if we sat in total darkness, my objection was ever-

A fact must here be noted, as a discussion has arisen about it. Mr. Egimton complained that Mr. D., the sitter on his right in the columns of "Learn" It will be best to quote Mr account to draw too much vitality from ham, and eventually, Farmer's own words on the subject, in "Lacur" of September owing to the imporative desire expressed by the raps, the sitters the sitters. On the contrary, after I had made this remark direction of the fire-place. This was followed by a confused place handelf near me.-W E.]

### Вилопан 2

Questions were addressed and in reply raps repeated the gravious statement, that the loose was haunted by a muswonger. Where Mr Farmer was asking whether by comarthmy may benefit would accrete to these "cartle bound spirits," in quick mecession a lond crush of glass upon the wall (at P) was treated, and some large, largey object descended with a creak upon the table, endang a slight scalp-would apon the head of one sitter and gracing the lacata of two others. The circle at onnow up the door being immediately opered and the form I In. It was then found that the creat of glass had been a sedue to the violent contact of a tunbler with the wall of the To section of the broker tampiler was found in the in some and menty aplinters of glass were found the planter upon that wife of the dent nearest to the The page had been enrofully elected of glauce before in a ting. The heavy object which had descended up a " table was found to be the from fauder, who has manualistely behind Mesays, Eglinton and Forant . . . W If, and was now spelde down upon - The a - wa deeply industed by one corner of the fender. The attention of the attem, whether or up disturbed by the proceeding incutent, was not attracted by any mobile indication from the movements of the fender. The hands of the three gentlemenneurost to the fender (and thus is especially noteworthy) were clean, wherean all those who lad been teneded by it in its fall, or had an acomently handled it, were soiled by the black-load

I was now at see to all he throughout the sitting the contact of hanny had been firmly maintained. The sitting was adjourned at Mr. Farmer's request, by mying that he know Mr Eghaton to be in a very pervous condition, and that he was likely to suffer if any further violent manifestations took

About 11 p.m. on Sunday another sitting was commenced in the duning-room, everything having been removed except the table, chain, and the soft, which last was tied by a rope to the hars of the fre-grate. The party received the positions in which they had sat last, except that Mr. D. transferred has scat to acleft hand of Mr. L.

Mr. Evi aton states at first that the " industree was go-Raps were heard upon the floor, and these purported to be produced by "Josy," one of Mr. by me a secont als. The stated, in answer to questions, that he ("Joey") had been overmastered on the preceding night by the spirit hounting the house, that the sirele incurred considerable danger by at it in the dark, as the manifestations would probably be violent, the spent baring a porticular antigathy to one person present. but that he (" Jooy ") would try to protect the circle from antis Very shortly afterwards Mr Eglinton and that he felt a compacte change in his feelings, a roturn of the cell influence of the previous night, accompanied by very unpressant sensations of a which we afterwards judged to be that of falling morter, in the Jam.

various members of the circle suggested that F should again sound, which gave the impression that Mesert. Farmer and Eglinton, sented on the sofa, were struggling with something nuscen. The door was opened, and the light let in. Both Mesers, Eglinton and Farmer appeared overwhelmed with horror, and the upright slab of the mantal-passe (weighing 1451b.) on the left hand-side was seen to be detached, and was lying on the sofa behind them. It appeared from a deep dent Mr. Farmer's hat that the slab had first been raised and dropped on to his head, whosee R had falles over Mr Eghaton's lack on to the sofa-

Mesara, Eglinton and Farmer have themselves furmaned some observations upon what took place, which it is as well here to imert. Mr Erinton says. "I was not strongling, nor was Parmer to the best of my belief. I was conscious of the Presence, and best down under Farmer to ecopo impending danger. The slab came immediately after I had done so."

Mr. Farmer mys "I was not struggling. The mose as of scuffling arose from the fact that Mr Eg . . . hoon forcibly struck open and a market to be a feet. my but. After striking my head, the substance fell on to my shoulder, and thereo descended to the sofe at the back And further he continues "After the experience of the tone night, I, to be prepared for any emergency, had kept many hand a single war match , and after I had been struck, and while Me Eglinton was crouching down under 180, I disgod my right hand from the left hand of Mr W., and namediately atruck a light." It may here be mentioned that saturate of the form of the stage stage what a rate re had

Book Mosen For a no known a new freed to dear who as a few a gas That and the second of the second o which they could not consent to go through again. And most of the circle seemed dup-seed to agree that the mandestations luct been amply sufficient. Two members of the circle, how over (Mr D. and Major H.) and by themselves as the distriroom for forty minutes in complete darkness. Boyond the fall of some mortar into the fireplace, nothing occurred

All facts having any relation to this separation of the slab, chaterer bearing they may agreeally have, must be mentioned. The slab was excented abortly after the final sitting and amarks were discovered eyon it, or upon the parts from whice had been detached. The corresponding slab it was impossible to units by the hands alone, though the next norms. presence of three members only, a weekman who was romie the damage, took it off with his chief, leaving a La on the slab. He comarked that these slabs sometimes come of by themselves owing to the drying of the comest. The slab was, however, secure on the Sanday morning.

[Final Note by Mr Eplinton.-Its hould be distinctly underand that at nous of these seances did I experience any of the reducing sensations attending mediumship, except during the period when I was questioning the rappings which purported to be produced by one of my "controls."]

Signed on broad of the circle I to LEOVING. October 21st, 1885.

WE have received a copy of the general programme of the proceedings of the Landon Lodge of the Theoreophical Society for the second 1985-b. General meetings of the lodge will be hold at Queen Anne's Mazurone, St. James's Park, on the fourth I hagar a war a only The first general meeting, at Queen Anne a Ma to per was held on Wednesday October 28th, at 0 to a case of the Society, but to be a set of the case of the ca Presence. Mr Parmor, Mr L., and Mr. D. also stated that they experienced peculiar sensations. They had scarcely made those statements when there was heard a slight reacting sound, In a statements when there was heard a slight reacting sound, In a statements when there was heard a slight reacting sound, In a statements when there was heard a slight reacting sound, In a statements when there was heard a slight reacting sound, In a statements when there was heard a slight reacting sound.

### SPIRITISM VERSUS OTHER THEORIES. (Being an answer to Messes, von Hartmann, Myers, and Gurney.)

November 7, 1883.1

By THE ROY. RODEN NORL.

Mr. Guzney speaks indeed of a consciousness "unapproprinted," " belonging to no continuous stream of consciousness (Proceedings, December, 1884), but uone can be really anappropriated. Even a feeling, and a fertiors a percept, or idea involves some attention, though the main attention may be directed class here, which may cause the faint feeling or notion to be seen forgotten. But if I feel at all, I must feel thus or thus, and if I perceive, I must perceive as and so, which means I must descriminate the feeling or thing by bringing it into one implicitly (if not explicitly) identified outrent of conscionment, that it may be implicitly compared with remembered, or simultaneous items of experience. And that involves one conscious comparing Ego implicitly felt to be the came yesterday and to-day, else the process would be impossible. So that the percept, however facet, is always liable to be re-appropriated at its own proper moment. For self-consciousness in redoction is but the prempi tate of elements intent from the first in the montal solution of ments consciouszon.

Thus in the very interesting experiments of Dichet deta on in the mine article, where Richet was the suggest a Milor one of them, the conditions of a scance, according to what we Spiritists believe, were exactly reproduced, except that Richwas an emboded spirit, and usually the spirit is not in the ficals. There was a medium tilting a table at the right moment, and a planchette. However, the earlier experiments suggest a disembodied intelligence bouldes, and, I suspect, the later men also, if the name transmitted to the medium was not secrely sub-conscious in M. Richet's mind, but at the moment out of it, anlow, indeed, it was "telepathically" transferred to that of some other embodied person present. The point is, however that not the name he intended, but snother that had been one sub-conscious in his mind, was reproduced by the mediate

The whole continuous succession of our scinal tano-contains nem (if taken in its ontirety, and multiplicity of development in many phases, perhaps in many lives, worlds, or spheros) is in my belief, no other than our transcendent consciousness. only viewed from the importeet, limited, and imporary standpoint of our present defective (and, therefore, as far illnere) life. If we can and felt traly our own life, the time-observat would be absorbed by being felfilled, changed in form, virtually, therefore, disappear, and "be no more." But how does it follfrom this idea that, if you post another different conscious succession, simulitareous with the one conscious ancommon that, by its very openom in variety, constitutes an individuality as we know it new, you get do not have two individualities, but still only one? This does not follow at all! While we are living and amoniting under the form of time, simultanoity of distract consequences (pace Mr. Gurney, Mr Musey, and Dr von Hartmann) must always arguify two individuals, not one It were easy indeed to conceive of etermity, if that only meant placing a number of successive temperary consciousnesses side by side in almultaneous times! I But that would not advance os much, I imagine ! for no we should not transcond time, but simply reduce it to a confessed absurdity. For my own part, 1 our make little of this two-headed-mouster theory.

What surprises me most in that a thinker like "C. C. M should entertain this hypothesis when he has uttered such axcellent and weighty words so these in his every on "Sympneumata". "An long as the human individual is soluted" (italica mine), "he cannot realise and wield the psychical forces which belong to emential humanity. But when the untily of the race is a living fact for every member of it, the vast reserves of force can be drawn to may point where they are monded, and the undividual soit of armour (our present solid organism) can be discarded. We have beard some complaints lately that telepathio psychology is being protect too far. It is destined to be enormounly extended. The Burnan mee is one suchonic organism. the internal supports of which are only as yet apparent behaven its more intimately concented members. The individual sympathics, mediating thought, and sensational transference are only an early and special case of the great assume respect, which will come to observation with overy advance of the mathers conscientisms." Excellent! And yet when the phenomena of E. Gurroy, E.q. Sea, of the Society for Psychoal Research, 14,
Spiritisms seem to extend indefinitely the oridence of such
intimate relations between all the individual members of the

great universal family of intelligences, unseen as well as seen, "C. C. M." profers attributing them rather to a purely hypothetical, and secreely conceivable (indeed, as I have shown, a self-contradictory) self-mudering of one and the same individual! Nor, indeed, can I at all follow him when he says in the same easy " For, as the normal Ego knows nothing of the trunscendental subject, any entrance of the latter into its coueccentrates is as that of a stranger. In the day-droun or somnambulic consciousness the transcendental subject steps forth as a second personality." " Hence the gunder and greatlinus of sommarabules and mediums." The emergence of the transcendental subject above the threshold, who then of course speaks as, and is inorntally accounted, a guardian or control." In the name of all that is verscious, why ! What our possibly wastant so questionable an amortion? In the first place it would seem as if "C. C. M." must attach a meaning to the phrase " transcapdontal subject" which I should have been, on other accounts, the last to attribute to hun, for he speaks of the somnambula or francesdental functions." I fail outlively to see why the nonmanibulic should be more "transcendenta," than the normal or waking functions, proceedy as I fail to see why Spiritials attribute some poculiar spiritual virtue to what they (not very prottily) call a "fludie" body, the result being that if only the religious decirine taught, or information ima imparted to them by some intelligence with a

il was " body, they seem to jump at it as if it came from the Day . Bern, Humself, and necessarily superseded all former re a a rese that a fluidle body, as Mr Maitland has pointed out. may be as much the appearage of a denice, or an hup, as of an angol ! I think of the two I rather profer a solut to a thindre body, as I frequently prefer the kindly common-sense of urdirectly daylight to the frothly rhapsodies of some cropuscular

\*C. C. M." says that even the sommanth and induced by disease often "mediates on exalted mem) conscionares and extelligation such as may not be apparent at the metaly personal character." No doubt that is juito tree. But then he goes on may that this is necessarily accounted a "grandian," or control." Why and If it belongs indeed to the same I er self, I quite fail to see why it should be so mistaken. Most of us are conscious of higher or lower moods, of affinitios with holl and harven, while now one allinity, now another, emerges into presented of rultof and domination. But such an action as that referred to, if indeed it be attributed to another, and augher, in more probably what intuition discorns, the moflowing of the Hely Spirit, which, while we are still earth bound, in mther primarily the mileenee of more elevated and advanced ouls, or angula, than that of our own holior or not use to though assuredly this also may be aroused into mone or low and fervour by their exalted summeration. For quette in their essential being are in most intereste communion, yea, free of one another for purposes of inutual help and love Though I admit the transcendent subject (and fail, by the

ray, to me how one who door so out disbelieve in our essential importality, and hold instead our ultimate absorption into a con-individuality, more absolute than that of love, knowledge and aympathy). I think those who believe in it, as a rale, per tage too much sever the two spheros of time and overnity There are not two subjects in one, a temporal, and an elemnifor loss are there several assaultaneers ambjects mone, which last des is a far more gratuitous paradox. But the temporal, conmanus auscomion (be it normal, or abnormal) is the tennecessiont on eternal mly a questocity grouped, experienced lived. tenurally the rater rises here is ad less sea e c ne have vig come one to make to the way of page. our true individuality. But that, so far from being the omergence of a different self, is the perfecting and fulfilment of the same, enabling us the more profoundly to realise our identity, our essential being through and in one another.

(To be continued.)

Light in the West is the title of still another newspaper durted in the interests of Spontaneous in America.

As showing the rapid spread of Spiritualuas in the provinces during recent years, it may be interesting to state that at recent Sunday services, hold at Blackburn, the attendance numbered 1,000 in the morning, and over 1,200 in the evening.

WHA "Caps" and "W G ," who recorded cortain narratives

### THE SOCIETY FOR PSYCHICAL RESEARCH,

Agenoral meeting of this Society was held on Thursday Octoter 20 mar to Caylon Mansion, Queon Anne's Mansons, Lonon S. W. understood that he can accept no responsibility as to the special to Mr. X.s garden, "it is, nevertheless, the fact opinions expressed by Contributers and Correspondents, that my wife and I thought them more beautiful than the Free and constants discussion is incited, but writers are lone responsible for the articles to which their names are attached.

### A CASE OF SPIRIT IDENTITY Br "M. A. (Oxox.) "

The story that I am about to relate is within my own personal knowledge. The actors in it are known to sao, and though I cannot publish their names, I can give my own personal attestation to the exact accuracy of the in the garden with my wife, also observed a large brown record which follows. The facts are of recent occurrence. I contred sentiawer which delighted her exceedingly, so much had an account of them from the lips of one of the cluef that my wife, who had previously not cared for brownactors, and I have before me the written correlecation in controd sunflowers, took it into great favour, and thencefull detail of the other person intamately concerned.

The actors, two in the body and two out of the body, are Mr. X., a gentleman of position in a neighbouring county, a careful and cantious observer, a man of high tions as to which to gather for the purpose. He brought acceptable reputation and attachments, very accurate at all there, and I put them into the could myself, he standing by that he states, a man of the world, and a man of afform. There was room for some more. John suggested Mrs. Z.'s of many leading Spiritualists, Mrs. Z., also a dweller in flower.' Hence the reason for showing your flowers to Mrs. Z." the sperit-world, and well-known to me before her departure

before her departure. It was a desire for knowledge of precise and singularly unlikely to be true. It was directly her state and of communication with her that led to the given to Mrs. Y., no one else being present, and is not, introduction of Mr X, to Mrs. Y through the kindness of therefore, to be accounted for by thought reading or any of Mrs. Z. a conomon friend.

On the 4th of May last, Mrs. Y wrote to Mr. X, saying be explained or explained away " in effect that the had clairroyantly seen Mrs. X., that she | But this is not all. While Mrs. Y was writing her had expressed less pleasure at mening in Mrs. Y.'s garden letter to Mr X., she observed Mrs. X. present, and said in some sandowers which Mr. X. had sent her from his own effect that it would be very gratifying to Mr. X. if she garden, they were the most beautiful, she said, that she could write a message to him. The reply was that she had ever seen on earth, adding further that the last thing could not write then, but would come later and try to write her husband had given her was a conflower, and that she if a penci, were provided. Two or three days after she had shown it to her friend, Mrs. Z., who had passed into the came and did actually write slowly and with difficulty in other life some nine months previously. "Why ?" (Mrs. Z., the named of a sheet of paper the words, Yours affecas she related, very characteristically remarked to her) "this monately Anna X " signing her full name. Mrs. Y did

particular variety of double orange sun-flower, which both (The Editor of "Liour" deares it to be distinctly be and his wife much admired. Though in no degree other kinds of sunflowers, and that my dear wife navor saw mem m wy garden but our own.

"The first of the three statements was thus most obyour ve the completest possible accordance with the literal fact. But at first I could not understand the statement that the last thing I over gues har was a sauflineer. One does not give to one's wife, or to a lady at all, a sunflower, a foot in diameter, to wear, or to place on a table. Nor could I understand why that sunflower should be shown to Mrs. Z.

"I recombered, however, that Mrs. Z. was viscoung us in 1881, about a week after my con's (uneral. Walking forward always spoke of it as 'Mrs. Z's sunflower.'

"The time came when I had to sak John to gather some flowers to put in her coffin. I gave him some direc-Mrs. X., his wife, who passed from this world some three munitower. I feared it was too large. John answered, 'Sno years ago, and whose return to it lately in spirit I am to went to see it every day, sir, since Mrs. Z. was here.' So I record , Mrs. Y., the medium of that return and electifical asked him to fetalt it. It was the last flower that I placed tion, a lady in private life whom I cannot further indicate on the coffin. In this sense it is literally true that the last then by saying that she is a personal friend of my own and thing I gave her mas a simplemer. And it was "hirs. Z.'s sun-

I have been thus minute in relating the verification of these three statements, because they were outside Mrs. Y's Mrs. X., I should pressise, was not known to Mrs. Y. knowledge, and because one of them, especially, was very those devices by which spirit-action is sought sometimes to

a shorld, a beautiful shoeld, that your lumboad has given you!" Thus had been clourandicatly conveyed to Mrs. Y., and sho recorded what had been and without comment, as being externed to ber knowledge, for the benefit of Mr. Y. He returned an answer on the following day, which as how before me. "For some time after reading your letter," he writes to Mrs. Y., "two of the three statements of my dear wife's which it reports, paszled me exceedingly. At length, however, I remembered what seemed to make all the object I had in clear without my thou first telling him the object I had in the distribution of the property of the pass of the pas

not know what her first mono was, had never heard it, nor did she know M s. X's handwriting. She forwarded the paper just as it was to Mr X

On the 12th of May no repues

"That direct writing is its my wifele hand. This admits of no question. I had no need to do so, but I have compared it with lotters of my dear wife's, and also with a legal document copied by her. I have also asked my secretary to compare it with the latter. He mys that the hand which wrote the one wrote the other

rtainly you never heard from me that my deer w fe a Christian name was Anne. I never mentioned it to you

On the ,2th of June Mr. \ further writes :-

"I lave shown that wonderfu direct writing of my dear wife's to my son . . . a . , and he admits that it za u noucedianably has mather's.

" And I have made a curious discovery hearing upon it. We may suppose that the direct writing was executed with difficulty. It was more deficult, I mean, to the writer then to write a letter, for example, while she was here. Now, writing on linen is more difficult than writing a tuper. The capital A and espital X,\* though most unquestionably my wife's, were yet different from any such campair in her letters.

"But they are indistinguishable from some such lotters of here which I have found written on linen-absolutely consult organizabile

I have sent this parrative to Mrs. Y, the medium of communication, and she authornes ine to state that the fasts are exactly recorded

We mayo here, then, information conveyed which was not within the knowledge of the meaning nor of any person present, which information was afterwards verified

We have next the signature of a "dead" person, which was exact and climinaterists

If this is not to be accepted as ovidence of the presence of that person in our world after death, of her continued allo and individuality, and of her power in her discurbedjed explanation of the facts can be given.

it would rank a strong premimption in favour of the surnature, and granted with, perhaps, greater frequency to this part of the narrative is this age, which so needs such evidence

of being verified on the spot, and attested by hving witnesses of unimpenelable position and character, and not on tradition or bearany - it is on such testamony that Spiritualists ground their conviction that there is nothing in physical death to impair the continuity of individual exatence. A prope belief, a general nope that all the generations of humanity have shared, at this turned into a are wrong in their interpretation of the evidence before toem.

They do not find, however, by search the most painstaxing, any explanation that covers the facts, except that and Man autvives the change called Death.

Tits Social Drift, orronously printe in a previous number Second Street, addited by A. B. Wood, is an a souther progreasive, and liberal" journal, published at Mukegan, Michegan. A too not profess Spiritualism, but quotes frealy from Speritualist publications, facinding "Liour," as do many

### PHASES OF MATERIALIZATION

A CHAPTER OF RESEARCH 3 THE

OBJECTIVE PHENOMENA OF SPIRITUALISM By "M A. (Oxox.)"

(Continued from page AT )

I paus to cases where

(3) THE PROCESS OF FORMATION HAS DEEX WATCHED

I remember well in the year 1873 watching repeatedly the gradual formation of the head and bust of John and Kutto King it is a rices of Heric con Wil and I have is fire 4 f - 44 these material as our took pice over the table at which the observers were sitting and taxt the faces and leasts so presented were subject to close observation by the aid of the light or lamp which was held before the face. I have in this way watched the gradual development of the features, look a directly rate the eyes, which were or a level with my own. I have seen John King a every man cervable singe of development and growth, and that under conditions where it was what we are socustomed to call "physically impossible" for a body to be placed unless it reclined on the table, which it certainly did not, or unless the piece of furniture itself was no adapted us to permit a man and woman to stand in its milst and play their aigity tricks. Not even the most rabid meredulity is likely to manatain that proposition.

The Spiritualist journals of that period are full of such seconds as this, which I quote as a specimen.

"John King showed blusself with great distinctness. At first the upper part of his face was seen , then he said he would try to manufacture his beard, when he soon appeared with a turbon on his head, his square, massive brow and straight, sharp nose being quite conspictions, as well as his dark-coloured board. The neck under the ear was quite bare and white."

Mrs. Nosworthy records in The Spiritualist | a season held in Liverpool with a private medium, in the month of state over naterial substance, I desire to know what better September, 1875, her father, Mr. George Thompson, and by I woman being also present. The cabinet was formed If the case stood alone and solttery in our experience, by sanging a curtain of green bases over an angle of the small room in which the observers sat. Careful examinayaval of our undersiduality after physical death. But it is tion by an architect showed that no communication with an unit strong a vest and coherent body of experience not the exterior was possible. The light from a paradia lamp confined to any age or to any people, but common to human was sufficient to see the faces of the sitters. The material

"A short time after the retirement of the medium, the On such testimony it is testimony fresh and capable curtains were drawn and a new a many repour appeared in which was faintly outlined the human torm. This va - ar gradually grew more dense, a head and arms were fushioned from it, and the arm immediately began to manapulate the rapouty mass below it until the whole assumed the figure of a tail man clothed in white priment. The man quickly showed up that although he had appeared as a rapour, and literally meansfactored hissaelf in our presence, he was no longer a cloud, by coming out into the room and giving each nitter a grasp of bie demonstrated fact, scientifically proven, unless Spiritualists strong, taugible hand. More light was then permitted us, and wo could me that the aparit was a tanpetic, grave-looking old men with long, flowing white heir and board. After remaining out of the cabinet for a considerable time this spirit retired to the spot whence he had issued, and standing up therein with ourtain held back by his own upwhich naturally and obviously suggests itself-viz, that lifted arm, he beckened each sitter is succession to come the pious belief, the universal institut of humanity, a right, up and stand close to him and his medium , whilst there he gazed stoodily into our eyes and invited us to do the seaso with him. My father was enabled to perceive that he was fair, almost of pink and white complexion, and that he had a reverend and dignified aspect. He 'stood holding up the grown curtain with one arm, and pointed with the other to his cutranced medium. We ware then visited by three other spirits."

> On another occasion " the spirits were seen forming them \* Modifiers, December 13th, 1872. | July 28th, thin, p. 200.

salves. Once or twice they showed themselves at the entrance of the cubinet, underinlized only to the want."

Navember 14, 1885.1

The actual process of growth has been observed in the presence of many mediums with sufficient accuracy to enable the Relegio-Philosophical Journal of August 8th :us to say that it is not always the same, so far as can be judged.

or less self-haminous substance is seen on the curpet in front mounty attached to them, and upon some circumstances of the calanet. This, if carefully observed, would probably about them which, I behave, are arreneously interpreted. I be found to be analogous in kind to those feating master of shal, first briefly allude to three typical cases. A few years hummous rapour of which I have before spoken as the pabulum ago, Mr. Crookes undertook to investigate the phonomena good by the invisible operators. It would also probably be of materialisation. He conducted his experiments in his found to be in agitation as though subjected to some form of setton which is acted to it a circular motion. Gradually to a white many is seen to grow until it assumes the form of a business work. This process has been seen at the Eddy mony as to the genuineness of the manifestations through makers, of Miss Works, one is course in the following her mediumships. A few years later, this same medium, extract from a letter" by Mr. Orthwaite, describing various then become Mrs. Corner, at a stance at 38, Great Russellcases of materalization in front of the cabinet. The street, was intercepted outside the cabinet representing a medium was Mrs. Esperance, and the so-called cabinet was spirit. The facts were detailed in the Times by Sir C. improvised with shawls stretched across an angle of the Sitwell and Mr. Von Buch, who, emagining froud, went to room in which the stance was held, in a private house, the stance on purpose to find out and make an exposure of it. Thirty persons were present, and soveral forms appeared. The part of the record material to my present purpose is an for materialisations, was called upon by some conspirators, follows .-

"A piece of something white appeared to be kicked out of the column, and then spreading smelf on the floor rescaled a About the same time Mrs. Miller, of Denver, was charged white poster-handkerchief. This gradually increased in air at St. Louis with obtaining money under the false protoned matil it appeared to be about as big as an infant. Whilst the of materialising a spirit. Her prospectors had conspired, little thing continued to fight its way out, it grow larger and before the scance, to prove fraud, and it was proved at the larger until it seemed about four fact high. At this stage, as trial that she was outside the cabinet, personating the aport though exhausted, it rested for a few moments and again commesood throwing its arms about and geowing still tailor un d it added about two feet more to its height, the bulk increasing character of manifestations through liter mediumship, and in proportion, and then at the bought of six feet it was dustinetly similar testamony was also produced in Mott's case. so in that the white patch had grown into the form of a man."

(To be continued)

Tax Bodon II is has squaye been fair enough to putcosh impartial accounts of admoss with different modulus. In a recent number a long account of a highly successful atteng with Share or reported.

Part is at Experts Tokofold Sympathy, -- Dr. Brown-Sequard related recently, at a meeting of the French Academy of Malie no the female as having come gailer his own observation. All the get was locking out from me appr commed window, with her arms restant on the sill. The support cabmet at St. Louis, and I think it likely that she wal be so of the man gave way, and it fell upon her arms. Her mother, | ranget again if she continues to give public stances, and who is themsel the accident, faculted as some time passess information recovery the way ten conservate of some or near arous on each of which was forms a or or corresponding a those in the shift who is he are how for on a Committee a less accresses a surce and a value and it winds provide a anneal of meredulity, but Dr. Brown-Sequence position is science does rad f. Rediene, February 20th, 1600, p. 118.

### SOMETHING FOR CONSIDERATION

The following is from a communication signed "M.," in

"I wish to comment upon some facts connected with In some cases a patch of nebulous, and generally more Spiritualism, that may have a greater significance than is

> " A short time since at Kansas City, Mr Mott, a medium who during a seance squirted some dye into his free when it appeared at the cabinot window to represent a apirit. But testimony was also abundantly produced of the genuine

> "Those three pases are very similar, and they are not exceptional. I believe that Mrs. Miller is houset, at a private randence where front could not possibly be, I stood with one hand on Mrs. Miller's shoulder while there stood on my other side a full formed materialleed spirit, with whom I conversed. During one evening at a sounce with her, I have seen as many as fifty unterislisations, sometunes two at once. Nine other persons, present at the same time, could verify this statement of fact. Notwithstanding, I believe that Mrs. Miller was caught outside the I where that it was Mott's face upon which antiyue dye was aquirted

"How can these facts be reconciled with neverty in the mediums, and with the truth of the mandestations in geneperform in their unconscious state almost anything could DEMATERIALISATION. Mr. J. Wotherbee, in his "Boston be employed aron as mediums for crime. Mediums serving mannerised, by their controls, and become for the time mere may among, by which the purposes of their controls are carried but and tiese who are referencedly anyons to see the measure instead of a mater case, appeal and who

beforehand if a thing can or cannot be done, they pass by

facts as if they were nought. No wonder that Mr. Egunton declined to give seances to such people.

scratch of the pencil coming, but no sooner did two of the tach ] commussion, who were positive that nothing would come. withdraw, than a communication was written. There is something similar to this in gaivanum, all the elements are classed as electro negative, or electro-positive. Suppose we Gorney for any obscurity or confusion in my ideas, whether are going to electroplate with one of the metals, one that is that is real or only apparent. Apparent, at the least, it must very electro-positive, our bottery must be sufficiently strong and a wight to gain something, wither in definitede of to overcome the opposition, or potentiality, of the metal to thought or clearness of expression, by centact with any be deposited, otherwise, our electric bottery will work backward, and no deposition of metal take place

"There is an analogous and more subtle law brought into action when hostile, positive-minded aceptics set up an opposition to the power operating in the production of tive) what Mr. Gurney means by it, viz., the objective aspect Spiritual phomomens. We are told that at one place Jesus of my perceptions in general (as in his relation B), the concould do no great works on account of the unbelief of the nection would undeal be anapparent between that and the people. And the record shows that the magnitude of His organic phenomenality which I seems. But I did not confound labours was proportionate to the faith of those about Han-Nothing our prosper in the presence of success. Nature will not have her confidences violated or mocked at. In (mre so far as relates to my perception of my wat the adjustment of her relations to man, sincerity counts for body), but just exclusively of that which ide. Gurney denote to as much, and is as important, as gravitation."

Francisco. Some thirty years ago Mr. Massey delivered a though it would be stronge to me if so great a master of the course of lectures in Leading on the abnormal phenomena new known as Spiritualistic-his first wife having been a very extra ordinary medius. One of his most important and interesting lectures is on this animost, and bears the title of "A Leaf from the Bank of My Lafe. During his absence in the colonies he | sectured to large and outloadastic audiences in all the principal cities. We shall welcome his return to this country.

A SECULAR PAREN ON SEATS-WRITING.-A correspondent of the Buffelo Courses, in the course of an interesting account of a wonderful strates with a Mr. Manatold, says -"If the our I (for I am not now assumed it), must at least, if there is no other munication is a long one, you find the elete-pencil nearly gone This is no mind-reading, no payahousetry, no jugging trick, for you have had it all your own way much more than If you had been doubted with a common telegraph office. If you send a ter was from an point to another on our earth, and you amaging compact by sufficiently personally with a silyou doubt, do you suspect the operator? Do you think the pure electric finish sent back an intelligent answer to your manager Or, is it not according to communicatino to emphase that your reply comes through another operator at the other and of the line, And if it was answer to your passings, do you not believe it to be dictated by the friend you addressed? Do you know of any telegraph operator on any line on earth be whom you can cake a scaled message rolled up in a hard pockage, hald closely In your hand and addressed to a distant place, who will read that sould communication in your shut fist and obtains an approprints mawer? Yet here this is done many times a day. \* Our it always be done? you sak. No, air. The battery may be weak, and the seeker an angular, envilling disposition, such so infort the world and make it uncomfortable to all who come within hailing distance. To be a medium is to wear your nervos on the outside. A sentitive organization these human notifies blister and exasperate beyond control. We all know of those whom we had rather must than meet, who pin us to the wall and strike us slumb. Conditions must be favourable. That thes sinte-writing, exactly as described, takes piace, there are thousands to testify But what is it? Not loose electricity, not formless payable power. No intelligence can couse from force of any kind that is not subject and under the control of intelhydrico. We leave you this time with the commidment-what Sec (2.7)

### CORRESPONDENCE

It is preferable that correspondents should append their Recently at a sussion of the Soybert Commission, one, names and addresses to communications. In any case, however, of the best sinte-writing measures sat for two hours without a these must be supplied to the Edster as a guarantee of good

### The Phenomenality of the Subject. To the Editor of "Least."

Sen,-I can very glad to be pulled up by Mr. Eduumd criticism of his. If the improvement is not immediately evident, and I some to turn upon my critic authend of mendang my own mental ways, that is only the imprateful form which reaction upon an intellectual stimulant often has to take

Had I meant by my existence as sensible (as well as sensi the two relations, for the reason that relation B was not at all many and, nor over colution A, as Mr. Garney actios it. I was not have of the objective aspect of my perceptions be a necessary correlate of my subjective existence, that which, given a percipient-whether another or mysulf-would for that percipient (according to and under his own modes) be pheno made. By the words "given a percipont," I am not begging the question-which is whether I need be perceptible at allboname in my view all perciplonce depends on a capacity of the pormpiens to constenct a supresentation in response to a subtortive unpression. We, for instance, have not that capacity in relation to a (hypothetical) "spirit," but that argues mothing games the spirit's perceptability, that is, against the existence of other beings who can nonstruct such a representation. Mr. Ms. Genate Massey, the poot, is now secturing in Man Corney, of course, may not accord this doctrine of purception, parchology of " hallocinations" did not hold some theory resambling it. For I can conceive no geneine idealiem regarding the whole world of sense representation so other than collective ballscination. Indeed, that is only to any that the sective world exists only in consciousness. Obviously, therenot speak of my his tire aspect, or tailor (to avoid misunderstanding) of the objective sepect of me, out of relation to any percipient, alone it exists only for, and

the consciousness of a perceptent, who, I shall centend be reports. No doubt the phonomeral are contains within itself abjective and subjective separate for the perciposal, the subsetive aspect bring the phenomenon regarded at the pursipient's feelings. Thus if I am the percipient, the shenomenon of myself is not only the objective aspect of seyacif, but likecine contains both superia for me as percipeers." I cannot, indoor, quite adopt Mr. Gurney's statement of relation B, because he there speaks of the "object" as " that which determines too," whereas the " object" only exacts when I am interruped, and so the objective aspect of my determination. do not know what determines use to the representation, lamp. only know that this representation does not determine my, consuccest only exists when I am thus determined. If I am a realist, say of Brown's school. I postulate an unknown X as cause of my repropresentation ("real object"), but for a differently constituted parcipient, X would determine a quite different representation, or phenomenon object, In short, I cannot follow Mr. Garney to calling "the relation of me determined to that which determines me" "a relation of subject to object." So also we have to distinguish anbject from subjective aspect in phononotes, not that the distinction is radical, for to monism the subect itself is, at hot, only an aspect of that world, but became otherwise we shall always be suppressing the distinction in the bject, or phenomonou, listef, and sliding from the conception of amoren into that of elements or factors, as Mr. Shadworth Holoson shows that Mr. G. H. Lawse did. ?

Now I concede to Mr. Gurney has supposition that there is no percipiont in the universe for whom "I" can be an object "I think he shad earth Moderne has encountrilly shown that the distinction of the asympte always eriose in unfection, and is not apparent. In principly constitute news. + Say \* Philosophy of Reflection, "Yel. L. p. 103 of my.

or phonomenon-creat world. But I contend that I cannot have also to distinguish phonomena themselves as subconstruct (or "percente") a world of space objects without at pretire or objective-the hors so-called "subjective plante the same time representing myself therein as one of those objects. Zinnon containing, of course, again the objective aspect, which That for the objectivity of such a world in relation to me, I repect a the representation of myself as an object among must be posited in space. Her Gurney apparently allows, but he objects. For other phenomenative distinction of the aspects arises says the condition in manifold by the insthematical point, and only in philosophical reflection for an end of the need not be dimension, or occupation of space. Now to test thetion belongs to primary reflection. The subject-object is this, we come to the question which it may be thought I should in econocily an organism. Locause it is that which establishes the have begun with. I have been using the terms "I" and "and, and what is mount by them? Mr. Gurney says that no more relation, however, insmette berepresented monnecounters satis need be meant than "a series of presentations," each cop condition of perception, only that as objects in space we are taining the relation which he describes under B (and which I affected by other objects. For the purpose of my argument, may perhaps express by determinate feelings combined into an Mr Gurney's relation A (conscious change to brain abango) is object), and implying nothing more. That is to say, he discummiportant. It represents, no doubt, the inner and most mission the "mabject," and registers it by the subjective aspect, essential fact of my organic constitution and relation to the prous the phenomenon the phenomenon itself regarded as contained of consciousness, but brana action does not belong to the "feeling." Now I do not object to the substitution of scalifor for acotio, but I maintain that belund and along with every "nortes of presentations" in which subjective and objective and objective sepects are discriminated, is one relatively stable precontation to which scatter stands for sector. I submit that for critiches, would be the but to require that his gauge used there a series of presentations to be related in and as one consciousnon they must associate themselves with that mode of feeler, which endures. I do not want to go hobbad the analysis of ecsciousness for an Ego, but I find in consciousness that which hypothesis, which Mr Gurney regards as unessential legerally. maintains electedy through the changes of its states, and makes " and the position of the states and makes " and the states are distinguished with mutual "perof being changes of a consciousness, which would be the more coption," implies the phonomenality of each of ma, and that destruction of its continuity or identity. Mr. Gurnoy's all objectivity corresponds to what we now call "matter" (in hypothesis makes no provision for the continuity of conscious , perception) nose, and could make mone, since it is framed for the very parpose of excluding the subject-object. How, in the history of each individual consciousness, that subject-object is formed and not to mine, though I do not suppose that my recognition of constituted, many writers have described. In speaking of it that fact can be doubted. So in my uses of the term "organism above as a mode of feeling, I do not ignore the fact that it is Mr Corney is liberal and forbearing, indulgrat beyond what I really a group of feelings, nor do I diagnize my own philosophical could expect, but evidently he thinks no tather wild here. I conviction that no organic aggregate will, of itself, account for the unity of consciousness, but, on the contrary, pre-supposes that. Logically sure, however, we may be that the unifying function must begin with the organization of feelings, an Egobeing thus constituted, in relation to which along a world of "external" objects can be perceived. That is to say, the remarks is that raised by Mr Gurney when he mys "I fail to consequences which any sages once deports as we are it in it too that the phenomenality of the ambject is in the least implied

November 14, 1885.1

The subjective "point" in space is not only passwary or order to obtain a system of space relations at all, but also in Camulica" has an important bearing, from the idealist point of order to account for every perception of the world in the farms of view, upon the question of organism. I read a paper on this the world percison. This account is, I believe, an exact more subject, ording attention to Dr. Ingloby's theory as a sion of the tree process (philosophy explaining why some avalupment of Kanton principles, before the Aristotolian experience and the scientific account thereof exceed but be such besuty water near a . I think of printing it, and if any Inversion), nevertheless, the very recognition of the world as one reason. I have the sees a limited on he spy to send have of which I am conscious obliges me to place my self-conscious. In her a copy of apparent on non us if, which I can only do by clothing my self-consecument homogeneously, i.e., finding in it an objective sepret. My relation of perceived objects acrong themselves—for which the pority and adventures dedicated to the floreries of Victoria. mathematical point of observation might softice-but their objective relation to me an percepient, and that our only he a sperit manifesting horself in such a way on to lead to the obtained by constituting sayself an object. I have not only to discovery of her neurdoned body. It is given as if the narrator obtained by constituting separate an object. I have not only to have a har he are not when the constitution expected to expect the constitution of the "me" in this relation is therefore a fooling at some given point of space, in other words, has an objective we are the series indicates the recognition. aspect in space. I quite agree that if I could connect space objects in my consciousness without any reference to a subject, the mathematical point would do, but since no more than Kant can I, or Mr. Gurney, or any one also conceive the function of unity to a consciousness without reference to an " Ich denko, "+

relation , it is that maded possed in space. We come back, then, to this: that not only have

relation of the subject to its external " world." The secondific expect of my self-consciousness. That aspect is the and their name which in our rank is no we kind w. Mr. Gurney, who has referred so kindly to the paper he

an a particular rolation should have the character of a conordly to a decade or oxide a proops so for an incumary to that argument. I wont therein altogether upon the "accord

I was not there concerned to show that your phonomenon of me belongs, after all, only to your consciousness and can only plead that I was trying to get at an ultimate conception from which no advocate of the pure subjectivity of the adiredua made could means, not to offer definitions which a biologist would for a moment tolorate

The only base I have attempted to meet in the foregoing empty of all present or or to have a feet in a way in the admittedly mocommy phenomenality of objects to the before it finds the world in steelf. The first objective aspect 1 subject." It seems to me that if Mr. Gurney admits a "subject discrimunate in any world I rolate myself to se that of those at all-other than the subjective aspect common to all its perfeelings which go to make up my sense of self. I thus got a coptions—as one torm of the relation, it is for him to show here representation of myself , for myself, at least, I am sensible as mention at all possible except by the representation of the to me at the distance of the percipions with its "objects."

I should like to add that Dr. Ingloby's "Law of Reciprocal

Dantso Deam. " by J. S. Borlano, is a volume of tales of Washington v. as in the New York J. Ono of the talen in or regular purishment of the growing tasks for payablest

Marran, whatever it be, has no spentaneity, it engenders nothing to our only be the more min if its ressemp too men of Him Who has created a given much the its operation. The there is an issuedute filling of space selve we represent the organised matter of the brain manifesting the phononeous of "Ich denie" at a point of space. If I perceive that there as a rela-more consciousness of the thoughts and of the phenomena manu-tion to make? Are, I cannot abstract from all content here, for feeled by it than the crude matter of an inert machine, than if is that very content which constitutes an assential term of the [a clock, for example, has of its movements and of the hour at points to , any more than paper and printer's type have of the ideas they convey to readers. To say that the brain secretes tre to distinguish the aspects in phonomena, but we is thought is like anying that the clock secretes the hour, the close of time. It is absurd to suppose that matter could engander timely detrimined as subjective aspect from the expectation aspect from the expectation aspect from the expectation of the Matterment. Le Spe term from the one Bernard thought is like saying that the clock secretes the hour, the idea

> Owing to structural alterations, and some delay which has occurred in completing them, the Repost-street entrenes to the Banquetlag Hall will not be opened. Friends will, therefore, kindly hear in mind that, contrary to the mood custom, they will only be able to enter the Hall by way of

The attendance on Priday, if the number of tickets constitutions as to the reality of the facts, no inexperience disposed of is to be taken as any criterion, will be the surgest ever assembled under the apspices of the Alliance. We are pleased to learn this, because the President last some very amportant business to bay before the members.

> THE Harmonie is the name of a new Spiritualistic monthly amazine published at Waco, Texas.

> Mr. Walter Rowell, an aloquest esperational medium, late of Manchester, is meeting with great seccess in the United States. He has just started a new society in Chicago, called the Improvident Spiritual Charch.

> A Serarroutist, of Huntinglou, Philadelphia, states that his is a litter aged twelve years, though entirely amorant of the erman auguage, recently spales it fluently while under the affinence of the spirit of a Corman poot.

> Mas, Jasanna Breenen Hoosen, a sister of the Rev. Want Brocher, in a firm behover in Sparitualism. An American contemporary has a long article from her pen descriptive of materialisation phonomens witnessed by her.

> Titink of it for a moment—an unpay, intact corner of a hambour drawing-room, as which nothing is protected by the curtain for the time, the medium standing outside of it, in right, and then ten materialized forms of men and women country out of that nothingness, as solic seeking as any of the persons in the room that a what I call she count demonstrated. proof of a sparit materialisation.- J S. WETHERBER.

> ROBERT INGRESOR, OR SPIRITUALING. -" I know a great many excellent people who are thoroughly convinced of the truth of Spiritualism. Christians laugh at the 'minucles' today attested by folks they know, but believe the natracles of ong ago attested by folks they dal not know. Thus us one of the contradictions in human nature. Most prope are waining to believe that wonderful things happened long ago, and will happen again in the far future, with them the pretent is the only three in which nature behaves beneff with becoming sobmety

### "APPARITION MEDIANIHIQUE."

November 14, 1885.]

Never since Gabriel Max produced his "Epirit Greet ing" has a master in art put before an unbelieving world such a chef-deavers as the engraving before us. M. Tisset is to be congrutulated on the happy rendering he has given his subject. All who have seen it units in pronouncing it one of the best illustrations over given of a Spiritual phenomenon, from an artistic as well as from a realistic point of

Regarded as a work of art there is little to be desired It is one of the best specimens of measotint we have ever seen, and now that an effort is being made to revive the for some in nutes, six again kissed, shock hands with lines, amost lost art—beautiful in stealf, but also passessing the special recommendation of being more than any other department of engraving identified with England such a picture as that produced by the emment French Soriety It discloses two figures, ast against a dark background -one artist is to be welcomed from a purely artistic point of view, spart from the attraction it will have to us as Spiritualists. As an art contemporary has pointed out, for some fifty years monotint has been declining, or, rather, the name has been appropriated by an art which has very little claim to it, and has commonly been given to a bastard process which has nothing in common with the methods of the Watsous, Dickinson, and John Raphael Smith. The fatal step was taken when it occurred to the engravors and publishers that to work upon steel would be more profitable than to [ (we can speak for ourselves) is here fully pourtrayed. The work upon copper. From the trade point of view they were right enough, for a steel plate will give a thousand in promions quite as certainly as a copper plate will give a hundred. From the artistic standpoort, however, they were hopelessly in seror

The "Apparetion Medianumique" is, as we have said, poculiarly realistic. Fow can possettly fail to grasp the tale it has to tell, or see it without being possessed of a clearer apprehension of the nature of this particular shows of Spiritual phenomena. It is, therefore, of the inglest interest to Spiritualists, and M. Timot's masterpiece will probably do its work aliently and effectively in drawing thousands to Spiritualism who would otherwise never have had the opportunity of knowing what some of its manifesta-LIOUS AIR BAR

Its history is as follows: During one of Mr. Eglinton . Continental trips he came in contact with M. Tieset, who, having been interested in Spiritualism, had several séances with Mr Eglinton. So improceed was he with the results obtained that he decided at the carliest opportunity to come to England and go through a regular course of investigation. This he did in the early part of the current year. We cannot here follow his experiences step by step, suffice it to my that in the end M. Tisset became theroughly entirfied not only of the reality of Speritual phonomena, but he also Okphant," "Colonel Oloott," &c., verbossly strong together in at length gave in his adhesion to the Spiritual theory. At a "mixed kind of way," too lessely connected for us to follow; the culminating season he had a most touching and amque experience. The veil was lifted, and he saw one whose sweet companionship had been his joy and misco in years gone by. It is not possible or right that such sacred experiences should be revealed in their fuller; expression to what, an unsympathetic world, but the few details of the séance we are enabled to give will no doubt be acceptable to those whose knowledge lads them lend a listening cut.

The seance (a private one) took place on the 20th May, and there were present, bendes M. Tissot and the medium, three ladies and one gentleman. After the usual prelimnames of a dark source, Mr. Egiinton took his place its an easy chair close to M. Tisaot's right hand, and so remained the whole time. The doors were all locked and the reconotherwise secured. After conversing for a time two figures were seen standing side by side on M. Timot's left hand. They were at first men very indistinctly, but gradually

Appearation Medianization Durk Reason d'EgNaton, 79 Mar. 1835. A Messature by James J Theor Ch. Delevieve, 15, Hee de Beine, Tatia. Frice at In. The picture may be seen at the office of " Lauri

they become more and more plainly visible, until those nearest could distinguish every feature. The light carried by the male figure (" Eruest") was exceptionally bright, and was so used as to light up a a most effective manuar the features of his companion.

M. Tissot, looking into her face, immediately recognised the latter, and, much overcome, asked her to kiss him, This glie did several times, the lips being observed to move. One of the astrone distinctly new Ernest place the light in such a position that while M. Timet was gaming at the face of the femule form her features were " brilliantly illuminated , " it also lighted up M. Timet's face. After staying with him and variabled.

It is this incident M. Timot has chosen as the subject of bispicture, and he claims that it is drawn exactly from the life. a sweetly pratty female form, with the head slightly thrown back and resting on the alcoulder of the companion by her side. Her face bears an expression of wietful tenderness, which tells its own tale of happy reunion.

\* I case, let it be I love hor still, and shall love him for over , The dead are not dead, im alive.

Ernest's face reveals the noble spirit he is-ful of colicitude, and compossionate love of his kind. The ideal which these who have come in contact with him must have formed hands are held half open in front of them, Brucet bearing the light with which their faces are illumined.

There is much more that we could say, but space forbios. M. Tisset's publishers, we may mention, have, in this osee, in order to place it within the reach of the general body of Spiritualists, issued the engraving at a ridiculously low figure compared with the price amaily charged for such works. We hope every success will attend it.

Law reputable mediums join bands with those Spirituanuts who demand that public mediums shall be of good moral character and honost. Let every Spiritualist and Investigator or se to connectance any public medium against when there are reasonable groupes for suspicion. ### CLASS A .- MESMERIC HEALING (Каналикалыя Саяс.)

For taxing years made and from extreme art compact more real section to some believed at any agreemity Hospital, they to me, Haurt II apr of Soho Square, and Brompton Hospitel, but the more than three years I have been unable to lie down or to also p

by the second secident I attended one if Mr Price's lectures george as it flesh spointage (May 18th fe in not evalue in you, store on bod, and along naturally the whole right through. The reas on I am in every respect better. My hourt is much better, and my byor, which was considerably unlarged, is now I ampione, in its normal condition, on I find my waint is reduced. at past an inches, and my appoints in excellent. I need woulder, and to show my gratitude I am using every opportunity of making the blessings of memorism known to the afflicted, and I do consider that much credit is like to Mr Price for the grant banes. I make receive to an hant, and that he is worthy of to roply to any quantions robiting to my case. - I am, yours (of which also I have experience) in Psychiache Studies. faithfully.

JESSEE BARTON

### 130, Park Torrace, Lower Park Road, Peckham July 21st, 1885

appears, but rhounsatic lover when a child, followed by heart given special heed to a certain high number, being the duplicaattenued, and the presention papers, showing prolonged and modern derivative alphabets are not natural numbers, conven-

an indoor patient at Brompton Hospital, being somewhat improved in general condition, but very weak and mable to sleep. On May 18th, she was first treated by Mr Price. He made passes for about ten minutes only, and without making his [In this column will be given from time to time such accounts | patient unconscious. Mrs. Barton's mind was quite open as to of psychical phenomena as seem to be worthy of permanent record. Any result which mucht follow, and not at all in a condition of blind belief. She slept till twelve o'clock the next day. The effect will at present be made , that work will follow in due conme. In lasted for a week, when she was again treated. The improveacret continued. The propping pillows were abandoned. The renders brief toports of phonoment soupect to two conditions | fourful dreams with which she was wont to be troubled entirely . If That a colour loss at a transcrit of facts without comment is given . | loft hor. The dyspopsis passed away, and the rhoumatson upon the second or third occasion, and has never come back. Early in July it became a subject of surprise at the Hometal that Mrs. Barton was so much better. It was not due to any change of treatment there, for the same medicines were still being tried.

We asked Mr Price to describe to us the healing influence as he feats it in himself. Re informed us .- He feets a soneunn on the head as if hands were placed there, as such as he larging to operate. A cold brown next seems to pass down the arm, not writing it, but upon the enries of the skin. The hand locuswithout Physic on that becomes cool. The power passes out of the tips of the fingers. It will be and Writing in A warmer influence, however, comes from the palm. This part is, becomes cool. The power power out of the tips of the fingers. therefore, used when a soothing offect is required. The lingers occusionally exercise an irritating influence. He feels the power leaving his fingers like "something flowing out." He never feels exhaustion. Formorly he used the will, and was obliged

Now he is passive and does not feel as if he was the operator. Thus, he thinks, is a distinctive quality in his suctmercant, and he ascribes it to spiritual influence. ]

### CLASS 8 .- A PSYCHICAL PHENOMENON

I must leave it to the editor to class the following phenomenote, which, if it was not simply a spect same was re-tainly a comarkable performance of my "marked assumanted to can arising in a great mosture from want of sleep , and in the early accounters." I am so little of a paych \_\_\_\_ I know nothing of part of 1882, I had a severe mental shock, which so much upset any semanabulic conceinament in general, and though once or the whole system that for some time my life was considered in twice before I have, while fulling askep, detected sensething the grave do an A complication of disorders followed. like an attempt (quate sorte see at a absect method at all with secured a pattle the least medical skill. I have been amended to the ear erience of a few inputs agreed over according

Unfortunately I cannot make it rates as de without receboundits I occived were partial, and not permanent, and for necting it with other mystical experiences with which I have wer failur for the past four years, but of which I can give no detrite account, partly because the endouted rains of the cus ount acce depends on enquirers to are us sed mostly on currence measurement, and was induced to place myself under foracted party was. I have always been conserved with his curv. To my ofter natomaliment, I at once felt reliaf, and what may be called the mathematical estimate of these things. aid of ). I have not been put into the mountrie sleep. I have the more sity of calculating chances, of not counting the hits and neglecting the misses, and so forth. Perhaps for have spent so much time in making estimates for this purpose as I have, but no De Morgan or Sylvestre could appropriately reloulate the chances against the coincidences correctimes pheoryed even in a ample day. Could these councidences have been referred to any head of psychool apquiry I might have savely any that my family and friends look open moss a living felt at a fluty to being them forward, but in truth I know of no theory, short of the most ultra-metaphysical speculations, which will at all account for them. These experiences are not singular. Another correspondent of "Leanr" mentioned similar ones of his own some time ago, and Herr Jankowski overympiort. You is mit mit an af the enter you think (author of "Phinomenologie and Metaphysik der Anormalen fit. I soull you my name at a sees a fall, and shall be happy. Sunneshilder") has recorded some not quite similar, yet cognate

But what is it all about? asks the reader, with natural impationce at this long prelude. I answer mone word - animbers. Cartain numbers haunt mo , they have very distinct associations for me, but into these I win not enter here. Suffice it to say that she [On Wednesday, November 4th, we called on Hrs. Barton, of hem capetally recurs to a certain month of the year new and saw her and her mother. Mr. Price was also present. In just past, and even on certain days of that month. Latterly, a few moments we were at licensity convisced that the two ladges to marrow the problem of connectence as far as possible, I have would only say what they believed to be true. But. Barton, it refused to take note of mere multiples, and have even only discusso, which is often the case. All her life she has been kion of the root number. This number is presented to me in troubled with also pleasuess, being obliged to be propped up in various objective and seemingly accidental ways, often directly, bee with pinows, and even so only obtaining the briefest but more usually by the following more. My attention will matches of slevy. After 1882 nor agapteen be made, saced by directed to some slight incident resultly to be characterized We saw the tickets of admission to the various loopitals sho has by one word or two words. Now, though the letters of the variou treatment under different well-known physicsma. There konally, so to speak, for this purpose they may be treated as was potassium brounds for the mamman, digitalis for the having the numerical value of their order, thus, a - I cardina disease, liqueam, &c., for dyspopsis, and limments for o = 15, t = 25, de., in the English. It frequently happens, no rhousentists. On April 6th, 1885, Mrs. Berton record to be doubt, that the same incident may be equally well characterized in brief by different words or expressions, and then, of course the usect summation of the letter values of one of them to the (Being an amerer to Mesers, von Hartmann, Myers, and Gurney ) required number is less remarkable, the favourable chances being multiplied by the alternatives. In every case, however, the natural odds remain largely adverse. But se, when atter teen has ouce been drawn to this sort of sympathy (or whatever it should be called) others may seek it in their own experience, I should add that any seeking or calicitade is perfectly idle. To be always on the look-out for such coincidences means spending half the day in doing ally addition same. Attention must be awake to them of course, for the incidents will be mostly trivial in themselves. But when the author has been discoveredand how it occurred to tee would take long to tell- it is only necessary to remember that if there is anything in it stall attertion will be arrested sufficiently often tomake it almost impossible

to doubt a significance. The condition seems to be some iron and deep feeling concerned. To such, apparently unconscious sym-Jast' as on, his Mere of e comment was the terest will not elicit them. And now, having premised an explanation which sounced necessary, I will come to the occasion of my

hearing the " resco."

It was at Eastbourne, October 23rd. I had been tather preoccupied all day, and late in the evening, having finished some writing, I took up a brook and lit a pipe. It then occurred to me that the " number had not that day been given. I felt rather disappointed, when in a few minutes one of the lattle commonplace incidents with the numerical value occurred in the room where I was sitting with no other companion than a kitten (who, by the by, had nothing to do with it). I made the calculation, and some went on with my book. Later I went to bed, my thoughts unsupied with certain abstract appeals tions person energies a sometime to the party of the state of meditative on the more ideas, when middenly, to seems internal sense of hearing, perfectly articulate, yet with a sort of quick. jarky intenstion, suggestive of a spannedie, but successful effort to overcome obstruction or difficulty—a breaking in, an it were susualed two whatpered words. Two more connects or altaple words are not to be found in the language (one was only a preposition), nor more uterty foreign to any conscious context in my mind. For I was not asleep, though drowny They roused me instantly, and almost instantly, struck with the absonce of any intrases some for me in them, I said to saysoit " they will mun out my number." The calculation was quickly made, and the result some country an anticopated.

Whatever the explanation, the ease cortainly has a psychological interest, for it can hardly be encribed to chance comesdence Agento t a same nesses de un le train " paaked " consciousnose-could start un andible hallscinstion of spoken words for the waking consciousness—(the proof that I was not salosp in in the fact that a course of waking, though come harving a to be use of a man of the most resourced earth, and this hurdren of special knowledge is the very to be supposed to . On seener also supposed man accidental a may be sugar med that a loss into course, say a six in march of to a create a teat to tell ment do come wintly your works to it and its average since if he sub-comme in facts a of car account or agrees with a partie per ter the result as an

habit ustes at many to open as urous that

I recover a message we came I car moning it has made for onto rethe control of a create a set of a part of the set of the control complexity than in the case of a vesser. You have I van thing to unce against those with the observement of such experiences. They are only a warted to have in order to explain the principal incident.

PS -I am willing privately, to impart the number, and the who is not conscious at the moment of being remembered (that more bears to any tripurer who wants these particulars for approximate to any tripurer who wants these particulars for approximate to any tripurer who wants these particulars for any of influencing this rememberer to remember hun) must be an approximately particularly particu

SPIRITISM VERSUS OTHER THEORIES.

By THE HON RODEN NORL

If the waking consciousness forgets the somnambulic, then the latter is not a second self to it, simply because it is a blank. Quite true, a thought that has occurred to us may not always be recognized as ours when it returns, but then it simply gets appropriated de nore, it does not necessarily appear to be the thought of somebody sise, though, of course, if it cames from outside, through our hands, or through our voice without our mind originating it, or through another body, or oven through our mind, though we repudiate it as not ours, then it does so appear and then probably it as as it appears. And again, when the semmentable remembers the waking consciousness, remonibers that as the different experience of he same person -as its own-not as the experience of a different person

When, however, the medium is visibly entraneed, then I confess the explanations of Van Hartmann lave some plausi hinty. In such eases our the medium be going about in a state of somnambulism? And yet one must again observe that these unply some want of personal experience of the phenomena. there are other moons, surely, bosides "binding," &c. by not, going about with his normal way , for mate we, what a milwe say conserving the occurrence of materializations, complete or partial, in the light, and the appearance of the form together the body of the medium? How does the attribution of auto-sommanibulima" to the medium explain, for instance, the plate-writing that occurs in the presence of Eglinton or Slade ! How door it explain haunted houses ! Nor do I know Vos Hartmann's authority for the statement that Spiritists about such extraordinary powers, e.g., as penetration of sould matter, for the solul body of the medium, if only that be in a condition of trance. But that a sommambule can assume remarkable resemblances to persons he may imagine himself is a noteworthy statement, possibly true. And if a medium be ontranced, it is convolvable that he might so imagine himself comeone also at to personate, and undergo some (musiguintion nto his likemone. But what if there be more than one figure at the sugo taged And what aformation a given not in possession of the med in the second the street persons present? Yet this seems established on reliable testimony. Moreover, the moduum can often lave no conceivable means of knowing anything at all about the person whose comblance appears, who addresses us through lumself, with the direct voice, or through siste-writing, and the circle may not expect the apparition of such a person at all. The hearting spirit alone, in many apparently authenticated cases, has the secret, weak the same was here y referenced by the sound, and I from the hurden of which he seeks deliverance by a return to amosainess couses, and he is at rost," Moreover, even if woman and a set our purpose a contract and transmitted by one who claims to be a visitant from the eilent land, unions this information be new present in the consciousness of this member, countler how very difficult it must be for the medium to get at it by thought-reading. ha tax co A was conscious but in the heast Where is it! How to get it out of a "t atout" memory ! But "fatent" is only a convoluent word, bining ignerance. A man a expecting some answer to a question, and he gets a different one, which he thinks incorrect, only afterwards does he find it be ter hand to a man or he exert ces be one, which he thinks incorrect, only afterwards done he find to be correct. Why should the conscious remembrance of facts the constant of the correct was formerly aware of, find now not at and upon him, but upon another? One cannot, of course, say that this is impossible, however, much is our solidarily as society, or human organism-oven without having recourse to the "astrol ught "hypothesis of Occultism, or to that " Absolute Unconscious" beyond and beneath individuals, which Von Hartmann avokes as his Dess or pusched. It is a quose notion that of one individual robbing another of what belongs to him by fileling it out of some maconscious Doily, in whom, or which waars all reduced to our native moneutity; a Duty, moreover who, unconscious as He is, yet provides us all with conscious ness! However, if I authstitute for this Absolute Unconscious my own belief in many transcendent conscious Individualities -cince I hold that every remembrance of a person

influence from his transcendent. Ego mirrorblously restoring the fraction of our dreams. But the very fact of one's remembering just-I must adont that such a communication as this from the a person at all proves (as I have shown chowhere) has trans-Immeetidant, obernal, or noumenal consciousness of one aids condent reality the transcendent reality of his past, out of vidual (whorous all his latent memories must be stored) to the which he still influences us to remember has , yet we must phonomonal, or temporary emisciousness of another, without also allow for the unaginatere, creative power in the presengthrough his mentengomery consciousness, a not impossible dreamer, and meer of the double, which may account for And the same explanation will hold good about a revolution this particular investment of the remembered person. of the lature, which is also in the etgrant intuition. But as an Smill I doubt not Mrs. Howith Watta was right that such explanation of the first case it is an hypothesis exceedingly far dreams are often symbolical, and simply a present influence forched, thus which were a y at a Santan or ar a our super upon the dramer from the porsen he pictures. It must be so and more probable—viz., that the manner is made to the first when one appears to another at the moment of death, unless that he cleans to be, list moment is made a modes, that he cleans to be, list moment is made a modes, that he clear agreement a modes are that he clear agreement a modes are that he clear agreement a modes are that he clear agreement a modes agreement agree this of term a room, or or in, so got a fig. while a set up also be set up at a conthe phanonicial, or apparent interruption of ordinary interestric with him which we term "death," we have every reason to conclude that it may probably be powered of. And if the poor aprefe to trying to make kinnell known to me, how sail a disappointment to him must be these wifinite ingenuities of speculation, by which we seek with so perspering an intellectual totl to availe the appaling and preconstituted necessity of recognition ! So a maximum cumot recognite his detroit friend, but takes him for a floud. But I forget that this very fine one mont is unworthy of a ph losopher, who eaght only to concern It quelf with, and he manusered of, raked shatmations. And yet it must be owned by Spiritum that the intelligences mainfesting are atmogely oblivious of things we should expect them to romannher, if they are the human beings they done to be, strangely sparing of their tests of identity, not to speak of reticence about their actual condition, which is to me, however, not a sale to ancientand, since they have to communicate

false upon and post with which of the new plant to is anyward a real. Card a chrysolia comprehend about a butterfly? The whole topic of course is most complicated, less in the mysterious twilight of occult loce, and is frought with gravost difficulty. I must say that there is to me unuch renson ablenues in the objection of some that element spirits are likely to have left the earth-plane, and stone cat communest with the state of the second of the state of the at the most exactly far a horse on a teach tree early beause

to an an applier to an a continuous the terminalizer of earth-

to . . You have many may be courtlebound? in part, was \* ret to I . \* takely that those intelligences are more human closesters. That is much more afficult to answer. Yet there whenever of any or he was pain, and they appear to a se tor near. Amounts, for instance, would be inexpetile of showing so much fund sarity with our clang and chaff on those Charles and Irrespetables display. They might be said united to be he control in our known atmosphere by repport with our server, only that sooms rather a far-fetched idea. The dead would be skely to forget a good deal when they take on carth conditions again, which may account for much

On the whole I agree with Mr Missey that the pumphlet of Von Hartmann which he hos translated in one of the most forminglify attacks that Space on an amount the one fre tatrick game of burying the head in the smalls of hynomics, and denying the facts is really pretty well played out. They "go through the hollant form of hiking place" so very persistently, so Mr. Charley wittily mys. But I hardly think that V Hartmann's attack is more formulable than those of Mr. Massay lumsolf, or those of the Socsety for Psychical Research, to which I have the lemous to belong, so far as the Society puts forward these theories as an explanation of the phonomena more probable than the explanation of Spiritum, And this I say, fully recognizing the high value of the very laborious and carolal researches of three capable and cultural workers ir me Soundly to whom I for the feel douply sulphted-who have done much, I enquet doubt, to discuss the projudice of the outside world as to the very possibility of our phenomena, beamer or abhaning the really momentous actuality of thought-

To so hopest too only the content that would suggest soil are those connected with what is called the double, or Deput-gauger, and those of drenning. For if it can be shown that the person whose double as seen was not thinking of the dreams of the moment. We can only remember a minute witnesses of all ages."

Unmaference

(November 14, 1885.

though the latter is not thinking of him. But issuey well-authoriticated stories show that the dying person desired to see or was the king of the healthy friend, when he appeared to a. At an rate accreect took of the neer removed a his six entires, a soft want of term to the basings of the needs the second present agency is to seen apon an agen. What is it when the former is not thinking of the latter 1. The is not may to answer. What is to prevent our summing a third inwhile agency in such an instance, transmitting the knowledge of the fact, which he, the unsurn agent, powerest? But of course there may be conditions, of which we are as yet quite ignorant, precluding the possibility of any such transmission in particular cases. The notion of a transcendental thought determining the Impression seems here mapplicable. For, or hypothesi, the mind of the sufferer is otherwise engaged, and, therefore, the transcondent intention has produced a consciousnote in time, which blocks the way against a present councious agongy on his part upon the person impromed. Only he tony have thought, parhaps drawned, for a messed of his friend, and forgotton it, or the Inend may be clairrogant of him. But if not, then whatever corebration, organic or othereal processes are involved, those could only mean for idealises, orther the intervention of son-human intelligences, whose disturbance would be translated by the recipent into human modes of thought, with furnitors and investment, possibly, from his own mind; or olse that some third human intellaconce transmits a knowledge of the crisis at which be was present, in, or out of the body, to the person in report at a wance I would myself rather call this a sissoony prospt tan a naturnation. The fire comprehension by the sofferer if his a sufficiency becomes to his furnize not to his present, that future, of ourses, being also in his transcendent nelf-cuttacinstation, but there it is a knowledge of this coryenterent I the interpretent the process If however we tak where have seen members, his magnetists of the measurement in the communitate that she shall do certain acts at cortain time on waking acts which she assumely performs. though she has forgotten the trance-experience, and supposes and senting quite of her own accord -then I reply, those may come from the transcendental-self, which is in Providential, attentive harmony with that of the measureiser. ("Hussan Personality, by P. Myers, Fortugally Benez, November,) But these wonderful experiments show that, while it is hardly difficult to determine what ideas do not originate with oneself, it is by no means easy to determine what ideas assuredly do.

### (To be continued.)

"Strumper," by Dr. E. von Hartmann is now ready. Parculars will be found by another column.

### MEDIUMSHIP AMONG THE MAORIS

In the Harlanger of Light we are reminded by Mr. Nation, of Greytown, New Zeeland, of the Aborigobelief in the excence of spirits, and of their still retaining was "Over the door of my house, beneath the thatch." His what may be he or a serious emtons of their forefor some-customs in which the most compactions figures are some other quistions and numbers the voice said, 'I go t c tokengas, or priests. In his paper Mr. Nation quotes Farewell, my family ! Farewell, my tribe ! Farewell, my from a work, mitaled "Old New Zeoland," by Judge puloba ' I go! 'Farewell ' all cried, 'Farewell' Manning-who know as much of the New Zealanders as The voice answered 'Farewell again and again, receding may European some instances illustrating their belief, gradually until it died away into silence. among them the following

of the calsoon if the chief would ever come back. The same as a got say a part ventriloquam, but it will be redunge appointed a formal meeting, at which he was use edital earlies and a vesseaply as a witness inspired by his familiar spirit to my "He will return, but will not return !" This peoplexed them. They sont messengers in search of the absence, and to offer recon a given. They is appearance in Mannapoles, U.S.A. It is edited by F. J. found hun dying, and they returned with his corpse. This York, assisted by an able corps of writers. The paper last our was considered a fulfilment of the takenger a saying

The captain of a trading ship sailed away with a Maori girl, the pride of her tribe. Her relations consulted the foliange as to how they might recover her. A solemn meeting was held, at which Judge Maxing mys he was allowed to be present, being friendly with the takenge,

' After waiting a long time in silence," mys the judge, " a voice, mear midnight, greated the assembly as coming man and thoughts of the other from a deceased member of the girl's family. He was proyed to drave back the ship, which was bearing her away The words responded, "The shap's nose will be hattored on the great sen.' This was repeated again and again. A few days afterwards the skip returned to port. She had encountered a heavy gale, and had sprung a leak in her rare e world should know it. But there is absolute necessity hows, called by the Maoris the ship's nose, compelling the for candour in such an investigation, and there is difficulty in captain to make for the nearest port, which was that from finding it.-E Bruar Paulie. whence he had sailed."

oracle was consulted as to its success. The answer through the tohuson was, "A desolate country! A desolate country! their own lands were made desolate

their departed relatives. A young chief had fallen in in this knowledge by the carefully-conducted experiments of competent investigators, both in this country and Europe, buttle. His family held a solemn meeting of mourning. Norther do so propose to fix the limit beyond which this manner is had been one of his intimate friends," writes the judge, featation of spirit power cannot be further perfected."

, "and was invited to be present. He was a superior young as and was the first of his tribe to learn to read and write. He had thus enabled houself to keep a register of the events is which his tribe had been concerned. I wanted to refer to this register, but it could not be found. At the meeting, held at night, about thirty assembled. After a time, from the dark corner to which the tolings had retired, a voice was heard-Salutation Salutation to you, my family ! Salutation to you my public (white friend). Salutation to all " The Speak to me, my pakeka /1 The women cried How is it with your Is it well with you in that country?' The voice gave reassuring answers. Questime followed question and the suswers were received with emotion and tears The question which I put was 'Your book cannot be found, where is your book! The answer immediately brother rose, went out, and returned with the book. After

Judge Manning winds up after the manner of one not A perty chief quarrelled with his relations, and went another vant of public opinion, with one car open to what off to a remote from them. After time they inquired thronogeneous maggest about the devil, the other to what

> A NEW workly paper, The Special Messent has just unde best wishes for its success

> It is mid of the Swedish novelist, Frederika Browns, that during her American tour she empoyed the generous bospitality of Madana La Vert, of Mabile, Alabama. It was observed that at a certain hour every day she retired to her room. Thus caused disappointment to visitors, but her explanation was that she has promised this hour to her sister, who sat at the maid the a Swedon, each for the being consecut of the feet

> Sixes Spiritualists generally insist that theirs is the only rational and philosophic system in the world, and since it is oridoatly gazing granted every day among intelligent people because of that claim on its behalf t would be only right to give it all the investigation it demands. If the phonomens of Spin now can be explained on accountific prescriptes, then it is

Urox the question of Sparit materialization, Colonel Bundy, Some forty years ago a Northern tribe sent their best editor of the Religio-Philosophical Journal, mys "The editor men out on a fighting expedition. Before starting the of the Journal is charged with boing a disbeliever in so-called entertain no à priori objections or projudices in the natter. Indeed, we thoroughly ballove that apparitions resembling in A desolate country!" This was taken to apply to the appearance persons once resident on earth may be witnessed at enemy's country. But the invadors were driven back, and times either with or without the agency of a medium or psychic. We have seen such uniterialised forms under circumstances ad-It is common for them to seek communications from mitting of no objection en scientific grounds. We are fortified

Working as me has trea were not manifestations with him in private. His little Indian control, I heard by some men in the ricinity. His wife as home engaged Dany men site to pop to in the measuremented manner and I had many long clints with her. One night we had gone to had I had many long clints with her. One night we had gone to had I would add that each bod was furnished with a manquite current, which tacked in under the mattress so that one had to had portably under water, and he strongth failing. Her screams disturb it if one wanted to get out of bod). We always kept a brought had portably under water, and he strongth failing. Her screams disturb it if one wanted to get out of bod).

# THE DIFFICULTIES OF INQUIRERS

About ton months ago a young widow lady had her interest excited in the subject of Spiritualism, principally Cases of persons who obtain actomatic writing are very rare. by meant of a mumber of "Li HT" lent to her by a friend. It was that of November 8th in last year, in which appeared a little article I wrote, narrat og how I paper would do just as well, but I should think it highly became a Sparitualist, and signed M. B. This lady and I conprobable that you would obtain writing in that way at first corresponded for some months before we met and became personally acquainted with one another. I answering to the best of my ability the questions she addressed me on the subject of Spiritualism.

November 21, 1885.)

I am glad to my that she followed the advice I gave her to investigate the phenomena for herself by means of psychography, and at the first scance she had with Mr. Eglinton the was completely convinced of the genulueness of the namberates and if the positives of those who have passed over into the world of spirits communicating wit those they have left behind, though it was not till quite recently that this hady, whom I may now call my friend, received a personal communication from a friend in spiritlife. The first time she did so was when we were with ; alone together, by tilts from a small table, and soon after wards at a sounce with Mr. Eginton and myself, she received a message in direct handwriting , in both lestanors the proofs of identity were very remarkable, but I am not justified in making them public. The answers I wrote to questions also put to me from time to and are nothing more than anyone could write [who was sequelated with Spiritualistic matters, but she tells me they made more impression on her than reading books on the subject had flone, miniply because they were genuine answers to questions may possibly be useful to some other carnest inquirous, my

I Spirit until come protes by he dramed alle as enterly this with ingles and one as when he as has those of whiteespecials to a me that dequirer come a tractar of the a altered in it, but the spirit of positive ecioneo requires that we he in former or in frame or in ich he morne if went put withous canger of a serial a averaged and likewood the loud some produced by the state pan | | he were always | growing tests for psychical topics. The following is an extract now get my lotters written on an ordinary elect of note-imper laid on a slate, and have laid many messages from Mr Eglinton's had never even anything of the kind. In her nonvent-school guidet, written on paper on which I had previously written she had been taught about good and swil angels. Of the possiquestions before leaving home. The slight amount of darkness bility of communical between human and this are 1 of apr th produced by holding an uncovered state under he day of the she knew only from the lives of the saints. Now that also saw table is, no doubt, a necessary is condition. It the spinwith the to ground one at a month I can use more may why them estant I can say why a presignable reacts but camera with a cloth before he can procure the negative on his plate this I things. A gent leman saked if they would try Planchette. He know, bowerer, that the greater amount of medial power proment, the less occasion for any darkness, and matanece have been known where it has been altogether dispensed with, and the pencil actually seen to write without a visible hand holding at.

O. I council understand being obliged to place so much confidence in the molerus, who may be a perfect stranger to me, and has in he character quite malmoren to me

A. It is not at all necessary to place any confidence in the medium. At my first ofence, after I had obtained answers from the spirit guides, Mr. Eglinton gave me a clean alate and went to the other and of the room, usking me to write the name of anyone I hoped would communicate with me, and to sak a question, and then to turn the abite wat the writing downward close to me. I did the, and he then returned to the table, and we held another slate under the flap, upon which I immediately (a foreign one), would communicate with mn. You can ask suty and believe but it is not attacking the case. Y a decommend was no don't long questions in that way on that the medium need know nothing help in the casty stages. In of Lour got un answer written that my friend, giving the name

about them, nor does Mr. Eglinton ever read the messages or letters unless requested to do so.

Q. World you adene an inquirer to try for results with the

Eurologic part

A. I do not recommend you to try with the Psychograph except after long development." Trying unenconstally would only, I think, worry and dispirit you. If you have the gift naturally, sitting with a pencil in the hand placed on a shoet of

O M'ho is it so deficult to obtain an entraner rate a prevate circle? Surely Sparitualists are not arerse to concernion?

A The great difficulty that exists in obtaining extrance onto private circles in from no unkindness on the part of those composing them, but simply that the forming of a harmonious and woll-arranged circle is a very important and difficult matter and when each a circle is formed, my of five or six paraous them solves and the spirit guides, the entrance of another person may throw everything out of goar

Q. What is this earest power, added by some memorie power,

and by others Orbits and psychic force ?

A. Meaningia power, Odyle, psychic force and psychic aura re. Ibeliovo, all one and the same thing, viz., an emanation from the body or more a, far more subtle even than electricity, through which alone sparite in the body, as in the case of meanurate at plostro-hologists, and spirits released from the mothly body, can influence or communicate with human beings to it psychoc arm is innate in seed people I fully believe are when it oxists in large quantities it produces powerful media. such as Home, Relinton and others, but in other matances it to expande of development.

## T. No. Extension Laure

Days Not -Some years since I made trial, with other Sparatomest papers, of "Laurer," and although among them all st seemed to me pre-minent for the tone it salested with refercree to the many manifestations of the great embject of specifical communion, I found it unantiafactory in many points, to me Sir -Some years and my hunband, who was a major in the Lately "Lieux" has again been brought to my action, and I Royal Artillery, died and be sy of ann-atroke. I was on the still observe, though ma tern degree, a went of that true elera-Neilgherry Hills at the time and he was on he way to poin then of thought and real raligious feeling, which I think should his battery in Purnish, in constant rota is when in a few weeks. by present many a publication I notice that you disburning in the room, I naw a ragge form which made me start venture to be so that you will bild space for a few words from monely out of bod, and my little dog ran to the place when it are to a native committee of the appendicamental examination and place back to the place when it are of he facts of its initial and but used the effect to with her tail flows. I new no men and though I felt sure compare quarters on was special, or to seek to a correct is noticed, supermitted and appeared I never associated it with Indepent of the matter, by recording what are its "beginst phases," and mealesting on its believers the principles which it

The object of these who really believe in it should be to true subjects of that kingdom.

The scientific anguiry into how it can be possible may interest a curtain class of minds , but the questions the public ask are What is it, whence is it, and what the nature of its teachings , why are they given us, and how can we profit by those ! To answer those, very shortly and in order, is my effort to-day.

November 21, 1885.]

1. It is a giving back of what has been for a long space with beld-the open vision (Issish xxix. 9, 10, 11). If such things were possible in the days of larged of old, they are possible

2. As in the days of old, it is partly "from above," partly " from benouth." Let inquirers read "Robertson on the Prophets of Israel," and they will realise how in those daythere were many grades of inspired persons, from "the prophets of the Lord through the prophets of the Temple, and the sens of the prophets, and others flown to serverors and witches."

3. The nature of its teaching will depend on which of these grades the inspiration itself belongs to. If the mapiration is of the highest, so will be the teaching , if not the lughest, the teaching will be in accordance with the character, knowledge and views of the spiritual speaker, this usay he one more or lan enlightened on the different subjects under discussion, or more or less ignorest, and on moral and religious points univerto or farther from the truth

I am writing at the moment especially for Christians, there fore I is not here two to say that in large of series is a culminates notice l'e son d'the I de Jesus, and where he an exponent of the teaching of the aptritual world whose guidance coincides with that one Central Figure, and with the principle of His lafe and doubt, I my, this is the highest communion, this is a renewal, the long expected sequel of the revelation of the New Testament , this is God's latest, greatest blemmy to man

4. It is given in fulfilment of pronune, it is given to rethe world which is skilly drifting further and further from God, and to guide hack wanderers to their only true house

5. The only means of turning it to real profit is to search and povert gate busing a as in the aracler of the communications, and in the old well has not be quite to be that that is the good " to show and act on such of the test on, as cends of draw us money to our God , to pains our spirits nower to our

Thus the whole torus of this great movement will be not princed. Was snot all we not confern a public prace and which is many over been target to hold up a stefan as why not make kip with a many south bangering for a blossed beaut which reach our own ! I should not here troubled you with this had I not been saled to more in the matter by one whom I never met in this earthly life, but who was well known to many. He has begged me to do all I can to raise the tone of Second or any and the spread on all or mosted with the moreover but he been not neglected on the first one of the contents. of he worse a leasure a securious you allow high maries w have higherent because of the amount of the members of the action of the Be, among any the kind of all rue Spr viscount. ## REVIEW

Erisote ne da Vie ne Tiuzar. Paris. Librario dos Etudos Psy a regiques, Rue des Petits Champs, and Dentu, Pelais

This work, elegantly printed, will be acceptable to those who hold to the deciring of Re-mearastics. It professes to be a seen, on the form of romance, by our Regish Earl of is a new through the hand of a median, "W K.," at St Fe sees our with an intimation that similar works are to fall a, depoting some remarkable characters through their different to meanutaces from age to age. An introductory notice informs readers that upo Henry Wilmot was a devoted partners of the exile Charles II. of England, who, on coming to the throne, gave Henry Wilmot's son, eighteon yours of ago, some office about him that young John Wilmot sequired the character of a wit, and his manners being what are called ologist, he because a favorate with the dissolute King, who ultimately made has Earl of Rochester. In early life he had shown good animal convego a a naved fight, and white at court he showed himself possessed she of moral courage by refusing to fight a duck. He wrote postry of a certain nort, taking Horses as his model. A hart c has body being worn out by dissoluteness, he layed into penttence and siety, and passed into the other world at the early age of thirty-three. Although in different apheres in this world, there seems to have been conquitality detween John Wilmet, the Roglish Earl, and Tiberius, the Roman Emperor; and the latter, according to the work solore us, dictated to the former an epacedo of his life, highly scattmental and dynamic, to be transmitted by him, through a medium, to the world for its edification. We think it will be most approclated by the conciples of Alba Kardes , and those who desire to read a practical illustration of his doctrino may find it here

## CLAIRVOYANCE.

On Decementith Mina Symons and I sat with Mr. Eglinton, Mine Symposis eftting next him. I had brought with me a pack of twenty cards, which I shuffled with their fares down and laid the three top cards in Mr. Eglinton's well-known folding so on M. Eplaton part on in with those a sib of light rod or ye becchark and one or bras. I monthorsal my while that the names of the curbs might be written down in the appropriate colours. The states were then eleved and the key faid on the table before me. We sat for a good white with considerable arm a Mr Eginter, who tend or ughe in the alates to see whether anything had been obtained, but in seither case was any of the cards barned from upwards. At last Mr. Eglinton old an upon slate under the table, raking whether it was any me going ou, when the answer, "Have pattered" bunks given. we continued our sitting, and shortly after hourd the writing communer. When the slates were brought up Mr Relinted turned the key, while the slates were in the hands of Miss Symone, who opened them, and we found written on the slate Ace of Hourts" in yellow chalk, and "Ace of Spades. Two of Spades," in blue, a true description of the cards we found enclosed. It will be observed that more if he a tax had any knowledge of the cards in question until we new the writing whom the slates were healty land open. 1 WERNING

## CONSOLIDATION AND CONFEDERATION

" The old order changeth, giving place to new."

These to us, as Spiritualists, are the questions of the hour. After a long period of conflict and transition, the outlook is courses than it has been for many a long year, and we may now reasonably hope that we are within measurable distance of a harmonious and unified Spiritualism. One by one the old differences and obstacles in the path of progress have passed away or become moribund, and there is now manifest a desire on the part of those who concern thomselves with the things of spirit, for unity of action, the extension of knowledge, and its application to the affairs of every-day life. A process of welding together of the broken ranks has been silently working in our midst, not noticed, it may be, by the casual observer, but nevertheless clearly seen by those who, accustomed to read between the lines, have discorned the signs of the times.

Interpreting the history of the past few years in the light of the logic of current events, the dawn of a new and higher Spiritualism cannot be gainsaid. Manifold have been the tendencies towards this end. The first step was taken when British Spiritualists protested with no uncertain voice against the abuses which had crept into the conduct of public circles, although, to the uninitiated, the only apparent result was the practical stroiping out of public mediumship. But the pulling down process was to be followed by one of upbuilding, and the first stone of the new edifice was laid when, soon after the publication of the manifesto touching the conduct of public circles, the attention of Spiritualists was directed in these columns, to the absolute necessity of preparing inquirers and graduating our circles of investigation. The proposal fell flat, but the seed was sown, a me after in my days it is bearing fruit a hundred-fold. Confidence having been restored in the public mind in the ability and willing ness of Spiritualists to face and deal with the difficulties and anomalies encountered in the administration of the affairs of their own household, inquiry grew apace and flourished as it had never flourished before. The progress made in this direction during the last two years has been unparalleled in the history of Spiritualism. Side by side with this spirit of inquiry there rose an organisation which, inaugurated with no flourish of trampets or noisy demonstrations of applause, has gradually grown into a compact body, including in its ranks not only those Spiritualists who were not in harmony with former organisations, but also many who had altogether hitherto held aloof from combined action. With this nucleus of carnest workers, the principal Spiritualists of other countries find they are in substantial, coming months.

accord, and the result is that a confederation of all who share our common faith has now " come within the range of practical politics" in matters spiritual.

As regards the growth of inquiry, the law of necessity has worked to its logical end-demand has created supply. Confronted with an overwhelming cry for spiritual food, it became incumbent on those entrusted with the public advocacy of Spiritual research to devise some means to satisfy it.

From whatever aspect the work of Consolidation and Confederation, brought before the London Spiritualist Alliance on Friday last (a full report of which appears in the supplement to this week's "Liour"), is viewed, fow will, we think, be inclined to deny that, whatever it may lack m completeness of detail and universality of scope, it is at least a step in the right direction. We, therefore, confidently bespeak for it cordial recognition and hearty co-operation on the part of Spiritualists all over the world. We shall not now concern ourselves with day-dreams of the future possibilities it reveals, but we do ea nestly desire to press on the consideration of Spiritualists their individual responsibility in respect to themselves and others who possess this common knowledge. Now is not the time to stand with folded arms, for there is work to do. The nature of that work, to which we shall again refer, is clearly indicated in the address of the President of the London Spiritualist Alliance. Who will do it?

## JOSEPH COWEN, M.P., ON THE DISABILITIES AFFECTING SPIRITUAL RESEARCH

At a political meeting held in Newcastle-on-Tyne, on Monday last, November 16th, at which the senior member for Newcastle, Mr. Joseph Cowen, M.P., addressed a very harge and crowded audience, amongst many questions sent up in writing, it the close of the address, was one propounded by Mr Alderman T P. Barkas, and which clicited the following favourable reply from Mr. Cowen friend Mr. Barkas asks me this question, "Will Mr Cowen vote for the abolition of the antiquated law which prolubits persons with occult powers from professionally using those powers! For example, Mr. Gladstone saw phenomena in the presence of Mr. Eghnton, and the law as it at present stands renders the exhibition of these occult powers for payment penal' Certainly I would vote for the abolition of that law. (Hear, hear.) I think that if a man can exhibit extraordinary spiritualistic powers, at least he should have the liberty of doing it; and if he charges any remuneration for it, I don't see that that ought to be an offence. The law as it stands was, as far as I recollect it, a law against the imposition of fortune-telling, which assumed a very different form from our modern Spiritualism, which is, rightly or wrongly, believed in very sincerely by a large number of very worthy persons. (Hear, hour.) Therefore I am entirely in accord with Mr. Barkus. I think the law should be repealed, and if anyone proposed its abolition, I should certainly support it," (Cheers.)

NOTICE TO PROVINCIAL CORRESPONDENTS AND SOCIETIES .-As we are degrous of making "LIGHT" in every respect a representative journal, we shall be obliged if secretaries of provincial societies and others would forward us items of interest relating to the movement in their locality-notices of forthcurrent week it is absolutely necessary that the manuscript should reach our office not later than the first post on each Tuesday, and the envelope should be marked "provinced." Too often our country correspondents are dilatory in proparing their reports, and the general condition of apathy which seems to prevail allows of no possible chance of the flourishing condition in which Spiritualism now is to come before the public. In this respect we trust to see a marked improvement during the

Complete Phenomena.

T =Corner sences

Spirit Loutity L - Materialised Spirit Forus.

Friends having had experience of any of these phenomena will be doing us a service if they will report them to us, going

(1) The names and addresses of the persons concerned.
(2) The circumstances under which the phenomena took place.

(3) A brief account of the occurrence.

Letters should be addressed to the Editor of "LIGHT," 18, Craven-street, Charing Cross.]

# CLASS O. PSYCHOGRAPHY

## REMARKABLE CASE

The following accounts of two seances with Mr. Eglinton are from a gentlemen whose profession has accustomed him to weigh oridence and who is an anatour but most profesent conjurer. The fr and who accompanied him has also a reputation as a conjucer. We have taken some puns thereagher to circular gate the case. Our effects have not with courteous assistance. and have once again brought us face to face with an mexplicable fact.]

Our sitting commenced morely after 8 p.m. with the full light of throu gas burners. After several sl. it messages prodaced in the usual way (i.e., a murked piece of pencil placed upon the upper surface of a slate hold in close contact with the under surface of a table), we proceeded to some more interesting experiments. The following message was written made the locked slate and a marked piece of pencil introduces; "Will England go to war with Russia in this contury?" While we held our hands upon the slate resting upon the top of the table, writing was heard proceeding from the interior When this had ended with the usual three little taps, we opened the slate and found written on the opposite side the answer "Within-ten mouths England and Russia will be at war". The pencil was identified and found to be distinctly worn away at the edges

The next experiment was as follows: My friend had in his pocket a entalogue of pictures he had visited that afternoon Without apaning it we selected the first word of a certa a section, of which I forget the exact number.

The calabyare was placen to a slate together with a piece of sologied shalk, and the whole held under the table In a short while we found a word "Song, written on the slate, and on turning to the book found it was quite correct.

The following and test manifestation, however, was the most wonderful of all. I asked the intelligences if they could write upon the slate if I held it sepself, and upon their writing that "they would try," I took a clean slate and placing on it another, with a bit of pencil between, I myself held one end under the table while Eginton just touched the other. We agreed not to question the spirits but to let them do what they liked. We shortly heard the familiar sound of writing, which continued for some three numetes or so, and it was evident that a long message was being written. About the middle of the message the sound seemed to change its character, and one of us We remarked that some other different hand was writing now removed the slates and found a long message entiroly covering one slate, and written in English, Grook, and French.

It is evident that the change in the sound of the writing occurred whilst the Greek characters were being traced, which is which it had been proposed to obtain it. The writing was was done slowly and deliberately. We also, during this in which it had been proposed to obtain it. The writing was

message, tried the experiment of breaking the circle, with the result of instantly stopping the writing, which resumed the moment contact was again made. Eglinton was evidently very exhausted, of which fact I, as a medical man, was well able to judge, and at our request the séance terminated.

M D. (Losp.)

(Since this account was sent to us our conjurers have tried what their art can do to imitate the phenomena they experi encod. In an imperfect way they met with some success. and a second scance in which no results were obtained, seem to liero made them consider the above account rather premuturely sent us. We also, being determined to be as scentical as we can, appear by our letter of inquiry to have suggested further trains of doubt. The result was a third scance before our letter was answered. This scance, besides being a convincing one in tack had also the effect of bringing out more clearly and disuncty what was still minutable in the first,]

November 6th, 1885

One fact of positive evidence is worth more than many negative ones.

Yesterday I had another sitting with Eghaton, and a word was written under conditions which rake any fraud upon his part impossible.

I took care that his mails were cut short; that his thumb never left the top of the table; that I saw the marked corner of my nen slate the whole time; yet a word was written in the centre of the slate with my oven marked pencil, which was worn away at the orige

I took particular care to watch each point, and kalenton know that I was doing so and took especial pains to help me

As regards the answers to your questions :-

I. Eginton's thumb was always above the edge of the table except when unable, from fatigue, to keep the slate against its under surface he dropped it for a moment. But there was not time for him to have written anything limitelf with it

11. The locked slate was put under the table for about three amutes before the message was obtained within it, and care was dropped upon the floor.

Both Mr. Eglinton's hunds were above the table and rest ag on the slate when the writing was heard within.

I do not know whether Eglinton know the question; I do not thank Ito did.

111. The catalogue was upon the slate, and was held under the table, the upper surface of the estalogue touching the under surface of the table. The slate was held in the usual way with the thumb resting against the edge of the table. The book was dropped once upon the ground.

In the first mamage the pencil was at the end of the ariting. but in the other cases it could often not be found, having dropped on the floor.

I have experimented with Eghnton's table and slates and find that it is impossible to open and shut the locked slate during the time taken by dropping it upon the floor and picking it up again, much less to write within it. It is also so dark under the table that it would be impossible to read a word in a book or inside the locked state, even suppressing them open. I have tried to de both and have not succeeded. It is also very difficult to avoid dropping the poncil occasionally

So that, viewed in the light of the last sitting, I was of op mon that the incidents above related are accidental.

1V In the case of the message between two slates, I held one end tightsy and Eglinton the object with one hand.

I am not certain it was not a propared soit, as it was one of Eghnton's, but know of no method of preparing one to produce such results, and know no one who has ever heard of any

The slate was first washed on both sides if not, we as conjurers should have noticed it. The writing was with slate pencil. We have the slate now.

The message was one generally applicable. M. D. (Losp.)

It is exceedingly interesting to observe that some accidents which occurredly occur, and cannot fail to, at psychographic sittings, and which we have known sceptical oyus to see distorted by prejudice, are to a ecujurer of no moment

Finally, we were invited to call upon "M.D. (Lond.)," and besides going over with him the pros and cons of the first seance, and witnessing some feats of prostidigitation which leave M. Verbeck in the shale, we received some additional information

concerning the important third scance

The word written was the word "Yes" just outside a circle

big. It stopped the middle of the word, and the taps came and a cold sensation was excepting over me, for which I could

Wh suggested the word Yes" we asked

I ad at the end of about milf uns your

Was the word written upon the sixte before it was put under the table?

Most certainly not.

In there a single reservation of your mind in the matter? No. I have tast you my whole thoughts. I not concentred

M Dis friend has also made the forewing remarks

Mr. Egrar and low mire of our own alatin, and marked upon the course a crede of fine two to two and a half melon in discreter. The pencil (our ow - was placed in the orelo, and the wate the held oneer or tubic or Mr Eglinton. I was sitting next his mer on . A best-a catherate we clininged places. My component to a aftersome though some a text the word "you " might be written in the circle. We get for some time without result, and the slate was three or four times placed upon the table to give Eglinton a fing on rest, and was also looked at to see if writing was there. Just when we bought of giving up, PAINT seratching was heard, white thee mand, but proceeded again faintly, and it was only by asking twice or three that Eglinton got the three tape, which were only just audible, one. were divided by long astervals, compared with what is essently the case. The word you" was formed written just outside the carola thus .-

It was positive fact that when the state was placed under the able for the as morne we me was upon it, and from that ways? Was it, that is to say, in the position it would be if t me Mr. Eghet an's thumb dad not have the edge of the table No me of the three people in the room wrote the word. It may be worthy of note that the writing was not written with the paint firances. Generally, I have noticed the panel or clark has been apparently present with great armsess. This result was quite in keeping with the surcounding conditions, weather,

Mr. Eglinton they drow a larger circle-say three meheam displictor -- and when the slate was below the table my fellow after asked that a certain name might appear. Some offerwards by at a and he thought he hourt senteting, but to say also and. The sitting was shortly afterwards discontinued when, in entirelly looking at the thirt, three strateless were seen in the errelo, than .-

as if an attempt and been made to write

no result attended that.

## Q. A WANDERING CHAIR

Orphaus, with his are made rom, And the passinish against rects. Bow to him when he dist way.

Or e evening, many years ago, I was the sale occupant of my large old-festimated drawing-room, and with one coulds only burning, I was rested at the picne entirely engressed with some new music, busily practising. Sundealy I became conscious assuring the in my music lessons. that one of the lounge-chairs was close to my e bow very it is supporting the movement of obstant. This arther surprised se, as that particular clinic instally occupied a position fully half the laugth of the rount from where the plane stood, but not stoppany to compader such a trivial circumstance, I morely pushed it the round and sare, "Wor, I thought I had pushed you away, but here you go now," and exerting all my strength I gave the chair such a violent push that (moving early on costors) it wont long against the surface of the large bow window with and broken some of the glass, and myring at the some time "There, stop there, you are far enough now " I continued playing, but was again interrupted; the chair was at my olbow, library where I found "Ecos Ecclesia," but the contexts are in

not account, and thinking, to say the least, it was rather un entry, I took up say eardle, looked round the room, which was gloomy, and without again toucking the chair, I left it where it stood, to find in the adjoining silting-room a metry party of my own family, who only hughed at me for my story of the wandering chur-

\*November 21, 1883.

[In answer to the more obvious criticisms, " Care" replies I can say with certainty there was no one in the room at the

time but myself. My only achool-boy as a was miles away at his college, and all the other members of my family, then at home, I found assembled in the arting room, quite at the far und of the bome, which was a large one. As to the theory of die string, the paint being as the appears end of the room which was if large size in string from a six or window, both remote, enald draw the chair in a contrary direction.

A plantible explanation might be suggested of the phenomenon, that is was due to the vibrations essented by the plane playing. How far this running planeble after the crussexamination upon the point to which we have enbjected our mlignig correspondent, and which appears below we must leave it to our residers to judge. To us such an explanation in nomes valide 1

Question.-1. How far (how many fost) did you push the chair away from you in each secasion?

Anaresy.-First time about four feet, second time more that

Question .- 2. Was the bonse an old boute, and the floor possibly not quite level, aloping possibly towards the pasto f

True You, very old, but the floor perfectly level, and accordent for dancing apon-

Question, -3. When the chair was close to your elbow on the first occasion, was it from to you or back to you, or sidetome person were sitting in it, or was it in any other position, and so tipor each meaniou?

there It was no eways. Lex my the position it would be tomorie were sitting in it, and to a position it reforms to

Question .- 4. Again, after you had purified it away from you what was the direction of the front of the chair? Did that licoction of the front after so the chair was approaching you, to that the clair not only moved, but turned !

Answer. - I was necessied with the music, and did not look in that direction at all.

Quanties, -5. Were you playing a piece which required some loov in the excention of it?

America-No. I was playing quietly.

Question .- 6. Did you hear the chair moving !

Issueer.- No, the corpet duiled all sound

Question,-7. What was, as nearly as possible, the exact time appy such secucion taken by the chair to reach your albow?

fauter.-I should say about five minutes.

Chestion.- 8. Did you over notice anything of the kind before or after with regard to that chair or any other in the We had a cheque instite the locked slate the whole time, but room, or did anyone cles who may have played music there? Sourcer.-No, not to my knowledge.

Question,-D. Do you remember may other occasion upon which an object has moved in your programs I

Anager - N

Question, -10. Were you while playing thinking of any person that so-and-to, perhapt no longer living, was sitting at

dancer .- I was not at the time thinking of my departed mother, but she used in former years to set just so at my albow,

Constion -11 Were the door and window both that? Louisers Year

## E. PRESCIENCE.

The following may interest job. The dream occurred away to some distance and continued my practice. In a few between Same, and Gam, this morning -I was scated in the manuton the chair was again knowing at my albow. I turned a reference library, aboving to my brother, who is in Texas, a namemanh in an old book, its leaves yellow with age. I stall I have wished to find thus a long time. You see this bears out what I my." What it was I do not remember. Two things fixed themselves upon my mind, the name of the book " Ecos such force that I holded round again, fearing the concussion Ecclesia," and this changed sometimes to "Esto Fidelia." I remarked also that while the title was in Latin the contents were in English. I was curious about this, and went to the

Lat n, and as it is some time since I studied this language I could not understand every word, though I got on fairly well. It is a large old book. Its contents are singular, dealing with Cain, Plato, Jesus, convents, &c. It contains some curious platos. The ressels which contained wine are organical with milar emblems, viz., Cancer, Leo, &c. I have only had time to plance heatily through. These solar enthless would seem to point to the sun-worship, which I am almost convinced was the first and has developed into Christianity. Now bear in much that although I am a frequent visitor to the reference library. my researches have never taken me into the E portion of the catalogue, so that an unconscious retention of a mane (which in steelf would be singular) is not to be entertained as the explana-Dots. I shall read it, as it bears upon the Early Church, an that I may see whether it supplies me with any information I need. I sofemaly declare that to the heat of my knowledge I had never soon the name, and it would not have interested and being in Latin oven if I had seen at But I re-affirm my researches have not caused me to look into be E portion of the cutar gue

P.S.—The outry in the catalogue is Seen Berlocks, or write M. That this is not the name of the book itself, and does not appear on the top of such page, or I saw it in my dream.

We may point out to our contributor :but. That the same of the book is different from the curry

2nd. That the name does not appear in the book apon the top of each page as he over it in his dream.

3rd. That the book is in Latin, while in his dream it as

peared to be in English

Thus, all that we can say is, that he drimmt of certain words which had reference to a book, and that these words appear in the estalogue in reference to a book. But the beek of his drawn. and the book in the library, have not an exact resemblance, but mly that general recombining which neight be suggested in the deman by the words.

The inference is irrotatible that at some time or other in turning over the pages of the estalogue the wors a keep Ecclosa" fimiled upon his somertim of timer eye, leaving no tences upon his consciousness. It might be bester there provisionally to my that this particular dresses was due to he emore spirit rather than is any muse external to him. This inner sperit, or free-horn soul exchained to matter, as it sught be downed, requires a name. It will be exited in these pages, for the time being, the Genera, which by the augmenter affinds of relationship between a work age and other mental phenome in accuming unnappy. The prohably in that tatolary genus referred of in Te - us and Cresula " Hark, you are called; some say the genius so eries "Come to him that replantly near dis."]

## C .- CLAIRVOYANCE.

On the evening of Sunday, October 18th, 1885, I was present at a stance at a private house. Man Let be F wher was the medium. She prefaced the stance by saying that are would the medium. one present an arrival condition, and under the boyond policial requirements, watnesses were allowed to relate go off into a nort of measurement control of a spirit, "Annia, would first address remarks to at large their experiences, and state their deductions from each parent present, and afterwards amover questions put to

There was stuck remarkable to west secures. Strongly owing to the muster of persons or sent there was a it to confusion the observation W. Man Leater Forler was said executhe exerances of the state of the second a lady new of the standard day she second a state of the lady and heard soughts, and the some bug, she me not know what on le her cough. And she conglist. The lady did not know that this referred to anything in our experience. But It is the without this referred to anything in our experience. But it is more too refer to a recent experience of my cwin, this may dony father who has dued to or arbitis. This fact, that my father had dued of oranchetis, was absolutely in an inwise every person present. I had nothing but subset not by write the following outside in my a great of peper. The my father had from the contribution of the armore was to be yeared in The armore may to be a great to the conclusion. The any further re create would now be made to the coughing. The medium book he toper out when to sking at do and whom the peak only of navong seem of this lam certain point against terforchess. She immediately said something of his nort, Oh, here in the some with the cough again. I feel man a tightness a rout the dresst

had written the nuture of three persons, two sirve, one dead. She placed them successively upon her furthead, and packed out

the initials of the dead person correctly.

I was much impressed by Miss Lottic Fowler's frankness, simplicity and genuineness.

## SIGNIFICANT EVENTS

Under this title "H. K." comments, in the Spiritual Offering, at some length, upon the recent trials of Mrs. Miller, at St. Louis, and of Mr. Mott, at Kansas City, on the charge of receiving money on the fraudulent pratonce of presenting materiansed spirit-forms.

"These trials are to our mind," says H. K., " of great ignificance, as suggesting the intelligence and power builted the manifestations which are forcing the fact of sparitual existence and intervention upon the attention of manking,

"We find that the spiritual inovement, commencing in 1848, has now centres of propagation in every civilisen country, not through any musionary efforts indiating from one point, but reparate and distinct; phenomena of a similar kind have been minultaneously presented in various nations, exciting the same ideas and convictions everywhere in all who have observed them. This sparstost movement of the epoch has been, and is, in its mean drift, everywhere consistent and harmomous, showing its oneness of origin,"

He considers that " the policy of the spirit-workers who guide the movement " may be often discorned in incidents which, at first glance, seem adverse, for example, n, so-called "exposures," regarded by many as disasters, and over which, in America, some of the most respectable of the Spiritualists "reper- when mediums for materialisation suffer temporary selipse." He considers that such so-called "exposures" have contributed to the extension of spiritual science, and me. therefore aded in the progress of the cause. He thinks that old Spiritonlists, Instead of londing themselves to what they roll "morposures," aboutd study more the phenomena of materialisation. If the "exposures" had not sided in advancing the cause, " H. K." thinks they would not have been nor mitted. "We have faith," he mays, "In its in seen gordes and genericans, whom we regard as inser her is of too. and as working in accordance with His laws to bring about a spiritual awakening, and a religious reformation on this planet. We do not believe in any special intervention of the Infinite Mand, to whom there is only in Eternal Now , but we do believe in interventions of His angels, high as well as low intelligences, to bring about the changes, stages in progression, which are a part of the Eternal Scheme existing in perfection in the Divine Mind."

Hence he concludes that " we regard the recent trade as having served the cause. They have brought about the wasset publication overtheland of the testimony which Spiritualists can bring forward, each of the trials was protrasted beyond judicial requirements, withouter were allowed to relate thous, which had but a hypothetical bearing upon the point at inthe shoontestable evaluates from most respected cit sets was given as to the true methaniship of Mrs. Miller and Mr. Matt, and the fact of the materialisation of spiritual forms has been testified to ax strongly as a count be in an open court of law "

A PORTRATE of Alderman Backet will appear in a future many of The Medium.

A new medium for materialisation, a Mrs. Hall, is giving котов са Ваггоу

Storon Daniani, so well-known to many of our renders, hout has left Lambon for Florence for the winter.

Mr. F. W. L. Myras has been lecturing in Newcoards on Heman Personality," Mr. J. Burt, M. P., in the chair

# SPIRITUALISM AT HOME AND ABROAD: ITS PRESENT POSITION AND FUTURE WORK

An Address delivered by the President of the Landon Specificalist Alliance, at a General Meeting of the Society, held in St. James's Hall, Loudan, on the 13th of November, 1885.

It falls to my lot as President to open to-night a new session of the London Spiritualist Alliance. In so doing, I propose to recount a chapter of history from the past, and to lay out some definite plan of operations for the intere. I have no sensational mendents to narrate, no philosophical theories to propound, but if I can succeed in making clear by my recital a rather complex narrative, I have no doubt that what I shall set forth will be regarded as of high interest and importance.

In the first place, I must carry your minds back to a meeting of this Alliance, held in this room on July 15th, 1884, whon the following resolution was unununously agreed to :-

"That it be an instruction to the Council of the London Spiritualist Alliance to take steps for Confederation on a basis of equality with Societies interesting themselves in kindred subjects."

At that mosting I had submitted a scheme for an International Confederation of Spiritist Societies, which was adopted by the terms of this resolution, and referred to the Council for

Recapitulation of Procedure,

After due consideration, it was thought desirable, as a pre-numery ste that list and address a letter to the various social es throughout the world whose existence was known to us, that the pass should be brought under the notice of the various journals and again of Sourcest percor and that an atternet should be made in this way to elic tithe views of those interested in our proposed.

This letter was written and despatched in due course. It embed ed the substance of the scheme which I lad submitted, and I may at once my was overywhere received with a flattering amount of attention, and with the most courteous consuleration, oven in the few instances where entire agreement with its contents did not exist. From Paris, from Belgium, from the Hague, from Germany, from Hungary, from Italy, and from Switzerland, the Spiritists of the Unit nent of Europe respondento our proposal. The Victorian Association stretched out the right hans of fels willip from the Art power the American Spiritualist Association wrote through the President "a hearty and fraternal response to my letter, and the by retualists of far distant Brazil the ugot our proposals sufficiently important to induce them to formulate an elaborate and complex a some for the purpose of giving practical effect to our general idea of

Now, it most unfortunately happened that just as replies to this letter began to come in I met with an accident which resulted in a todoors illness, from which I have but very recently recovered, so far as to be able to give attention to their contents. For more than six months I was not permitted, nor, indeed, was I able, to transact business. And as the process of recovery from an illness so prolonged was in itself tedious, so extreme care was necessary to avoid overtasking mental and nervous onergy waich had sustained so severe a shock. As a matter of necessity, therefore, I have only very recently been able to deal with the correspondence which my letter has brought me. Thus must be my excuse for what is a very regrettable, and what, in other circumstances, would be a quite unpardenable delay in dealing with the communications of my courteous correspondents.

Summary of Replies to Circular Letter

I proceed to give as complete a summary as space permits of the history of the negotiations with various societies and of the opinium expressed by various representative writers. It will be seen that some known journals and societies are not represented in my list. It may, I fear, be possible that some letters addressed to me have been misland or lost during my illness. I have made search, bowever, and can find no further letters, though criticums in foreign journals have more than probably escaped my notice.

To bogin at the beginning I must refer to some correspondence with

The American Spiritual Alliance.

In September, 1883, the American Spiritual Alliance (President, Judge Nelson Cross), offered affiliation to our Society in a circular letter, and enclosed a cartificate of membership.

14 It is neither expected nor desired by the Alliance," so the words ran, " that all should think alike, nor indeed that any two should hold uniform opinions upon subjects, which in their Limities range embrace all that is known or attainable in the realm of material and spiritual resistance." Further "It is no assumed position of leadership that the Alliance makes this effort to bring Spiritualist societies into closer relationality; and should this circular lead to the accomplishment of an ob ject so manifestly desirable, it is its further design to furnish all societies in affiliation with a complete list of sister societies, thus completing its voluntary ondeavours in the direction indic on i, when it will resume its place as one of a common fan ly with uniform to discuss provinces as implied to the official maxim Liberty and fraterity in unity

In May 13th, 1984 at an amount meeting, President No.son Cross man oweed that La Reversal and Paris, had published this circular in full, together with the certificate of affiliation of the Societé Scientifique du Spiritente, founded by M. and

Madamo Allan Kardee in 1860.

At the same time he gave a long list of American societies

which had also exchanged affiliation cert testes

On December 3rd, 1883, President Nelson Cross wrote to me in a private letter as follows . "Every previous attempt in this care is as in goors, at anything akin to a uniform system of organisation are got by a mainta was only have no no rel . not only because of a dislike to organization per se, but because of the divers views amongst Spiritualists, individually, respect guaranters which would necessarily have to be meorporated ir to any feemulative plan of associated action."

It was this resistance to the formulation of anything which should bear even the faintest resemblance to a creed, which gave rate to the circular letter of our Albanco and the cortilecte of athuntion amongst organised, societies which, I am glad to say, have met with general favour, and a number of societies widely separated from one another have embraced the preffered good fellowsh p and add sted with one anoth and the good work is continually going forward without of posterior form stry is more

The American Spiritualist Association.

In 1883 a convention of Spritualists assembled at Sturgis, Michigan, and there formed an association to be known as the American Spiritualist Association. It was stated that -

Yes see retroit notice of this Society was given by to have Yes see to see a lar "July 19th, 1881, which may be reproduced as a lar to the control of a few transfer founded by May Karling a 1800 mosted of a few Professional control of this Society was given by 1. ## A Comprehensive Platform.

I have said that the statement or social enough for all who concarn themselves with things occult, psychoal, spiritualistic, except, perhaps, one class. The fact, established for the Spiritualist, of a possibility of consumation between the world of sourit and the world of matter differentiates him from those whose philosophy does not admit of such a conception. In view of recent speculations with which the air is thick, this special point is rapidly becoming the distinguishing note of a Spartualist, I have no desire to catch any cheap applause as to any converse of Street, visite, visite, the opinions of any set of investigators of the pherson or with which we are concerned. But it is necessary to say that by virtue of the benef that we hold, we are not content with theorys, which not only lamentably fail to explain the facts that we observe, but which seem to be expressly freezed to explain away the unity remonable and complete explanation of which, in our opinion, they are anaceptable. While we riewit's interest, if also with no great fieth in the permanent value of the results obtained, all attempts to extend the existing area of human science in the direction of payelical facts, we yet consider that the hypotheses of Telepathy and the Unconscious Secondary Self, on the one kand, hop haltingly after facts which they will never overtake. The hypotheses of Professor von Hartmann-his amplantation and transference of objective hallucinations, his masked somnambilism, his almost umniscient nomeambulle eraselogeness; and his almost contiputant incliments there force, seem to us quite fashiquate to to the work of spirit which, as a theory, they are intended to displace. They are interesting speculations, filmy cobwebs The view taken by averone Sebantiano Fenzi is more in of the brain, expedients of a philosopher whose philosophy has increasity with what is possible for us in our present condition, no room, so far as I can see after careful study, for spirit, and closely in accord with the propositions laid down in the though Dy won Hartmann thinks it has, a philosophy which, address to this Allustee ("Loure," July 19th, 1831) when in its author's own words, holds "the survival of the personally gentle nast is President, proposes "to establish a friendly inter- not think that this theory covers the facts-to become a familiar course for the exchange of views and experiences, which inter ! disstrution, "It is not strong enough for the place"-and its course will give oil a rest into interactly and commune lauther would noon discover that to be the case if he had any eventually in a rast Society of Spiritualists throughout the personal experience whatever of the facts with which he seems

sound to lost forware to any to must a graph our them to the exclusion of all impact of the world of spirit on the federation between societies of repute in various countries, in a world of matter, we are differentiated by our distinctive belief.

"the fringes that adors, or possibly that sometimes embarrant been obtained in full light, and with the medium in full view and encumber the labric of amountal truth." Within our Confederation there will be room for very divergent views , and we shall hope for no little bought from the free appreciaion of opinion, and the possible modification of any environes views that we tony have too hartily adopted.

Navember 21, 1885.]

cannot forbear to point out how this correspondence illustrates the extent of the hold which Spiritualism in these few decades, less than a short half-contary, has gained upon mankind. It has spread, we see oren by this correspondence, into hear contitionia, and exists in organised form whorever men concerts thereselves with their future life, on lines of experimental questions as ner names these files as a helped when c chart of these and a result is opinion floured, in every land where a celebral of the cas is again a tailor with the amount of ser press an unwelcome and inconvenient expression of posses. Russia in the only country I know of where the parametion of a Speritualist journal is impossible, and even that burnigated anticipens to be up wing, and it has the boast, which is as unique as its rapid and wide growth, that among the master-minds that it has attracted, pone has, in all these years, in all these countries, repulsated a holief that has been founded in personal investigation and experiment.

This widespread dissomination of a belief which no votary shandors, and of which the philosophy of the Spiritsahis is, in the anotherin proponderance of opinion, enthanciorily explanatory, is a phonomonon without parallel, so lite as I

Atom in he and my of the world

Something Worth the Deing. It was be some toog worth the during to make some efforts, however tontative, to consolidate these widespread organia. tions, to give them a columnt bond of union, to bring kome to each member of them, in winterer distant land, that he is one of a great family that knows no distinctions of race, or disse, or creed, but is conterminous with humanity Itself. As our Innested friend Professor Cased once put at, It will be a grand thing if by our offerts in this direction we sely the world the idea of the brotherhood of nations." That will be a great factor in human progress which we shall set in action, if we can bring home to all men that knowledge is a prinches possession, involving as the prior of high truth we per senses. of high duties. I kope, without unnecessary dulay, t. Is a deto present to the floristy some nestured scheme by wat . the general objects that I have indicated pay be carried into effect. When are We Delat ?

But this thought-that knowledge involves responsibility and that " high duties are incumbent on the passessors or him troth," leads me to turn my attention to our own Society, and

What are we doing? I will not healtate to my that, though we are doing purhaps as much as our masses permit, we are not doing enough. I believe that an active plan of work, nealously carried out, would enlist with an some who now stand saids, perhaps in expectation of some more definite action on our part. I believe also that it is incumberat upon this Spiribalist Alliance to take a lend in some definite attempt to extend the area of our knowledge by organized experimental research, and to by broad and first the foundations for the faith that is in me. The methods of investigation have too often been faulty. It is our duty to do what we can to amend them, to direct offort, to contribute of our experience, to guide the ignorant and inexperienced in the difficult path of personal experimental research.

Old Mushods of Dressingstion.

When in November, 1892, the educated Spiritualists of Great Britain pronounced with such straining unaming against methods of investigation which experience had shown to be disastrous, especially against promuenous circles held in total darkness, and against the secusion of the medium in a dark calinet a heavy onew was given to methods of investigation which should nover have been sanctioned methods of inquiry into an obscure and unknown subject, deried apparently at produce the surrimum of bewilderment with the minimum of knowledge, while offering at the same time the most comprehousers faculties for fraud From that blow the old had method of investigation-if, indeed, that title could ever be applied to it has never recovered. Some of our most valuable recouls of

Otherwise we are responsible for no some private opinions - eridence, e.g., in materialisation and in psychograps r have

The Time of Construction has Come.

We have practically destroyed what led to grave abuses. It as now ancomocity in us to take a step forward in the afreehon of construction. We must do what we can to afford facilities for inquiry into, and observation of, the phononists and facts on which we roly by any reasonable and rational methods. We I must not delay, for much yet rusmine to be said, but I must meet the great and growing domand for guidance and matraction that now presses with such unequal force on a few known individuals. We must omuze, if we can, tunder, delicate, and careful treatment of our mediums, as matraments the accuracy and value of which largely depend on the treatmont to which they are subjected. We must see to it that car circles are so guarded as to be masscanide to the merely generant who desires only to air his ignorance and not to dimensials has stock by assigniting knowledge, to the projudiced who only churishes his prejudices , to the more wonder-hunter who has no higher motive than a similar currently to know what this new thing may be. We must learn to graduate our sircles to can the need, e such not be at once amounted to the inner negatories, but shall find his purtable sphere of observation where he may grow in knowledge till he fitty takes his place among the experts. We must try to secure such mature knowledge amongst the contributors to the Spiritualist Prom as shall provont the advocacy and defence of our beliefs, and the exposition of our facts from falling into industreet and incompetent lanus We must stouchly and at raising the value of the records, discussions, and disquisitions which those who are able should feel it a duty to contribute to the general fund of knowledge.

son to send on se in the work, interests, lusportant, and companience of the source to the Council in whose same I speak to be now for all your Spiritualists. It is high time that it should be taken in hand. How our we best approach it !

The Constructive Work of this Alliance. Frequent at the same of the Administration of Spiritualists is the most enitable body to undertake it. It in cludes within it must of the experienced Spiritualists of early days, together with a considerable number of earnest and able investigators of the new quest. Experts and inquirers are ready to our hand. How our we utilise this experience of the one class, and answer the cavings for knowledge which are morosategly apportunate in the other? We must apply the experimental mothed on lines at which I have already hinted. Our circles toust be properly graduated and duly controlled.

The plan of practical research that I am about to lay before you and for the draft of which (in some ways but not materially modified by subsequent compileration) we are indebted to Mi J. S. Farmer, Editor of "Licent," and a member of the governing body of this Allianes, kan been thoroughly discussed by the Council of the Alliance, and has received its sanction and approval. Indood, I may say that it is in working order, and that I have dready received the names of some inquirers who are setually engaged in lavortigation, as well as of several meditions who are willing to give their time and powers in furtherance of the plan Graduated Circles.

Circles will be graduated so as to be resolved into two classes, of which there may be various grades and any number of groups

(I) Circles or Exquirence

All groups of circles of whatever degree will be subject absolately to the direction and governance of a Central Committee or Corract. All who desire to take part in these circles will give it your hantes to me and I shall subjust them to the Can me than atten. The election is by bullet, and it is obvious that great care must be exercised in the selection of suitable persona, and their arrange cent an circles, so compared as to moure perfect harmony. These various circles will meet, each at its own convenience, in private houses for the most part, and their proceedings will be strictly private. They will be conducted by a Director elected in each circle by the manibors, and accurate minutes of all proceedings will be kept by a Recorder These minutes will be submitted at stated intervals to the Committage of Control, who alone will door o make the republicacion. No publication will be permised ble with air the same noted the Comic ties and from a decision there a non bear. Each member of the various curves predges on self - keep at premedings strictly private until authority a given for publication and the names of the persons who constitute a particular circle are known only to themselves and to the co-mostice of Control.

A circle should not consist of more than ten or byeste members, and the control of its proceedings is vested in its correct miles

## Circles of Despirers

will consist of pursons who nave been elected by ballot, and who have plet god themselves to some prolonged and thorough course be sift out the tearning consons, as well as to select a transfer so. The an spect from a stars point of dog ratio sutageness, and to select with continu those only who are is a more enthusiants, out muo, I layer besided, and conceased of hour purpose. Such persons. when elected, will be put a so connecation with some exportwho will give the recessary advice and gordance wil arrest their reading, if commed, will give help in difficulty, and generally not no Mentor and approper to them, until, in due time, they become fit to take their place in a circle of experts, and to do for sthers what him occur done for them

I may take that the proceedings of each circle of asquiress will be moder the charge of its Export Director. But it is clearly undestroids and practically impossible to interfers with what the myor do question do. An expect would know that such rater for since would be executronic and would confine be such as unch management of the afface of the circle as may from tune to trace be necessary to facilitate its investigation

## Pance, and Lampungastion of Mediums.

## time or two points of detail respects to be stated.

While the mumbers of the various circles will, of course, be already, or will you forto become members of the London Spiritualist Alliance, it will further be expected that they contribute a goines assumlly to the working expenses incurred in this plan of research. It will be very desirable that we should may funds at our cosposal, and the Committee will be prepared t pecore and administer an discount foot may come of buy another term in embers of in assume a ca.

It is hoped that this plan of work, when fully developed, may have the effect of opining private circles to these qualified ry was not a given proof of those esemestment, integrity, mas and that the introduction of the Course the field and self-article of the self-article of the field and the self-article of th Fight dis of a man day in inter- dissert of

I work proposed to offer any renuncration to those mediums. a his danteer their services to the various circles. It is not to he demoid that the complete descent for a complet of muney, at least in the shape of payment for separate season, in a mounter die fieldly. Though hell a may the the low or a way has here. I cannot dony that this same h ro, under the old methods of investigation, has been a stumbling block and cause of offence. For the time to an and to be sent and of the miles of the best for per had as a specific with a size Research begins as supplying the not imbeed to make payment to mediums by results, at so much a to oil, or so much an hour, but to place a median beyond the the host such temperation, by medicating him with such a sum as These wise wish to take part in this work will not refuse to shall justify as in monopolising his powers, and claiming their for our exclusive me. In this way we shall get a very doubtful element out of our enleabations, and shall form the nucleus of a es member who may be a good a hear for School of the Prophote where medimental will be developed more proper conditions; where the modium will be guarded from large, and where we may reasonably expect to learn much that as yet we have had no opportunity to study

but they a public shipt have to be name ante present In a tipe to at a manuary that I make the manuse of the free constance of any probangs who have they memory are at the pervice of the Committee on war or hanks are due to them for this bright example of self-accificing no.

## In a Robetona Service Destruble?

It may possibly be that out of this plan may come worse more direct pervision for the appritual masts of our over sets that we have yet been able to make. Some of an desire very much that there should be noted available form of religious service expresgive of one faith, which we could attend for worshop for has me tion, perhaps for direct and olorated communicate with these who have guite before. It is an assistant that no one can speak if in the content and those of respect. I tried some time wince to organise such mostings, but I serived at the conclusion that there were grave sufficulties in the way, and that the time was when the difficulties may be autocounted, I will not renture

## The Conclusion of the Whole Matter

It remains only that I should redeavour to place before you a susuancy view of what I treat may result from the procecution of the plan that I have now inadequately expounded. Much must depend on the zeal, the energy, the discretion, and the perseverance of those who maune responsibility in carrying it into execution. No dilettante dabbler will be of any service either to hannelf or to us. No man who sees everything through a real of preparito, whether that preparito be unlisted on the side of our beliefs (as in the case with the more enthusiast ou whom rational argument is wasted) or against wa, in the shape of dogged and invincible acopticion, will advance what we desire to prospects. The man of open mind, who can view facts in their relations, and ma regard them with equaniumty, to whaterer end they draw him, the man who is not thrown off his balance by a bold theory holdly propounded, but resting on fidence which has always been shown to me by those with whom | nothing more substantial than air , the unbrused student of an

absours and occult group of phenomena which have not yet percived from friend or for a perfectly calm and dispessionate attention - these are the people we want.

To them I respectfully say There is already seemsulated a vast man of observed fact, of various degrees of importance, more or less accurately recorded. The study of this mass of evidence will yield interesting results to a careful student, and will probably lead him to the conclusion that what is therein stated is of the highest importance, even if it also lead him to the verge of despair in view of the general looseness and in accuracy of the records, and of the diversity of the conclusions based upon them. These facts are occurring in our midst to day. Lat it be our work to deal with those in a more solor and serious spirit, in a manner more in accord with the truly accontific specit of the age. Sesones (falsaly so called, in this connection) has done its best to barke them, to explain away their true significance, to relegate them to the lumbs of superstition. Let us shame Science by dealing with them eccentrically.

If we only deal fairly with the facts and are not carried away by ill-regulated enthusiasm or fettered by an unbonding acopticion, I auticipate from the plan that I mor leave with you results such as these

- 1. The openingoment of exact methods of research.
- 2. The encouragement of more exact records of observed facts 2. The due regulation of admission to circles, so that the elements of which they are compared with the man-Інониоспеционня.
- 4. The graduation of circles, so as to afford a complete and progressive rearns of investigation and instruction 3. The more careful treatment of mediates
- 6. The cost logice of o and to speed in the set of expect the of the cost of the order more light upon from " Some botter material for our Spirstnalust Press derrive from
- a larger seek of experience users oxactly tabulated.

But, whatever the outcome of what is, at any rais, a well rousidered plan, the work presson. It lies at our doors, and we cannot rid ourselves of the responsibility of accepting or refusing its acceptance. For we hour the burden of the age in which our lot in cost -an ago of strendent activity, of incommet change, of rapid development, of conscious questioning of renerable beliefs :-- an age of the shaking of dry heros, of the both of now trath, of the reconstructions of old beliefs. nobler assinctions, and of deeper insights:-- an spech that any true man with his mind awake may be doughy thankful to have he dand acted on even through he he not at all times in harmony with its over thing spirit, but an epoch also that will be to him a veritable touchstone, proving him with inevitable certainty what manner of man lee is whether alive to his opportunities, awake to his responsibilities, conscious of his high dation, or only enerupped in selfish and inglerous case. cardies of the real import of what tickles his inded curiosity. caroful only to cat and to drink, and on the motrow dr pang into the grave where he and his acts will be alike forgotion

## MR. MYERS ON HUMAN PERSONALITY. By Dg. George Wylp

Mr. Myers recently rend a paper on the above subject before the Society for Psychical Research, an epitonic of which paper appeared in last week's "Light," the subject in its complete form being given in the current number of the Fortnightly Review.

In this paper Mr. Myers attempts to show that his recent studies in hypnotism "lawo led in the first place to certain negative results which, so far as they go-and that is very far-do at least appear directly to contravens those very [Spiritualistic] conclusions which he holds as so uniquely a porta t

In the above paragraph I state Mr. Myers' position regarding the import of certain hypmetic phenomena in his own words, his conclusions being that these phe curean gr towards throwing doubts on the persistent or immertal personality of the human sou.

As there are some of us who have been willing to risk int hou is even himselfle set in evolution Specitualistic studies, because we think that through these only can we arrive at that true Science of the Soul whereby we can demonstrate its triumph over death and the gravehe agnostical conclusions arrived at by Mr Myert's . cause of trouble, were it not that it can be most distenetly seem that his conclusions are not in any degree warranted by his facts

The argument which universally appeals to the for mor series of mankind in that our continuous or nor asserts as beyond all doubt that the conscious Ego, of my, 18 " ... the same conscious Ego of 1885. But Mr. Weers I was that, because certain hypnotic experiments out apparently break the chain of the continuous memory, by substituting the will of the external experimenter, the memory of the Ego may thus be interrupted at any number of points, and the entire chain thus broken jute may number of disconnected naka, the Ego being nowhere

On examination, however, it will be found that the Ego is homogeneous, and cannot be disintegrated, and that an disintegration which takes place is only the disintegra to of the machine through which the Ego works on the physical

In illustration of his view, Mr. Myers proceeds to give a for elementary experiments in hypnotism, the strongest of which I now give in an abbreviated form, accompanied by a beief analysis, by which, I tank, it can be easily shown that Mr. Myers has no foundation whatever, in the facts presented, for his agnostical conclusions.

Case 1 .- A subject is hypnotised and then informed that his name is Nebuchadnamar. He replies, "It is so," but adds, "I only say so to oblige you." The operator then requests him to act undependently and tell him what his name really is, when he heatates, but still many a Nebuchadnezzar," and when awakened he says, "I thus glit I might as well call myself by that mane as no day in ac-

In this instance we have no break in the personality, but shaply a credulous being "biologised" by a stronger will, and induced by the will of the operator to oblige him by the exhibition of any tom-foolery he may desire. It is samply an illustration of the willing game, and the sensetive proves his personality by his will inguess to oblige his

Case 2.-A young lady is hypnotised, and then told that blue is the protect colour for bricks, and when awakened she resumes the painting of a diagram upon which she had been engaged, and when she comes to paint the bricks she says to her lady companion, "I suppose it would never do to paint these bracks blue I" and when asked "Why blue !" she replies, "The childish idea is in my mind."

This instance in no degree suggests the loss or interruption of personality, but only shows an amiable desire to here again the transmission of the idea, proves the unity of the Ego.

Case 3.—It is suggested to a hypnotised subject in a hospital that when awake he shall take Dr. X.'s umbrella, open it, and walk up and down the gallery. Accordingly, he does so, and when asked why he so acts, replies, "it is just a fancy; I sometimes take a walk."

This case is the same as the last, and is another illustration of the willing game. In no degree does it support the disintegration of the Ego, but on the contrary shows the transmission of the idea from the dreaming to the waking

Ego, and thus proves the unbroken personality.

Case 4 A is hypnotised on the 14th July, and is then told that on the 1st January following, her hypnotiser B. will pay her a visit, wish her a happy new year, and then disappear. Accordingly, A., being in her chamber on the appointed ay, hears a knock, and mays, "Come in," when in walks B., dressed in the summer clothes he were 14th July, and says, "A happy new year to you," and then disappears.

This is a very interesting case, and may possibly be an hastration of the phenomenon of the Double, or it may be a case of will transmitted from a distance, but otherwise

it can be as easily explained as the other cases.

A. received up announcement in her semi-traure state, which announcement dwelt in the spirit memory, and was delivered to the waking mind by impression so strongly that the framaction projected the objective appearance of B.

In no degree does this case show any disintegration of the personality, but it goes to prove that the true person dity

is the anner spiritual self.

H wing given these and other similar cases, Mr. Myers then adds: "These brief hints most suffice for the present to indicate that memory as we know it cannot prove the personality of men." But, as we have seen, these illustrations bring us to no such conclusion ; and that Mr. Myers should be so easily satisfied with his proofs is a matter for

Mr. Myers further adds . Our ideasyneratic reactions to special stanuil form, as we have seen, the organic basis

of what we call the will."

This sentence is as obscure as almost any passage in Browning, but in this case, at least, I think we must not matake obscurity for depth; for when the purple mists are dispersed which disguise the menning, there will be exposed only a naked materulism. And I feel sure of this, that the words in no sense whatever explain the meet mism of the will or soul

On the other hand, I colucely agree with Mr. Myers when he says, speaking of the ness bypootism may, when truly applied, yield to man; "This will seem to most minds n paltry counterpoise to the depressing views of man's dig ity and destiny which the train of argument in this

Mr. Myers, however, admits that " the soul very probably exists,' and he believes that further experiments with hypnotism may lead to far higher revelations than they have yet brought to him; and here one cannot but regret that he should not have matured these experiments before delivering himself; for in a noble percention, with which he concludes his paper, surroudering himself to the inspiration of the pootic fire, he has a vision of higher things coming from afar.

When that day comes to have he will see that his present theories are but the "baseless fabric of a vision."

This we know, that there are those who, with a pure heart and a devout mind, have witnessed the deeplyentranced soul risen beyond the disorderly purgatory of an ansane "electro-biology," and standing apart, and if that soul responded at all to questioning, has done so in the

gratify the operator; the influence of his persuasion being words of instruction, of warning, or of command. Thus transmitted from her semi-transed to her waking state; and it is that while the lower forms of trance exhibit the soul in a state of reverie, the higher entrancement exhibits the soul as the true Ego-the persistent and the dominant personality

But beyond this, still, there is the hely entrancement of the tortured saint, who, while the flesh is burned with fire and torn with iron screws, blusphemously in the name of Christ by fiends in the shape of men, leaving the body for a time, has risen into the sphere of the immortals, has conversed with the spirits of just men made perfect, beheld that which eye hath not seen, nor ear heard, nor hath it entered into the heart of man to conceive,-while falling before the Great White Throne of Him Who liveth for over

IF a canon becommected by a cord to a distant slup, one in the canon may, if he cannot draw the ship to him, draw himself to the slup. So it is with prayer : if it do not bring God to man it will bring mun to God, and this is always well for man .-- W. P.

The Spiritual Offering says -" The past history of Methodism, and the persecutions and marepresentation it encountered, should inspire the Methodists of to-day with knidder feelings toward Spirit along than have bother to been manifest. The Church needs, and will by and-bye linve to appeal to Spiritualism to save it from the inreads of materialism Faith in a future life is not enough; the world is calling for facts which Spiritualism alone can give.

"The Nest of Godly People ' is the A SINCULAR SECT title of a Russian sect which has come intresidence during the last of the years. Its headquarters (according to a Tracs correspondent) appear to be at Bender, Bessaraha, and its manalised to the fact that its members—all of the persons classed dig a grave in the floor of their labitations, or in their gardens, and he therein, as they say, to commune with God, confess to line their sine, and examine their past life. The grave is covered with a wooden box-like lid with a door in it for ingrees and egross, and they lie in the grave as in a coffin. When the grave or "nest" is in the garden, it is surrounded with bushes akin to that of unclosstered monks.

Note that of unclosed end honks.

Note that of unclosed end honks.

Predeceder (T. J. C.) writing from Lamore, Cal., relates the following:—"I was sent early to the public school in Lucester, Mass., and was there till ten years old. Among my playmates was a little girl about my ago. At twelve I went to sea. In May, 1855, I sailed from New York in the brig Samuel and Edward (Captam Raymonus) for South America, loaded with humber. The wear fer was stormy. On the 10th of June, 8 p.m., I went to the forecastle, through a small hatchway, to lie down in my hammack. Searcely a moment clapsed before I was conscious of sonact mig in the hatchway. I watched. First appeared a faint glummer of blumb light, notwithstanding there was a sluth hump burning, affording sufficient light for all purposes. In this black light, at the foot of the latel way halder, appeared, faint at first, but soon quite distinct, my little school-mats, of Leicester, beckening to mu to got up. To convince myself that I was not dreaming, I went on dock, talked with the man on the leokest, get wet, and went below again. The appearation was viable from my humbook, gesticulating as before, and remained till midnight, causing me minoyance. June 11th, from 12 p.m. till 4 a.m., was a repetition of the 10th; but on June 12th, from 8 p.m. till midnight, my strange vinter was more distinct. Her hum, before tied up, was down, being tessed back with the left hand, while beaked up me with the right. While gasing I heard the man at the helm begin straking eight bells (twelve o'clock, midnight), when my vision to except the fait of my shipmates forward, by the being reliable; with an English ship during the darkest night the being reliable; with an English ship during the darkest night. Ex eries e -A correspondent of the V. PHENOMEYAL aft to relave the belm, and reached the quarter-deck not an instinct too soon to escape the fact of my shipmates forward, by the brig cribidity with an English ship during the darkest right of my recellection. And now the sequel: In the spring of 1868, I visited my old home. Meeting my former schoolmate, now married, with her parents, at a social gathering, I was invited to spend a few days with thom. At the supper table, one evening, Mrs. — asked too if Mr. — had told me of her three dreams about me on the 10th, 11th, and 12th of June, 1886 (being much taked of in the home circle, the dates were preserved). In relating her dream, she described the were preserved). In relating her dream, the described the forecastle, the swinging bed (hanmock), the ladder to go up, the tin hamp, and the gloomy appearance of the place, and said she woke up the last night with a acresm."—The Golden Gate.

# SPIRITUALISM AT HOME AND CONTINUED ELSEWHERE

On the 7th November, as ' Lts et ' p 539, I broke a long allence by referring to some human characteristics perfamine to apiritual phenomena, prompted by a previous reference thereto in this journal. Not that the home phonomena, to which I have frequently called the attention of your readers, have consedfar from t-but because for many anorths past we have been developing and carefully recording notes of other phenomena

necurring in our family scances. While still, as yet, incomplete, we adoutted in suclo if name who has sat with me on other occasions, and whose name is well known. Phonomens then occurred which led us, on his account, to seek, outside our own circle, a completion of what with no is only partially developed. Very briefly I will record what led blut to ask for more. In dim light, with the medium in the enhance-which was dark-materialised hands were formed in a very convincing number. A small globe of light first came out of the enbinet, stationing itself between the opened curtains. This gradually grew into the shape of a small child-like hand, the child's hand grow, under our close observa-tion, to a beautifully-formed female hand, which our vinter thought resembled one he well knew. And now, by apart direction, the lights were put out, and we est in darkness. hands now appeared about the room. One took my daughter's hand, lifted it high up above her head and kused it, thus showing that a form was also there. My uncle then had his head and face fondly caremed by a hand, probably that which he had proviously accognised. A considerable breeze was diffused all over the room, and most of us were touched during this abnormal occurrence. I am quite aware that all this could be explained glibly, but I am now writing for Spiritualists who will understand the impression such phenomena would make on an unbinased mind, and I only record it for one purpose. led to Dr. Morell wishing, before he returned to Italy for the winter, to see this phenomenon in its full development; and a medium, wall known to us, -whose name shall be X. to the public-kindly gave us a sitting for the purpose. The notes of that sitting, as now recorded, have been read and approved by five of those present, three of whom have the temerity to sign the report for publication.

In an upper room, carpeted all over, and opening into a smaller room, eight of us sat down at 8.20 p.m., having first carefully inspected both rooms, locked both the outer doors, and placed securely a gummed paper over the opening crack of the door in the inner room, which led on to the landing where gas was burning. The paper so gummed was initialed by Dr. Morell, and was found intact at the end of our sitting at 10.20. We sat in dim light, sufficient, however, to see one another plainly, and those who had good sight could tell the time on

some were duplicates, i.e., the same spirit after retiring into the dark room returned again

One of the female spirits came to a lady who sat next to me, and placing her hands on her shoulders drow her towards her and kussed her. In doing thus I distinctly saw a beautifullyformed hand and arm, quite bare up to, and above the elbow, and it was not no large us any man's arm. Another form saluted a gentlemen present, and spoke to him. A third female spirit, which appeared to have less power, approached Dr Morell She evidently tried to put her arms about him , but not succeeding, she strutched out both her hands towards his and repeatedly kissed one hand (smaller to the one he had seen at our home circle) and threw kisses to him. This was a cluarly formed fou de agure, and the arms, bare to the elbow, were o stanctly soon by us all,

One of the male forms, who appeared to have gathered up much force, was recognised at once by my wife as her father. He came up to us '(sitting together), shock hands with us both, then kined my wife on the forehead, covering her face with line beard in an doing. He then turned his face towards the light and to Dr Morell, who observed a resemblance to E. M., and shook hands with hun. We all three remarked on the physical power in the hand; bon is and massles, all felt, is not ral as in life; there was no timidity in his group, in retired three times into the dark room, and commercat again walked firmly about the closes, being clearly secorly all the cores

Mrs. R. remarked on was playing a and feat res. there was no tarracking him by those who know him in earth afe, the three who sign this report had that privilege

The last materialisation was remarkable, massimely as we me the spirit-form developed in our model. The medium X was mud, to come out in deep trance, and in evident distress, he sulked about the room rapidly, during which true Legisent bright lights were seen flashing from his left side. He said full dalk of described. We, at once, sang all together Shall we gather at the river, which seemed to give the necessary focusing power for what fellowed. Where lights had been seen flashing, new appeared white drapery, at most looking like a very fine white handkerelised hanging from a pocket, but higher up than X.'s pockets actually were. X now pulled away at this gauze-like drapery, and nervously or excitedly drew out and laid upon the floor some five yards of t as light flowcy material. First coming out of his side as a broad ribbon, it sproud speedily over the floor just under our eyes, Watching intently this heap of fine white drapery, we saw a tune forming under it, a head first, then shoulders, until a full form ax foot high was developed, some two or three foot distant from the medium, who now seemed attached to the form by the drapery only A new pulled away at the latter, and disclosed a fine head of curly black hair and dark penetrating X. was apparently thoroughly exhausted, and his strongth seemed to have invested itself in the spirit-form, who now sheltered the medium, put his arm about him, I think, but, anyhow, supported him, and gradually led him back into the dark room and placed him on a chair.

Soon after I was called into the dark room, where I found X. distressed, and receiving a few directions from the spirit, in direct voice, I retired. X. soon returned to con-aciousness, and wanted water, which I gave him, and last of all a female form, of about four feet high, materialised, and in glistening white, stood for a few seconds at the opening of the curtains, and then faded away into darkness.

Recorded by MORELL THROBALD, F. C. A. ELLEN M. THEODALD,
JOHN DANIEL MOBELL, LL. D., &c.,
Late one of H.M. Inspectors of Schools. Confirmed by November 20th, 1885.

I should say that during the evening four or five distinctly different female spirits came and walked among us, and also two one powerful feeling, which has its harmonious connection with male spirits, probably there were eight or ten appearances, but a particular hour and a particular scene.

## PHASES OF MATERIALIZATION

A CHAPTER OF RESEARCH IX THE

OBJECTIVE PHENOMENA OF SPIRITUALISM By " M. A. (Oxon Y.

(Continued from page 560.)

There is no conjecture about the cases I am about to narrate and refer to. I introduce their here because they i, astrate the process of formation, though in some cited in the presentation of evidence.

cabinet or syrtain, and under conditions when the exact stops of building up a human body could be accurately attils under or about four feet in height, grew by his side. Thu most probable view was that the medium was depleted of a positively that it was so cortain amount of vatal force, which was employed in forming what was at first a shadowy and impulpable body, but which under favourable conditions, and in the presence of certain measures, grow to a condition not distinguishable in his on terms, I, w this energy so withdrawn from the may of the reduce was used we were adole of to he are we not more advanced now after the star. principal of Francis W. Mouck have been repeated and caref. . . . . . . . . the presence of other mediums, especially W ha non What occurred in the cases observed by myself are, others was briefly thin! Monek stood in front of a poor of folding closes which reparated the room in which the Colley, took place. Both shood by the curiam, and by degrees

my opinion, no possibility of access to it, nor would what I watched have been affected by the presence in it of any, I might have seen what look place more clearly. number of possible accomplices. I by no means lose sight of the allegation that some phenomena which occurred about this time in the presence of this medium were open to suspecion. I express no opinion as to the truth of this an here concerned. Moreover, allegations such as these n arvels that they hear of too difficult for digestion. The charge is easily brought, and sometimes is mutained, apparently by superficial evidence. But I know no medium who, after having been, as is alleged, caught in importure, ias not given proof that in his or her presence genuine psychical phonomena do unquestionably occur,

I mear, then, to the facts which I witnessed under circumstances which, I hold, precluded froad, and I reproduce the surrative which I wrote while the facts were fresh in my mind. I see no reason to withdraw any part of it as being macourate in its terms, or inconsistent with the observations of others who had better facilities than were accorded to me

"The materialization of a spirit watched. Notes of a seance hold with Dr. Monck as medium, at his rooms, 26

'M.A. (Oxon.)' " The second-floor room in which the scance was held opens into an innor room, and each room has a door opening on to the aiment classics, and very lean and douby in appearance. sanding. The nitting-room door was locked, and that of the Colley and I searched the inner room throughout. There was me

no other means of access to it except by a window which looked down into a back yard. There was nothing in the room which could have been used in producing the phenomers. I am about to record. Between the two records a door was left open, and a counterpane was suspended over the decreas. The room in which we sat was hantly lighted by a very small paradia hosp, which was placed in a corner of the rosso and shuded. Though the eye become accustomed to the dam light by degrees, and could make out the forms and features presented, the light throughout the evening was less than I desire for exact observa-We were informed that the medium was exhausted by previous scances, and that the light was much less than mount

[November 28, 1335.

After a short sitting at the table, Dr. Monck retired into instances the medium was not actually secreted from view. the inner room and presently appeared standing at the door The slight deviation from logical classification may I hope, way between the two rooms, drew ands the curtains, and, be excused by a plea of increased convenience and force entranced by Sannad, atood and convenied with we we were or a set the table, about two yards and a-half from the In the year 1877 the process of materialization was first they are. By degrees a facut cloud of white, at first like a finobserved (so far as I know) without the intervention of any " are must, appeared by his left aids, and in the course of a minute or two, during which the medium graped and shuddered convaluably, a small but perfectly-formed figure of a child, a watched. Up to that time much conjecture had been figure seemed to be united to the audium by a line of white expended without much knowledge being gamed. The most, but the light was not good enough to enable me to say

"The child was, uncloubtedly, a separate entity, distinct from the medium. Seasont maintained a perpetual current of conversation, more round to me and grouped both my bands, and placed the medium's lips on the back of one of them During this time we could all see and hear the little figure approximation, nor by weight, from the body of a full-grown dapping her hands, and could hear words proceeding from her month. Bho also rang a little hand bell with authorest viscour to break (s.

"When she had estuained for some appreciable time at a me prenoment then witnessed by myself and others in the distance of not less than air feet from the modern, he drew near to her to give her more vitality, and when this was an pended the process was again renewed, until at length he stood again by her side, and she vanished from my eyes , but the light again was not strong amough to enable see to my positively that the absorption into the body of the modium, described by Mr. observers sat from an coupty bedroom, this room had been the form vanished having a reason musty approximate on the left carefully searched, and the outer door secured. There was, we exist must make their root. They be found one because to me alone. Had the curtain between the two recess been black.

"After a very brief interval of retargement in the major many the medium again stepped forward, and, pulling the curtain ands, stood in the doorway. By his side came a single prosty appearance which developed rapidly, until there some but so we a man of consularably taller stature than the medium, anget v statement, for, even if it were proven, it would not affect and oriental in type, with large book word and notatable and what I saw, and it is with what my eyes witnessed that I with dusky arms and hands. On his head was an ornament which flusted in the done light. He was drawn from head to are freely brought against mediums by those who find the fact in white, and making allowance for the deceptive nature of such an appearance on uncertain light, I should my that Mr Colley's estimate that the form exceeded the mediens's height by eight faches, is under rather than over the mark. I speak with confidence, became I asked the figure to stand in a position which enabled me to measure its beight against the side of the doorway with my eye. I have no doubt that the figure was firmly planted on its feet, because the same height was maintomed in all its movements.

"In this case, again, there was no room for doubt that the figure was so wrate from the mer any any was epidemical with vitality and volition. At request, the Maheds (such is has title) took up a chair and put it on the table, removed it and mat down upon it, with the clumy, jurky morement that I have before noticed in these forms, wrote some hieroglyphics in my pocket-book, and moved round to a remote corner of the room while the medium was by my chair. In this position Dr. Monck, under control, grasped both my hands, and placed his lips on Southampton-row, on October 19th, 1877, at 8.30 p.m. the back of one of them, and under those conditions the form Present—Rev. Thou. Colley, Mrs. Colley, and myself. By spoke, and moved round to the table. At request, the madium held one of my hands, while the form touched the other. The mediums hands were very warm, those of the figure cold,

"The same process was gone through while the child-figure inner room I secured by means of guminod paper (the outside of " was before us, and I noticed then that the little hand given to a shoot of 21d, atmosp, bearing the poculiar marks and letters me was life-like and natural to the touch. Not so with the that belong to stamps of that price), initialled by myself. Mr. Mahodi's hand, Its deathly coldness sent a shudder through

as in the previous case, the same scene was onsected near the her hands and ring a hand-bell, and her lips moved as whisper cartain. The medium and form stood side by side, and the log sounds issued from them. The male figure lifted a chair. latter gradually variabed, but whether it was dissipated, or sat down with difficulty and awjewardness, and at my request there was not light enough to enable me to see.

"After the disappearance of the form, the medium, still , cutracced, requested us to examine the inner recent. Mr. Colley and I at once did so. My send on the door was intact, and no suspections object of any kind was discovered by a thora to be pieces of animated spirit-aculpture controlled thorough scrutiny

"liy testimony should be read in connection with that

abrendy published by Mr. Colley. He had better light and better means of close observation than it was possible to afford me. . . . For the present I can only say that what I mw was consistent with his statement of what he new under better notion of a number of molecules temperarily held in attraction conditions of observation."

In a subsequent number of the Spiritualist November some further points.

1. "As to the mode of production and dissipation of the form. The evidence goes to show that it as reproduced from the left side of the medium, near the region of the heart. The first appearance is nebulous, as though vapour were in a state of agitation, and was being condensed into a solid form. The motion is as if a vortex were created within the figure. It is apparently enited to the medium by a cord of the same nebulom substance as that of which itself is formed. By and byo this is severed by a motion of the modern's hand, and the force is apparently, but not rully, alone and independent. Not senally independent, I my, for it is necessary for the medium to approach the form at intervals of a few minutes in order to revive its vitality . . . . The mode of absorption seems address ("Lenne," p. 573.). Mr. James Ragus (Lystiau Rouse, to be arranging to that of or ecountries. The same notion of a Westbury-parding, Clapitan Park, S. W.) offers thousand of £100 vertex a reserved to as a terms) anched outs the medium towards the opening of an emittation in London for the

. Now when was this repour which was no agreeted from a central point as to form this figure? What was the jubulum? Briefly, odle, psychie, or vital force. It is the unresmal pabulum, the rew material mod in all operations of the nature At a sience I see it as floating masses of luminous vapour which condense into forms visible to my cluisvoyant sense, at form the material out of which the invisible operators produce whatever physical passifestations they desire. I have seen it as a flory cloud over the circle before some scent-laden brown has everyt ever us , as a pillar of light, when the same somted air is carried round the circle , as a ball of light when paculiar rappings are made, in short it is the publishes of spirit manifestations. And here we get a close to its source. It is the medium's vital force.

3, "The variety of materials, if I way use the term, made out of this pubulum is not a little singular. Drapery, metal, and, so far as one could tell, 'all though that apportune to the perfection of man's enture." The drapery that appears in connection with those forest has always been a puzzle. Whence does it come ! And whom the scance is over, whither has it

"The hand, too, was to all intents and purposes (schooled as mine is, but cold, and giving off or surrounded with a most repollent atmosphere. It felt like the hand of a corpse. a sapprenching, it sent a shudder through me. It sermed to me as the air were in circulation round it, m if, indeed, the whole body, with its chromambient atmosphere, were held in attract tion round a centre. The notion of a vortex never loft me

I had use next reported by to the evening of November 24th and 18" I write a na he production of this drapary Mr. Eclinton was the medrum, and the sinner was held at the house of Mrs. Makdougall Gregory, 21, Green-street. The medium lay on a sofa in our eight, and here again testimony is rendered of far less value on secount of the very diss light permitted. What apparently took place was very similar to what I saw with Dr. Monek. A nebulons mass appeared it account to be in a state of constant motion , the medium, too, rolled on the sofa backwards and forwards until his whole body was enveloped in a mass of white gauty drapery. He afterwards stood up, draped from head to foot in this white substance. Where it came from I do not know, or how it was made, or what became of it. One must see the same thing again and again, and in very much better light before offering any opinion.

"The movements of the forms were constrained and automaton-blee. There was an absence of lithe freedom of

" After several journeys of the medium to vitalize the form, movement which was very striking. The little girl would clap retired into the inner room, or was absorbed into the stedium, inscribed some characters in my note-book. But the movements were unnatural and constrained, as I have before noticed in nome of these forms.

5. "Lastly, what was the formative power?

"I believe it to be one external to the figure. I believe ab exted, possibly in a manner analogous to that in which a meamorison controls the movements of his ambject. Everything pointed to this conclusion-this constrained attitudes, the moresents so automatou-like, the ballow sepulchral voice; the reiterated refreshing of the forms from the body of the medium, and the round a centre of fures which was prominent to my mand throughout -all this favours the idea of external creation and 30th, 1877). I supplemented my narrative by notice a him to be distinct from that specimen of his handwork which

## Work for the Lendon Spiritualist Albanos. To the Endor of " Liney"

Sin. -- Permit me to call more direct attention to a month cust offer, particulars of which appear as a fundament to my recent gratuitous hading of disease by laying on of hands. He also promises to devote his own gift of healing to this work. We have in the Metropolis many who have the power of healing the sick and of alleriating suffering. I hope that we may find it possible to establish sense Matropolitan institution in competion with the London Spiritualist Alliance, and to attach to it to see your one case repetitionts—if I may use a convenient term to avone common on primarily has not any experience and graduate are attached to our great hospitals. In the early days the momento infirmary was an institution of a kindred nature to that which I dondersto. And, though the methods are enployed were wholly confined to measure trestment, the results obtained were extremely naturactory. It is our of the current pieces of ovidence that unwelcome truth cannot root itself by any ferring process in unwilling and unready minds," that this analytution should have possed away into obliviou without lastung a trace beyond come almost unknown records of its bauefione work. The world was not propared for it but we have grown in knowledge during the past justicer of a or are now . believe that Spiritualitie are ready now to well one a me off. or at real work, such so I partially sketched in my recent address

I believe that many Spiritualists have gut beyond the stage of mure wonder-himting, even beyond that of deliant criticism when every asparato phenomenon is scrutinized with suspictors as if it stood alone by itself, and was not one of a vest group that have systematically been presented to critical investigation for many years. I believe that to many minds the "Higher Aspects of Spirituation" are as truly present as what " Vivat Yerstas, in an otherwise admirable letter with which (except in some criticism of "Liour") I largely agree, cal a he populaacientific examination of the facts of Spiritualism | | 1 | | erv respectant that our scientific sequentance with he wotherly at work in the production of phenomena with the cocurrent of which we are intimately familiar should be extended by practical research. We shall gain nothing by the mere repetition of these familiar facts, but we have all to loarn as to the methods copleyed in their production. This is the sphere of truly scientific research which the London Spirituated Alliance pro poses to occupy And I treat that the projected arreles when formed will definitely devote themselves to practical research by which our stors of knowledge may be increased, and not merely to the uninstructive and simless repetition of phenomena with which we are all superficially acquainted.

If it were possible, by the possession of pocumary means, to

carry out in full, a plan of work that would be a satisfactory | before them, though I was prepared to laws argued it expression of our fasts in practice, the would be in some had not my success upon a more technical pre-minary points mesonro the ideal. A minimizing of non-essential divergence of opinion so that amon in essentials in , in be secured amongst | Cleraby and Pollock in the Monek case is reversed, fraudulent Spirituanite flowerfd over A hearty co-operation among Spiritu-mere manip is with a flat section. The Lawrence case was mosts in each country, so that divergen in the ranks should be so dy a cauge under the general law reacting or false impossible, and unch country should bring to the Confederation protences. We could probably succeed in getting the old an united body. Actual definite scient/fle research such as I have test of Gorge II. repealed or amended, but that would arrendy propounded. The organization of some charitable work be of to se use, for we are in no serious danger from such as that of the health; of thionse which Mr Regan advo it As to the fourth section of the Vagrant Act, I think enter, so that our farm amy first expression in sate of mercy and it is useful in protecting ignorant sectors girls and paraous bunetowing. The establishment of some devotional service of that class from impossion. The abuse was in applying a law which shall express in concrete form that faith which, as Spirita nilste, we hold in common, and alred give opportunity for us to we of those that aspects of Start militar to which I have missions, and to aurture the faith which is in as by the means which be exempted on the ground that the general law relating to false al. religious minute that survicescele, and which few can afford wholly to neglect. To this night, perhaps, be added some attempt at direct educational work, such as is successfully extend out in the lycoung of Australia and America

when such a plan as this will be carried as the It is very this law for the protection of medium unitable that it should be done in an orderly manner, and as the expression of our common faith as Spirituarity. For this redsort it to be my name important that it should be done, with all respect for work already beaut some by where an will junious exto in no way to interfere with it, by the Los -Specificalist Alliance, I wish the work could be truly nothing. continuent att organizations throughout Grant Besting. The time is not ripe for that, but it is the for the communication by us of a work too long delayed.

## Antiquated Laws. To the Betitor of " Linux

Str.-Some weeks ago there was an ad torial article in Limit," I think under the above beading , and now I see that

Mr. Barkas has been interposeting Mr. Cowen, the Parlie mont yearson a November of the same set of a loss on posed to bear a specify on Spirituscom. The question was

Wil Mr Cowen vote for the abelition of the antiquated law which prohibits persons with occult powers from professionally using those powers? For example, Mr. Cladstone saw phonemount in the presence of Mr. Eglinton, and the law as it at prewent stands rounders the exhibition of those occult powers for

funged dispersym,

Now at the time of the Shale prosecution, I was at considerable trouble to explain the state of the comment and statute law on this subject in the Spiritualist, and also to my friend, "M 3. (Oxon.)," for the perpose of a paraphet he was then writing c' Slade Case "), and to which any one may still be referred for an accounts statement. With the exception of the old and quite obsolute Act of 9 George II e. 5, which profails the protence "texercise or the any kind of witchendt, soccory, enchantment, or a new strent. It look if no law which could possibly be held to neswer Mr. Barken' description, or to which his illustration would apply. Were audumship hold to be included under the terms above situa- and I me for from saying that our courts would not so decide- Mr Barkas would even have understated the case. because the Act says nothing about payment, but makes the protonce itself pand. Nor would it be in the least necessary under that Act to prove the protence unfounded, or that there was any decoit in fact in the particular case. But although there was just a reference to, or mensee of, this obsolete old tet, by the solicitor for the prosecution in the Shalo case at Bow-atreet, its unaphyment has never yet been suriously concomplated. Shale was convicted a ruler the fourth section of the Vagrant Act of George IV , and to talk of repealing that section all sorts of offences which more would wash should by an our sand The part remains point outs or otherwise requires that he " subtle ends or series" shall be "to decaye or muses upon," &c., and notual bound must be percent. The fact that | have strangely belied in respected character. the tribound in very likely to hold it proved on evidence which would not extury us or no logical objection to the law and would reason for altering the law. I hambly conceive that the Vagrant Partiaga, more reliable than voices, in a general way, concerning Act was always y here applicance by the judges to the Mones to the them against the Justice of published in the Quarty work

made that unnecessary. Still, until the decision of Burene emony more in all for the many surprise on an one speciality of the delice and to species a gat on buy naste in unless. But as proof of such a required, we could only ask that mediumshe to the protences and consparacy is adequate to deal with any real case of napositions. I am afraid it is also adequate, as it would at present be administered, to deal with honors medionship, and dust we must look rather to a more general acquaintance with The time, unless I read its ages were. In near as said the facts on the part of the public than to any amendment of

## TRICK-SEEKERS AND TRUTH-FINDERS.

the strongth its pessession bestows, and to act as men strong ignorant, the weak of limit, the feeble of purpose, or the knowledge and the anesteration of their fellows, and the rulers of the hearts of men, have been cost in a timeman, and in the future of mankind; men of knowledge, singlenous of purpose, and purity of aim-seckers for truth is the sparit of truth, man who, having discorned the almost autversally deadly and soul-chilling influence of the overwise philosophy of the schools, have realised that there is something in life worth living for, that by ranson of the mnate germ of goodness and righteousness in sum the worth, so far from being protriovably oad, is, stop by step, derwing nourer and nearer to Him in Whom we live and me a and have our being.

The principles embedsed in the lives of such men have a special apparention to those who concurs themselves with the the igs of the spirit. He who would pass the threshold of the inquiry must be honest of heart and pure in method We connot too entractly insist upon the absolute measurity for such a spirit of inquiry in order to essure the best results, indeed there is no more effective barrier to so we soful investigation than the absence. The status of Spiritua and to-day (and few, except, perhaps, the ignorant) bure two sing are been wen from those who, having ward the up take I was a stirring to steay the power at everyone as factor a money for a though , subject the same critical acamen and painstagues westing is due, not to the endorsement of the churches, the seal of tion of facts by which the triumphs of second have been science, or to the inhours of this or that accesty, but simply characterised in other fields of inquiry. Scepticism is and solely to the stoutness of heart, the steadfastness of permusible provided it as honest, texts may be applied if purpose, and the parity of method which has characterised preferred in good faith, but we strendously depreente the those whose manes we, as Spiritus sts. new liquour as elements of decest which have played so prominent a part househole words also get us. Leaving sought for truth in the lift some quarters. spirit of truth, and, having found it, coming buildy forth in its defence, these pioneers of the new epoch stand out as ex clars for allose who seek to follow terr stens. Unsworving in their loyalty to the teath, they, in their cay stood soldly forth regardless of ridicule and scorn, agas at all conters, in its defence, monicating the clean personal conjection. It now reads with us, as a long to respect to spiritual phenomena, and are the custodians of conserve, guard, and extend the nerstage committed to me

contact with those whose cavilling, harr-splitting scepticism. for truth-

and want of appreciation of the fundamental laws affecting spiritual research, would endanger their value as instruments for spirit-communion.

This is a real dauger, and it must be met and turned The Annual Subscription for "Liver," past free to any address table. There are those who, affecting psychical research, within the United Kingdon, or to places companies within the Post of United Kingdon, or to places companies within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United Kingdon, or to place within the Post of United King ness. Immersed in the fog of immature speculation they have failed to realise the sun-lit logic of facts. Imbued with a fear of the prevalence of fraud they have apparently forgotten the very existence of honorty, and, counting up the fools, they have ended by doubting if there be any

The atmosphere in which these men work is full of doubt and suspicion, and few there be who, coming within its range, are not similarly impregnated. Failing to recognise good faith and honesty of purpose in others, it is matter for little surprise that they end in doubting their own. In their course of action is clearly seen the tru to of It is mountain these who possess knowledge to realize such an admention. Finding avenues of envestigation closing upon them by reason of the attitude they lave n the conviction born of personal experience. Not to the salepted, they descend to insidious methods in the ray. hope that by so doing they will find out, not the train. dishonest of method is given the power that leaves its mark but the tricks of medians. Having collectively obtained upon the world. The proneers of civilhation, all who have an unenviable notorioty amongst sensitives for anything contributed most largery to the advancement of human but fair and just dealing in their investigation, and in g total a Discoursetion, they seek by secret sea a, by the employment of conjuce's and others unknown at baying would. They have been am of faith-of faith in God and only connection with them, to visit mediums with the object of discovering the supposed fraud.

We should be wanting in our duty as Spiritua-journalists. five failer to so on a note of warning against methods who a, though they may be very mourt, are certainly not honest. Of their mornisty the less mad the better. One thing, however, is certain at would be fatal to any sensitive to be subjected to such unincaces, and we carnestly implore mediums and Spiritualists, for the wise wike of a financial and the honour of Spiritvalism, to be ardulously careful in regulating administrate to careles. No one should be allowed to gain entrance who is not introduced by a well-known

In writing thus we expressly desire to guard against the possible mascenception that we are opposed to rigid scientific investigation of appritual phenomena. That is far from wing the case. Conjointly, however, with the seientific metron there is to be deciderated another absolute essential -a sympathetic, truth-loving spirit. The laurels of these attributes, have also brought to bear on the

We have no fear of the result of investigation undertaken in a right spirit, indeed we look for victory at no distant date, all along the line. Acresdy Sparstnalism can do more than held its own, and if Spiritualists are loya to their trust, so attacks-whether from fees without, or tractors within its ranks-can inducace its destiny cave for methods by which they had themselves sought and gained good. Spiritualists stand in the position of experts in the avenues of investigation for these facts. It is, therefore, our bounden duty to see that speculative theorisers, morbed Charlest amongst the duties involved by this legacy is hair-splitting scepties, fraud-hunters, and, above all, the disto one for the worker mass who are the charles of believers in the average integrity and good faith of human communication between the seen and the enseen , to guard testimony, have no apportunity to saw the work we have in tuen against the ignorant, the projunteed, and the wonder | band, while at the mine time every reasonable facility is hunter, and last, but not least, to secure them against afforded to the surnest, honest, and right-minded scaler

## Obituary.

November 28 1884.

Mr. Frederick Hockley, after some years of illness and pain, residence in Vernon Chambers, Bloomshury. He maintained of psychical phonomeus as seem to be worthy of permanent record. passed away Navember 10th, in his seventy-seventh year, at his throughout his afe an aninterrupted an active interest occult science, commeterny more than half a century ago furtherance of this object we shall be pleased to receive from our with astrology. Then the study of the phenomena of readers brief reports of phenomena subject to two conditions with astrology. Then the study of the phenomena of readers brief reports of phenomena subject to two conditions and an approximate property of the study of the intelligent compression and the study of the study of the intelligent compression and the study of the study o bruston of the subject of Spiritualism. Some of his experiences he related in the Sperimential, particularly those though we should naturally prefer to be at liberty to publish them which occurred at coances with Mr and Mrs. Everitt. He furnished some interesting evidence to the Committee of the Dislectical Society. He particularly interested him- I self in the phenomena of the Mirror and Crystal, which he studied concurrently with the late Earl Stanliope, and in which he had, perhaps, a larger experience than any of his contemporaries. The communications which be received through the mirror-one of his mediums being a most comuch. acle secrets—were carefully recorded by him and bound up in volumes to form part of his extensive library, which included works in every department in occult acience, including rare works on astrology. It is hoped that his library may be kept intact and made accomible to students of payelulogy

It would be interesting if some of the intimate friends who, at the time of like departure, were preparing to preand him with a memorial of respect, were to furnish a detailed account of his experience.

He maintained his interest in Spiritualism o thereno. one of his latest visits being to Mr. Egianton, through whose mediumship he received, in writing between slates, a chorished communication from his long-departed wife, internating that he would speedily rejour hor.

Mr. Atanic A. Watts, one of the Assistant-Secretarios ( the Board of Inland Revenue, and so well-known to our resilers, has retired, after a period of over feety-two years' service in the

MEMOR. THOS. R. KNOX AND Co., New York, have just mused him. Sman G. Horn's new book, "Nort World Interviewed." Our readers will recall the popularity of Mrs. Horn's first book published comeyents ago, entitled "Strange Visitors.

Ar Amotican correspondent writes that an evening of quiet home reading of such books as Zollison's "Tyuracondontal Physics" will bring to the carnest med honout investigator more joy and information as to the after life than a lifetime of fruiton sourch in the dark with no facilities for innight.

Swedish correspondent that the aminout writer, Dr. Cart you u.30 I was called to a midwifery case in the country, fifteen males Bergen, has been gained to the cause of Spritudian, and that from my residence, and when I cause to the bedride of my be proposes to give public lectures upon the subject in the course patient I recognised the veice at once. The patient told me. of the ensuing winter. - Le Messager.

Ar Lyons a wealthy paper has appeared under the title of augnotic, scientific, and social questions. It is open to Spiritiats, farmer of the name of William Ryan, of Indigo Creek, next and Sparitualists of all shadon, to authorialists and to aloricalists. Chiltorn, Victoria. but no questions of personality are admissible into its columns.

t Dance. We take the following from La Chronique of Brunes, of ann little 1865 I received in payment, noncarefully in view of a journey to Paris, which I should have june-suid-a-listly miles from my residence, and Mrs. R. saw me shortly to make. When the time came I looked for my note where I thought I had safely put it, but it was not there. My mind was painfully ansection about my loss. I want to bed that I heard some one my, "The note is at the back of the for "I see he is bleeding from the left temple." third compartment of the gland cubinet. I rose with the of my double (f) took place at 4.30, and about the man time words still in my cars, lighted my candle, and found it there. I taxed my measury to the utmost, and could find no recollection whatever of having placed it there, now, how could the plea of an act of which I had no conscious remembrance have been impressed upon my brain? I think this is a question for mind-readers and physiologists. F.C."—Le Messager

## CLASSOC PSYCHOCRAPHY

Will you allow the space for a brief record of photometric withough by myself at a scarce with Mr Eglatton, held on the 2 has a be a more and a aftert account of which I butted they are all in the date. I have add that a few days processedy I had but a with a way the water medium of white the road to wore almost ail. On the 22nd there were present a lady known both to Mr Egl uton and myself, my daughter. aged twelve, and myself. The earlier phonomena were of a very enrious observator for instance, I asked a question, and at first stillisting writing appeared on a plate hold stiller the table with one hand by Mr. Eglinton; then appeared the Christian manage of my busband in full. Afterwards I wrote a nuestion on the slate, out of sight of Mr. Eglanton, which was avidently and and an appropriate answer given. During these the sale tions, all of which took place in the light, Mr. Eglinton morely held the elete with one hand beneath the flap of a common deal table, a part of his hand being visible above it, and not only did he very courtoouly allow me to exemine the falls and but what touts I pleased has see a me a that I should do so. At last, the sittors changing sonts, a most remarkable, though I believe by no means ture phenomenous

We again joined hands, and Mr. Eglinton placed a common school alate in the top of the table, with a egrap of pencil more recently, his hand held that of the other lady, and the hands rested on the state. Presently the district sound of rapid writ | was heard, and as a very short time the sale of the slate noxt the table was found covered with writing by an means restabling that of the madeun, containing a long and very appropriate message to myself and exactly described the sear of my meato a hostover, being known to the medians, a got he a been tinctured by his own intelligence, but supressing horte have buen the come it does not account for the approve copy to the question of which he was agnorant, any more than does the theory of prepared states account for the fact which I omitted to more than, that three different coloured pencils were proceed as the slate, the medium asking us to choose a outour and number, writing appeared on the slate (haki underseath the table) correct as to manifer and colour.

I give the above details briefly and without comment, and non-reportly in some

Dear Madam,-Idonaty, as you know, as a most deficult question, and you do not tielp in through trying to being around you your own friends you are merbedly and unreasonably sception), and want too much before you are entuded as to the facts. To us a would seem that your first duty in to prove to your own satisfaction that this thing is. Then you open a sympathetic passage for your level once to reveal themselves. You may not know it, but you have considerable mediumiene power, which is empoted to an extent by that portion of your nature which refuses to allow you to believe. If you will give us opportunities we will help you.-Expert." I remain, uir, faithfully yours, EURA BOUCHER.

I encluse my soldress, and shall be pleased to show the slate to any one who would like to see it

November 23, 1885.

In conversation with Mrs. Boucher, we have learns that there was, in her opinion, no possibility of the slate having been previously prepared, and that further, when the sound of writing was heard, both Mr Egimton's hands were upon the slate, and he could not have under the sound of writing by any movement of his fingers walkout her perceiving that movement. We do not know of any theory of natural numer which can be brought forward to account for Mrs. Boucher's particular experience, except the one we have allowed to be toughed above, and which Mrs. Boucher is happily in a position to refute ]

## CLASS F. AN OPPURITION

In only 1877, my father died very suddenly of apoplaxy is, Germany I was then resident in this country. About this time I had a somewhat extraordinary dream, or I should rather call it a viscos. I had retired to rest and had been calcop for some hours when I was awakened by a noise at the door of my roun, at if some one was endeavouring to open it. I, thinking some one might be ill and that it was one of the servants, went to my door and opened it. There I mw my father, who I believed was at that time in Germany. Strange to my I did not experience any feeling of surprise, but recreed to take it quite As a matter of course.

Why, father," I said, " what do you wast with me?" for I was struck with the grave and end expression on his face.

16 My child, in some apara, very se cir. To out all intake eare of the test thus was us not been the extake eare of the less they was us not we make a sign much attached. Next the was us not we make a sign much attached. Next to a sign of the sign of the sign of the less and less

## CLASS L-MATERIALISATION

a house of our own choosing and under conditions of our own a late general from let early measured and gundral deportsamonging. A sitting-room in Mr. Skipsey's home was chosen next I am process a treat she could not be the me med unit for the purpose, and the educes took place on Wedness in a compressed form. She et a set a set me on to be is day. October 14th, at 7 p.m. L. J. Rendel and I went up at that George was going round the civals in a wear which 6.30, and hung two curtains from a projecting part of the celling he was doing in we had a considerable conversation with her and in one corner of the reces, and arranged the chairs, &c. The and ag ourselves, when anddedy I noticed a faint relation of curtains were nailed to the ceiling and side walls, a portion must about the size of a man just me, and go towards the ourlayon the ground , they overlapped a few inches to the course tain ; Mrs. Wilson also noticed the same thing, and we were but were not featened together in any way ; a chair was placed than informed that George had got back to the modulus. The maids for the medium. The sitters were placed in the form of building up process was then repeated as precisely the same way a horseshoe, and I sat most sue of the ords. The door was on before, and George appeared again. He now told "Ciny" locked, and I put the key in my pocket. Mrs. Metlon took her to get up, at which she grundled, and then the forms of both seat behind the curtain, and the gas was lowered. Mes. Mollon George and the medium appeared at the opining in the curcutes in quite an emprofessional espacity and took no just in any tain at case; they appeared several trains, and although we could of the arrangements, she is allghely masic, rather small and only see their bonds properly, new and then catching at moses stellente looking and was dressed in a very simple way. When of their shoulders and arms, there was cortainly the form of convenation flagged, hymns were sung to fill up the time between the various manifestations. After Mrs. Helion had been seated voices conversing with each other, and overlapping sufficiently to for a short time abe began to speak in a lond, but decidedly mantile voice under the supposed "control" of the spirit of a child onlied "Cinty" She first and "Ob, what a lot of "folkees," ably by "Ginty," and after some further convergation she and and after asking Mr. and Mrs. Skipsey to change places, and "Geordy' wished us good night, and then after a few moments, having told us to join hands, she then proceeded to ask each birs. Mollon asked, in her natural voice, whether the seence person, beginning with Mrs. Skipery, how they were, and when was finished. She said she was quite unconscious all the time, abe came to a stranger, the put the additional question, "In 'ou a and when she came out she was certainly looking very puls and big "skleptic?" She seemed to have a childish difficulty in languid, and complained of having a head-sche pronouncing some of our names, when she came to me also remarked that I was always lengthing, and that I shut my open

when I hughod, also observing that she could see us quite well although she was behind the curtain, and in practically total darkness, and judging from this contark and sandry others which the made, also containly appeared to be able to do see. She told me also was going to do her best to emprises us, and seemed to , to realise my wish for some roal proof. A shair had proriously been placed just outside the curtain with a prose of paper and a pencil on it in case it should be needed. Presoutly the curtains were opened and a final a period which spikes in a graff voice and was known by his previous nequantanees by the name of " floordy" (the North country for in the course we we go on them time to me not accounts account. He attempted to make use of the paper and pencil but knocked the pencil over. Mrs. Skipsey hoked for h super or the orthogonal transfer or the factor of the state of the sta try. He then secured on the jupor compare it is and row it into the middle of the room. The sensel appears to me to be ments . M to a standard allowing hands in a very a common way his a Hammerbons he again disappeared between the curtain.

Propertily we observed a faint luminosity at a point on the floor distinctly in front of the certain. The gas was very low as George and he could not stand more, but we could see everybody to the norm, and as the object under importion was nightly bindiness it could be discerned distinctly amough to put delunion out of the quoution, aspecially as everybody's subsequent description agreed in the natio. This faint luminosity gradually grow in size and and note, and appeared and meal heap about a foot high. It the mane's me this and as it rose is became agitated in a wavel we me mer mixing rather the appearance of a culumn of steam. This process went on until the substance assumed the shape of a tall desped figure, which after various mavqueents e tired behind the curtain. Here it was suggested that the crack andor the door should be filled up as the light coming through it rather interfered with our observations. When Mrs. Skipsey was filling up the crack with a hundkerchief "Goord or out and touched her on the back and retired again. After more after Cong of he wedicin to universities, at any rate a white draped form apparently of a little girl came from behind J. Skippey, L. T Rendel, G. Wilson, and I arranged to the curtain, moved a chair about, threw kieses to some of the savite the medium Mrs. Melion to hold a private assume in notherns and re-red I saw her very distinctly, and was quite vectory, and nemest am visible at oncound two entirely different mitigly un that both could not have proceeded from the same person. The medium was then replaced on the chair, presum

## PHASES OF MATERIALIZATION

A CHAPTER OF RESEARCH

S. THE

OBJECTIVE PHENOMENA OF SPIRITUALISM

25 M. A. Owon y

(Canton of from page 581.)

Mr. Coney and Dr. Donah, Kennedy of Boston, U.S.A., both give precue testumeny as to this re-absorption of the vita, force of the medium, which had been temporarily Witadrawn, and so atmogety used,

and out those witnessed by me, but in this case the form becoming, by those who were present was that of a young girl. Mr Colley describes what must have been a close and convincing view of what took since when the form disappeared.

" When the form at last retired, I wan permitted to accounthe form to the mod our again more into view, the vanishing point being towards the mart. Hy means of this cord I am how the figures sounced to be sucked back into the body of the Dr. Monde draw on the spirit form gradualty, so that I was model to writer the process, "for, become against, and holding, the presentation, with may last ment at his back, and may less over and check in his bread, his heart besting in a most embest and abirming rest. I see him receive back into h. person, the form before dest not from bin. I marked to face aspect, eyes, he was delicate complexion, and knowled the accepy said so in process of absorption it desolved into the a succe-

Respecting the method of formation of the materinized flictro I may here introduce a description of a sounce commanifested to "Literer" (July 11th, 1885) by Mr. Barkan.

15 On Friday evening, Sopt. 3rd 1875, a scance for material ata stell was habe in six appropriately group, the size of a non-size of the g 27 or In the corner of the groots at magh, 4ft of oft but was as a sea and by a suspended quetain. Bitting in a of a cent of a circle and at a dutance of from all to sorem feet; from the earthin, were the following persons, who sat in the order recorded Mr. Mo. Mr M., Mrs. H., an American Mr. II., a gonthuman from Banburgh Mim P., Mr. F. H., Mr. Barkas, Mr P. The medium was Mrs. P., a married lady about forty yours of ago.

We first out hand a hand round a table and had knocks and writing, materiality in to put the table within the enthined recommandered referred to, and all for apatomagazing concaco of the rugam. The one on Mrs. P. one our actio dangeter Finance sat on two has so facing the curtamed recess at a distance of three feet from the curtain. The company mit, who facing the curtain, a distance of about seven feet from it as amove described. A tamp was burning within three feet of where I ant and with such brightness that I could see all persons a the room and could endly read time by my watch. I could son both audiums with onse, and the apace between them and

ofter secting about diffeon invantor we were told to remove the table from the recess, and untertalization would take place The table was removed, and mediums and sitters not in the open room in the arms order as outline.

" After sitting about ton minutes a small, white, dickering, Same like substance about the size of a man's hand, appeared above the kneed of the lady medium, her hands being by her sides auting the whole of the scenes. It increased und diminished in size and brightness, and at last continued to grow until it covered the head, shoulders, and body of the medium in a ficery, white, semi-transparent cloud. It then took a more solid and definite shape, and descending to the floor, appeared like a young female, at last five feet in height. This form moved freely about the room, was visible about fifteen minutes, and gradually declined in height and width where it stood, antil the form was about orgitteen inches high, and during the whole time I saw the hand of the medium beinging passively at her

side. This small, white form again began to rise and encressed in bulk, until it recembleds stuoping old buly, who isoved freely or the floor has been white, thowing garments, and had so behead a harry, old-fashioned. Quaker-lake bounet, she touched who was if four of the attent, taking them between her linger and thumb, and also permitted them to feel her drom. This annuated form was visible for about Imputy-five numetes, and at me knowlt unversed greatly in bulk, runs to a height of about eight feet, and completely overshadowed the medium. The a mescamo-u e no a o l'sore and made for are the huly medium took a hand of one of the attern between its finger and thumb, the form then returned to a . about two feet from the mediting, and fosts feet from Mr. Colley records among others a manne held at theke a same a to the collection of the second sections. the house of a friend of his near London, at which Dr. a alteria we will be a weather and a contract of his Is an a way were to The occurrence were much be unvarianted record of facts, which could be continued, if

I I bake has

"Central Exchange, Newcastle-on Type

If these cases had occurred only in the presence of any particular medium, the evidence for their reality is such as pany it until I was close to Dr Monek, as he know fall in view could not be put mide, if we are to accept human testamony of all. As it heared him the gustamer filament which united to these phenomenal occurrences. It would, indeed, have been necessary to say of them that they lacked corroborative evidence, and it would have been discress to hold medium. Like a waterspect at sea, the superior vital power of them over natif such oradence cases. The fact that phone mena of this class were at that time observed in the presource of a secluded medium made it impossible for us to do more than guess what took place. Since that time the use of columnts and curtains to concent what we all so much desire to watch has slowly and surely decreased, and recently we have had the full record of a materialization occurring us the mulat of a down observers. This record, to while I have more than once referred, Blummates while it continue upy own observation with Monck so far at the process of construction of the form is payalved. I do not doubt that we shall have in due time corroboration of the process of absorption of the form into the mediana's body.

> Meant me, so far back as the year 1880,0 we have a recor . Mr. John Mould, of Newcastle, of a siance with M as West which is instructive and to the point. The medium was scrowed into a cabinet, or closes, which had over constructed by the New 2019 Spirit will by mercia waters a their own cooks. After had a white walling a mean new mass of trans at the extensive of the outer time of the cu ain used to serven the "ght from the medium (the door of the case set was made of wire-netting), and we pottently observed the lateral and perpendicular asovement of the must until it reached a height of about four feet and a-half, when the form approached and shook hands with the cleven persons present." This small form was requested to move in various ways, and at once did so. It was desired that it should vanish on the spot where it stood without returns to the medium in the cubinet. It "exhibited sog at provements for a few seconds, as if waves were passing over the whole structure, then it spudenly became invisible." That is much what I observed with Monck; Mr Colley was more fortunate in baring a closer view of the process. "After the disintegration of the form," Mr Mould adds. we observed a resultum of white like a nebulous mass." A repetition of the experiment was saked for, when " very accided movements were see going on in the residual mass. the white su stance occoming or other non ocuser and more expansive until it was so fully developed that we heard the roice speaking to us again." Here we have formation, dissipation, and re-formation of the figure under the observers' eyes. This, read in connection with other cases already referred to, will be sufficient to show that the process of construction of a materialized form has been more than once carefully observed.

> > (To be continued.)

## CORRESPONDENCE

It a prefer bie that remotion ents should appear her names and addresses to communications. In any cue, however, these must be supplied to the Editor as a guarantee of rood

The Phenomenulity of the Subject. To the Editor of "Lacity," Sm.-From puragraph 2, in Mr Gurnoy's ectored latter,

it is evident that the issue between in turns mainly the nature of the "subject-object." That, Mr. Gurney says, the engantum, and, therefore, I do not help myself by an am, and it is the condition of perception. "I agree," he says, "that in redoction I can make myself a nort of object. 1 can think over the various "subjective sujects which have fallen if you think a complete of some one washing the o those their objective aspects." Now this account of the producting the agreement suffer at one can OF 18 2 2 1 1 1 1 4 PAR BY 2 16 the weakly water at the sentence of the control of may consciption of the last th senoutrons, and the cor or distinct in the Nor is the primary reflection wantly have discongulative to a releas to be confounded with the reflection which could affect such an abstruction as Mr. Gurney describes, an abstruction object—the fact that the latter represents the whole system which I believe in point of fact never is effected, except as a relation with other objects which perceptence implicated into philosophical exercise. Nay more, the subject-object is prior to the first reflective discrimination of the sepect. atu. a time stands for me in relation to all other objects. Un mobiledly the Infant first known itself as its body. "When por, see spould papale the Idealus by presenting nerve changes ne infant), as Mr. Shalworth Hedgeon mys, "learns t any I and 'mo,' he has already harmt that percepts are success and his ne is a thing among things, a percept continue as offering the clien to this mystory from the Idealist among percepts. . . . . If he could speak analytically, point of view. Withou are up an analytically being of view. his carlicat post-reflective language would be. This the group of percepts is 'esc,' those other things, or ground percepts are 'my percepts. For this resson, that his we loody has been by him channel with and negarated from other superante attacks a many even a se hypertonic has successfully groups of percepts, that is, feedings and thoughts appearance as is vertically not as more formatted. surrounding groups of percepts, that is, feelings and thoughts by primary consciousness, before the particular perception arison that one of theme groups, his hady, has the feelings formula to the facts underlying the appearance which constitute that and the other groups of percepts. Thus the apparent derivation of perception from an extended object perception it is which is indicated by call, a second which they were the object is itself nothing class than percept, it follows that the s note and which is always present when may of the owners. Ar. \* Now that is what I recan by the subject-diject—the total false appearance, is not the true relation between percent organisation and combination of feelings into an objective repressible in Proceedings in question suggests that it is the sentation of self-a phonomonen in the tracet sense, just as exact inversion of the true relation, and that therefore the much as "the lamp and all other phonomena," and not at all - " the result of a process of abstraction."

shall be better able to one whether Mr. Gurney has successfully the following passage from Dr. ingleby's book will show how met my contestion that this photomorous, or subject-object, is a acceptance mendation of all other objects or phonomena in purcontion. I submit that he has not really met it at all. He has put forward a conception of the subject object which in completely different from my own conception, and to which my argument nonne, mind so at make, experty of organized matter as louble in quite implicable. Cortainly I could not posit life. Gurnoy's refraction is of a crystal of locked spar. But I have the mental abstruction in space, or make it do duty for an organia-Nor do 1 at all use how he husaelf connects it with his admission of a local Ego-partit as mesonary to percaption of objects space. I endeavoured to show that this local point must be objectors representation in space of the self-constitutions—that is a body For this objective representation Mr. Gurney wealth ambstitute a subjective representation, the abstruction of developed reflection, which, by its very nature, could find no out we may we the prosupport whatever in space. I demanded a percept, and Mr. the aphere of psychology. Currey, without showing that this departd is illegitimate, offers or a concept tratead, and then threws on mp the caus of a war a securetal say steads with my Chemible existand the same is and it is dies intest contracted to the a of her next as severe a spine of a set

waters on the think But my whose mucht was above that you one is the a local course of selections consequently except as a summary and that this is more can the and proctical equipment for this special task. It appears to mo mathematical term I have been in that he is summently unsuited for it, and to a degree which

admission the sentence . If I had no valido and extended organism, if I had not found this in the world of external to a worgh my exponence of my world might be as keen and various as now, I do not think that the words 'space' and externality' could retain at all their present connectation." Now that really is just my contention. I do not want a local subject-object except for a world of objective spaces of known to sa, but I maintain, generally, that such as the objects perceived, such must be the self-representation of the subject. Mr. Garney's instance of the symphony should help us to a better understanding of each other's position. If Mr. Gurney was only of music ideally and intellectually (as I believe all truly munical souls can, and as I wish mine could) the sound need not be localmed, and we center a world of other relations. a would have to doubt to contend that he will still represent himself therein to himself and others-if " others" there are-

but under quite different modes of perception It is, perhaps, hardly necessary to said that I am not under taking to show what the conditions are which give to other similarly constituted perceptants a phenomenon of use corre same on the as phonomenon of myself. I can only may that or a portion of a late of man A work, of summerly conso to just the a solution of a transfer wealth a white he deposit to representations are similar for all

But I quite admit that the organic character of the subject arisaged by morety showing that some objective representation myself is required for a local centre of consciousness . a . . in incompotent to answer Mr. Gurnoy's question, or it was so this head, I cannot dony that " the squadue object that trees has seen at his practice of the his bloom." It and consect the last tot I be a Law of pas he are body as the store and the physical enterpol white are or on the which Is on the course tax was a none, y a quarrance back to nus on ye at a mon I solution which shall be comparedly outs or the between object and objective organism, which tout her phonomenal, receptive organism is an inverted representation of the subjectively real, constructive organism. I do not pre-Having removed all possible ambiguity on this point, we need that the correspondence has been exhibited in detail , but strict he conserves it to be. "That again is dependent upon organisation, which is already an established destrine in physic logy, will, I doubt not, be more and more confirmed by frush administ ) r my own part, I believe that in the expictors arghest sandranes that I can obtinto the least objection to the dootrine of sparituality which our be based on physiology. If it can be shown that the Equ nonsecuou is constitutive of the requires, and that it is by virtue of an apperceptional Law of Remproval Causation that the manifestations of intelligence or projection of organisation, are actuated, we may not only a a view the speculations of materialistic physiologists with slarm, not we may were the prospect of utilizing their researches on C. C. M.

after. It also involves a non-bolish of find or in any ment that it is an exchange of weakness for power, and that of every the window of the senses.

a near head, or rather flat deaper as or the destines

but there is the more he has no printies, extending had no hopes. Now that it wholly important is the histogram were interest. subject! When should we the kind a we or on choice ony wind and mechanical mediation by other vibrations -- between persons charged experiment, never made one changed mangulation? also "another kind of thought-transference without material A precious matructor such as one would be I wonder mediation, which seems to be fimiled to us distance." He con Zei ner a seconded. Undeterred by the accounts from England or Share a trial and conviction, he determined to receive the and most lively hallocinations." He had need before that while prisoner-the pat-discharged convict-to witness his "nerve-force rapidly diminishes so the distance merceson, performance, and to make minself corporable for the result. This preceding in fact to the square of the distance—how, then, are yet is not ashanied to step forward to instruct the work as compares the sucto's diameter to the distant transferes f what they ought to thank of these things ' on it is ing to study reports of admices, and to tall as their select it waste of the assumption of their truth, but by no means to make he out ! responsible for the by assisting at any source. Now this I call mer special parties that gleanches at a minimum of a man fest y. His scarpert concern in not to jeoparcano his philosepared reputs on. It is a comfort to reflect that this is transfer his ballicinations—his sity nothings in their full can rocceay at the shoot of any events.

He sele loss never attended a scance declares that it would be necessary "to attend a hundred senacos at least" before delivering an applion. If this is not abound up, residue writing -quite unworthy of a great philosopher-I know not what can I hold with Milton that there are apents, and that be. To not in this manner and to refuse time after time to neknowledge that which your senses and your judgment assure you of, is to destroy all self-reliance and to stupely the mind. In the words of Lucretius .-

"Est violaro folos prassam, et convellere tota. Fundamenta quibus nitatur vita salusque.

To got thus in to make the mind weaker at every fresh instance it is the strught road to shotey

For the rest I will only now glance at some monstrous natural le suortemantes

1. The transference of halbsemations which we may call "the charle of a sicilor. That one may have nathteniations is only in the transference of them at will any their much more to a circle, is about at maconcervable at anything can be us less. In an animal headity, given more than one account of the curious midsed, we accept Mr Myers' dontrine that what exists in any recurrences of certain numbers in connection with the events of legree may be raised as libitum to any "higher power." This has life-recurrences which cannot be explained by the mathewould lead to very abourd results. Von Hartmann is bound to matical theory of probability. As I have had similar experiences, expirals everything without cating in spirits. Hence he does and as I believe I am the correspondent referred to in one of

would make a satisfactory creatment of it by him next to impose not healtate to make this sheer and menatrons assumption.

2. He does not believe in sparits, but he knows exactly what sort of beings sprits would be, did they exist. He says that spirits must be "bodileus," and being "invasible," on have "no

Now we maintain the exact reverse of this. We maintain that "spirit must have a continent—that is a body—for that there is no such thing as maked thought, that it is never unclothed, but clothed upon," or in other words, that the phonoments, at court in any adequate manner in my set leadle and the invisible are in oternal alliance. But that better to you I said distinctly "it is title to pursue psychical visibility implies corresponding organs, therefore, by those research except on their foundation, viz. of a belief in the who are in the same sphere, or for a time exalted to it, as was Past (Cor. II ).

He further mys spirits can have "no brams," no parts that the visible universe, and in nothing beyond t. He has no lany dynamical affects except in a sparitual way," i.e., by

Now the whole of this is an contrary to philosophy as it is to an enlightened belief in spirits. That belief is-which was also liow then our holes analog in the matter-how then can be be that of Swedenberg-that a spirit has an organized form, contrusted to examine the embered appartially? Must not all his pasts in all its parts and functions, that it has all the hisman faculties in an unlarged and exacted degree, that in the truest Moreover not to believe in spirits, is not to believe in a here- | some the spire body is more anhumital than the mortal one . refer of the in went-it is to be sunk | pure situration in land. In one word, there is a natura hady and here is a sport body. Just in proportion to anythm, is go so sted mate, a. 4 st. I may advance a step further, and any that he is a Pessionat - | weak, sceruptible, and more. It is the othered body, which bushing it a sales to hope for a future after short, and out about a substantial, powerful, and incorreptible. These truths, supported though they be by sunumerable facts, and by suggestic he may my in the curtle. Here surely man ample out of discounts under chief selection, are fully to a low-thoughted Positions, whose "toyes are always downward bent"-who has no aspera-

## Fumbers as a Masan of Spirit Telegraphy. To the Editor of "Lanux."

G. D. HACGITON.

Sta,-Your correspondent "C.C.M." has recently, and with

December 5, 1885.]

advisedly, because one does not well know of strithing really frequently snewer our questions so computely. trivial , this, however, seems a minor matter. The question is, they continue do.

My own experience is that there are at least fee ways in that may be , the other, as I feel very strongly, is by mount of thanking about any matter—my study, illness, wealth, or any 10 for the word. The word selected was to count from the end iden which can be represented by one word, not amountably other words, meaningless, except as to their nemerical value, come isto my mind-those suggested words are possibly the work of my second self, my sub-consciousness, or of smything the which is myself and yet not myself. But if I am mentally desirous of an annear to a serious and perplaying inquiry, the answer almost always states on, as it wore, when I am thinking of something clas. Unless, then, I have two or more spond actives I do not een how the accound self oxplanation comes in

That the work is at bisses that of an intelligence outside my self the following story tends strongly to show. Just after Easter of this year, I was travelling in Belgium with one of my children We led been for more than a week without news from kome, and as I was expecting a letter from South Africa, from a conwhose boulth was then still a cause of anxiety to me, my unceamous became considerable. On the Sunday after Easter we were, during the morning survice, in Antworp Cathodral, and my anxiety culminated. I then made an exposit wisk, or prayer, that if all were well, the number 107, which according to the mothed of reckening adopted by "C.C.M." and myself is the value of the word heppiness, should be presented to me in much a way that I argued could in no way influence its presentation We left the eathedral, and went to the Musée Plantin; our umbrolles were taken from us by the ouncerpe, and the mumber on the ticket given for them was 107 ! On reaching London. I found that the letter had come from South Africa, but lad not been forwarded. I do not think either the telepathic or the been forwarded. I do not thin.—I am, faithfully yours, we p

SATURDAY, UPS EMBER TO 1885.

## GRADUATED CIRCLES

There are some points in the Andrew of the President to the members of the London Spiritualist Alliance' that will bear spansion. They were of necessity handled beinfly and traced in outline, though with sufficient clearness, i un address which was fimited by time, and which fra era-d a large area literally briefling with subjects of interest and importance. We have already stated our belief that the ong period of conflict and transation, of solfish apathy, and of allo curiosity, in passing away, and that the formation of too Alientee was the inauguration of a new and foreign oncell. We entertain little doubt that the accress question will be found to mangurate a new departure which will still fartner advance the cause we have at heart. The plan of practica, research therein lake down comes as a natural and inscessary consequence to the action of Spirit athets in respect to public and promisement or and lark cabinots, just three years ago. The destructive process had its perfect work the taste has come for the constructive work to be organised

It has been growing in definiteness, and taking form and shape during the past two years years which ave been americal both by a clearing of the ground, and by a successful sowing of good seed, which those alone who have been concerned in the work can adequately appreciate. Bud methods have been acondoned, or rather have died out because the intel gence of mun has outgrown them. As seem as attention was drawn to the conditions under which thenomens of a rure and obscure nature were investigated, their fate was seaked. To no set of people are Spiritualists. more undebted than to such men at Sir G Sawell and Mr. von Buch, who, acting a very different purpose before them, drew prenument attention to our faulty methods of avestigation. By their seizure of the spirit-form they did not, indeed, prove its identity with the medium as they desired, and loasted that they had done but they drove Spiruaalists to injure what might be expected to happen in case a depen and form were to as radely seven white the memory. meetum was in a state of trance, but beyond reach of reservation by reason of darkness and sectionen in a calcuet. \* Spiritualism of House and Abroad, by the Franking L.E.), Price 6d. London: The Psychological Press Association.

placing the medium under careful observation. It became manifest, that this was the next step to be taken. Arready one or two observers had been hold enough to demand such conditions of observation, and the results were conspicuously valuable. Since that time our knowledge has been extended by repeated opportunities for observation in the presence of Mr. Echaton, who has never shrunk from affording conditions of investigation which, however distressing to himself, are invaluable to the observer. We do not hesitate to say that Speritualists owe to Mr Eglinton a hearty acknowledgment of their obligation to hun in this respect.

December 5, 1883.

We have learnt much from the action of both foe and friend. We have learnt so much that we are disposed to wonder how the old bad methods of observation could have been telerated so long. That the profoundest mysteries [The Editor of "Liout" derives it to be distinctly smould have been subjected to what passed for scrutary in a promiseuous circle of people, whose only qualifications too openious expressed by Contributors and Correspondents, often were an itching cariouity and the pomeision of five Free and courteens discussion is sursted, but writers are shill age wherewith to grantly it, in a dark room, with every authod of deluding the sensor available .- this is now a source of wonder to us. We see that dark jose may indeed be essential for the development of certain phenomena, but that them special phenomena should not be sought for in these premiseness circles. It is not fair situer to the operating intelligences, or to the obcorvers, or to the medium, to conduct experiments in such a manner. We son further that to admit a neophyte to these mer mysteries without antecedent preparation is most unwise, productive neually of little good, calculated in most cases to bring about disastrous results. We have learnt that circles must be graduated, and that no meers must learn the alphabet before beyone expect to a negrous what they rend. It is not too mine to say that from this graduation of circles pasterously carried out, almost more than from any other single cause, the best results may or expected.

But this is not all. We are less to the belief that there are certain persons so unfortunately constituted as to be apparently unable to get any satisfactory oridence of psyclucal phenomena for themselves, and to be absolutely deterrent by their very presence of the phenomena others may wish to observe. It is said, we do not know how truly, that some persons who are very desirous of witnessing such ther omena as occur, for instance, in the presence of Slade or Eghaton, are uniformly unable to do so. Their presence paralyses the force, apparently, and thus in spite of a professed desire on their part to witness what others see without difficulty. It used to be a scoff against me in the months of such men as Professor Tyndall that the presence of a sceptic was intal to the occurrence of psychical phenomena. If that were so, we wonder how the vast array of those who started from a standpoint of absolute scepticism. and who have reached conviction of the general truth of what Spiritualists believe, has ever been recruited. The truth is that scepticism has nothing whitever to do with the matter, except in so far as it is arrogant, dogmatic, virulent, and obstituately arrayed against the tenth. The passive mind, whether favourably or anticeography impressed, is usually more of its evidence list some there are who can apparently get zone, and it will be interesting to see in the future whether improved methods of research will throw any light on the reasons for this singular psychical impenetrability, which in some observers wholly unlits them for the investigation, and amounts to a positive discuss. For the present, at any rate, they are not suitable members of any circle of

Mrs. Frances Lean (Florence Marryat) announces her To thus question no sufficient answer could be given without

A series of remarkable inculants obtained through the different medium with whom she has had senter.

Sug. May, (Onon's)" " Phones of Madernalization." (" LIGHT "pp. Sat-Sal.)

"SPIRIT TRACHINGS." (From "MIND IN NATURE!") By A. N. WATERNAS.

The title of this work is sufficient to henceh it, not only from the homes, but from consideration or notice, by a large portion of the community.

Spirit communication, so called, is looked upon with boly beeror by seene, and regarded by others as drivel, unworthy the counderation of in his Whent being

It cannot be denied that there is reason for these opinions A great part, perhaps the greater part, of all said to be the teachings of spirits, is either so measurequential, so farereal, childish and silly, or so fanciful and visionary, as to make a sensible man assumed of taxing liste sed to it

The great number of intelligent people, however, who scorpt these revelations, not as necessarily trethial or trustworthy, but az actual voices from another workl, renders the phenomena interesting to every person who desires to study matter, force, or man. It is, therefore, a pleasure to find a book in which is written the history of the development of a so-called medium, together with a large number of what purport to be communications by spirits, couched in plain and simple language, with no attempt at duplay of rhetoric, or ornamentation; without embellish ment, by way of imagery or symbolism, and with no ca denyour to be functful or poetronl.

All that is here given is easily understood, and cannot well be mesunderstood, all is elevating in tone, pure an mornin, logical and consistent.

A theory of spiritual life; an explanation of the intercourse lectween this and the spiritual world, the reasons for, and methods pursued in the communications now being maile, a statement as to the good and evil that may result therefrom, and as to the revolution of the Seriptores, and God's dealings with man, are contained in the "Teachings"

However much one may diment from what is set forth, no one will be alsocked by ridicule, blaspiomy, want of dignity, or frivolity.

The sparit in which this "Teaching" is given, is welillustrated by the following extract from the words of \* Imperator," in what purports to be a letter from a spirit who wrates under that name.

"What we wish to impress on you is thes. You must judge the Revelation of God by the light which is given you in the man, no, by the dicts of its preschen; by the spirit and governl tendoncy, not by the strict literal phramology."

"You must Judge of us and our teaching, not by conformity to any statement made by any man, at any special time, but by the general fitness and adaptability of our oreed to your wants, to your relations with God, and to the progress of your spirit

"What, then, is the outcome of our teaching!" " How far does it square with your right reason!" "How does it teach you of God ?" "How does it help your spirit?"

It has been well mad

"All religions, faiths, doctrases, should be studied at their best." Whoever dourer to examine Spritsalism at its pest, suon mend this book

Oxford is connected with the Londor University College is one of the Vice Presidents of the Society for Psychical Research, also a member of the Council, and, until very recently a member of the Laterary Committee of fell on the rof and passing through every discrete the house that Society He has purposeed a number of works on completely at thance he come emoration of this meredial payelocal subjects.

will work itself out with mathematical occiousty.

## IS MAN DEVELOPING A SINTH SENSI > BY HELES EREN STARRET

home friends were discussing the statement of evolutionists, that new organs had been developed by the resisting of the screening of the appropriate and for any care of a or separately more a facts to progress on the and, One who was sceptical as to such assertions of realising in their own experience he to be up of species a key frequency and the same forms of a movel for his had the power to develop new organs to meet new conditions, why is it that man, the highest animal of all, less ne such power. Alloy are set for jest on developwings by the efforts a new same of the

The new or was not with a more set the part of the evolution ste, but one was written and at an aways weenes once hat if our war are do a vines facilities or nowers in the world that development won he is in over stages of arena to recurse of a one, and mathe same way man is developing the power of spiritum perception through a nuglity deare to know something of spirit, of life beyond this life, and I believe he is guinng the power to perceive and know facts and truths heretofore un recognizable by any of the senses or organs pomested by

there is a reason for outerlaining it. We all know that as and advances in communent and knowledge he becomes new and more senative to the subtler believers of mind and spirit. People are attimated to or repelied from an another by an entirely invisible, indescribable power. Marof mereshou the fact of the attraction or repulsion, and Antwerknow it to be a faut, to whom it in an invisible mystery. If, then a follow-boing whom we know to be truthful, tens un that he can perceive an aura surrounding eve y huns bonng, which attracts or repuls, immonises or antagonises with the num of other hunam beings, why should we seems at him as a famatic or a lunated? May it not be that he in only developing a new power, a new faculty, a new sense ?

Assilv, there are thousands of men and women, and their number is constitutly increasing, who tell us they can perceive spiritual existences. They tell us they hold on verse with, and even see and feel the disembedied spirits of those who have passed out of this life. This much cotainly to be said of those who claim to be possessed of the new power. They experience a happiness in their belief, a freedom from the fear of death, which all other human beings may well only them. To all who are thus assured by facts in their experience of the reality of the continuance of life and personal mentity beyond the grave, of the appritual body and poss bility of intercourse with these who have gone before, death has lost its ating. The grave is the continuation of the continuation of the continuation of the appritual body and poss bility of intercourse with these who have gone before, death has lost its ating. The grave is the continuation of the continuation of the continuation of the approximation of the continuation of t Is only a covered bridge leading to the life beyond. Shall the Down who are a 180 and these property new

Not any vigore enough recognised by the Scipture than can be reten in least from the fact of apprinted existences, may, it is token for granted inscoraries which only a single grunnition ago would have to compliant the current of a long late. Christ Lyton in Mr. S. C. Holl's "Retrospect of a long late."

those who cannot see or feel or hear such manifestations dony their reality? Often, perhaps in a large majority of cases, such power seems to be gained in response to the despent and most earnest pearnings of the sorrowing uniantheart, agonising towards the ark and nown of test.

If, in response to such pearning, and eager congrue, the spiralital vision is quickened so that it perceives what lies beyond the range of the bodily senses, would it not be more reasonable to attribute such enlightenment to the pitying beneficence of the Father of spirits, rather than to solf deep proposed details of the Father of spirits, rather than to solf the analysis of the prophety that the narreal of \$50.00 cm. In the contained that word is an absolute to attribute such enlightenment to the pitying beneficence of the Father of spirits, rather than to solf the analysis of the analysis of the analysis of the prophety that the narreal of \$50.00 cm.

SPIRITISM VERSUS OTEMS THEORIES. (Buing an answer to Mosers, von Hartmann, Myers, and Gurney...)

By THE BOX RODER NAME.

Though see has, I presume, little warrant for doubting or denying the fact, I think it hardly seems to help one much in comprohending the "Trad" or "Faut" to notice that there was probably a dance of molecules going on in the nervous systems of Houser or Goothe, while they themselves were engaged m composing those immertal works. How very queer looks the "formula" of Mr. Myers for the "damon of Soundor," and for a egod i messager of revelation. Where not referable we care of the brace to be easy to be \$1.4 H C. an affer one of the dear exches area win hearing centres I wonder what he Thereas, it has cathe one four from a month of the seeds of the contract of the heart Porsons, wound many said to that or Pane, where y is or mad of the lady he cannot tell, anught up into some third heaven, and hearing words which it is not having for man to utter i or Excheel, hearkening the sound of the wings of elementary like the sound of a host and the voice of many waters) or Milton, blasted with excess of light! or Dante, treading, as a familiar naturate encourant, the pavements of helt and heaven? In a more and y see so han M. Jourdain, our prophote, according poster a car of the meaning to be and each to attering very prose, without knowing to Williams to come for a violin quartet of Bouthoren! Let James Blaten a sewer a secuping of horse-tails on the intestines of cuts. In this then endeavour to belittle the sublime ! I have every respect for the pustorior Corne, for the Hippocumpus miner, and all

that sot, yot I do not think that intenste acquaintance with them can teach me much, my, about the composition of a Bible. But what for selection, it is worth inquiring, is the signifi-

cance of such corobration as may be held not coincident with our own passing consecutaness. Either we sent regard this as empoired by other intelligenees in the state meaner at we alould conceive it if we were thinking of it, or as a portion of alien and a manner which he thus would be represented in the No as a di os se mos gener 1 she figures case we can Assume that the date grown with high reserve a die in a qui ayan or as we do if not human's make be more beat or in organic than con role the author mate nomals or no so does where we presente avenualed number and his transfer and a series of a discovered har er att motte omgredent sa u.v. en ney fremme red know exact. The hear's to be the rationale of matinet, tellos actori, i mi mero, grant d organisms, regulable or animal, and evolution of species. The arienal is under a special Providence that thinks for him. A most striking confirmation of this view I find, moreover, in some of the recent experiments of our Society, those wherein the agent mormerises the patient, or merely "talepathically" influences him, though the latter only look an irresistable impulse to don thing, he does not know why -- the reason of his note lying hidden in the broam of the operator, or possibly mintentional centroller. Thus a man feels supplied to have his sent in a locture-hall, and go house, anding, when he arrives, the home on fire, and his wafe longing for him. (See Proceedings 8, P. R.) Thus the bec and bird are isomerized from the unicen. In all these cuers there is one conscious intelligence influencing another. Shall there, then, be none in osees where, though none is actually ideatifiable at the encurant, the influence of more each about intelligence is with equal probability to be inferred from the result? The guardian ungel, the tender guidance of some loved and loving one out of the body, hocomes to me more probable and conceivable than ever in the light of these very interesting experiments. And shall the anthority of Christ and His disciples go for absolutely nothing! more especially since it coincides with that of so many seers of all times and races, and the general behot of the great majority of mankind, that there are both "angel and spirit"!

Now such a controlling intelligence must presumably be aware not only of the neuronis (we are not aware of the neuronia in thought) but of the psychosis correlated, aware, therefore, of let the poor econtists down gently—not to brook the news to Mr News am a question and Mrs Newsdam's answer Either tries, the inster must be used bed to that his ser order of an elligence, or clie to that hower order to which Spo "min relegates". according to the more should reading the dress mena. For since bhomsoms cerebration rather to navely Amonies that the basin orders out of our thought exact year thought exact year.

assumption that this must be either in a higher intelligence, which is aware of and comprehends our thought, or class at another human intelligence, similar to ours. But the latter is the conclusion of Spatiasin for if there be such a third his telligence present at all to be aware of the neurosis (of which, by the way, or are all -even brain-doctors -shauefully guarant when we think) it must surely be the mine which understood. and other or or matched of Or agram, if we imagine an alum order a cre agentee suppose the coll-souts of our body) to whom who remarks the to expose it is place in the track and picking it has my some equilation to feet think the correlative psychosts for prestor to more or so N which case will unly be something out up disting at it was to be if mentioned through assente me och a worth in our est red and the Their concre are one or any great gates of the stage and batter as it to be for the the of any for the season which a sweet of they uplease a to M. qua-Mrs. Newadian. For as the or see of an age as a stylusion is and dominates the countries of the angle of dashies are d maked attachment of the same with modely and quantitate our own personality as a mere coll in it I do not dony that the cellfoolings may influence us , but those must be suprograted by our on human Ego, before they can become part of un, ours, Isolated blurs of sublineas squaredly incommunicable featings cannot make a solf identify in Ego by more addition, as Professor Chillard and Mr. Myors seem to suppose. The idea of an organism is, however, reamountment, in the Eternal Plorents, which is God.) But one need not go so far a field at present, and has a right to tireter to such speculations the simple and obvious hypothesis of Spirition. I suspect that our body or organism in an full sense a the warte of our influence or action upon the world of intel ligences external to ourselves, plus our next capacity for receptavity and representation of thems. Thus the manufacted universe in the Body of God. In objecting to the exutions deliberation of our Society,

however, Spirituse should really allow for the almost invincible ropaguance of "bard headed," "somable" persons (in the autable world) to anything in the maps of a ghost-se also for the melancholy seizures of psycho-phobic froncy to which poor materialistic Sciolists are liable at more hint of anything so taboool, exploded, and heretical Just when all the begays of enperatitions theologies had been so excelully laid by the book, bell, and easelfs of Hame, Huxley, and Herbert Sponcer, when we were all atting down so confortably to dunier, for ever delivered from vain hopes and four concerning a morely imaginary future, surely it is a little too had to have that well that is up does into the unseen eminging affectly open again. and got on a halmbly are a ung up to the feative board yet another plant on the areas and anknowable, this time boaring a soroll inscribed with this out we as now of Warner ft is roully too much for finds and blood ! The only thing to do is to that the eyes very tight, and exect -do not see it, or (if you are assured that it is not never not withstanding) to declare that anyltow it doesn't interest you, and for your part you would rather look another way.

Ah I that obstitute nea persuants of modern Science, and old Theology, how frought with invente pather is it to the onlightened mind, beholding those green Dignities, one heavy, and the other strongly alterly, halling sterils before a barrier that is very unpassable for them, because it is none other than that of their own constitutional impotonce, while running past, fleat of foot, and with no faint hourt, orange one younger than they dearing all at a bound, and winning the fair guardon of bold youth, and stalwart valour. Read the admirable latter of C C M." to Thymol," in "Leout" (Detober 24th, 1885), on "Facts and Theories," which deserves reprinting and circulating in lotters of gold; also Cardinal Nomman's cotay in the Nineleanth Century for October.

Therefore, it is not amon that our Society should have much slow approaches, leasurely campaigning, porhaps, all the year about mone remote outwork, this wing up direumvallations, and in short affecting rather the strategy of a Great Friederick than that of a Napoleon or a Multke. You, they have done well to them very suddenly. That is but common courtesy, ordinary good-breeding, on their part. Think a whole system of agreeable negations, a fair edifice so laboriously built, so lately crowned, already threatened with Indeces rule said confusion dire, forecoth by some defunct modifical Bodium of myrang my sheated ghost, and tilting table ' Spiritists are so abrupt should we welcome our good frience of the psychical research THE EXPERIMENTAL RESEARCH SECTION pursuasion. Who cano before the world with similar testimony, but in more cautious, echolar-like, and suplemate game, with some of the caustic humanr, and face fronted stelle of Brasines. There is place for Nicodemus, and for Paul.

But all honour to Specials also to those who have been the burden and heat of the day, amid much of ridicule and of scorn, who have being allows the courage of their spinions, one avered them, some non of culture and ability with custo and position to lead, all possense of open maprojudiced mine a high role was wise after the Besh, not some learned," are called to mange rate a new conjumption

In all seriousness I say it—seem not the plank that is being last, the bridge that is being built, from one extreme position to the other, for thereon perchance may Sconticing and Creduity most, and from their intercounts be been some nobler and higher dring than a new to

## PHASES OF MATERIALIZATION

A CHAPTER OF RESEARCH

IN THE

## OBJECTO'S PHENOMENA OF SPIRITUALISM By " M. A. (Oxox.)

(4 meliumed from page 1002.)

IV .- TESTA SPECIALIST APPLY D

There is earth, any medium who is, or has been before the public wars I wast been subjected to a series of more or seas a telligent tests, having for their object the proof that the medium and form are not identical, in other akin, and produces the impromise of an empty glore filled with words, that a greene materialization has taken place. Many of these sexts were absolute a community some such as the tring of the operatus was as a means or water a session at Hackbery (the residence of Mass Cook). Kakie had not a cabinet, do not impress use of thomselves, though they have their value when taken in connection with other cir cumutamora. In some cases, the sevies of tests imposed extended over yours, and no citation, such as space permits me to make, would do any sort of justice to the results moving about and drossing in it, had even the time been arrived at. Such a cam is that of Miss Florence sufficients" Cook (Mrs. Corner), The record of the carefully applied tests in her case, contained in the pages of weeks ago,") Mr. Varloy, F.R.S., att a sennes held at the The Specimalist, must be read consecutively in order to house of Mr Laxmore, Mr. Crookes, Fil.s., and other estimate its value as a piece of connected evidence. The obser erapivesent texten this Florence Cook by a series of still more stringent and conclusive tests applied by Mr. electric expecture in A amutely etailer account contains Crookes, F.R.S., are not public property; and I can records taken at short mercuas throughout the source only may, therefore, that no more conclusive evidence ever ... "Miss Cook was placed in an arm-chair in the twent which attested a fact than did that dicited by Mr. Crookes, in was subsequently to serve as a darkened cabinet. Two specimens of its best proof, were I altogether to omit some space will permit me to make. I can but give some well, which led into the light room where the alters were located. known records as specimens of countless others, lest I should even seem to ignore what is of such value.

In the Spiritual Mayanine, Mr. Benjamin Coleman an observer of large expensence, and much shrewd sagacity describes a seance held at the house of Mr Laxmore, on during the scance she moved her hands at al., the fact was November 18th, 1873. The material points he thus materialy rendered visible by the galvanometer in fact, Miss marrabia :-

"Her hands were first tied together with a piece of tape, the code of which were some and souled, and then the tape was the whole scance. Had the current been oroken for only one passed retail her want and tightly knotted and sown and tenth of a second the galvanometer would have moved over

December, 1873, Vol. VIII. Kee order.

scaled again. The tape was then passed through a staple in the floor, having a slack of about a toot, and there knutted agelu, which restrained Miss Cook from standing up to her full height, and then the tape was brought into the room nearly up to our feet. Mrs. Honeywood entered the cabineta room separated by folding doors from that is which the American mit-the matenet Kato disappeared, and there she saw [The Editor of "Lacury" desires it to be dustinelly Muss Cook asleep, learning over nearly to the floor, the new of Katto, who was clothed in pure white germents, and whose foot were maked." Mr. Culoman adds that Katio presented the exact features of Muss Cook

The inte Prince Emile de Sayn Watgo stem, in the course of a letter" bearing strong testimony to Miss Plorence Cook's powers as a medium, thus gives reason for maintaining the separate individuality of Katie King in spite of her frequently striking resentilance to Miss

Katio rescribles Miss Cook by the law of the periperit keeping, we as sengaged, the impression of the material form to which is a conjugatively listing personalities and we mantake by and only rearing between them a sort of strong enterpresentation in which if the control states of an esta of Karmon successfully appears to make her way of moving. She did not walk, she did not over glide, she seemed to be there at uncu without my knowing how sho came. The touch of her hand also is not that of a material one. It fools more like velvat than air But the most irrefutable proof of Katle and Miss Cook being two separate individuals was given to me at the sud of a disappeared for longer than forty seconds at most when we operand the curtains and found blise Coult in the act of awaking. It would have been quite impossible for her to change her gown, jett utt her boots, dross har hair, in so short a tents; and the space steelf in which she sat is too mercow to adult the possibility of

About the end of the month of February, 1874, ("three

his own bouse, and under conditions most favourable for severeigns, to which platinum wires had been soldered, observation, the fact of materialization. It would be unfair attached one to each of her arms a little above her wrists, by to the subject which I am endeavouring to present with mount of clastic rings. Between the severeigns and the skin solution of ultrate of ammonia, were placed. The plantinum records of Mim. Florence Cook's remarkable mediumship, wires were attached to har arms and led up to har shoulders, so but I repeat that I can give no complete idea of the wealth us to allow of the free morement of her limbs. To each platiof oridence already before the public by any quotations that num wire was attached a thun, cotton-covered copper wire . . Prior to the modium being entranced, the was

requested to move her hands about, which by varying the amount of metallic surface in actual contact with the paper and skin, produced deflections of from fifteen to thirty divisions of the galvanometer, and sometimes more consequently, if Cook took the place of a telegraph cable under electric test

The current was not interrupted an hutant during

. Saleitmillet, Petermey 19th, 1874. | Spiritnellet, March 20th, 1874

200 divisions. Katic came out into the room. Katee was much and then ended to see Katee, but did not leave the room till ke the medium. room was darkuned, and Katle allowed me to approach her. She then let me grasp her hand, it was a long one, very cold Mr Cholmondeley-Pennell, Mr Crookes adds the following. and claiming. A minute or two afterwards Katie told me to go into the dark chamber to detrance Miss Cook. I found her in a deep tranco, headles together in her easy chair, her head lying upon hor left shoulder, her right hand hanging down Her hand was spind, warre, and dry, and not long, cold, and changey like Katte s. In the course of two or three minutes sha came out of the trance. . . The severeigns, bletting paper, and when were exactly as I had left those, viz., attached to her upon by pieces of chance."

are of his records? of facts observed by himself in his were house and on the midst of his own from y, her Crookes thus writer -

"On March 12th, the syn wante in my panel after bank had been walking amongst us and talking for some time who retreated behand the curtain which adjurates as -- -where the company was artistig, from my chrary, who is no a mes calified. In a manuto she came to the curtain and caused me to her, mying, "Come into the room and lift my medium s head up, also has a ppost down," Katio was then standing before me abitized as her usual white robot and turban beats dress. I immediately walked oute the library up to Miss Cook, Katie stepping made to allow me to pass. I found Miss Cook and al., and partially off the note, and her head was konging in a very awkward position. I lifted her on to the sofa, and in so doing had satisfactory evidence, in spite of the darkness, that Most Cook was not attired in the Katio costime, but laid on her udinary black volvet dross, and was in a deep transs. Not from the states for the energines were seed to buy most rubor Kutin atquel ag se a membra ay rasan, Mass the soft from the position into which she had fallen. On returning to my post of observation by the curtain, Katte appeared again and and and thought she should be able to show that "it was a common thing for the seven or eight of us horself and her madeum to me at the same time. The gas was then turned out, and she asked for my phosphorus lamp. After exhibiting honelf by it for some speeds, she handed it back to me saying. 'Now come in and sao my medium.' I closely followed her into the library, and by the light of my lamp my Miss Cook lying on the sofa just as I said left har, I keeked a little after, was going at the usual rate of ninety." round for Katio but also lead disappeared. I called her, but days to the another religions to

"I page on to a meaner held best night, blarch 20th, 1874] at Hackney. Kathe never appeared to greater perfection, and for nourly two hours she walked about the room conversing familiarly. On noveral occasions she took my arm when walk-I asked permission to chap her in my arms Permussion was given. She appeared to be as material a boing as Mass Cook hurself. But the sequel shows how wrong it is for an experimentallet, however accurate his absorpations may be, to venture to draw an important coucle ston from an amultiment amount of evidence

his a new cord she thought she should be able this time, to show harnelf and Miss Cook together. I went enutionaly with my phosphorus lamp into the room, it being dark, and felt noon or bliss Cook. I found her ercocking on the floor Kies ong down, I ast air into the anap, and by its light I mer than young hely dressed in black volvet, as she had been in the early to a record which wears the well-known name of Mr. C. C. per of the evening are to all appearances perfectly senseless. Massey, Together with a friend (who "concurs with him have all not more winer a book her word and here he night of we to her face, but continued quickly breath no Re . o, we late Mr. Massey had a seamer with Miss F Cook at the rooms I looked round and any Katte standing close behind Man cook, of the Dulston Association of Inquirers into Spiritualism, She was robed in flowing white drapery, as we had seen her previously during the sentes. Holding one of Miss Cook's lands in mine and still knooming, I presed the lamp up and down so m so thanning to Katies whole figure, and satisfy myself the sitters were placed one on each side of the curtain. theroughly that I was really looking at the veritable Katie whom | The medium had been elaborately tied round the wasst I had chaped in my arms a few immutes before, and not at the with tape, which was sealed and wound round the chair plaintom of a disordered brain. She did not speak, but moved and carried to some distance. her head and mailed in recognition. Three coparate times dis ! I carefully examine Miss Cook crouching before ine, to be sure This was followed by a hand and arm \* \* Next the that the hand I said was that of a living woman, and three curtain was drawn away on one sails and the other, showing at acparate times did I turn the lamp to Katin and examine her each aids successively a full-length figure, enveloped in sample with stendfast acretiny, until I had no doubt whatever of her objective realsty

At last Miss Cook moved singhtly, and Katte matantly meanmed me to gooway I went to another part of the exbinet

Towards the close of the scance the Miss Cook woke up and two of the varitors came in with a light,

In answer to a letter of inquiry addressed to him by

"At the time of the occurrence I felt its importance too nuch to neglect any test which I thought would be likely to add to its completeness. As I hold one of Miss Cook a hands all the time, and knelt by her, held the light close to her face, and watched her breathing, I have abundant resson to know that I was not decrived by a lay figure or by a bundle of clothes. As regards the identity of Katie, I have the same positive convicn. He are figure, fastures, complexion, dress, and pleasant sundo of recognition, were all the muso as I have seen there showns of times, and so I have repeatedly shood for many minutes within a few inches of her face, in a good light, Katte a appearance is to me as fundam as in that of Mim Cook herself.

Later Mr. Crookes describes an occurrence at some recent scances in his house. He states that two medions -Miss Showers and Max F Cook-being present, two prateriansed forms-"Katie" and "Florence"-walked about in his laboratory " with their arms entwined school gu fashion, and in a strong light." He further adde

Katie has also materialized and spoken when I have been in the cubinet with Miss F. Cook, holding her hand, but, it being dark, I could see nothing except here and there lights, one of which settled on my cont-sleeve.

Mr. Crookes succeeded in photographing the materialised form of Katie by electric light. During the later scences,; held at his house, he had ample opportunity of compuring the medium with the materialised spirit-form, and of using the many points of afference between them in spite of a superficial resemblance which was more man-feat at some times than at others. Moreover, he is able to say [comprising his home circle] to see Miss Cook and Katie at the same type under the full blace of the electric light." One evening he had opportunity of timing Kntic's pulse "It boat steadily at seventy-five, whilst Mass Cook's pulse,

Not needlessly to multiply testimony, I will only add! that Florence Marryat records a piece of perfectly conclusive evidence. At a scance, when Katis said farewell to her friends, her power of manifesting her prosence through Miss F Cook's mediumahip being about to cease, Florence Marryat states that she "saw and touched the warm, breathing form of the medium, and at the same time w and touched, and felt Katse standing by "

Testamony such as this of Mr. Crookes in not to be put naide, unless published testimony, solountly given in to be diaregarded altogether. It will not be pretended that this not conclusive, except by those cursously-constituted minds to whom no proof suffices to establish an unwelcome trath

If it be permetted to quote from another source in correleration of what has already been adduced, I will refer in his account and in entire saturfaction with the result "), on September 32nd, 1878. The medium sat in a back room, and a curtain divided it from the front room, where

"We convocaed a short time with the medium . . . masses of white drapery, and which spoke to us (the voice being Maric's) from the places at which stappeared, moved, and gave

† Spiritualist, April 1946, 1676.

undoubted evidence that it was not a 'dommy' On reentering the room we found the medium conted on the chair in the store position as before \* \* \* Knois and scale were intack, " " Nothing had been tampered with."

December 12, 1985.1

It is not in my power to add to the evidence respecting faith.] Miss Florence Cook's mediumship. It has been subjected at various times to the most stringent tests. And if, in later years, doubt has been east on siz genuineness in a particular case, I can only my that that doubt was not substantisted by evidence sufficient to establish the case that was sought to be made out. Much less do such rough and ready methods of investigation invalidate the careful and cautious conclusions arrived at by Mr Crookes after prolonged and patient observation

(To be continued.)

## A CHILD'S STRANGE MALADY

We take the following narrative of a tranco, headed so above, from the Literary World of November 27th, which the editor says a New York journal has received from a correspondent at Seguitor, Pennsylvania.

a foreman is the moulding department of the Dickson Manufacturing Company's works, in subject to fits of trance of strange interest, some of them latting for woole at a time. A short time ago, on regaining conactourness after an unusually protracted spell of this sort, the girl prote on a state that the had been in the colouted regress, and that it was suppossible to describe their glories. After another trance, ahe seemed greatly porturbed, and prote that she had seen the informal regions and codents and conditiontheir socupants. Prior to her present trouble Rebecca was an unusually bright and attractive skild. One evening about a year age, she visited a merry-go-round, where a number of other children were playing and laughing. She started for home at nine o'clock. A short distance from the house she was accosted by two men who followed her to the door. The shild's acrosmbrought her mother to the some, and the men can off, but Rebeam was greatly frightened and suffered a terrible shock Soon after this three of Mr M Donald's star cloud on were taken sick. Reboom devotal much attention to those, and one evening, while ministering to their comfort, and putting things to rights in order to be in time for school, she fall downsteirs and injured her spine. The injury was followed by sickness and decline, and the parents, thinking a change of air might benefit her, took her to the residence of her aunt, Mrs. Warburton who lives in the Hyde Park section of the city. Three months ago Mrs. Warburton took Rebetts out for a walk. When only a short distance from the boson the girl screemed, and fell. Her limbs became rigid, her eyes assumed a fixed stars, and she was mable to speak. She was carried home, and remained in this condition for eight days. During this time she could not more her lips or tongue, but she hunnred numerous tenos. For neveral days she took no lood. As soon as also because conscious she formed at the mouth and enapped at everybody who approached her. Then came a period of calm. Her eyes my Singer, was the word "wholly" with. On the lower we remained closed, and her efforts to articulate were paraful in the extreme. She understood every word that was apoken in the room and wrote on a slate replica to such questions as were asked her. Between that time and the 4th of July Rebecca had three singular spells. Then she appeared to get well again, was About the middle of July also became unconscious again at the jul least one of the words was 12% or the odds were less than five taken out riding, and second to be in a good way of recovery Warburton residence, residence the humming of well-known wire, and kept this up for a long time. The doctor thrust a darning needle into her rigid limbs, but she did not seem to feel it, and continued the humming as if nothing had occurred to give her pain. Two weeks ago she became conscious, and startled all the neighbours with her screams. Then she became transmil. She remembered nothing of the transa. A week ago hat Saturday Roberts had another trance, from which she has not yet recovered. A reporter visited the house in-day, and me the afflicted girl. She shook kends with all who approached over, the fact that the Hebrew latters are proper numerals, has her bednde, and her efforts to speak were exceedingly touching. In to a whole system of a streat aterpretation of the Bible by While the reporter was in the room she began humming, and
kept it up for half an hour. Het closed eyes quivered, but
there was no movement of the other features or limbs. The case
arction the most produced pity for the little sufferer. excites the most protound pity for the little sufferer.

## CORRESPONDENCE.

[It is professible that correspondents should append their names and addresses to communications. In any case, however, these must be supplied to the Editor at a guarantee of good

## Divination by Nambers. To the Euter of " Lion?

Sun,-I feel personally obliged to your correspondent W P for supporting my experience on this subject by the manufaction of his own. I do not, however, think the tree of his latter, "Numbers at a means of Spirit Telegraphy, seators appropriate to the malance be given, because the giving out number by the concurre at the Musée Plantin was, as in so many of my own coses, a fact which, according to the temperaorder of thangs, could not be directly influenced by spirit interference, unless the concerns was made to give a number out or the together succession of the tackets hundred to visitors as they ontered in exchange for their unbrullas. Otherwise it was the apparent coincidence, that "W P" should arrive just at the turn for No. 107, that makes the case to difficult, as well for Spiritualists as for anyone clac. It is this circumstance that made me for years withhold my own sindler facts from even the Spiritualistic public. Three years age I obtained responses in "Roboco, the fourteen-year-old daughter of David K Donald, this way on no many occasions on to convince me that I was in the presence of one of the desput of metaphysical myst were one for which even the section of the public most suverneed . the recognition of mysteries was hardly prepared. Let me consult, however, that like all true experience of nature this particular mystery is very nuclent-some of the systems of augury presenting the same difficulty that the event is apparently determined by an infinite regressive series of physical ante-

The following case of a recent response is less mysterious of this respect, but is worth mention as the subject has been

becaused One day, about a fortnight ago, I was thinking of the physica. miditions which might, in my own case, provent that direct comnumication with the spiritual world which I have long exceed ingly heatrod. It necurred to me (as often before) that my habit of rather excessive enoking might produce a state of brain adverse to this possibility." It occurred to me to try for on direct confirmation of this naming by the numerical method, ascertained the value of the words " moking lad," which is 05 Then I meant to take a book, upon it, and place my ringer on a line without socking. If the line contained a word of the value 95, I should have my affirmative answer. But by one of those trivial purplication which happen to all of un occasionally, I could not at first decide on a book, though many were nearly within reach of my hand as I set. Though I lind no years for proferring any, I rejected, as if fratincircly, two or three that lay close by. Then Abbot's translation of Kant's "Theory of Ethics" occurred to me, with an immediate and quite unnecountable sense of minefaction. I rose to get it from the shelf, opened it at encount madem, and dropped my finger about the middle of the page (p. 280, 3rd edition). I found it had fallen on two lines. On the upper one, the first word to the left of partly under my finger, was the word "elevating," slee-95 ' 1 then took the trouble to count the numerical value of every work not residently that a not seem thurty-three lines of the page. Only morather has the value 95 N will but his two mer and an proving the serfact was the three right words in the page of in inflictent see, here such dang two grow his a for any it to one against the event. But the chance of the "double event" obtained, that is, that the two lines touched should contain two of the three words, was only 134 (since \$1.78 - 525, 5 7 and  $\frac{1}{2}\frac{1}{2}=\frac{1}{2}\frac{1}{2}$ . And the edds against my flager falling on one of the three right words in the page, and in immediate presently to another, were of course outermously greater.

Any one who supposes that the alphabetecal valuation is a fanciful novelty of "W P." and myself may be referred to the "Story of the Bab," in the current Contemporary Review. More-

## " Spiritism various Other Theories, To the Blater of " Lanter

Six -The powerful series of articles by Mr. Roden Noel funder the above heading carrier find to command the derivate attention of all who may be concerned to defend the positions he attacks. The humble office of translator does not surpose the obligation of championing an author's ideas, and much that Mr. Noci says against Hartmann involves the argument against others, who will doubtless most it, if not in your solumns plauwhere. For myself, paoreover, I would my that I should be it mak and protomptuous to oncounter this long and able essay in an off-hand roply, though, as what I have written on my own account is occasionally criticised, rater on I must sak have to occupy some of your space. Meanwhile I will only remark that I think there are points in which Mr. Not, an not a tecorrectly represented Enringents views an factor, that in exploring his new related expendingly, we should be particularly contions how we oppose to any terestive hypothesis Income corners conscious of personality which are in truth upon their trial.

As regards Mr. Haughton a lotter in "Lienty" on Ven-Hartmann, I do not feel the same difficulty. With what he says about "transferred halfneamtions" I quite agree, but I must regret the tone in which he speaks of the connect author he attacks, a tone and justified by accuracy of criticism. For it to not the fact that Unrinsum " believes in the visible universe, and in nothing beyond it," nor that he "connect at all understand how spirits can exact." Wholly anjust, also, is the charge his philosophical reputation in relation to these phonome in because he will not be responsible for insavidual cases. His expingly, honest, and most courageous declaration in view of the whole evidence (see p. 22 of reprint) was one of my reasons for undertaking the translation. Looking at the rabet proposes preva ling in Germany, Hartmann a recognition of the anti-jet might.) see If no it regards to many reportation force arms y automothers.

surgon," So I must be excused from replying. Has why from Mr. Haughton miscoscriba area poor Slade? Slace was never a " prisoner," never a "discharged courtel," was not ever in contain dation if an a convict a all for the enaching of the contractor as the Muddletex Seatons related back, and state that it who water

## The Phenomenality of the Subject. To the Editor of " Living

Six. I wont trouble you with one more letter under this

title, which I will make as brief as possible. I son serry to have led "O. C. M." off the track by what I

and as to the "subject-object." As he seemed to think that I admitted so subject object, I just explained the come in which information that Miss Lottic Fowler has suitful huntelf at I hold that a subject-object exists, and would exist even for a No. 16, Bury-street, W C. (entrance in Gilbert-street), and is being who had no organism—the imperceptible percipient whom manage to be seen between two and seven o'clock. Man Fowler I was inneghting. "C. C. M.'s" quite different "subject-object has a herge to dis before her visit to America which she would I shee admit as a fact, agreeing with his and Mr. Shedworth be glad to gather round her again. I had several sittings with Hudgam's account of the important place, in my perception of her in part years, and always countered her one of the most the world as I flood it, of a body which I call once. The more remarkable clairs youth living. I sat again with her but week between us thus done not at all "turn on the nature of the and had every reason to think her powers unabated. As an subject corper for he admits my "subject-object" and the salvisor and director in business macters, her central is expecially nature, and I admit his -- se fects. The issue is whether-as he good, and I would trust her implicitly. As several people contends and I deay-a body or objective appearance of myself soon unaware of Miss Fowler's present address, I thought in foguestly necessary as a consistent of percepience in guarant. I this note might help both her and them. -- 5 am, dear dr, yours And the controversy has divided itself under two homes.

(1) As all the arguments by which "C. C. M" supported for tier were drawn from a single bounds of perceptones—the percipience of an external world-I suggested that percipience of this world by no means enhanted percepiones , and I put the question How do I represent myself, or how can I be shown to

he world of mante! C C M accomptants much a some quiperion. I must need to treld to my comen that it admosof none. He argues with skill, and proves as he thinks, that when I contemplate external objects, I must be an object among them, what precludes him from a minifer demonstration that, when I contemplate tunes, I must be a tune among them, except the inherent absurdity of the notion? Hat vague assump tion that, when experiencing music, I am perceptible quater mae different modes of perception" from those involved in my bodily perceptibility is, in the first place, opposed to the fact that no body ever found use so; and in the second place, is surely a more blind. To be logical, his position must be this, and this only :- It is unplied by the fact that I have perceptions of sight and touch. Shortly after, he waked one night persuaded that while asleep that I am visible and tangible to others it is similarly nuplied behad soon hat fish withall the numering features perfectly restored. by the fact that I have perceptions of sound, that and awarer to others. That is the only "mande of perception than mand here my reterance to the argument. But in general, I would thinking that on looking snow at the impression his should see defy "C. C. M." to advance a step towards proving his point in respect of any next of experience in which the two qualities of vani-the blurred record was as blank as ever. The next night extension and externality are not prominent. A quite parallel he saw the fish again, but with no more satisfactory result case to music would be that of more colour-percepts. How would a percipient who had seen nothing but blue sky "clothe Hoping that that the same experience might be repeated, a his ask counciousness homogeneously " ! I expect that it would the third night he placed a pencil and paper beside his been need the propounding of the problem to make him look properly before going to alsop. Accordingly, towards morning the fish

which "C. C. M." takes into account—the experience of objects zoological character. Still half-dreaming, in perfect darkness, in space-I remarked that all that is legically necessary for he traced these characters on the sheet of paper at the bedade local detinations is that the objects seen shall be definitely in the morning he was surprised to see in his necturnal aketch related to a machematical point or contro, -a point which, if a features which he thought it impossible the featil should may be in a sense as object to the perspical whose per. reveal. He hastened to the Jardin des Plantos, and, with ins ceptions of other directs involve it, could in no more be an drawing as a guide, succeeded in chiscling away the surface of

nations who had comparatively no such knowledge but who had seems not exactly to deny this but he fastens on my further remark that to a nerespitors whose some existering trea-A desire " to know" is natural, and under certain conditions, patrowed down to this simple point, "externality " and one of the highest means to good. Sparitualism meets that, "apatial relations" might probably have a meaning rather intelligences seem at all adequate in quality, if I may world excelly as we know it implies something more than more use such a word, to the subject-matter of the Bible?, local position, which "semething more," according to han, is direct a body. Now I need not enter into the further question as to spirit how for the body implied would be the second body that I know attensives in someon, were collected together, would or that science knows , for on that question " C. C. M." merely refers 1 Dr. Ingleby It will be comingle to remind him meaning hat he aske between him and me in respect of visual pheno There are many more things I should like to ask, but must know is whether my visible extension in space is logically into a point, my visual experiences might be modified, in surely to porcement to the claw that visual experiences in themselves amply a local " positing" of something wholly different to the point-to wit, an extended body.-- I am, Sir, yours obeliently,

THE

## PROTECTION OF PUBLIC MEDIUMSHIP

Three years ago, as the members of the London Spiritua.tat Allianco were reminded in the President's recent address, a new departure was taken in respect of the public investigation of the physical phonomena of Spiritualium It may be well to recall the weighty words in which the "oducated Spiritualists of Great Britain," a.c., those whose experience in the investigation, and insined espacity for observation fitted them to pronounce an opinion, go r utterance to a conclusion and was prinches, y usus amous, so few were to a south its from its terms.

" Public or promisenous againsts for physical manifestations (they wrote) have been of late years generally marked by the following obstructurings:-(1) The estates has been conducted in imperfact light, or in total durkness. (2) The medium has been warm from the circle, by being placed either in a cabinet or belond a curton. (3) The altters have been, either wholly or in ourt, other assetted with the subject and with each other (4) There has not infrequently been a manifest want of larmany, comequent upon differences of opinion as to the manage and value of the tests employed,

Those conditions, usually found in combination, effectually produde excelul and dispositionate investigation, open wide an around to fraud suggest suspicion of its presence even where is

Saal; conditions should be allowed to provail no longer "Mixed circles should be an little mixed an possible-more wonder-seekers, and men whose moral atmosphere to known to be impure, being carefully excluded. Above all, darkness should give way to light. In the early days of Spiritualism. public dark circles were the exception, and there is no need for Shorter so pathetically lamented its fall from its former those now. There is abundant evidence that, with mediums of , high estate , and it occupies its present honograble place the present day, satisfactory phenomena, including even force manifestations, our be obtained without notation—the medium, where a cabinet is used, being placed near, but subide of it, and in full view of the sitters. But even if this were not so, it is neither who now honourable to expose mediums to the risks which have been shown to attend acanem held under the conditions that have of late been provident , and it were far better that we should have no physical phenomens at all than that experience we have learned our leasure so far, at any rate, least, insvitably conduce to stupicion

'In view of all these considerations, believing that fenul is not of the essence of this crafessedly obscure subject, but rather an necident dependent on faulty conditions of research feeling that Spiritualists have the remedy for the svil in their own hands, and that without its consciontions application they cannot hope to maintain a fear reputation before the world, we carneally recommend-That in all public circles held for physical continuously under observation by each member of the circle. \*

\* " LIGHT. Vol. IL. p. 534.

About the same times Mr Thomas Shorter addressed to the Central Association of Spiritualists some wise and well-considered advice on the question of Public Mediumship. It is needless for us to say that no man is more entitled to be heard with respect on such a subject than Mr Shorter His long experience, his sober habits of thought, but candid mend, and his outspoken fearlessness when necessity requires, mark him out as one ammently fitted to handle this difficult subject with discretion and thoroughness. This is Mr. Shorter's conclusion :-

"I magnitude in the interests of the medium, of his health and integrity, in the interests of the one of a low, it is interested of the public, in the interests of Speritualists and Spiritualism, that this whole question of professional mediumship and of our relation to it should be seriously reconsidered. I believe if [cortain changes were made which have in effect since been curried out] that Spiritualists would no longer have to hang their hoods in shame, or to feel that Spiritudius was a represely, has that it was comething of which they might be henourably proud , the medium would one that I was anxious to magnify his office, for I would have him feel the responsibility of his position—that to him is committed a high and hely trust. I believe that Spritzalism would be raised above that reigne layed of doubt and suspecton with which it is now beset and barraced; that we should rise into a lugher and paper condition and that many of sewould be able to go beyond the need of physical manifestations into the higher region of spectual con-

If there were some that heard these words, who at the tupe thought them a hard saying, events have subsequently abundantly visulicated their meacious foresight. The Declaration promoted by the Central Amountain of Spiritualists was signed by some two dozen presidents or secretaries of country societies. It commended steelf to such representatives of opinion, sufficiently divergent in general conclusions, but wholly agreed in this matter, an M. Aksakof, Mr. W. P. Adahead, Mr. Barkes, Muss Atlant Blackwell, Mrs. Hardingo Britten, Mr. Calder, Mr. Egiinton, Mr Farmer Mrs., and Mr Destrood, FitzGorald, Mr S. C. Hall, Mrs. Hallock, Mr. J. Enmore Jones, M. Laymarce, M. A. (Oxon.), Mr. C. C. Massey, Rev. W. Minll, Hon. Roden Noel, Mr. Hay Nusbet, Mr. Frank Podmore, Mr. Rike, Mr. Dawson Rogers, Dr. Speer, Mr. Morell Theobald, Mr. Tietkens, Mrs. Nesworthy, Mr. Alfred Russel Wallaco, Rev. W Whitear, and Dr. G. Wyld, not to mention many other names of consideration and weight,

We need not dwell upon the result of his action. The President of the London Spiritualist Alliance classed that does not exist , and in many once, we feer, expect the medium | by it "a heavy blow was given to methods of investigation which should never have been sanctioned "; and that " we have practically destroyed what led to grave abuses. Experience and knowledge will after the justice of that claim. At the present moment Spiritualium is in a far different position to that which it occupied when Mr very largely in consequence of the action that we are now mending to recollection. If we carry the minds of our renders back to those dark days, it is only that they may the better be able to appreciate the bright outlook that now lies before them. For " we have changed all that " during these three yours. We have grown in knowledge by end they should be sought under circumstances which, to say the , as to turn our backs upon the past with thunkfulness, and to welcome the prospect of work worth the name of Research which the President of the Alliance set forth in his recent address.

We shall have occasion hereofter to recur to other matters therein set forth. For the present we desire to fix attention on the bearing of this plan of research on the question of Public Mediumship which Mr. Shorter handled parnomena, the mailtan be so placed, and in med light, as to be , so exhaustively three years since. It goes without saying that the sholition of payment by results will out away one

great source of temptation to which Mr Shorter drew attention. It will remove from a weak person the temptation to "assist phenomena" when they are weak, or to counterfest them when they are absent. It will go far, together with the absence of darkness, and of unknown observers. promisesously gathered together at haphacard, to prevent a medium from being placed in an equivocal position. Our attention will be mereasingly drawn to the study of that most important question—the influence of conditions on the phenomens, and on the medium himself. Already we know that if we are to hope for good results we must provide good conditions, and above all that we must surround the medium with a harmonious circle who will treat him with tendernous and care, and shield kins from injury that tenorance or malice might inflict.

December 12, 1880.)

The Spiritualistic public has much to hope for from a rational avidem of layers gration such as that now and before them. They may renomably expect an extension of their knowledge of the causes which produce familiar effects, they may hope gradually to dispel the mists of ignorance and prejudice which hang round the subject in the popular mind, albeit in a decreasing degree year by year, they may hope to prick many an inflated theory, and show the beliew emptiness of what looked so fairly rounded till it collapsed. The public at large has much to gain by the clearing away of obstocks to rational investigation , by the sweeping away of vulgarity, folly, and a mansoons kind of cant that have repoiled from the threshold of mquiry many a weak-minded parentigator whose interest was not robust enough to save him from diagrat, by the repression of ill-regulated onthusiasm and the development of reasonable methods of angular and remerch. But the medium has most of all to go a by protection from farsit and injury from foolish, or ignorant, or malicious persons, by his removal from equivocal conditions, under which it is almost impossible to distinguish perfect sincerity from communicate trickery, by the development of his powers under guarded conditions carefully carried out, so that they may be brought to perfection without risk of injury to his health, whother of body, soul, or spirit

A Rest exit in Southport dearns to meet with Spiritualists so that locality with a view to form the process coreles for investe gation. - Address, Edstor of " Leasts."

DEATH is the samest of our material existence, to-marrow the spiritual sun of a brighter and more beautiful day will appear in the firmament of our being that shall stand at high merchan of that eternal day whose horszon a crossonen with the never-feding light of immortality.-Dr. C. C. Pasy

A Sentire atter reaching in Dubi is complained at through the action of Mesons, Smit and Son our afficult to cocure LIGHT and as more a flight o make the acquaintance of Spiritualute. If any of our resident residing in that city would care to meet another investigator, they can be put into comneuroscattor upor application to the Ecotor

MEETINGS for Spanissists are held every Senday at the Recent Hotel, near Baker-arrest Stauton, Oh Sciences next-13th mat., at seven o'clock, Mr. C. U. Massey will deliver a lecture entatied "The Relation of Fuith to Evidence in Research On the following Sounday the speaker for the evening wall to Mr. A P Tomasi, who has chosen for his sub-set ' Occu tom'

Sax told use that in all that alse coundered her cest writing there was a "not herself" which took possession of her, and that she felt her dwn personality to be merely the instrument through which this spirit, as it wore, was acting. Particularly she dwelt on this in regard to the account in 'Middlemarch' between Dorothes and Resumend, saying that although she always knew they had, somet or later, to come together, she kept the idea resolutely out of her mind until Dorothes was in Respond's drawing-room; then shandoning herself to the inspiration of the moment, she wrote the whole scene exactly as it stands, without alteration, or erasure, in an intense state of excitament and agitation, louling berself entirely possessed by the feelings of the two women."—Extract from the "Life of George Elist," by her husband

If evidence of apirit-knowledge of our worldly affairs to secontable in your columns I beg to offer an encopie. Being After being we beam quite in a people of an a business uniter some weekings, I thought reputation for being housted I would try a spirit measure, and called on More Lettre Fowlof I here street, Bloomabary, whose meno I had not up marel I found her a most reportsable sometime. She did not | On Tuesday, November 18th, I witnessed a naterialization walt to hear mo state my case, but at once began to felt in which we will be a long to Mr. by other being the payebre what were the su jects on which I had to consult her, and The stance commenced at about 3 p.m., in an apper most over pointed ont is detail the course to be too in. This course may be leading the atreet, an ady in the ach resent sero, is discourse to not in second with my own views of the moneton, but I followed in one: "The bank room, win a next in the ways model may her nilvice, and, I am pleased to say, with the next antisfactory of other courses who and one on the course, was expenses result, and it was afterwards oridont that if I had served on my by the autors, and the shoer leading on to the a many regard was out making questions, or attempting to get the slightest in the waver rate wavelows in a court of The sitters, or this give mu particulars and come do personal descriptions of a converse to gentreasen were been a only an anemicarcle number of my rolatives who have been the or many years, and ) reaching from the corner of the source room directly opposite some of whom had not been in my so aghts for perhaps a secubinet, which i shall only the head of the circle, to the lath quarter if is contary.

the name of "Diargard," and who are mid-had passed away man at the head of the circle atood a gus-hoop which was alight between twenty and therty years. This was no ment who used during he course, there being always light enough for use to we to take a good deal of external in me when I was a lad. "Jane | the arrangement of the room and the position of the sitters, as was the mans of another spirit present, and who used to live well as to distanguish with some the features of those sitting on with Margaret as an adopted chief. and a comm. and playments out ser hand and their immediate neighbours. The attenubaring

striking. Not only wore the descriptions of the periodal up of a none of being our best was seen intermittently over the pearsures of her mother and sister, who left the body same ye case word accurate, but the three of passing away, and noticeable as his vacualty during this part of the sitting. He then the comparate they suffered from were sorrectly giron. The entered the cabinet, and scott a voice, purporting to be that of to an also will that my wife's mother came to live with me the latter part of her time here, and died at our home, and that | familiarly with the circle. After a short time the curtains there was some unpleasantness with one member of the parton, and a form appeared which was recognised by one of family who had not beliaved well to her , all which was the the atters so the likeness of a decessed friend. During the truth. We had suspected pseular treatment of the kind ind. sitting no less than eight forms were recognised by different ented, you had not proof, but at this scance the medium said the sitters, each sitter recognising one at least, some two. Three apiret distinctly told her who was the affending person, and gave forms, which were very characteristic in appearance, represented the same or very poeulist one-which perfectly confirmed men, women, and children. Eleven came during the evening, or suspicious. The medium also told my wife the names of two of these being the medium's "guides," "Jeey" and elaters and brothers she had lost, how long they were ill, and what they died of, that one of the family recently came to this sum and a child. Towards the end of the stance Mr. Eglinson country from abrend, and waitful to horrow money, and a many himself came out of the cabinet, apparently in a state of trance. Be advanced to the find of the circle and walked up and down. and of which we know the medicin could have had no personal

A remarkable feature in these seances is that no "bead. ing" questions are saked by the medium, no cross-examina-

away. Miss Fowler's forteappears to be the identification of and communication with, departed friends and relations. The minnon was at Mus Lottes Fowler's room (16, Bury-street, Bloomsbury). I went straight there without making an appointment. Except that two years ago I went to her once in the same way, and without divulging my name, the way entirely unacquainted with myself or family

## PHASES OF MATERIALIZATION A CHAPTER OF RESEARCH

## AN THE ORJECTIVE PHENOMENA OF SPIRITUALISM By "M. A. (Oxox.)"

(Chalinsed from page 605.)

I have mentioned the name of Miss Showers in connection with that of Muss Plorence Cook. The first-maned larly was for a considerable period prominently before the politican a private medium, who generously consented to the publication of particulars respecting the senious at which some remarkable evulence of materialization was green. Tests of a nature similar to those already described were given, and in many ways the manufestations of pay chical power which were teen in the presence of Masbeing the medium, given the following testimony

' Plorance, raising the curtain, saked me to go inside and look at her medium, at the more tions directing into to be to the the curtain to let in the light. I did no, and stood before You handed to it, and otherwise compacted itself as 'one of in Showers, who was lying linek entranced in her way man net black dress with the white lace round the sleeves and threat. Plarenco in her whate rubes stood clean to my left hand, in the , full light from the outer room, that cans he as I stood with the | with long, flowing hair, and with high-hosbel boots on her feet curtain reased in my right hand. I carefully looked at the The figure of Florence energed from the cablest with a head medium and Florence, and minafed mysell beyond a doubt as to micircled with drapery, and with a long net vell that covered their separate identity. After scruting both for about two her aboutdoes and descented to her waist. The upper part of manutes, Florence took my left arm with her right hand, and the buly was covered by some very soft material, of worl. raison and a met of soul in oft arm of Mus Showers from her Imperently , the lower part by a linear gardent which builted in as, surked my arm, pros. hat of the measure and held them the floor. After the mennes the measure was found on the floor together for about his seconds. The medium then gave a slig! Hat on her face, clear to the chair on which I left her. The start, and moved. The form then came out into the room and long hair was undisturbed, the silk dress, the bests, were there, remanded a fed go since day on , and a sur, we

test was obtained .-

"The sparit "Florence," standing in her flowing white tobes, in a good light in front of the ourtain, directed one of the gitters to take the hand-lamp from the table and follow her at once upto the dark room used as a cubinet. This was done, but Phorence and va edied, vary he area up in her black silk dress, lying entranced in her chair, was to be seen. After carefully examining the room, the goatleman resumed his seat outside, and again Florence came out in her white robes, asking him to repeat the experiment more quickly. He did so, but Florence had disapposted, the medium being found entranced as before. Another sitter was then allowed to do the some, with a like result."

\* Spiritualist April 10th, 1871. 
† Spiritualist April 2 th, 1874

I quote here a careful account of a private scance at the

with ordinary wall paper. In this frame-work was a door, [The Editor of "Laure" desires it to be distractly and an aperture at which the specit face usually appears. Within the caldnot was a plane, a sofa, and some clusters There was no means of egreen from the room except by moons of the door which led late the front drawing-room, entered, she herself, or the sparit 'Peter,' rather, speaking through her, proposed to Mrs. Gregory that a scarch for any concealed dropory abould be made. This was declared. Three who was a word to beliente conditions which seems y accounon these may besterious will not consister that they would be thely to be improved by subjecting a lady to the indigaty of being coarched for the discovery of her implements of deceptout. Nor was it doesnot advisable to the her to the log of a plane as, I am serry to say, was once before done. We conadered that meli mode of testing was neither descrit may profitable. She was simply placed on a chair in the most distant corner of the room, and I left her sitting there with a black adk It was be not souly flowing over her shoulders. After the ascar post for super at soughing, which is the inevitable publish ment in these cases. I heard the voice of the spirit, 'Florence Moster, speaking within the partition near the door. My clinic work it we feet of the describbroughout the evening. The room kaying boom partially darkoned. I apened the deer sow in the dim light a form said from head to foot in white. By degrees a flower rather bands to be such the doctors of the to as in which we sat. The projecting francowark ever which Showers were akin to those shown through the mechaniship also passed sound no importanent, though it was six or eight of Man Florence Cook. Mr C. R Tapp, for example, in mehos from the floor, and was somewhat awkward to stop ver recording a season held at Mr. Luxmero's, Must Showers. The figure was new so close to tab that I could touch it with are It remained within my reach for an hour and a-half, during which true I accutanted it with great care, and observed some very curious facts. Moreover, all the fourteen sitters cause, saw, and touched it. It sat down in a chair, which I

" Now for the points to which I wish to advert

"L. The medium entered the submot in a black silk dress, and a appearance lawredor could be detected. Will your buly readers my whether they concern it possible that such At the same place on another occasion, the following budy realors my whother they been made in the dark by the most skilfed setress, or whother each a change, involving the pulling off and on of a silk dross, could have escaped a theep car planted close to the partition? Probably the question

". I noticed that the figure of 'Plotones' seemed taller than that of the medium as a stand of the asorway I, therefore, naked it to stand by my side. It did so, and the height was carefully observed. After the science, I requested the medium to stand in the same position, and a difference of not less than four inches was found to oxist between her and ' Florence.

3. When the figure first emerged from the cabinet, Isaked it to shake hands with one. A cold, claustry claw rather than

\* Spiritpation April 201 1274.

December 19, 1883.7

hand, was stiffly jorked from the slde, as though a string had been pulled. I touched it, and found it to be unmaturally formed, cold to the touch and milite human flesh. I took and I found it emdually acquired with beat, but its abnormal Minpo and fool, and became like a human hand but always larger most for ger then be increased as. When once it had got aliane

and warmth it returned it through the evening

4. A though the unidents orms were naturally formed and the budy correctly shaped, the face mover assumed a natural look, and during a part at reast of the evening I believe that feet were wanting. I passed my foot under the figure, which sounced to be off the floor, and found no obtancle. I believe that no foot were there. The face presented throughout the evening a compactely alsocatual appearance. The complexion was justy, and also bad was work the lips compressed so as tgive an appearance of pain ; and the glamy eyes, with their perpetual stars, gave the face a most unmatural look. I tried all in my power to make the eyes blink, but in value. The whites were annotherally large, and no spolids were perceptible. The free was unknown throughout the night, though at other tomes I have man it look justiced and protty

95. I felt the breath from the mouth, and I saw the chest rise and fall as breath was drawn. Moreover, as the figure stood tone and any by my side, I could feel the beating of the heart.

There was apparently a fully-organized body

5. I handed the figure my close and asked it to set down. not very long after it first appeared. The process of sitting down was most possible. I spologies for my expression, but I can fluid no other. It simply doubled up, as though some one had touched a meing which caused it to bend. The legs were handled under in some way, and the whole process was as onlike a lady taking a seat as our be integined. At a later period of the evening the process was suny, graceful, and natural.

'7 During the whole evening the figure was in immediate corresponds to may I could bough tent will. I was frequently between it and the cabinet. I could have gone through the door into the enbinch, or lave grouped, the figure at will. This scarcedy asymmeted a tricking sporit. I famey. Such would have been careful that it should not be at the mercy of any enrique investigator, especially one who who had shown much trying carbotty as I had. I do not propose to offer any theory to account for the fact which I have receivables. I have none, and I must see much before I care to fining one. This form certainly stood more bendling, inspecting, and probing that any I over mor. Indeed, that a young processing who was easily know mayone to a rough filled with fourtoon people, should have been able to croke such a manifestation, at over the possession of medial powers of a very rare st or The figure suomed quite reluciant to go, stul departed upper untily in bottor condition than whom it first appeared

I have already said that I applied my our to the thin paper which along repainted to from the cabinet after the seance was were and it is a promining for the to record my conviction, as a turt a tea that no movement of ne manham in the exhibit sould have escaped me. I heard no sound winterer. Complete stillness prevailed in the submot, and I entertain an doubt phenomenal on the floor."

[To be contenued.]

by modern Christenslous had not been under the domination to convince the world of the truth of a religion that taught, while it could not prove the continuous of life after the dissolution of the body.—Bolden Gate.

[It is preferable that correspondents abould append their names and addresses to communications. In any case, however, several appartunities of touching the bund during the evening, these most be supplied to the Editor as a guarantee of good

Shirts Meaning

To the Editor of " Lines." Sig,-In this month's number of the Fortagality Eccess there is an article entitled " The Evidences of Spiritualism," by F H Brauloy, written against Spiritualism, which I wish very much some competent writer smong ourselves would meet and answer. Such an undertaking is utterly beyond my powers, but there are one or two points on which I would like to make a few remarks, as, though a Speritualist of only short standing (some eighteen months), I have read and thought a great deal about the matter, bearies having some little practical experi-A. He is every installed the expect decitate and manage spart, and continued by according age to facult and ple noment, though he denses the Sich was high a dr. or extree the fact that the mandestations are due to those from whom they purport to come, namely, the spirits of our friends and polations. He likewise doures that such manifestations us any way prove the managerality of the soul or the fact of an are as dual existence after death. The points in his emay, however, was a wearesty to teach are the natoriality of the spirit body and the question of spirit identity, of both of which subjects I have some lettle knowledge. I pomoss the advantage of having received a large number of letters or consequenceations. in direct writing from a dear friend who has passed away , and as perconstitute in sort as his correspondent a ready buffield he and a single for so I have not sury the evaluation of his swing hands riting, in lotters written during seances with a well known ties up to contactifications received through my units present in the solitude of my room, as well as when sitting occasionally with a friend at her randomen, all the constructions agreesing and corresponding with one another. I empetimes with I were permitted to make public some of the messages I receive, which throw a little light on the extremely difficult question of the means by a left apports are able to common place with un and which my friend tolls use is to some extent yet in great measure mystery to binnell; "spiritual chemistry, as he also it. oning most utilically for him to explain, or grow to comprehend conself. One sentence I think I may be permitted to quote. It arts "You quite understand the difference between the thysical and spiritual? When I am able to chak myself with the physical aura emanetting from you, I am then physicalised and able to give you show of my presence. At other mass I can only hover near you in loving grandlatehip." This seems to me very clearly expressed. I have no doubt myself that spirite, when in their own sphere, have organised and material bodies, exitable to the almosphere and conditions in which they exist, but that they cannot bring these material spiritual builtos with those to our sphere, when they was to communicate with us, and therefore have to berrow such amount of materiality as may be necessary for the purpose of manifesting from those we are called medicase. Being slightly endowed with what is called modulmistic power myself, I feel a certain espount that the modition was lying, as we afterwards found her, deeply of vitality being taken from me when the consumments on I refer to take piace while nitting alone, the same feeling in less apparent when I am sitting with others, as they then contesbute some share of this force, which our spirit friends collect in of a hoology that was autocrate and wholly discordent with order to be ablate manufest their presence. Mr. Bendley says the tea mage of Jeans, in would have welcomed the modern the "sparitual body" is a foolish imagination." I do not con-Spiritualism. Its demonstrations were just what were wanted coive that the "spiritual body" returns to this earth, but that caive that the "spiritual budy" returns to this earth, but that the spirit is clothed for the time in attributes becrowed from others necessary to manifest his presence. The difficulty of so manifesting in horrowed temperary garls, and in some degree through the mental on well as the physical powers of mortal beings, can be only faintly imagined, and may explain to a certain extent many incomplete and manufactory manifestathere. The only comparison that occurs to me as at all secquate in that of the diver in his combernass and unwendy apparatus, by mesns of which he is some able to overcome the difficulty of exacting or performing his task in a strange element. One would be surprised if, so encumbered, he could set

possibility of their being due to some lower and ground order of of their presence, and the past instruments they frequently spirits. This is not a new sites, but whonever it is presented to have to work with, the writing by direct means of only one word my notice I am asways atruck with woulder as to what can be or one little meanings given by the tedious procom of raps or magined to be the ned to wine network these services to serve tills, becomes a stupendous manifestation. Many, however, of trateand carry enasystem of deception hasting some men for years. The spirit-teachings or communications made and a wife are acadim as by pursuating the relations and friends with whom we believe rather than inferior to these of ordinary morta and any or we hold communion. If it be for our confusion here and the manner, while in matter they are as the light from heaven rum of our souls hereafter, surely it is a most curious and ma- compared to that of gas lamps. The style of sich comaccountable method to adopt. To make our lives better and perer, bright with the hope of a glorums immeriality and reunion with the friends we love, is a work worthy of angels, rather than of demons or elementary spirits. I will only speak in this matter of my own experience—the letters I receive are personated with the percet and bost continuous, with a compassionate lore and pity for those on earth, whose eyes are as yet blinded to the great truth of immertality, and for those who to be strong enough to allow them to give some manifestation long in value for some sign from their believed doed, wrging me showing they are in our midst and soft about a case of soft to help them to attain this knowledge to the best of my ability, of their undying lave and interest in our welfare. - I am, dear and above all, with pretitude and adoration of "The Almostry Str. yours faithfully Pather, the Great Supreme." There is one paragraph of Mr Bradley's estay which I will quote, for I think it shadows forth a hope that he, too, may one day one the light. " Against the re gain of the Spirituarist of we take it at its best, against his conception, that is, of the true aim of the soul and of the duty towards (seel, I have not one, to as ... He avaids for a nove in lord of gelt los the stra see and of 1 th and that he are is would weaken his persuasion, that would cause me regret Surely the coursels, communications, and teachings which land in such a result as this sugnet be derived from an inferior most of a scance -he seems, on the other hand, to be well acquaintent

Auto the possibility of emablishing sport identity. Mr Bradley uttorly denses this. Everyone knows how difficult a uniter it is to prove the identity of a purious who, for instance, has long been about from his country and ent off from all commanication with those who ever knew him, especially if her personal appearance is altered beyond all recognition. In the case of our spirit friends, there are even greater difficulties to represent, for they are invisible, and the oridenes of the likenome cannot be manufact forward, except in rare outer of materialisa tion ; but there are many ways in which they can and do prove their identity without the shadow of a doubt. I conclude M given I will confine saysolf to my own very limited experience in the last and my that whom sitting with the lady friend I which could not by any possibility be given by any other lateloccasions they were to my friend, being private natters atterly will, but of immonse value as an undensable proof of identity Such instances come in family and harmomous circles by

Though his native language is German, he always erote to me in earth-life, and does so still, in very correct English. He wrote on one common that he found it cannor to write in support of proceeding statements that, "As a English Senetimes, however here is a star foreign and to dec, are an odd as those of a corpse laid upon loo' a sentence, or even a sught error in the apel up, and his I not would have done well enough). Fot my personal experience poster occurs when the poster is weaker than mais. In the with Hunk does not correspond with You Hartmann's assortion. position incurre when the process is more of a over from the 3 and his hands disagrossibly hob, and dripping with perspiration written most beautifully in Cerman, and the nex time I set he at a summy aimed oriens. explained it thus " I wrote in Cerman on the last scration directs use. to avail themselves of it. aparts at their best are inferior to those of human beings, there-duction of such marticulation.

fore such spirits must be my a an aferior race seems to one very week. No mount in their wit a nero, unfettered and, of the medium performs it all is, in the face of throat expertfree, they are much over persental and exact than we past ment, an absurdity. Or, does the author mean that the ring mortals, but if we think of the asmost onsuperable difficulties jumps, by magnetic attraction or by some uninvestigated marve

this for the present an open question, but he seems to admit the they have to overcome before they can give the musilest proof munications is, however, to a pertain extent dependent on the instrument through whom they come, and the most highly entallectual spirit finds it impossible to express his thoughts or views with much elearness through an uncoluented medium-thus us mystery, but it is likewise a fact. For my usen part I am overcome with wonder and gratitude at the trouble they take, and the patience they show, watching so carefully for the power

## Spirition versus Other Theories. To the Editor of " Laonr,"

San, -- According to You Hartmann's speculations, all the physical phenomena are produced by the medium, who, for the purpose of obtaining the required results, places himself in a cortain condition called marked or manifest sommanibulians. Whilst the author conferms to an absence of personal experience of the subject-never having, upon his own minimion, attended with other strange physiological facts, therefore, we cannot wonder at his reluctance to attribute these mysterious senaceroom occurrences to the agency of disembound human war to I was the author has taken groat pains to keep out sprits

Or the state of the Forgland transferred his mayor. In some very extraordinary phenomena, e.g., the penetral an al the modium a arm by an iron ring, to is reported that the medium's hatale become as ould as those of a corpse latel upon for." Parties on, p. 41, the author records the various experimonta (relating to the penetralion of matter) of Reiners, Bradley has had few, if sury, opportunities of being present at Akarkow, Olcott, Zöllner, and other competent observers. these private or family circles at which proofs of the identity Here, however, he does not consider the facts as "very A low sourish communicating are so feequently and repeatedly extenordinary," but an a "specially improbable class of phenomina," and concludes with the remark, " it is generally secreted among Spiritualists that a medium in the summambrile before mentioned, we always get messages through my guide, some is able, by the ponetration of matter, to get free from and to reasons every seet of festoning." One might be permitted ligence than the one from whom they purport to cook. On two to ask whether Ven Hartmann does or does not admit the passage of solids through solids. He certainly does not state so naknown to either my garde or myself, of trivial import if you definitely, and much depends upon title. But I beg to remind the author that Spiritualute do not generally accept the theory that a ring helps itself upon the neckenn's arm; but that, on the hundreds, but naturally they are not made public. As regards contrary, Spiritualists who have made the experiment in quesmy correspondence with my spirit friend, busides the familiar tion, possess sufficient evidence to contirm their belief-if not to handwriting and signature there are many little unreistabable absolutely prove—that the disintegration of uniter and the fixing signs, proving that it is really he bisself who is writing, and of a wolded from ring on the modum's wrist, is the work of discontrolled burnship opts

As to Ven Hartman - courte p 'Il it must appear to the reader that he really admits this very extraordinary piets one non English, and I prosume that this is because the medium from constantly recurring observation, the hands of the medium, whom ne gent the - wer to wretethose labors in do of writing a which by means of still uninvestigated nerve forces, predices,

## The Phenomenality of the Subject. To the Editor of " Liour."

Sing olf I have confined myself, as Mr Gurssy mys, " to a single branch of percipience—the percipience of an external branch of percipiones for an attack on try position. If there can be no agreement between me as to the necessary couch tion of percipience under the form of space, it is under to carry the controversy into hypothetical worlds of non-spatial objectivity. My way is effectually blocked by Mr. Gurnay a denial of the seconds of a local filling at the percipiont point of abserts a norm a works of spatial perception

I containly thought at one time that Mr. Gurney was wavering as to the conceivable sufficiency of the mathematical point for spatial percipiones. As my organisms to the contrary depends entirely on the essential character of all matial extu nality, and the relation this involves to a self-representation, i de not now how it can be affected by the supposition that " externality and "spatial relations might have a meants, acknowledged as being co-existent with our creation in the rather different from their present ones." I cannot give him Morano records supposition a more which would make it at all relorant to made But it is clear that Mr. Gurney does adhere t the most concared point (though he will speaks d it as pros. ty "as a sense as object to the perci pient, which I carried than states how a matternapoint could possibly be). And so I am afraid we must agree to deffer. For I can only repeat that it is a representation of raynelf that her to be placed at the point of chaptration, not the more unity of apperception, a representation of myself as at that point, and that such a local representation is secondardy, as I conceive, a local filling. Mr. Gurney does not recognize that necessity. I believe he does not recognize it because he does not lay stress, as I do, on the word representation which, referred to space, is extended object. Bubject and object must be as aguaded a consistenthat I can represent the subject or determine it was the fundamental form of time only, but for a food representation the form of space, which is not the authematical abstraction of a point, is smoutist. If we easinot agree upon these, it is useless to discuss the further ques on how the extended ashiest-object must also be conceived, so organism. Given the | 1 a, non with the make with reference to senaces for material as subjective construction of a world of space out of the feelings us a consciousness, the first object thus constructed will be-I contend necessarily -that which can be afterwards represented as the condition of all the rest. And I find in the actual course. tion between my body as percept and my body as condition of perception (organism), the general relation which can be unliested a priory as the condition of porcepiones at space.

One word more as to the homogeneity of the sulpost-object with the objective world to which it belongs. This does not mean for me that a cell is represented to correspond with such particular kind of semution. I have not to represent soyack as a culour or a sound, a testo or an odour, because I have those several sensations. It is the objective world-spetial or non-spetial as the ones may be-towhich my nomention refers use (or to which I refer my semuntion), not the particular semantion trackf, with which I say the subjectobject must be homograpous. The conformity which I posterlate is simply that of extension in a world of space, and of the but in simply that of extension in a world of space, and of the correspondingly general mode of representation, whatever that strongs facts observed and recorded by persons of continuous that any be, in a world of percepts not implying space at all. Given a world in which the sole mode of percepts not implying space at all. Given could have foreseen that the Journal of Cartesian and Springalous, when we would have foreseen that the Journal of Cartesian and Springalous, when the world have foreseen that the Journal of Cartesian and Springalous in the could have foreseen that the Journal of Cartesian and the could be precised as the strong facts observed and recorded by persons of continuous that the could be precised as the could be prec experience or consciousness, is of ideal harmony - the only some in which I out conceive music without sound implying spatial externality.-I have still to relate

existent in force or more dimensional space, with a two or more. It maniful notes, to a me, since that is the indepensable condimensional time at his command, might have arranged the differs of consciousment. But the me must be represented in consciousness, and such representation must be require to (or Loursegeneous with) my experience, since it is ontirely derived therefrom, unless (contrary to the hypothesis) and preser concent would seem to follow from the hypothesis of a world of tune and nothing also. I confess I do not mysalf see any more a sum by me soft by prescrince in or representation to others, as a harmony, than as coloured extension of a cortion form. If Sen, - Allow our to state that the title of the paper I read to | there is any absurdity, it is in the hypothesis (of a world thus The Relation of Faith to Evidence in Martini Experience," modes of perceptance, we have a more general beaut of objectivity, and therefore of objective self-representation, just as extension is such a basic of our existing world, and self-positing therein.

## "In Wan Redeveloping a Latent Sense?" To the Editor of " Lagur

Sta,-in H. E. Starrott's interesting article in your sense of world "-that as because he homed especially selected that December 5th, there is so much to admire and sympathiae with. that I feel a retoence in saying anything to datract in any way from its value. Still I think stahould be shown that it springs from an entirely inicialous foundation—and the change of heading I have adopted above, (" In Man Developing a Sixth wall can to chicadate thus.

For his not this sense our great to man you the earliest

See the Bible testamentes from Content to the Revelation See the Delphus Orneles "

See the supported worthly strong averge nations "

See the accounts of the so-called superuntural in all countries, and mail ages

. This sixth sense is in no way a sero senso, but a sense

It has simply been lost to view through the more worldly somes granting such assendency over the mind of man, at to drown for a time the fluor and more spiritual sense

But that some has always been part of the soul, although, like a veix of pure gold, so deep in the bowels of the parth as to be and secovered, such this, our greatest and purest treasure, has lamholden in the recessor of the soul, both individual and untions only of late years to be donnterred and redeveloped through the recotors on our nature of a wave of spiritual emlighten mont, that seems to be gradually permeating, not only the ladand and manual, but the empered soul of our planet.

Should you consider these for smooth lies as the right direcon, may I ask you kindly to allow them state in your next I am an taith a y yours. LILL

## THE UTILISATION OF PRIVATE CIRCLES

We have already shown how the plan of Research now in operation will beneatt the medium who devotes his psychical powers to the service of the public, too often with evil results to himself. The gradual dissipation of and attract influences of the earth, earthy, or even lower ignorance must benefit him by the development of better still. The records of such circles, if any be kept at all conditions of investigation. The graduation of circles will [systematically, are not of a antare that can be made public. remove one of the greatest difficulties under which he The unimating principle is one that is mored, and thus abouted. The exclusion of persons, for one or more of the lugical, parent, most impressive plane of Spiritualism many rensons utilitied for a place in any circle, will be to is one almost unknown to, and altogether unappreciated by, him an unpoxed benefit. Acquaintance with the least the autside world. They take their bles of Sparitanham conditions of pagary and research will prevent him from from the police-court, from the average magazine artale, seing placed in positions injurement, hurtful, and conducive from the buffeeneries of a promisecous circle, from the to misensception and error.

But the public medium is not the only, though he is the best known, channel of communication with the world of cannot even imagine. It is not too much to my that murit. It would be a revolution to our readers if it were possible to give some account of the private ejector that are hold regularly and systematically throughout this kingdom, ception of that much missed term as the pollucid purity of and of the results obtained in them. They are occupied usually with the higher aspects of Spiritualian, often with in London its more distinctively religious phases, or with intimate not mered communion with friends who have gone before rate the world of spirit. Most frequently they are secure from intranen and change, and experience has taught the best cond tions for the results desired. These are not such As the frequenter of a public circle seeks, and are, undeed. wholly apart from what he is likely to obtain. A permanent circle into which no fresh element is allowed to penetrate is fiely, as very rudimentary experience teaches, to socare results that a promise tous assemblage of mechanent and often manraonious elements is not at all likely to sible for publishing, records of fact which may be useful and sahieve.

It does not seem to be sufficiently apprehended that a circle composed of a dozen persons scated round a table, or in a horseshoe form, obtains objective manifestations or y after an internate blending of the psychical elements of which it is composed. If there be in any part of it a person whose psychical imponetrals sty is proof against that Spiritualists at home and abroad. By this means an intiintimate interblending of the subtle ages that sucrounds each of us, the results are so for interfered with, and possibly stopped. A promiseuous circle, collected at haphazard, affords, therefore, a precurious field for investiga-

reckening with its unknown elements and eliminating possible conditions of fraud. That such remarkable results are so often secured is due chiefly to the more complete development of the medium, and to his indifference from long practice to conditions which would paralyse a less hardened psychie-

In a private circle the line of resistance is less marked. The elements of which the circle is composed are usually more intimately fused, are more harmomous in themselves, and more at one in their intents and desires. They are on a far higher plans of elevation, and the emotional, often the religious element is present in a marked degree. The medium is surrounded by congenial influence, is at case and readily open to access from species who are on intimate terms with the whole circle. He is cared for with a wise and tender cure, and his sensitive nature is not wounded by rule and foolub tests, falsely so-called. The evidence of We have recently sent out a number of impath accounts. Spirit-communion is too clear to the spirits of those who scok at thus -for spiritual things are and must be spiritually discorped—to make it necessary for them to impose harassing and often hapossible restrictions on the friends who return to them. They have learned enough to know that such a mothod of material test produces mevitably, and by a natural law, results of an order that they do not wish for : results confined to a lower plane, out, wequestionably, more suited to the plane of development occupied by those who devise and empty it

> In such circles exceptional results are obtained under exceptionally perfect conditions. The medium approaches in ideal condition of harmonious development, and the circle is freed from the gromer elements that so paralyse results in promiseuous circles, or, still worse, that invite meanest representation and the conrect parody of that which is boly, pure, and ennobling to a degree that they when we speak, from this intimate experience, of Spiritualism we mean something as far removed from the rulgar conan Italian sky is from the murky gloom of a November fog

> Suck circles we are aware must be hely ground on which no trusion can be permitted. But there are others, held under conditions hardly less favourable, where no imperchable results are got, and where the communications are not of that betimately personal nature that shuts them off wholly from publicity. To these it is hoped that some secen may be obtained under the plan of research with which we have been now for some weeks concerned. Some, it may be, can give to the Central Committee of Control, who slowe are responvaluable. Some may even be able to admit properly certified persons to witness some of the more elementary phonomena, or to listen to some teaching from the world of spirit. It will be part of the work of the Central Committee to seek for duly qualified persons, for whom they will war testimony, notes to the acquaintance of experienced mate bond of union will be kept up, and the results of inertimable value collected in private circles will, it is hoped, be to some extent utilised.

The average invertigator is shut out from this sphere of tion on other grounds than those of the impossibility of lobservation, almost necessarily by the nature of the circle,

and finally by his incapacity to appreciate the evidence with which he has to deal. If there were ever any chance that the evidence of which we speak might at any time be made public, and submitted to a norotiny that is often ignorant, and more often impertinent, that chance has been lost by an almost inconcervable folly. It remains for the on Tyne. Experimental Section of the London Spiratual of Alliance to approach this mean of evidence from the side of sympathy and experience.

In consequence of the Christmas holidays, "Legare" wall be printed a day outlier next week. Communications should, therefore, reach us not later than Monday morning's post.

## A REMARKABLE MATERIALISATION SEANCE.

On Toesday evening, August 15th, 1876, I, by invitation, attended a séance at a private residence un Newcastie-

The hour appointed for the senuce was eight o'clock-I reached the house at 7.50, and found the company assembled in an ordinary sitting-room which was on the first theor, was plainly furnished, and about 12ft. or 14ft above the sevel of the street.

The room is 14ft, by 11ft, and is entered by one door in the corner of the room , the window at the other end faces the main street. One corner or recess of the room is formed by the front wall and gable end of the nonse, and was screened off by a clark curtain suspended from an iron red, the window was entirely closed by deal bearding the door or entrance to the room was closed and locked and hasped from the maide, so that there was no access to. nor egrees from the room

Across the window and close to it an ordinary doubleended sofs was placed, and the medium, Mrs. P. a lady about forty years of age, stout and matronly, reclined or the sofe with live feet towards the curtained corner of the room, and her head at the other and of the sofu reating on a pillow. The company eat is the quadrant of a circle in the following order, and extended entirely from the end of the seefs on which the median lay round the two sides of the room close to the walk, thus preventing the presibility of either ingress or ogress through the circle of the sate s. The sitters were in the following order:-Mr W P next the nofe, Mrs. JL, Mr. L, Mr. R., Mr. Backas, Mrs. M., Mr. M., Mr F., and Mr P.

During the whole time of the connects lamp was burning, and during the greater part of the time it berned so brightly that I could see with distinction the features of all who were sitting in the room, and the medium reclining on

That the median recluing on the soft was visible during the whole sennes to all present there is not the least doubt.

The senter was commerced at eight o'clock promptly A sentable hymn was using and a short and carnest prayer offered, after which the musteal box played, and we sat in silence. After sitting for about twolve minutes the curtains acreening the recess began to move, and a tall, white form presented itself , the partial presentation took place five or six times at intervals of about one an ute, and finally a tall, female form emerged from behind the curtain , she was draped in brilliant white reliment, which covered her, in the fashion of the young girls of ancient Greece, resembling the gards wern by Galatea in the modern drawn of Pygunnon and Galates. Over her head and theo there was a thin, almost perfectly transparent gauge veil; on her shoulders was a cape or cover which descended a little below her waist; she was clothed from neak to fast in a loosely-fitting white garment lier bust, which was small and slightly developed, was loosely covered by her cape and dress, and her body and lower extremities were well covered by anderately ample skirts. When ahe mised her arms, which she frequently aid, the cape fall from them, and left exposed slender arms naked to the shoulder She was, as I have said, slender, elegant, and sylph-like, and the medium, who visibly lay on the sofe, was a stout and very fully-developed matron.

The figure was the bount-uleal of a levely girl in the first that if they would do so at once. The amount at present finals of womanhood. She moved about the room freely, gracefully, and modestly, with all the air and grace of a

The figure, on first emerging from the recess, walked timidly into the centre of the room and looked modestly round on the circle of sitters. She approached Mr. J. P., and after slucking hands with him she went to Mrs. H.,

who presented her with a bounust of flowers, which she have she wrote "Good-night", and I have now generally accepted. She then went to Mrs. M., and the paper containing the writing in my possession. received a bouquot from her, and another from Mr. P., who But at the end of the crede.

her right hand, which I took in muse, and held it one hour and s-half, and this wonderful seance closed. while she Rosed me on the brow the feeling was that of recess, and I observed several times during this in fully spnurkable scenee, that when the payeluc form remained recessand returns of her dress was brilliantly white, and her mations free and firm. She appeared to lose power and re-appeared among the sitters at least twenty times during the avening and always with the same room to.

When next she presented herself I was decreus of beside her this she kindly greated, and I stood before and w t m a few motion of her. I then new that the top of her attempted. head was or a sevel with my eyes, and that her may these oft our. there is " melion taller them the hed anywheray's obly on the sofa. After the morningwho say that on an adocularies conscious what, whose past London near the certes of the room, not white the and we sat in a . hindred and ampressive whence one of the ger tlemon present introduced the following words, which were two took a and enthertly by the company (Hyam 193, " When the nours of day are mumbered," &c.,

The hyn sering finished, the form again retired, and pupped ring, sok a cautionaly come the coom, and when at a sample from her one onto medio manuscrip passes towands her

on the sofe, began to move, clumging the position of her knight, and second to be under some popular influence, the psychiaform, or palpoble apparition, then approached the meetium, form, or pulpable apparitum, then approached the meetium, the meaning over her, embraced and kined her fervently and for a short time medians and payelite form were chapted has some noter in Switzerland, and in new residing in Parts. A in each other's name. The psychic form then released herself from the medium, and sat on the sofa near her feet. Again ratiring and reappearing, the sat gracefully on the vacant closir, and Mr. P rose and pronounced a very impressive and appropriate invocation. The form again rebred, and returning, set beside the medium, bent gentar over her took her in her arise and raised her up into a sitembedied human beings clung together for apwards of a amounte, and then the medium was gently laid upon her

Again, the psychic form retired, and reappeared and wasked round the room, slocking bonds with the sitters. I requested permission to feel her pulse, and she immediately stepped towards mr, extended her right hand, placed it in my left hand, and permitted me with the forefinger of my right hand to feel her pulsa. It was feeble man contemporary says. As far as I can see, mediuman public perfectly recognisable and beat at what ap- am because of Source along governor appear to be much peared to be the rate of 70 per manute. I counted that The results of four other peared to be the rate of 70 per manute. arm-chair, and was resting gracefully and easily when we have the reader down to the Spa traduct together asked her to write in our presence. I supplied a pocket-frauda so long. It is probably due to the spatial together well-night book and paper to write upon, Mr M. supplied a pencil. greater socurity to genuine mediums, and parting the moreoment She took these and resting the book and paper on the long a proper feeling.

December 10, 1863.

She entered the recess, respiesived, and walked round the room, shook hands with all who were present, permitted Gathering these flowers in her hands, she possed believed several to feel her raiment, which, judging by feeling and the curtain, and on her next appearance in the course of a appearance, seemed to counst of the finest muslin. After couple of minutes she was without the flowers. She shook this, she sat on the vacant chair, and Mr. H. delivered a hands with and embraced Mr. W. P., kissed Mrs. Moule very suitable address of thanks to the other-world visitor and others on the check or mouth, and anoted nearly who had kindly favoured as with her presence. She retired the entire circle. When she approached me she proffered within the curtain after having been with as upwards of

The weather was almost unbearably hot, and ofter the human lops, and the explosive sound that of kissing. Her last appearance of our psychic vastor I amount the bond was worm and most. She again entered the took foor an took charge of it out the glit was turned

The neclun gradually and slowly recovered from the visibly in our presence for about five minutes, her trance weighthe had been the whole evening and was gar nexts become less where real substantia, and her power to feeble and exhausted that the two ladies present had to of motion appeared to decrease, but on entering the assist her across the room. Immediately she left the sofa I took up my position near it, moved it quite away from where it had been standing examined it carefully, draw solkaty in the open room. She entered the recess and maide the curtains of the recess, took down the curtains, and did not discover anything that presented the slightest appearance of deception.

I exemined mustely the walk, floor, &c., and all were knowing her exact height and requested parasission to stand perfectly sound and good. In my opinion there was not the possibility of successful deception, nor was any deception.

I refmin at present from expressing any opinion as to theories, but as to facts I believe those just detailed are as real, genuine, and objective as the fact that the Thames flows

28, Lovane-place, Newcostle-on-Type, T P Dankas. December 7th, 1885

## THANSITION

On Tuesday, the 5th inst., Mr. Rudard Gala, for many years editor I to Hall New some to the higher life in high fourth year. He was a firm and intelligent Spiritualist, and while he never needlessly thrust his views before people to whom they would be intwotomer, he was nover anhanced to arow his couriethe when the fell has be could do so with averaging the his The medium, who had up to that time him perfectly still on me of west was to him a great and server truth. He gentle nature and kindly manners wen for him the affectionate regard of nil low friends and it is onemed

from her ong about him, mys that he has suffered terribly.

A beat interesting brogen-ineal notice of Mr. H. Chatmondular-Pennell, with an excellent portrait, recently appeared in the Fid. of district. Mr. Pennell, it will be recollected, published, maler the title of "Bringing it to Book," a series of antesorthous absterwiting scences that had taken place at his house.

Tilk Newcastle is Tyne Sees at Society has invited Goesman Barkas to the er a lees e in the Continuitiers half, ever her took her in his action and raised her up into a sit. ment, and a fine of £40 for a grin had libel.

Da John E. Pouron, so well known to many of our readers,

is amounted to give lectures in the United States on psychical and Spiritualistic subjects. His address is Gayose Hotel,

Rev C if Spurgeon who, in response to an aughentian rept with the difference of the strong and an area of the strong as a consistent of the spurgeon of the strong as a consistent of the spurgeon of the spurgeon attention twenty presenting, be asked her if there was saything she particularly wished for. Before ahe told him, the made him promise that he would not try to procure the objects for when she had been would not try to procure the objects for when she had been sources. She then told him that she been washing for a prime.

## A MESMERIC INSTITUTION,

A proliminary meeting in furtherance of the above object was hold at Dr. Wyld's home, 41, Courtfield road S W Sumlay, the 13th.

Mr. Regan Mr. Yamper Mr. Prac. Mr. Recomm and Mos. Config. day post copy of the reportation were opened as about the day James Mr. version with Mrs. De Mor an Maint no. Mrs. Walnut say r Mr May May Harry Mrs and May Long M. K. o. States by a reason of members on Mr. Stambin Minot, being necessarily out of town, was unable to

Dr. Wyhl stated that the movement had arisen out of the generous offer of Mr. Hegus I gave a on town in the four aim of an institution or nespect for mosmorio treatment. He ax planted how the Meanwere limitative, founded nearly fifty years ngo, and which was supported by Dr. Ellintson, after doing much good, collapsed for want of funds, and he regarded them as a sage hat we alread though with meaning we we prove the matitute for out-puttants only, and as a contre where a registry of the americ healers could be consulted by the public. The estitution would also afford an opportunity for experimental the a men some parameter siew was a the use of we study only a managery read allow the office he are ber my mont, would affore anthront necessary and to on a way, and a new rousin about the is a situation readily. necessible by rail or otherwise. He also orggested that there chould be a small committee composed of those who pear ( tabilly understood mouncrims, and that the institution should terms the assistance of a qualified moderal uses who could 4 4 1 1 1 1 1 1 1

Mr. Regan sold his view acrowhat differed from that of Dr. Wighly for his house a large of more to your tage. offers for a month of the Sale to the date of the sale of he was willing to anoth my good plan which is to be a like the poor as well as he had been a like the poor as well as he had been a like the poor as well as he had been a like the poor as well as he had been discounted been and the poor was the ground not the poor was the ground not the poor was the ground not the poor will be depleted into sook a circle, or fit be preferred they will be advised been a point of the preferred they will be advised been a forward the profession of a private circle. ne bject, and that a small he go it a just we are annex time.

ne he found the interference of a committee or of dectors would only retard progress, and freedom, and he for one reald never amount to any distation in these matters, but, he added, if such an institution as described were established he would be clad to

Dr. Wykl, in reply to Mr. Younger, explained that nother the committee nor the ductor of the mutitation would seek to control any qualified memoriat in his work, but just as physicians in separate practice desired to have hospitals to work in, so he was sure proution monumerists would find a control hestatution of great bought por the case groups which offer take the by giving measuring the aid of a central organization.

Mrs. Do Morgan remarked that the original Manneric Inst. to suffered from the officious interferences too trong any Mr. Yarr, in but that no sur-interference and is compared in the top that injurying the way is made that himse estimational cen i worth and to an encount as well as to this negative of an

Mr. Prior would be glad to apprort a Manueric Institution, and bottered that it would be the means of extending the mefulness of this mode of treatment.

Mr. Reduct and Mr. Reducts spoke to the same effect.

Mr. ! H. M. w said he took great interest in the spread of measurement, and fully believed that the present chaotic state of inconcerns was mission to the success, one that you are a rise a partial correct is in how he refuse used the subject be tames in jublic estumeren

Major Wallow Corportor would support such an mailtrainm, one great benefit to be get from which would be that the public e and here tool a costry of measurariets with special andowments or regard to the various forms of disease.

The meeting then separated, and in the meantime any reggosthers on this subject can be sent aither to Dr. Wykl or to the Office of "Ladyr" for publications

Dr. Stratuers, having in give evidence at the Middles-berough Petty Sessions, declined to "kim a book which had been handled by all sorts of people," but affored to do so if a piece of clean paper were laid upon it. The Beach declined this, or aren to receive his affirmation. He finally kissed the book under protest, on the ground that he 'ran the risk of catching some

## PHASES OF MATERIALIZATION

A CHAPTER OF RESEARCH

OBJECTIVE PHENOMENA OF SPIRITUALISM Br " M. A. (Oxost )"

(Continued from page 010.)

Again, Mr. H. M. Dunphy-a name well-known in storary circles—testifier\* that he begged permusion to see the medium and "Florence" at the man time. The latter suptising also, came from under the cartain and remained in drew saids the certain, and Mr. Dunphy's sacrative proceeds:-

"Buil holding the curtain, Florence pointed with her disengaged hand, and there, seated in the chair, with her head thrown over her left shoulder and the right eide of her face visible, was unquestionably the form . . . of Miss Showers. He then saled to be allowed maintely to follow the form into the cabinst. The request was granted. Plorence had not disappeared a second when she put her right hand and arm through the curtain and said, "Come now," I sprang up, and throwing aside the curtain, which I held back wate, I stood uside but populiful white material, was perfectly ovelved, the dericages in could see nothing except Mine Showers still in a transa in the arm-chair. . . I then held my hand over the head of the medium, and it was grasped by a thin, cold touch, but I could yes no hand. I then said, 'Will you touch me when I touch the medium 1' Yes,' Florence replied. Bold out your hand and rest it on her bund." This I did, and was again grasped.

Mr. Blackburn gives his testimony, further, that in Mrs. Showers' own house at Teignmouth, Davon, he passed a thread through the perforated lobe of Miss Showers' tar, mented upon. bringing the two ends of the thread into the room in which he sat. "Leonore"-one of the materialised forms that the edenor. A noise as if two persons were wrestling was heard were accustomed to appear—came out into the room. Her in the cabinet. It increased, as if a struggle were taking piace. same were not pierced, and her foot was melformed, and was , At this juncture, and when we were wordering what it means closely examined.

The records of Mr Eglinton's mediumship would furnish a wast amount of matter of high value. But I am compelled to present speciments only, by reason of exigences of space, magnifulity, he would have fallen to the ground had be not and, moreover, I am glad to know that an exhaustive been caught in the arms of the materialised spirit. Momentary record of facts observed through his mediumship is now in as it was, it sufficed for the whole of the eleven spectature course of preparation. The following letter,; presenting to witness the presence of the spirit and the wediens in some important matter which will be useful in forming conclusions as to the methods employed, may be appended cuses in Eghnana, I was directed by " Josy" to enter the dark

Str. -- Your renders are aware that Mr. W Eglinton, in order to continuehis important work of psychography without suffering from undue exhaustion, has found it necessary to dealine many requests for scances for materialisation. It was under presents of freedship that he kindly committed to favour me

† LEGEZ Agreeaber 22nd 1864. Rainvoore may also be under an account of a adjunctional to " \$10,823," October 21th, 1864, by Florence Marryan.

with a sesnee for Tuesday, October 28th, 1884, and as some of the content of Populous Paracesces 600 the manifestations were remarked and unusual, your readers are a few of Cross Wasseries and The circle was a large one, necessity appearance of the leading phenomena. halos and seven gentlemen. It was very harmonious, and [The Editor of "Learn" deerest it to be elistinally the physical and metoorological conditions were all that could one gas burner was kept alight during the continuance of the within three foot of the curtain. During the evening we were favoured with seven materializations. Must of thom, if not all, were of the third or highest order, which, considering the number of sittem, was certainly remarkable. In my experience, se them appearing either at a large or at an undeveloped and promisesom circle, may, with very rare exceptions, be classed upder either the first or second order; that is, either "transfigurations" or "animation of the model." The whole d he forces , as avening were, in my opinion, true stateringes. the Two of the hypersumanlo great efforts to obtain recognition, at not for if the sixtors, to whom the materialised spirits pointedly addressed themselves, were able to recognise them with absolute certainty.

The following singular phenomenon then occurred. An -bject, dark as pitch, and resembling a black cloud more than front of where I was citting. It was not more than eightoon makes from the ground, and awayed backwards and forwards. In process of time it assumed a rotary motion, and two patches of white vapour because visible. As the process continued, I could disaly trace the entities of a form, apparently sitting or the ground at my fuet, with its arms moving continuously horsewards and forwards with a circular motion. At this stage, the arms only of the figure were clearly developed. Gradually the white meterial increased, and a face and burt arose, the arms still keeping up the mune motion as if wearing. By degrees, and rapidly at the close, a tall male figure, dressed in the usure which it had first suscepted having disappeared as if absorbed, or dispersed like mist before the sun. Thus sleven persons had an opportunity of witnessing, in front of the curtain stell within the circle, the whole process of materialising a form.

As a matter of ovidence, it is worth noting, too, that during the seanon at the time that one of the appearances was in the circle, the medium in the thick room was taken with a fit of cougling, which was heard by all and com,

The most remarkable phynomena occurred at the close of the curtains were parted, and the medium was literally thrown forward into the sirele. Behind him, and holding back both curtains with the outstretched arms, stood the materialised form of " Brucat." As the medium staggored backwards in a state of the cords at one and the some time. Immediately the curtain room and take the med am a glam of water. Having it ready at my side I kat not a moment in complying. Feeling my way to the sofa I found the medium reclining, and still in a state of trance. Raning his head I gave him the water, and while doing so, " Josy" spoke to use in a direct rosm and requested me on returning to increase the light. The medium after the monoc was painfully exhausted

The material or elething in which the spirits appeared was the same throughout, although variously arranged on the person.

On a former occasion I had been allowed to handle and examine it in my hands for several minutes together. A few weeks since, a transcriptional spirit, standing by my side and plainly visible during the whole time, detached from his person a large portion of this lovely gause, and put it over me, completely covering up my head and face. To the teach the neaterial was firm and strong, as it resisted the lateral pressure of my thumbs. It was, however, as light in weight as a mowflake, and, as it swept the face, felt more like a cobwelthan a authoratial material.

Another medium, with whom the electric test, applied to Miss H. Cook and to Miss Eva Fay, by Mr. W. Crookes, F.R.S., was successfully tried, is Mr. Haxby, Mr. J. Frootoung describes in the Mediton a series of electric test somess. After several failures, on April 24th the medium was fixed with electric wires passing round his waist to the chairs on which he and. If he moved a bell would at once ring. In less than a minuto after the preparations were complete two forms walked from the cabinet into the room, and were visible to all the nine observers. They then retired and the bell rang. Once again the predian was tied with insulated wires thick enough to resist accidental breakage. Several forms came out, two at the same time, both talking while the medium's voice was also heard. The forms were desired to beautithe wire, which they did, and the bell sang and the medium, who was found exactly as he had been placed, was released."

(To be continued.)

## ANSWERS TO CORRESPONDENTS.

SPECIAL NOTICE.-The Editor of "LIGHT" cannot, save in exceptional cases, and article to answer correspondence through the post. All inquiries reaching this office not later than Westnessiay morning, will, as far as practicable, be answered in the eneming number of "Light;"

W. GLANVILLE: -" Coincidence " received.

MARY BOOLE.-We will look up the MS, and return it to you.

NIXIDA.—MS. to hand. Both this and your former article will be used. Thanks for your conjudence on the burglary at our offices. As you say, "LIGHT" has no money it can afford to lose. £5 10s. disappeared belonging to the Sustentation Fund, £3 from another Fund, and £8 of our personal money, besides other effects.

'XMAS CARD.-The Editor has received a card on which above the legend, "May it never be Empty," is drawn a leather purse. A facsimile of a \$20 note is seen peopling out of it. We trust this in a good once, and that the Sustentiation Fund which is yet far short of the amount required, will speedily receive substantial additions.

Wirn this issue we give the title page and index for 1885. In consequence of this demand upon our space we have been unable to give attention to several communications which would otherwise have appeared in the current issue,

ERRATUM. -- In the reprint in pamphlet form of the address of the President of the London Spiritualist Alliance, antitled "Spiritualism at Home and Abroad," transfer the last line of page 8 to the bettem of page 24. Foreign papers please copy.

DUNOTER'S "MAGGE UNVEILED," —This remarkable work, the price of the French edition of which was £4, has been translated, and will shortly be published, edited by Mr. John S. Farmer. Full particulars will be announced in next week's " Light," together with a notice to the few subscribers who have ordered " Present Day Problems."

Swiss Post Office Order,-We have received a P.O.O. from Switzerland, but no letter of advice accompanied it. We wish to impress upon Continental subscribers the necessity of informing us of the despatch of their remittances, in order to trace the particulars, sometimes until months afterwards.

Last week's number of the Medium was an exceptionally good one. It contained, amongst other interesting and valuable matter, a biographical sketch of our friend Mr. T. P. Barkas, of Novemble-on-Type, which was accompanied by an admirable ink-photo. Its account of Mr. Berkes' life and work cannot fail to impress regulors with a strong senso of the value of his testimony to Spiritualism. His all-round scientific knowledge and experience eminently qualify him to observe and pass judgment upon many matters connected with the subject. We hope this number of the Medium will be widely read, and those of our readers who have not seen it cannot do better than procure it at once from Mr. J. Burna, 15, Scuthampton-sow. Holborn.

## A PSYCHICAL EXPERIMENT.

Some years ago there was in our family a girl of fifteen, a medium for writing and drawing. When being controlled aba above the elbow; then her hand became pule, edd, insensible, and properloss. Communications would be written through it, mostly from those departed ones known to us and to

One evening I brought home with me an investigator. Several neighbours were present having a scance with the meeting, who, blindfolded, was writing. My feieral and I took our sents as the clock struck nine. I looked at my watch and pointed set to my friend that it was a quarter too slow. For a test he erote on a alip of paper, " Can you tall the time by Mr. Reed's watch?' Through the medium's hand was written. Lot me take the watch and I will try." I laid it on the table. The medium took it, opened it, held it near her right shoulder, and then wrote the time marked on the dial of my watch. I wrote," Why did you put the watch near the medium's shoulder instead of her face?" The reply was through her hand. "In pentrolling this medium I sit by her side; I hold the watch not to her face but to my own. In using her hand I am partially natorialised, and so I hold the watch so that I might see the hands and dial plate."

Next day my friend and I had some business at the Secretary of State's office, and in convenation there we spoke of the incident of the previous evening, when Colonel J. R. M., then Assistant-Secretary, attributed it to what he called psychological perception by the medium of the ideas in our own minds-to telepathy, as it is now called-my friend and I knowing how the hands of the watch pointed.

Some evenings afterwards several investigators came to my iouse, two of whom I knew carried hunting watches. These I beckened out of the room, and proposed, for experiment, that we should, without looking ourselves at our watches, ask for the time they marked to be stated through the medium. They consented. Returning to the circle we laid our watches, mine being also a "hunter," on the table, with oursepance requests in writing. The medium, who was blindfolded as before, took the watches up in succession, acted with each in the manner before related, and replaced them on the table with the correct statement of the time marked by them, each differing from the other. The time marked by them had manifestly been seen, but by no mortal eye. The psychological explanation by telepathy or mind-reading was thus disposed of .- C. A. REED, Portland. From the Golden Gate.

FATTH-CURE, -The Nest York Sam states Mrs. A. Wilcox, Oneonta, had suffered for a year with what was said to be Bright's disease of the kidneys, and had been mable to walk for months. Being advised to try the faith-eurs, she left off modicine and took to prayer. Some mornings ago a sympa-thising friend came to her, and they prayed together all the day. In the evening the patient rose from ker bed, walked into the dining-room, and supped with the family with which she was residing, that of Mrs. Potter in Maple-street. The day before she had had to be lifted out of her bed. She has ever since improved, walking now freely about the home. She believes that she has been cured by faith.

A NORER BENEFICESON. -- On Sunday morning, November 13th, at the meeting of the Society of Progressive Spiritualists of this city, San Francisco, immediately after the opening song, Mrs. R. S. Sleeper, a dear and noble souled lady, who has long enjoyed blessed communion with her loved once in the spirit world, went forward to the restrum, and, addressing the president, presented to the Society, as a contribution to the building avoid mistake and inconvenience. We have on several occa-sions received money in this way, and have not been able to the presentation and cerdial acknowledgment of it, the subject of "Spiritualism" was discussed. Bro. John Allyn taking for his text the benefaction of Mrs. Sleeper, urged upon others with affuent means the exercise of a like generosity, as a help to their soul's advancement in the future life. He referred to the case of a wealthy Spiritualist of that city, who, dying, made no provision for the cause in which he professed great interest, and whose cast estate was now involved in numerous law suits, and likely to be squandered in litigation. He thought that a portion of the accumulations of Spiritualists could not be devote a better use than to the promotion of the cause that lies close to the heart of every true Spiritualist. "We not only need a hall of our own," he said, "but he hoped the time would come when provision could be made for the founding of a mediuma' home."—Golden Gate.

of payetrical phononoms, as seem to be worthy of permanent record.

Beyond the general classification indicated, no attempt at tabulation will at present be made; that work will follow in due course. In furtherance of this object we shall be pleased to receive from our readers brief reports of phenomena subject to two conditions (1) That a colordess statement of facts without comment is given; and (2) that communications are accompanied by the names and addresses of these concerned, not necessarily for publication, though we should naturally prefer to be at liberty to publish them, Amongst the phonomena referred to may be mentioned :-

M.-Itappings, Knockings, and A.—Messacriam. Stone Throwings.
N. - The Spirit Voice and Clair C .- Clairvoyance. D.—Thought-reading.
E.—Premiesco, Provisional and
Coincidental Drouss. andience.

O.—Psychography.

P.—Antomatic Writing.

Q.—Movement of Material Ob F .-- Apparitions. jects without Physical Contact. H.—Speaking and Writing in -Presence at a Distance. Tengues.
8. —Miscellancous Phonos
T. —Coincidences. .- Hanntad Rouses. K .- Spirit Identity. L .- Materialised Spirit Forms. Priends having had experience of any of those phonomena w

be doing us a service if they will report them to us, giving-(1) The names and addresses of the pursues comcorned.

(2) The circumstances under which the phonomena took place.

(3) A brief account of the occurrance.

Letter should be addressed to the Editor of "Letter," i.s. Craven-street, Charley Cress.]

## CLASS O .- PSYCHOGRAPHY.

Two or three weeks ago the controls of a median with whom I often sit, intimated their wish to lry some new manifestation in siste-writing, and, if possible, to let me see the this woman who died for him." pencil in actual motion.

We had our first sitting on Friday, December 11th, with the gas of the table with our hands on the slate lying on the table. We this dark saying is evidently elucidated, as far as it can be, by got sense slight, but unmistakable movements of the fragment of pencil, which on one occasion vibrated gently about its history there is nothing more astonishing than the way in contra like a magnetic needle, as it lay on the slate. I was then which this simple sheperdess thought she heard the Divine voice directed to place the slate mader the flap of the table, where I telling her to be the savious of her country." held it close to the under surface of the flap, pressing it tight. So it is the old story. "The simple shepherdess thought with the fingers of both hands while I rested my thumbs on the she heard the Elvius vulce." And on August 19th, this paper upper surface of the table, so as to deprive the medium of any told us "Half the unfortunate greatures in our madhouses possible access to the surface of the slate. In this position I fasce that they hear voices." That is what the paper calls, I heard the pencil working on the slate, and when I brought up suppose, "gaunine hallustration" ! Where is the difference bethe state I found that a bit of red chalk which was left on it had tween the Dady Tolegough, with all its praise of the scatalio been rubbed hard over a considerable surface, without any Maid in some respects, and Dr. Forbes Winslow in 1876, who attempt at writing.

To-day, December 14th, we had our second sitting, and sando apon it close beneath the flap of the table, as before, with both Daily Telegraph is entirely wrong, if French records are right. mpon it cross beneath the map of the table, is better, in the land, it is shought the land the Divise my hands. The medium held it inthesame way with his right hand. The Doily Telegraph says: "She thought she heard the Divise my hands. The medium held it inthesame way with his right hand. The Doily Telegraph says: "She thought she heard the Divise wice." She never thought anything of the kind, if records are resting the thumb upon the table, while he placed the palm of the kind, if records are his left hand flat down on the hare surface of the table in front true. No, her experience entirely coincided with what Spiritof use. He soon became entranced, and the control, speaking ualists and others of the present day frequently affirm of through him, mid that there were spirits there whom she did themselves. She said she heard "the voice of an angel." net know, who were trying to write. At the man time I heard Here is an account of this wondrous mailen's own narrative, the sound of writing, after which the centrel said she would given us by the celebrated physiologist, the late Mr. J. W. bring up the bit of chalk from the slate through the wood on to Jackson, in his "Ecstatics of Genius," from MSS, existing in the the upper surface of the table. Accordingly the medium, still Royal Library at Paris: "In my thirteenth year I heard a voice ontranced, lifting up his left hand, which had hitherto remained in my father's garden, at Domremy; I heard it from the right without moving, flat upon the table, displayed the bit of chalk side, near the church, and it was accompanied by great brightlying in the middle of the space which had been nevered by his ness (edic light). At first I was afraid of it, but I soon became down on the table. I slid the slate underseath the table to my watched well over me, and taught me to conduct myself with side, keeping it close to the flap so as to make say juggling propriety, and to attend church. Five years afterwards, while with it on the part of the medium impossible, and found on I was keeping my father's flocks, this voice said to me: 'God with it on the part of the medium impossible, and found on I was keeping my father's flocks, this voice said to me: 'God

She said she heard the name of Maynard, she thought; no, it

rest of the name being cut off by the edge of the slats), and that in a general way voices are not always to be depended upon. J. M. Eliza Meteyard wrote the life of my grandfather, Josiali

Wedgwood, and Joseph Mayer was her patron at Liverpool, who supplied her with the greater part of her materials. I am confident that the medium had never heard the name of either of the two. He essures me that they are quite unknown to [In this column will be given from time to time such accounts him, and he certainly does not move in any circle in which topics of such a nature would come under discussion. His control anticipates a brilliant career for him in the way of slate-writing, H. WEDGWOOD. 31, Queen Anne-street, W.

## CORRESPONDENCE.

[It is preferable that correspondents should append their names and addresses to communications. In any case, however, these must be supplied to the Editor as a guarantee of good faith.]

# "Bearing Valors as an Indication of Insanity."

To the Editor of " Lanur,"

Str. The Daily Telegraph, if incorrigible, is yet, at any rate, under influence, for it had two leading articles out of three, on Spiritualism, the same day, December 5th. And, if we do not see in it an improved tone, we are glad to find the journal rejoicing that that admirable heroine, Jeanne d'Are, the Maid of Orienze, is likely to be such canonised by the Church of Rome. That she has not been so before can only be because she was condemned by that Church ; and the Church of Rome is, naturally, slow to reverse its ewn docrees. Indeed, only a liberal Pope would be likely to attempt gettlug over the

Bt. Ouen's " Histoiro de France" says ; " Josne d'Are was brought before a tribunal, at which several Frenchmen sat who were unworthy of that name. Spite of last sincore plety and her pure faith, the was declared a heretic, and, as such, condenned to perpetual imprisonment. Shortly afterwards the English condemned her as a relapsed heratic, and to death by barning. Charles VII. did not even make an attempt to save

The Daily Telegraph says : " It is not difficult now to see that the famous French heroine may after all have been the victim turned about half down, the medium and I sitting at the corner of a genuine hallucination," whatever that may be. Still, another observation in the same article. It says : "In all

then said," The insanity of Joan of Arc may be considered a good example of superstitions andness " ! Does he think so now ! a great advance. I held the state with only a bit of red chalk Perhaps not. There is one point, and that historical, where the hand. It had certainly not been there when he laid his band aware that it was the coice of an angel, who has ever since with it on the part of the medium impassible, and found on has great compassion for the French nation, and that I bringing it up that the chalk had disappeared.

I now took the alate close to the light to see what was I began to weep at this the voice said to me, 'Go to vaccouleurs and you will find a captain there who will conduct written, and at first I thought it was only a scrawl, but the vaccouleurs and you will find a captain there who will conduct written, and at first I thought it was only a scrawl, but the written, and at area I mought to the spirits she had seen. you without hindrance to the king.' Since that time I have control assured me it was the names of the spirits she had seen. you without hindrance to the king.' Since that time I have control assured me it was the names of Maynard, she thought; no, it acted according to the revelations I have received and the She said she heard the name of Maynard, she thought; no, it was Metoyard.—Eliza Metoyard.—Did I know the name?

The other name, after a little beggling, she gave as Joseph Mayer. The writing was now clear enough to me; E. Met (the Maid of Orleans was a favoured individual, like Secretor, and

SATURDAY, DECEMBER 26th, 1885.

## UNITY IS STRENGTH.

together in the address of the President of the London provide an opportunity for the sending of some chosen Spiritualist Alliance. The plan then propounded, if successfully carried out, will have the effect of consolidating the various scattered sociaties throughout the kingdom, and of binding them together by a sufficient tie in the pursuit of done, no one will welcome the step more warmly that research with which the Experimental Section of the Alliance is concerned. This is an aimost essential The chief one is lack of money; the old, miserable, preliminary to the wider schome of Confederation between demoralising difficulty with which we have had all along to Spiritualists of all lands of which the President spoke.

It has always soomed to us that Spiritualists waste force and lose power by neglect of attention to ordinary and established principles of action. What is found to be practically good, asoful, or necessary in average daily life sample means at command, will be generous enough to bear us a principle of aution is, at least presumably, of equal on its own shoulders a burden that should rest on all. A application to ourselves. It is universally agreed that few donations of £100, such as Mr. Regan offered towards anion gives strength, and that disunion is a source of one special object, would enable the Alliance to organise a dangerous weakness. Selfishness and self-seeking are vices comprehensive plan of work, and to carry it out under its that work ovil; self-merifice is a virtue that brings its own own personal direction, which would soon place Spiritualium reward. This is the vardiet of experience.

Now let us see how we Spiritualists stand in these respects. There are peattered up and down throughout the British Isles, a number of societies of Spiritualists who are engaged in similar pursuits, and who have the same end in view. Yet they do not keep teach of one management of research, confederation, and publication both another; they do not take counsel together; they do not of its journal and of the books which may be issued from seek comfort and consolation by the exchange of experience; time to time. Here again union would be strength, and nor do they add to the common store of knowledge by giving success would be far greater than when, as now, the various to the public a careful record of facts such as that record of a materialisation seance which Mr. Barkas lately contributed to our columns. They remain a disunited bundle of sticks, when they might gain power as a closely compacted fagget. Each society stands alone when it might stand let those who have no money do some howest work for the shoulder to shoulder with sympathetic friends. Isolation in place of consolidation; individual in place of united effort.

Now, this is obviously neither wise nor well. The question is, can it be overcome? We believe it can; and we believe that the successful carrying out of the plan on which we are now commenting will go far to overcome this source of weakness. We have little doubt that those who ec-operation from export Spiritualists in such omitres as occasionally illustrated.

Liverpool, Newcastle, and the various districts in which Spiritualism has struck so firm a root. They will seek to be represented in these districts by some trusted representative who will stand in regard to Spiritualists and inquirers in his district as guide, philosopher, and friend; and who will be to the Central Committee of Control a channel of information with regard to the events occurring in his own district.

By this means a blow will be immediately struck at isolation. Circles will be placed in communication with one another, and with the local society, and through it with the Alliance. The bond of union will be at once provided. Important as is the work which will be accomplished in the Metropolis by various circles devoted to research, we confess that we regard this sphere of action as one of even higher promise if it be judiciously occupied. We are ourselves so far concerned in the success of this endeavour that we make ne apology for pressing upon the President and those who net with him the desirability of organising some such scheme of associated work as we have indicated without delay. It is said of us sometimes that " Least " does not interest itself in country societies. Nothing could well be more remote from the real truth. We are desirous of ratablishing and maintaining cordial relations with all Spiritualists wherever we can find them. We would gladly receive from thum such records as that of Mr. Barkas, to which we have referred. If we had time we would most cheerfully visit thum, and said to the tie of a common interest that of personal acquaintance. But time and money are scarce with us, and we have not been able yet to find the nucesaary It was not without a sense of fitness that the two supply of either. We are not without hope, however, that subjects of Confederation and Research were treated the working of the plan of which we are now writing may representative of the Metropolitan Alliance to gather facts as to provincial Spiritualism and to make the personal acquaintance of its insiders. If this can be than ourselves. There are difficulties, but none insuperable. struggle. If the denocracy of Spiritualism would bear its equal burden the weight of it would be very light. If they will not translate their faith into works, then it remains to be hoped that the aristocracy of Spiritualism, which has on a very different basis, and would be to this journal of the most direct advantage.

The Council of the London Spiritualist Alliance, as the representative of the great body of Spiritualists enrolled among its members, should have in its own hands the agencies are in different hands.

Let us consolidate all round; let us throw selfishness in all its forms to the winds, and set in the coming year with united real and energy. Let those who our provide funds; cause ; and let all remember that union is strength.

WE are informed that Mr. Henry Slade will be to Germany during the coming month. Through the action of antiquated laws and the bigotry of a small section of the adentities world, he will not be able to visit this country.

A new magazine devoted to Spiritualism and the occult seichnes, will be published early in January next, in Musick. It will treat the subject both from the historical and the experi-

THE SPREET SHOW AND	***	814	***		

Our appeal has not yet received so general a response as we had hoped. Many of our readers who have not yet contributed to glad if they would do so at once. The amount at present received in far freen sufficient.

Remittances may be sent either to Mr. E. Dawson Rogers, Rose Villa, Church End, Finehley, N., or to Mr. M. Theobald, 62, Granville Park, Lewisham, S.E.

BARE GOPAL VENAVAR JOSHKE, the Brahmin pundit and Follow is a believer in Thososophy, and is the recognised head of the not well, she saw-and that I was so very cold I (Indeed, it school of Eastern philosophy in America. Babu Joshoe pro-was so !) She also add that she burself was now surrounded feases to be an Adopt, but in an interview with a correspondent of a newspaper he gave no evidence that he possessed any of the marvellous powers claimed by him.

## CASE OF CROSS MESMERISM. Written in 1858, by A. M. H.

FROM THE UNPUBLISHED PAPERS OF MRS. HOWETT WATER.

Our friend, Mrs. H .....t. has a confidential servent (a housekeeper) who has lived with her for some years, and who, having been present at a lacture on mesmerium some time since, developed into a "sensitive," She has for many years been a "dreamer of dreams" and is open to spiritual and mesmeric influences in an extraordinary degree. It is feared that she is in a consumptive state, her health having become very feeble. A clergyman, a mutual friend of Mrs. H \_\_\_\_ t and ourselves, the Rev. J. W., has regularly mesmerised her once or twice a-week for some time past, in order to benefit her health, he being possessed of considerable meameric power, and experience in meanerising also. Mr. W. had frequently expressed a wish that we (my mother and myself) might see this housekeeper of Mrs. H-t's whom I will call Black-in the mesmeric trance.

Being myself extremely sensitive to meanarie influence, and "mediamistic," my spiritual guides have always strictly prohibited are from being present on any such ogendon. Indeed, I had been told that on no account was I even to unter the house of our friend or come into personal or sympathetic contact with Black. When, on occasion, I have stopped at the door of Mrs. H-t to exchange a few words with her, to my curpoise I have felt a strange mental oppression full upon me, and my breathing middenly become laboured.

On Sunday afternoon, November 1st, 1857 (All Souls' Day), Mr. W. called on us on his way to Mrs. H---t's, to mesmeriso Black. He said would I do a kind act. Would I be so good as to accompany him to Mrs. H .-- t's! He was afraid that Mrs. H -- t was from home, and he did not like to meamerise poor Black unless in the presence of some indy, and her state was such that he did not like her to go without her helpful mosmorio vloep.

Remembering the strong injunctions given to me by my spiritual guides never to go to see Black or to pay visits at the house of Mrs. H--- t, I hesitated. On second thoughts, however, it appeared to me to ben very unkind-not to my unclnistian-act thus to prevent the poor sufferer from receiving her meanaric strengthening through fear for myself. I, therefore, said I would accompany Mr. W., inwardly trusting, however, that we might find Mrs. H -- t at home, when I should have oxcused myself from going into the room to Black. We had afternoon ton and then went to the house.

Mrs. H 4 was from home, Black, looking ill, was anxiously awaiting her mesmoriser, and, after a few memberia " passes " made over her, asak into a deep trance. I at in the room at some distance. Diagreeable sensations had seized me immediately I came inside the hall door.

Mr. W. made some inquiries from Black in her trance state regarding her health. She then beheld a vision of great darkness, clouds in chaotic confusion struggling against a bright light beheld in the heavens. She appeared much the fund, are no doubt fully intending do so. We should be distremed in mind. Mr. W. oxpressed a wigh that I would speak a few comoling words to her. To this I had a strong repuguance. Nevertheless, I did not express this feeling. In order to be able to speak with her I had to be brought into mesmerio rapport with her. Mr. W. asked no to tako Black's hand in mine, and he made mesmeric passes over our hands. Black's hand was now grasped round mino of the Theorophical Society, of Bombay, India, is a guest of Dr. firmly locked round it. I talked to her soothingly regarding Ellist Cones, the well-known scientist, of Chicago. Dr. Coues her health. Black soon said that I must go home-I was

atmosphere,-my protecting sphere,-which the had drawn away from mel

I was extremely anxious now that Black should be roused out of her trance and be fully demesmerised. Mr. W., however, requested me to remain quiet a little while longer, as he did not like so soon to wake her up. He made her, by a roversed pass or two, relax my hand, and I retired to the window, where I sat looking out into the garden, feeling much dopressed mentally, and very cold and wretched physically. Of these sensations, of course, I said nothing. But Black was fully conscious of them; alm said: "The lady had much better go home—she is very unwell—she is ill I she is very cold?" Mr. W. then awoke Black, and walked home with me.

This net of disobedience to my spiritual guardians cost me very dear, although I had sought to not as I believed. in obedience to an injunction from a yet Higher Source, namely, to "love my neighbour as myself."

Black at that time was not alone in a very morbid state of physical health, but had on the day we paid our onlucky visit, passed through a terrible mental excitement regarding something painful connected with her own family; this, at the time, of course, being entirely unknown to Mr. W. Black's morbid condition, to a degree, had been conveyed by the memorie rapport established between us, over to me. The less of my protecting sloud of susircling nurn-"the pink cloud"-had weakened my power of

That night and more or less during the space of the ensuing three weeks, I felt at times overwhelmed with a vague-and apparently afterly conscious-sense of undefined misery; sold shudderings would seize upon une, and at times I was like one in an agreefit.

At night-or during the day if I closed my eyes, the spiritual sight was always open, but into the resim of pain and suffering, and I could not hanish from my oyes objects of distress, crowns of thorns dropping with blood, and other nictures of anguish. Also there involuntarily presented thomselves before my vision all manner of lostheous skin or internal discount My spiritual being wort incommatly, as it were, in the Garden of Getheemane. Many animals appeared to pass scross the field of internal vision, in troops and herds If alive, if dead presented on if marificed, slain and bloody. Thus especially were presented rabbits and doves. It would be impossible to note one-tenth of the objects thus beheld. Only those who have passed through similar experiences can comproband the distress or the unavailing desire felt to escape from those visions. To close the eye to untural objects of the asternal world was only to open, so to speak, the internal eye.

Gendually, however, the inner sight began to present objects of a less painful nature. Gradually order supervened in the character of these visions and the meaning of them as symbols of mental states and conditions made ovident to mit. . . . It was, however, fully six months before the baleful influence of this morbidly conditioned juvalid passed away from me, this being alone brought about by earnest prayer for spiritual help and strengthening and by every possible endeavour to preserve healthful physical and mental conditions in myself. It is singular to observe that during the course of fifteen months any person coming from the house of Mrs. H-t to ours would cause a return of the dreadful influence to myself. The aguish feeling would seize me, dread and horror of mind, a vague sense of approaching evil, and even at times I found myself walking with the languid step and sunk-in chest of a consumptive patient-altogether a physical languar entirely foreign to myself.

It was some time before we discovered that communication between the two houses brought recurrence of these symptoms. But so it was clearly.

The presence of Mr. W., whom we occasionally mw either at our own house or at the houses of friends, would also bring the same miserable sensations, though in lesser degree. Once at the house of a friend, where Mr. W. seated himself beside me for a chat at afternoon tea. I felt so utterly wrotched and cold that I mentioned it to him. saying I felt as wretched as when he memorised Black; and be then said that he could well believe this since he had been so long in the habit of mesmerising Black, and had also himself been suffering from the same cause.

December 26, 1885.

Wirm Vol. VII., The Theorophist changes its style of form and sover, being now much easier to handle and to preserve.

ANY theory, hypothesis, philosophy, seet, ereed, or institution that fears investigation, openly munifests its own error.

Ir is said that Commodore Vanderbilt's daughter, Mrs. Le Rau, inspired by the example of the donor of the Spiritual Temple, in Bestou, thinks of building one is New York.

Mr. W. Eggerray leaves Landon early in January for St. Petersburg and Moscow, where he may stay for one or two On his return he will probably visit Berlin, Handburg, Munich, and Vienna.

"THE GROSTLY NUMBER" of Once or Week has just made its appearance, and is full of excellently-written ghost stories, nony which are the actual personal experiences of the editor, Florence Marryat,

THE President of the London Spiritualist Alliance bogs to inform correspondents who may write to him respecting the Experimental Research Section of the Alliance that he will attend to all letters on his return to lown after the Christman va-cation with as little delay as possible.

A NEW addition to the literature of Spiritualism in America A New addition to the interstance of Spiritonism in America is announced, the title being "Human Imponderables. A Psychical Study." The book is written by Mr. J. D. Featherstonlaugh, and chiefly relates to experiments with Mrs. Maud Lord, an excellent medium for physical manifestations.

A NEW STUDY OF DOMME has recently been published under the title of "Jacob Böhme: His Life and Teschings, or Studies in Theorephy." The visions seen by this remarkable num apparently suffice for the Theorephiats to claim him as a other, but why should they not have been the results of dairroyant mediunuhip!

At the next convernations of the London Spiritualist Alliance a series of chalk drawings by Mr. J. G. Koulemans, representing various stages of the photomeras of materialiation, will be exhibited by Mr. John S. Farmer, together with other drawings of a kindred character in his permussion. If any of our friends have pictures of a similar scope, which they can place at the disposal of the President of the London Spiritualist Alliance for that occasion, we shall be giast if they will communicate with to at the carlinat opportunity, so that they may be entalogued for the occusion.

"SHALL I SAY YEST"-This is the somewhat curious title of a novolette written to illustrate the benefits secruing from spirit communion. The plot is a good one, but some of the conversation is rather weakly written. Notwithstanding this defect the story has a considerable interest, and we confer to not leaving it until we had finished its perusal. Spiritual phonomens are very naturally woven into the narrative, the incident of the interview between the heroism and her dead lower being exceedingly well written. "Paithful in death as in life," may be taken as the key-note of the story.

Mentusette.—Mediumship, elevated and true, is a noble office. It is an open charmed between a higher and clearer life and our own dan and staggling mortality. It should ever be used as a secred office and a noteron responsibility. A glorious work may thus be done in the world's redemption and growth. May God and the good angels help all our mediums! May they be wisely taught the laws of self-protection and self-help. May all exposed and demoralised ones be lifted out of their unhappy sorroundings and be taught to work only for the good and true. May all the channels become pure, that living waters may flow freely to the thirsty ones of surth!—Religis-Philosophical

RESTITUTION THROUGH A SPHIRT.—At the beginning of the civil war, two young men of Milan, Ohio, being about to join the army, called upon a young lady friend to say farewell. While talking, one asked for a glass of water. She left the room and procured it. After they left she missed a bracelet.
One of the young men fell in the war. The young lady married. Long after the incident of the bracelet, which had faded from her mind, she awoke one night to see before her the roung friend who fell in the war. "I have come," he seemed young friend who fell in the war. "to speak above the bracelet. It was I who took it. I have always regretted it. My sister has it. I handed it to her at once when I went home. If you ask her for it, at my request, ahe will restore it." He disappeared. Next day she went to the sister, told her the story, and ahe gladly handed it to her.

—The Daily Local, Sandasky, Ohio.

## TESTIMONY TO PSYCHICAL PHENOMENA.

The following is a list of eminent persons who, after personal investigation, have astisfied thouselves of the reality of some of the shemomena generally known as Psychical or Spiritualistic.

N.R.-An auterisk is prefixed to those who have exchanged belief for knowledge.

SCHENCE.-The Earl of Conviord and Balcarres, F.R.S., President R.A.S.; W. Crooken, Fellow and Gold Medallist of the Royal Society; C. Varley, F.R.S., C.E.; A. R. Wallace, the eminent Naturalist; W. F. Barrett, F.R.S.E., Professor of Physics in the Rayal College of Science, Dublin ; Dr. Lockhart Robertson ; \*Dr. J. Elliotson, F.R.S., sometime President of the Royal Medical and Chirurgical Society of London; "Professor de Morgan, sometime President of the Mathematical Society of London; "Dr. Wm. Gregory, F.R.S.E., sometime Professor of Chemistry in the University of Edinburgh; "Dr. Ashburner, "Mr. Rutter, "Dr. Herbert Mayo, P.R.S., &c., &c.

"Professor F. Zöllner, of Leipzig, author of "Transcendental Physics," Soc.; Professors G. T. Feeliner, Schellner, and J. H. Pichte, of Leipzig; Professor W. E. Weber, of Göttingen; Professor Hoffman, of Würzburg ; "Professor Perty, of Berne ; Professors Wagner and Bullerof, of Petersburg; Professors Hare and Mapos, of U.S.A.; Dr. Robert Prices, of Breslan; Mons. Camille Planmazion, Astronomer, &c., &c.

LITERATURE.-The Earl of Duaraven ; T. A. Trollope S. C. Hall; Gerald Massey; Captain E. Burton; "Professor Cassal, LL.D.; "Lord Brougham ; "Lord Lytton; "Lord Lyndhurst; "Archbishop Whately; "Dr. R. Chamborn, F.R.S.E.; \*W. M. Thackeray; "Nassau Senior; "George Thompson; "W. Howitt; "Serjeant Cox; "Mrs. Browning; Hon. Roden Nocl.

Bishop Clarke, Rhode Island, U.S.A. ; Darles Lyman, U.S.A.; Professor W. Denton; Professor Alex. Wilder; Profemor Hiraso Corson : Professor George Bush ; and twonty-four Judgus and ex-Judgus of the U.S. Courts; "Victor Bugo; Baron and Baroness von Vay; "W. Lloyd Garrison, U.S.A.; "Hon. R. Dale Owen, U.S.A.; "Hon. J. W. Edmonds, U.S.A.; "Epes Sargent; "Baron du Potet; "Count A. de Gasparin; "Baron L. de Guldenstübbe, &c., &c.

SOCIAL POSITION,-H. I. H. Nicholas, Duke of Leachtenberg; H. S. H. the Prince of Solus; H. S. H. Prince Albrecht of Solus; \*H. S. H. Prince Emile of Says, Wittgenstein; Hon. Alexander Almakof, Imperial Councillor of Russia; the Countries of Californiand Duchesse de Possar; the Hon. J. L. O'Sullivan, sometime Minister of U.S.A. at the Court of Lisbon | M. Favre-Clavairez, late Coasal-General of France at Tricoto; the late Emperors of Russia and "France: Presidents "Thiers and "Lincoln, &c., &c.

## WHAT IS SAID OF PSYCHICAL PHENOMENA.

J. H. Figwyz, The German Philosopher and Acthos.—
"Nothwithstanding my age (83) and my exemption from the controversion of the day, I feel it my duty to beer testimony to the great fact of Spiritualism. No one should keep silent."

Progression of Mongan, Presultant of the Mathematical Society of Lorizon.—"I am perfectly convinced that I have both seen and beart, in a manner which should make unbelief impossible, things called spiritual, which cannot be taken by a rational being in bu capable of explanation by imposture, coincidence, or mistake. So far I feel the ground firm under me."

Dr. ROSERT CHARRERS.—"I have for many years knows that these phenomena are real, as distinguished from imposture; and it is not of yesterday that I concluded they were calculated to explain much that has been doubtful in the past; and, when fully accepted, revolutionise the whole frame of human opinion on many important matters."—
Extract from a Letter to A. Russel Walloce.

PROFESSOR HARR, EMPRIPUS PROFESSOR OF CREMERTY IN THE UNIVERSITY OF PENNSTRVANIA.—" Far from abading my confidence in the inferences respecting the agencies of the spirits of deceased mortals, in the manifestations of which I have given an account in my work, I have, within the last nine months" (this was written in 1858, " had more striking evidences of that agency than those given in the work in constitue."

PROFESSOR CHALLIS, THE LATE PLUMBEAN PROFESSOR OF ANTRO-BONT AT CAMERIDEE.—"I have been unable to resist the large amount of testimony to such facts, which has come from many inde-pendent sources, and from a vast number of witnesses.

In short, the testimony has been so abundant and concentrations, that either the facts sound be admitted to be such as are reported, or the possibility of certifying facts by human testimony mount be given up."— Cierical Journal, June, 1862.

Provision Journal, June, 1862.

Provision Granory, F.R.S.E.—"The essential question is this. What are the proofs of the agency of departed spirits? Although I cannot say that I yet feel the sure and firm conviction on this point which I feel on some others, I am bound to say that the higher phenomena, recorded by so many truthful and honourable men, appear to me to render the spiritual hypothesis almost certain.

I believe that if I could myself see the higher phenomena alluded to I should be axissed, as are all those who have had the best means of judging of the truth of the spiritual theory."

Long Brocuran — "These is but one countier. I would ask the

Load Bactoran.—"There is but one question I would ask the public sether, Is the Spiritualism of this work foreign to our materialistic, the author incidents circumstances produce are found those who cultivate man's highest his family.

faculties; to these the author addresses himself. But even in the most cloudless skies of scepticism I see a rain-cloud, if it be no bigger than a man's hand; it is modern Spiritualism."—Proface by Lord Broughous to "The Book of Nature." By C. O. Groom Napier, F.C.S.

The Book of Nature." By C. O. Groom Aspier, F.C.S.

The Lownor Dialectrical Constitute reputed : "I. That sounds of a very varied character, apparently proceeding from articles of furniture, the floor and walls of the pocus—the vibrations accompanying which sounds are often distinctly perceptible to the touch—occus, without boing produced by anseular action or mechanism contrivates. 2. That movements of heavy bodies take place without mechanism contrivates of any kind, or adequate securion of muscular force by those present, and frequently without contact or connection with any person. 3. That these sounds and movements often occur at the time and in the manner asked for by persons present, and, by means of a simple code of signals answer questions and spell out coherent communications."

PROVESSOR BARRETT, F.R.S.E .- "I know and rejoice in the blee Provessor Barnerr, F.R.S.E.—"I know and rejoice in the blessing Spiritualism has been to my own faith, and to that of several dear friends of mine. Moreover, I cordially recognise the fact that in bereavement and deep distress numbers have been cheered and consoled by the hope that Spiritualism has set before them. . . So far from Materialism being true, I do not believe a single person has ever yet lived on this earth who has truly and heartily desired to know if an intelligent and personal existence be possible without our present bodity organism, and has ateadily set humself to solve this sourcean question with all the help to can gain from every searce.—I say I do not believe any such earnest scelers after truth has ever failed to obtain a clear and definite answer in the affirmative."

definite answer in the affirmative."

CASHLE FLANARIOS, THE FRENCH ASTRONOMER, AND MEMBER OF THE ACADEMIE PRANCADE.—"I' do not bestate to affirm my conviction, based on personal examination of the subject, that any eccentific man who declares the phenomena decominated 'magnetic,' commandabile,' is one who speaks without knowing what he is talking about; and also any mas accustomed, by his professional averations, to scientific observation—provided that his mind be not biased by pre-conceived opinions, sor his mental vision blinded by that opposite kind of illusion, unlargely can common in the learned twoff, which consists in imagining that the layer of Nature are already known to us, and that everything which appears to overation that initial of our present formular is impossible—may acquire a radical and absolute certainty of the reality of the facts allusted to."

Converts F. Vantey, F.R.S.—"Twenty-five years one I was a

ALTERN RUSSEL WALLACE, F.G.S .- "My position, therefore, i ALFRED RUSSE WALLACE, F.G.S.—"My position, therefore, i that the phenomena of Spiritualism in their entirety do not require further confirmation. They are proved, quite as well as any facts are proved in other sciences, and it is not denial or quibbling that can disprove any of them, but only fresh facts and accurate deduction-from those facts. When the opponents of Spiritualism can give a record of their researches approaching in duration and completeness to those of its advocates; and when they can discover and show in detail, either how the phenomena are produced or how the many same and able meabers referred to have been defuded into a coincident belief that they have witnessed them; and when they can prove the correctness of their theory by producing a like belief in a body of equally same and able unbelievers—then, and not till then, will it be necessary for Spiritualist to produce fresh confirmation of facts which are, and always have been, sufficiently real and Indisputable to estimy any houset and persevering inquirer."—Miractes and Modern Spiritualism.

Dr. LOCKHART ROBERTSON.—"The writer" (i.e., Dr.L. Robertson)

safficiently real and Indisputable to salisfy any house and persevering inquirer."—Mirecter and Modern Spiritualiza.

Dr. Lockhart Robentson.—"The writer" (i.e., Dr.L. Robertson) "can now so more doubt the physical manifestations of so-colled Spiritualism than he would any other fact, as, for example, the fall of the apple to the ground, of which his senses informed him. As stated above, there was no place or chance of any legerdemain, or frank, in these physical manifestations. He is aware, even from recent experience, of the impossibility of convincing anyone, by a mere narrative of events apparently so out of harmony with all our knowledge of the laws which govern the physical world, and he places these facts on record rather as an act of justice due to those whose similar statements he had elsewhere doubted and denied, than with either the desire or hope of convincing others. Yet he cannot doubt the ultimate recognition of facts of the truth of which he is so thoroughly convinced. Admit these physical manifestations, and a strange and wide world of rewards his opened to our inquiry. This field is new to the materialist mind of the last two conturies, which even in the writings of divines of the English Church, doubts and denies all spiritual manifestations, published in the Disalectical Society's Report on Spiritualism, p. 24.

NASSAU WILLIAM SENDE.—"No one can doubt that phenomena

in the Disloctical Society's Report on Spritteelism, p. 24.

Nabrau William Senior.—"No one can doubt that phenomena like these (Phrenology, Homosopathy, and Mesmerism) deserve to be observed, recorded, and arranged; and whether we call by the name of mesmerism, or by any other name, the science which proposes to do this, is a mere question of nonsentelature. Among those who profess this science there may be careless observers, prejudiced recorders, and rash systematisers; their errors and defects may impode the progress of knowledge, but they will not stop it. And we have no doubt that, before the end of this century, the wonders which perplex almost equally those who accept and those who reject modern mesmerism will be distributed into defined classes, and found subject to ascertained laws—in other words, will become the subjects of a science. These views will prepare us for the following statement, nade in the Spiritual Magazine, 1864, p. 336: "We have only to add, as a further tribute to the attainments and honours of Mr. Senior, that he was by long inquiry and experience a firm believer in spiritual power and manifestations. Mr. Home was his frequent guest, and Mr. Senior made no secret of his belief among his friends. He it was who recommended the publication, under initials, of one of the striking incidents there given, which happened to a near and dear member of this family."

3

## WHAT CONJURERS SAY ABOUT PSYCHICAL PHENOMENA.

Mediums, who are the instruments of an external agency, have, more than once, been confronted with conjurers who deceive by sleight of hand; and in the same manner that no man of science who has thoroughly and fairly investigated the phenomena has failed to become convinced of their reality, so no conjurer who has been confronted with the same facts has been able to explain their occurrence by prestidigitation. Houdin, Jacobs, Bellachini, Hermann, Kellar, and others have already confessed their powerlessness to produce under the same conditions what occurs without human intervention in the presence of a medium.

Testimony of Behert Hendin.

already confessed their powerlessness to produce under the same conditions what occurs without human intervention in the presence of a medium.

The Marquis Endes de Mirville published during the lifetime of Houdin two letters from the latter, in his "Mémoire addressé à MM. Iss membres de l'Académie des Sciences Morales et Politiques, sur un grand nombre de phénomènes merveilleux intéressant également la Religion, la Science, et les hommes du Monde," in which the conjurer confesses his inability to explain the phenomena he witnessed in the presence of Alexis, the clairvoyant. A circumstantial account is given of M. de Mirville's visit to Houdin for the purpose of engaging hum in this investigation, of the latter's confidence in his own ability to detect the trick, and of what took place at the séance, the conditions of which were entirely under Houdin's control. This account extends over twelve pages, and its accouncy is confirmed by Hondin in the first of the documents now translated:—

"Although very far from accepting the eulogies which M.—— is rood enough to bestow upon me, and especially insisting that I am not at all committed to opinious, either in favour of magnetism or against it, I can, severtheless, not refrain from declaring that the facts above reported are entirely correct (sont de la plus complite executionle), and that, the more I reflect upon them, the more impossible I find it to reak them enough those which belong to my art and profession.

"4th May, 1847.

A fortnight later, M. do Mirville received another letter, in which the following, referring to another séance, occurs:—

"I have, therefore, ruturned from this méance as astonished as it in possible to be, and persuaded that it is utterly impossible that chance a skill could ever produce effects as monalerful (tout à fait impossible that chance a skill could ever produce effects as monalerful (tout à fait impossible that chance e skill could ever produce effects as monalerful (tout à fait impossible that chance e skill could ever produce e

Hary Kellar, a distinguished professor of legerdemain, investigated the slate-writing phenomena which occurred in the presence of Mr. Eglinton, at Calcutta, in January, 1882, and on the 25th of that mouth he addressed a letter to the editor of the Indian Duily News, in which

he said:—
"In your issue of the 13th January I stated that I should be glad of an opportunity of participating in a scance with a view of giving an unbiassed opinion as to whether, in my capacity of a professional prestidigitator, I could give a natural explanation of effects said to be produced by spiritual aid.

"I am indebted to the courtesy of Mr. Eglinton, the Spiritualistic medium now in Calcutta, and of his bost, Mr. J. Meugens, for affording an the omnortunity I craved.

mo the opportunity I craved.

"It is needless to say I went as a sceptic, but I must own that I have come away utterly unable to explain, by any natural means, the phenomena that I witnessed on Tuesday evening. I will give a beief description of what took place."

After describing several successfu experiments, Mr. Kellar pro-

After describing several successful experiments, sar. Relaw proceeds:—
"In respect to the above manifestations, I can only say that I do not expect my account of them to gain general credence. Forty-eight hours cofore I should not have believed anyone who described such manifestations under similar circumstances. I still remain a sceptic as regards Spiritualism, but I repent my inability to explain or account for what must have been an intelligent force that produced the writing on the slate, which, if my senses are to be relied on, was in no way the result of trickery or sleight of hand."

On the 30th of the same month Mr. Kellar addressed another letter to the Intline Daily News, reporting some experiences of another kind with

On the 30th of the same month Mr. Kellar addressed another letter to the Indian Daily News, reporting some experiences of another kind with Mr. Eglinton, and regarding which he said:

"In conclusion, let me state that after a most stringent trial and strict scrutiny of these wenderful experiences I can arrive at no other casclusion than that there was no trace of trickery in any form; nor was there in the room any mechanism or machinery by which could be produced the phenomena which had taken place. The ordinary mode by which Maskelyne and other conjurers imitate levitation or the floating test could not possibly be done in the room in which we were assembled."

test could not possibly be done in the room in which we were assembled."

The Testimeny of Professor Jacoba.

Professor Jacoba, writing to the editor of Lickt, suchr Lickt, April 19th, 1881, in reference to phenomena which occurred in Paris through the Brothess Davenport, said:—

"Spite of the assertions, more or less trustworthy, of the French and English journalists, and spite of the foolish jealousies of ignorant conjurers, I feel it my duty to show up the bad faith of one party and the chicanery of the other. All that has been said or done adverse to these American mediums is absolutely untrustworthy. If we would rightly judge of a thing we must understand it, and neither the journalists nor the conjurers possessed the most elementary knowledge of the science that governs these phenomena. An a prestidigitator of repute, and a sincere Spiritualist, I offerm that the medianimic facts demonstrated by the two brothers were absolutely true, and belonged to the Spiritualistic order of things in every respect.

"Messes Robin and Robert Houdin, when attempting to imitate these said facts, never presented to the public anything beyond an infuntine and almost grotesque parody of the said phenomena, and it would be only ignorant and obstinate persons who could regard the questions seriously as set forth by these gentlemen. If (as I have every reason to hope) the psychical studies, to which I am applying myself at this time, succeed, I shall be able to establish clearly, and that by public demonstration, the immense line of demarcation which separates mediumistic phenomena from conjuring proper, and then equivocation will be no longer possible, and persons will have to yield to evidence, or deny through predetermination to deny.

"Following the data of the learned chemist and natural philosopher, Mr. W. Crookes, of London, I are now in a position to prove plainly, and by purely scientific methods, the existence of a 'psychic force' in mesmersm, and also the individuality of the spirit in 'spiritual manifestation.' I au

estimeny of Samuel Bellachini. Samuel Bellach 1: Court Conjurer at Berlin, made the following

Samuel Bellach 1 i Court Conjurer at Berlin, made the following declaration in Deccaser, 1877:—

"I hereby declare it to be a rash action to give decisive judgment upon the objective medial performance of the American medium, Mr. Henry Slade, after only one sitting and the observations so made. After I had, at the wish of several highly esteemed gentlemen of rank and position, and also for my own interest, tested the physical mediumship of Mr Slade, in a series of at tings by full daylight, as well as in the evening in his bedroom, I must, for the sake of truth, hereby certify that the phenomenal occurrences with Mr. Slade have been thoroughly examined by me with the minutest observation and investigation of his surroundings, including the table, and that I have not in the smallest degree found anything to be produced by means of prestidigitative manifestations, or by mechanical apparatus; and that any explanation of the experiments which took place under the circumstances and conditions then identify by any reference to prestidigitation is absolutely impossible. It must rest with such men of science as Crookes and Wallace, in London; Perty, in Berne; Butlerof, in St. Petersburg, to search for the explanation of this phenomenal power, and to prove its reality. I declare, moreover, the published opinions of hymen as to the 'How' of this subject to be premature, and, according to my view and experience, false and one-sided. This, my declaration, is signed and executed before a notary and wincesses.

"The delia December 2th 1877. (Signed) Savert Branching." notary and witnesses. "Berlin, December 6th, 1877.

(Signed) SAMURL BELLACHIST,"

## ADVICE TO INQUIRERS.

The Conduct of Circles.-By "M.A. (Oxon.)."

If you wish to see whether Spiritualism is really only Jugglery and imposture, try it by personal experiment.

If you can get an introduction to some experienced Spiritualist, on whose good faith you can rely, ask him for advice; and, if he is holding private circles, seek permission to attend one to see how to conduct scances, and what to expect.

There is, however, difficulty in obtaining access to private circles, and, in any case, you must rely chiefly on experiences in your own family circle, or amongst your own friends, all strangers being excluded. The bulk of Spiritualists have gained conviction thus.

Form a circle of from four to eight persons, half, or at least two, of negative, passive temperament, and preferably of the female sex, the rest of a more positive type.

Sit, positive and negative alternately, secure against disturbance, in subdued light, and in comfortable and unconstrained positions, round an uncovered table of convenient size. Place the palms of the hands flat upon its upper surface. The hands of each sitter need not touch those of his neighbour, though the practice is frequently adopted.

Do not concentrate attention too fixedly on the expected manifestations. Engage in cheerful but not frivolous conversation. Avoid dipute or argument. Scepticism has no deterrent effect, but a bitter spirit of opposition in a person of determined will may totally stop or decidedly impede manifestations. If conversation flags, music is a great help, if it be agreeable to all, and not of a kind to irritate the sensitive ear. Patience is essential, and it may be necessary to meet ten or twelve times, at short intervals, before anything occurs. If after war, An hour should be the limit of an unsuccessful scance.

The first indications of success usually are a cold breaze passing over the hands, with involuntary twitchings of the hands and arms of some of the sitters, and a sensation of throbbing in the table. These indications, at first so slight as to cause doubt as to their reality, will usually develo

at first so slight as to cause doubt as to their reality, will usually develop with more or less rapidity.

If the table moves, let your pressure be so gentle on its surface that you are sure you are not aiding its motions. After some time you will probably find that the movement will continue if your hands are held ever, but not in contact with, it. Do not, however, try this until the movement is assured, and be in no hurry to get messages.

When you think that the time has come, let some one take command of the circle and act as spokennan. Explain to the unseed Intelligence that an agreed code of signals is desirable, and ask that a tilt may be given as the slyshabet is slowly repeated at the several latters which form the word that the Intelligence window to spell. It is convenient to use a single tilt for No, three for Yes, and two to express doubt or uncertainty.

the word that the Intelligence wishes to spell. It is convenient to use a single tilt for No, three for Yes, and two to express doubt or uncertainty.

When a satisfactory communication has been established, ask if you are rightly placed, and if not, what order you should take. After this, ask who the Intelligence purports to be, which of the company is the medium, and such relevant questions. If confusion occurs, sacribe it to the difficulty that exists is directing the movements at first with exactitude. Patienco will remedy this, if there be a real desire on the part of the Intelligence to speak with you. If you only satisfy yourself at first that it is possible to speak with an Intelligence separate from that of any person present, you will have gained much.

The signals may take the form of raps. If so, use the same code of signals, and ask as the raps become clear that they may be made on the table, or in a part of the room where they are demonstrably not produced by any natural meson, but avoid any venations imposition of restrictions on froe communication. Let the Intelligence use its own means; if the attempt to communicate deserves your attention, it probably has something to say to you, and will resent being hampered by useless interference. It rests greatly with the sitters to make the manifestations elevating or frivolous and even tricky.

Should an attempt be made to entrance the medium, or to manifest by any violent methods, or by means of form manifestations, ask that the attempt may be deferred till you can secure the presence of some experienced Spiritualist. If this request is not heeded, discontinue the sitting. The process of developing a trance-medium is one that might disconcert an inexperienced inquirer. Increased light will check now manifestations.

Lastly. Try the results you get by the light of Reason. Maintain

disconcert an inexperienced inquirar. Increased light will check now manifestations.

Lastly. Try the results you get by the light of Reason. Maintain a level head and a clear judgment. Do not believe everything you are told, for though the great unseen world contains many a wise and discerning spirit, it also has in it the accumulation of human folly, vanity, and error; and this lies nearer to the surface than that which is wise and good. Distrust the free use of great names. Never for a moment abandon the use of your reason. Do not enter into a very solemn investigation in a spirit of idle curiosity or frivolity. Cultivate a reverent desire for what is pure, good and true. You will be repaid if you gain only a well-grounded conviction that there is a life after death, for which a pure and good life before death is the best and wisest preparation.
